Question 1/22

Next Question >>

What are two reasons why you would send an RFP to multiple vendors (Choose two.)

- [ ] **A.** to satisfy international law requiring a minimum of three vendors
- [ ] **B.** to eliminate vendors who cannot meet the requirements
- [ ] **C.** to compare competing proposals
- [ ] **D.** to warranty the process against fraud

Hide answers/explanations

Correct Answer: B,C

Question 2/22

<< Prev Question

Next Question >>

You are asked to provide a WAN design proposal for connecting together multiple customer sites. As part of your design, you want to use IPsec tunnels to ensure that traffic is private and secure. Which statement is true about the proposed solution?

- **A.** Packets that are passed through an IPsec tunnel are not encrypted.
- **B.** IPsec tunnels will require an MPLS infrastructure through the WAN.
- **C.** IPsec can require MTU modifications to accommodate the additional overhead.
- **D.** IPsec packets can be fragmented once encrypted.

Hide answers/explanations

Correct Answer: C

Question 3/22

<< Prev Question

Next Question >>

What is a feature provided by devices in the WAN aggregation site of a large enterprise WAN deployment?

- ○ **A.** DHCP
- ○ **B.** power redundancy
- ○ **C.** MACsec
- ○ **D.** Internet gateway

Hide answers/explanations

Correct Answer: D

Question 4/22

<< Prev Question Next Question >>

Why would you recommend Junos Space Security Director in a network design?

- **A.** It provides detection, isolation, and resolution of network faults and incidents.
- **B.** It simplifies Ethernet switch deployments and provides rapid operation of campus and data center networks.
- **C.** It provides the power to quickly design, provision, and deliver MPLS and other Ethernet services.
- **D.** It helps administrators to more quickly and intuitively manage all phases of a security policy life cycle.

Hide answers/explanations

Correct Answer: D

Question 5/22

<< Prev Question Next Question >>

You are asked to secure the routing engine of all Junos devices in your design. The design should not affect transit traffic.
Which action will accomplish this task?

- **A.** Use a firewall filter on a revenue port.
- **B.** Use a firewall filter on the loopback interface.
- **C.** Use a firewall filter on the fxp0 interfaces.
- **D.** Use a firewall filter on the management interface.

Hide answers/explanations

Correct Answer: B

Question 6/22

<< Prev Question Next Question >>

You are designing a solution to allow secure communication over the public Internet for a corporate WAN deployment. For business policy reasons, all branch-to-branch traffic must first pass through the corporate headquarters.
Which solution will work in this scenario?

- **A.** hub-and-spoke GRE VPN
- **B.** fill mesh IPsec VPN
- **C.** hub-and-spoke IPsec VPN
- **D.** Layer 3 VPN

Hide answers/explanations

Correct Answer: C

Question 7/22

<< Prev Question

Next Question >>

Which two statements are true regarding a Virtual Chassis? (Choose two.)

- [ ] **A.** A Virtual Chassis can be configured on mixed series and models.
- [ ] **B.** A Virtual Chassis supports up to 10 participating devices.
- [ ] **C.** A Virtual Chassis must be configured on the same series but not the same model.
- [ ] **D.** A Virtual Chassis supports only two participating devices.

Hide answers/explanations

Correct Answer: A,B

Question 8/22

<< Prev Question

Next Question >>

You are evaluating an existing network to determine requirements for a network upgrade. In this scenario, which statement is true?

- **A.** A network baseline identifies how many users are connected to the network.
- **B.** A network baseline identifies the type and level of traffic load on the network.
- **C.** A network baseline identifies traffic growth patterns across network devices.
- **D.** A network baseline identifies devices that do not have redundant components.

Hide answers/explanations

Correct Answer: B

Question 9/22

<< Prev Question | Next Question >>

Which three steps are part of business continuity planning? (Choose three.)

- [ ] **A.** Know your staff.
- [ ] **B.** Understand your tools.
- [ ] **C.** Test the plan.
- [ ] **D.** Assess the risks.
- [ ] **E.** Know your network.

Hide answers/explanations

Correct Answer: A,D,E

Question 10/22

<< Prev Question

Next Question >>

You are performing a risk assessment for a network design.
Which statement is true in this scenario?

- **A.** A network must be designed for an uptime of five nines.
- **B.** Some risks can be safely ignored.
- **C.** All identified risks must have a mitigation plan in place.
- **D.** The likelihood of a risk occurring should not be considered.

Hide answers/explanations

Correct Answer: B

Question 11/22

<< Prev Question | Next Question >>

Which two pieces of information should be included in an RFP response? (Choose two.)

- [ ] **A.** a list of contributing material including technical publications, training guides, and courseware used to build the proposed design
- [ ] **B.** design details including information about the devices, protocols, and technologies included in the proposed design
- [ ] **C.** a network topology including a high-level logical design as well as low-level physical design of the proposed network
- [ ] **D.** configuration details including proposed devices, protocols, and technologies included in the proposed design

Hide answers/explanations

Correct Answer: B,C

Question 12/22

<< Prev Question | Next Question >>

In a network design using the traditional tiered structure, which two tiers connect to untrusted domains?(Choose two.)

- [ ] **A.** core
- [ ] **B.** access
- [ ] **C.** aggregation
- [ ] **D.** WAN edge

Hide answers/explanations

Correct Answer: C,D

Question 13/22

<< Prev Question | Next Question >>

You are asked to propose a security solution that integrates with OpenStack, Kubernetes, and OpenShift.
Which Juniper Networks product will work in this scenario?

- **A.** SDSN
- **B.** Sky ATP
- **C.** JSA
- **D.** Contrail Security

Hide answers/explanations

Correct Answer: D

Question 14/22

<< Prev Question Next Question >>

You are in the process of developing a business continuity plan for your network design. You must analyze data about weather patterns, maintenance history pertaining to leased buildings, and the frequency of power failures.
For which purpose would you collect this information?

- **A.** redundancy
- **B.** risk assessment
- **C.** high availability
- **D.** disaster recovery

Hide answers/explanations

Correct Answer: B

Question 15/22

<< Prev Question | Next Question >>

Which three questions should be asked when performing a business impact analysis? (Choose three.)

- [ ] **A.** Which functions and services are critical to the company's survival?
- [ ] **B.** How long could an outage be sustained?
- [ ] **C.** How many redundant data paths are there?
- [ ] **D.** What is the cost of both partial and full outages?
- [ ] **E.** What is the replacement cost of the core switches?

Hide answers/explanations

Correct Answer: A,B,D

Question 16/22

<< Prev Question Next Question >>

You are designing a network management strategy for a new network. The requirements for the management of network devices are shown below:
- Administrator passwords must have an expiration date.
- Administrators must be assigned role-specific privileges on each device.
In this scenario, which statement is true?

- **A.** Local authentication must be used on each device.
- **B.** A centralized AAA system must be used for authentication.
- **C.** Each user must have a unique login account.
- **D.** All devices must be configured with the same privilege levels.

Hide answers/explanations

Correct Answer: B

Question 17/22

<< Prev Question | Next Question >>

What are two main data center profile solution templates? (Choose two.)

- [ ] **A.** adaptive
- [ ] **B.** high-performance computing
- [ ] **C.** transitional
- [ ] **D.** enterprise IT

Hide answers/explanations

Correct Answer: B,D

Question 18/22

<< Prev Question | Next Question >>

What information is included in an RFP issuance?

- **A.** COGS pricing
- **B.** product positioning
- **C.** product features
- **D.** design requirements

Hide answers/explanations

Correct Answer: D

Question 19/22

<< Prev Question | Next Question >>

What are three components of an RFP? (Choose three.)

- [ ] **A.** a list of available IP addresses within their current IP allocation
- [ ] **B.** general information about the existing network environment
- [ ] **C.** the types of solutions that the design must include
- [ ] **D.** a list of design requirements
- [ ] **E.** a list of devices to meet the design requirements

Hide answers/explanations

Correct Answer: B,C,D

Question 20/22

<< Prev Question

Next Question >>

What does the network MTTR measure?

- **A.** the length of time to build the network
- **B.** the length of time it takes to design the network
- **C.** the length of time it takes to reboot the network devices
- **D.** the length of time to repair the network

Hide answers/explanations

Correct Answer: D

Question 21/22

<< Prev Question Next Question >>

What are two valid reasons to implement a network management solution within your network infrastructure? (Choose two.)

- [ ] **A.** to eliminate the need for network planning
- [ ] **B.** to reduce network operating expenditures
- [ ] **C.** to reduce network capital expenditures
- [ ] **D.** to increase network visibility

Hide answers/explanations

Correct Answer: B,D

Question 22/22

<< Prev Question

Which tool in a Juniper Networks SDSN solution is responsible for telling Juniper and third-party network switches to block a threat in real time?

- **A.** Juniper Secure Analytics
- **B.** SRX Series device
- **C.** Policy Enforcer
- **D.** Sky ATP

Hide answers/explanations

Correct Answer: D
