GST203: INTRODUCTION TO PHILOSOPHY AND LOGIC

_____view is refuted by exposing the inconsistencies and contradictions involved in accepting it as true.
Prima facie

_____is often used to characterize a person or a group of persons' attitude to life.
philosophy

_____is the general pattern or the habitual way of response of the person to events
Attitude

According to the_____, everything is real when it tends to fruitful activity and results
pragmatic method

_____urges that all knowledge obtained by the senses is of what is already existent outside themselves and that reason has its function in carefully judging the nature of the perceptive material provided to it by the senses
Empiricism

The laws of reason, according to empiricism, are copies of and controlled by knowledge which is _____
Posteriori

Kant's critical method was taken much further and completed by Hegel in a staggering system of idealism built by means of what he termed the_____
dialectical method

_____sees Logic "as the science that appraises reasoning as correct or incorrect
Nancy

_____is a reflective study that provides the canons for judging and evaluation of correctReasoning
Logic

_____- is also the study of the principles of reasoning especially of the structure of proposition as distinguished from their content and of method and validity in deductive reasoning
Logic

logic as a discipline derives from the Greek word *Logos,* which means _____
Reasoned discourse

Argument can be divided into two namely_____
premise(s) and conclusion

_____is also known as reason or reasons for the conclusion
The premise(s)

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

_____is the claim that is been supported by the reasons
Conclusion

There are_____forms of arguments
Two(Simple argument and complex argument)

_____is one that contains one, two or three idea
simple argument

there are basically_____types of argument
two *(Deductive* argument and *Inductive* argument)

Episteme which means_____
knowledge

_____is the study or the science of knowledge.
Epistemology

_____is the branch of philosophy which investigates the scope, source and limitations of human knowledge
Epistemology

_____is the branch of philosophy that studies reality in its most comprehensive scope and fundamental principles.
Metaphysics

_____studies the totality of things in the universe both the possible and the real
Metaphysics

For_____, it is the knowledge of things which lies beyond this sense experience
Rene Descartes

The word metaphysics is derived from the Greek word_____
meta-ta-physika

meta-ta-physika means_____
after the physics

The word meta-ta-physika first used by _____
Andronicus of Rhodes

_____means that which is beyond the 'physical eye'
Metaphysics

_____known as "the branch of philosophy which deals with the morality of human actions in society
Ethics

_____was the first to confess that "the only thing I know is that I know nothing".
Socrates

_____is also referred to as the science of human conduct
ethnics

ethnics is divided into_____,_____and _____
descriptive, prescriptive or **normative,** and **meta-ethics**

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

the view of_____is to examine the moral views held by human beings or the society and to confirm whether these views are universal or not
descriptive ethics

_____is to prescribed what ought to be both for humans and society. In other words, it prescribes that criteria for human actions properly be judged as morally good or bad.
Normative or Prescriptive Ethics

_____is the part of ethics that deals with the logic and language of ethical concepts and terms.
Metaethnics

There are also_____steps procedures in any scientific inquiry Six(**observation, inductive generalization, hypothesis, attempted verification ofhypothesis, proof or disproof and knowledge)**

_____is a school of thought in epistemology which holds that human beings canacquire knowledge of reality using our minds alone
Rationalism

The sources of knowledge includes_____
(a) Reason, (b) Sense experience (c) Authority (d) Intuition (e) Revelation/faith and (f) Mystical experience

_____is usually considered the first proper philosopher
Thales of Miletus

_____believed that all things are composed of material entity
Materialists

_____devloped the theory of condensation and refraction
Anaximenes

The destruction of the city of Miletus by the Persian was in_____
494BC

_____asserted that **Nothing is static, everything is in a state of flux**
Heraclitus

_____argued that everything that exists is permanent, indestructible and unchanging
Parmenedes

_____was a student of Parmenedes, and is best known for his famous paradoxes of motion
Zeno of Elea

_____combined their ideas into the theory of the **four classical elements** (earth, air, fire and water),
Empedocles and Democritus

____developed the extremely influential idea of Atomism
Democritus

____theory simply states that all of reality is composed of tiny, indivisible and indestructible building blocks known as atoms
atomism

CALEBIOS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

_____led a rather bizarre religious sect and essentially believed that all of reality was governed by numbers
Pythagoras

_____developed a system of critical reasoning to work out how to live properly and to tell the difference between right and wrong
Pre-Socratic philosophers

_____developed doctrines such as Platonic Realism, Essentialism and Idealism
Plato

This idea of Plato is known as _____
Platonic Realism

_____identified the four levels of knowledge namely imagining, belief, thinking and perfect intelligence
Plato

____also identified the soul as having three parts namely, reason, spirit and Appetite
Plato

Aristotle was engaged in a system of logic called_____
Deductive Logic

_____is a system of logic where a conclusion, or synthesis, is inferred from two other premises, the thesis and antithesis
Syllogism

_____group held a relativistic view on knowledge
Sophism

_____believe that there is no absolute truth and two points of view can be acceptable at the same time
Sophism

_____group rejected all conventional desires for health, wealth, power and fame, and advocated a life free from all possessions and property as the way to achieving Virtue
Cynicism

Skepticism is also known as _____
Pyrrhonism

_____group was named after its founder Epicurus, whose main goal was to attain happiness and tranquillity through leading a simple, moderate life, the cultivation of friendships and the limiting of desire
Epicureanism

___are of the view that pleasure is the most important pursuit of mankind, and that we should always act so as to maximize our own pleasure.
Hedonists

_____theory was developed by Zeno of Citium
Stoicism

Medieval/Middle Age happens to be in around _____
11th Century

_____is one of the great Islamic philosophers of the Medieval period

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

Avicenna

_____introduced the concept of the "tabula rasa" (the idea that humans are born with no innate or built-in mental content).
Avicenna

_____is another Islamic philosopher whose translations and commentaries on Aristotle had a profound impact on the Scholastic movement in Europe
Averroes

the Medieval Christian philosophers were all part of a movement called_____which tried to combine Logic, Metaphysics, Epistemology and Semantics
Scholasticism

___- was the first philosopher who introduced the problem of evil in the world of utmost important.
St. Augustine

____hailed from Tagaste in North Africa
St. Augustine

_____is best known as the originator of the Ontological Argument for the existence of God by abstract reasoning alone
St. Augustine

_____is also known for his five rational proofs for the existence of God, and his definition of the cardinal virtues and the theological virtues.
St Thomas Aquinas

Abelard

_____rejected the distinction between essence and existence that Aquinas had insisted on
Scotus

Ockham introduced the important methodological principle known as _____
Ockham's Razor

the revival of classical civilization and learning in the 15th and 16th Century known as the _____
Renaissance

_____is the belief that humans can solve their own problems through reliance on reason and the scientific method) and a new sense of critical inquiry.
Humanism

____age is classified as the period of revival of classical civilization and learning, which occurred in the 15th and 16th Century
Renaissance

_____age marked by a movement away from religion and medieval Scholasticism and towards Humanism
Renaissance

_____attacked many of the traditions of the Catholic Church and popular superstitions, and became the intellectual father of the European Reformation
Erasmus

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

____was known for his acclaimed cynical and devious Political Philosophy.
Niccolo Machiavelli

____was a Christian Humanist whose book *"Utopia"* influenced generations of politicians and planners and even the early development of Socialist ideas.
Francis Bacon

____belief is that truth requires evidence from the real world.
Francis Bacon

the Age of Reason was in the_____
17th Century

the Age of Enlightenment was in the _____
18th Century

_____ages recorded serious advances in science, the growth of religious tolerance and the rise of liberalism.
17th and 18th centuries

_____is the belief that all knowledge arises from intellectual and deductive reason, rather than from the senses
rationalism

_____is which represent the belief that the origin of all knowledge is sense experience.
Empiricism

____was the first figure in the loose movement known as Rationalism
Rene Descartes

_____believed that absolutely everything (even human behaviour) occurs through the operation of necessity, leaving absolutely no room for free will and spontaneity
Baruch Spinoza

the real world is actually composed of eternal, non-material and mutually-independent elements he called _____
monads

According to_____, the real world is actually composed of eternal, non-material and mutually-independent elements he called **monads**, and the material world that we see and touch is actually just phenomena
Leibniz's theory

_____also saw this as overcoming the problematic interaction between mind and matter arising in Descartes' system
Leibniz

_____was a follower of Descartes in that he believed that humans attain knowledge through **ideas** or immaterial representations in the mind
Nicolas Malebranche

_____argued that all ideas actually exist only in God, and that God was the only active power
Nicolas Malebranche

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

_____argued that all of our ideas, whether simple or complex, are ultimately derived from experience, so that the knowledge of which we are capable is therefore severely limited both in its scope and in its certainty
John Locke

_____believed that the real inner natures of things derive from what he called their primary qualities which we can never experience and so never know
John Locke

_____argued that, although we may form beliefs and make inductive inferences about things outside our experience
Hume

_____stressed the importance of moderation, and his work contains elements of both Conservatism and Liberalism.
Hume

_____- described in his famous book *"Leviathan"* how the natural state of mankind was brute-like and poor, and how the modern state was a kind of "social contract"
Thomas Hobbes

_____is referred to the process whereby individuals deliberately give up their natural rights for the sake of protection by the state
Contractarianism

___is a confirmed Fideist who opposed both Rationalism and Empiricism as being insufficient for determining major truths
Blaise Pascal

_____is who was considered as one of the founding fathers of modern Conservatism and Liberalism,
Edmund Burke

_____also produced perhaps the first serious defence of Anarchism.
Edmund Burke

____was a German philosopher who appeared towards the end of the Age of Enlightenment
Immanuel Kant

____sought to move philosophy beyond the debate between Rationalism and Empiricism and he attempted to combine those two apparently contradictory doctrines into one overarching system
Immanuel Kant

According to_____, Empiricism and Rationalism could be combined
Kant

Our senses can only tell us about the appearance of a thing called _____
phenomenon

_____made a great contribution to Ethics with his theory of the **Categorical Imperative Kant**

_____theory simply state that we should "act only in such a way that we would want our actions to become a **universal law**, applicable to everyone in a similar situation
Categorical Imperative

CONCOURS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

_____theory is also interpreted as Moral Universalism
Categorical Imperative

The greatest and most influential of the German Idealists was
Georg Hegel

the Contemporary age began in the _____
19th Century

_____was founded by the social reformer, Jeremy Bentham and waspopularized by his even more radical protégé
John Stuart Mill

_____is kind of approach to Ethics that stresses an action's outcome or the consequence of an action
Utilitarianism

The most popular American movement of the late 19th Century was_____
Pragmatism

Pragmatism was initiated by _____
C.S Peirce

Pragmatism was developed and popularized by _____
William James and **John Dewey**

_____is based on Peirce's "pragmatic maxim", that the meaning of any concept is really just the same as its operational or practical consequences
theory of Pragmatism

European philosophy was not limited to the German Idealists in the_____
Contemporary period

_____saw this as the final phase in the evolution of humanity, and even constructed a non-theistic, pseudo-mystical "positive religion" around the idea
Auguste Comte

Vienna Circle came in in the early _____
20th Century

Tractatus was published in _____
1921

____was the picture theory of meaning, which asserted that 'thoughts', as expressed in language, picture the facts of the world, and that the structure of language is also determined by the structure of reality **Tractatus**

_____is which simply express the mindset that philosophy should apply 'logical techniques' and be consistent with modern science
Analytic Philosophy

_____is which in very general terms, rejects Scientism and tend towards Historicism
Continental Philosophy

An important idea that influenced the Analytic Philosophy tradition wasthe_____
Logicism

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

_____as developed during the late 19th Century by Gottlob Frege
Logicism

_____attempt to show that some, or even all, of mathematics can be reduced to Logic
Logicism

_____work was mainly in Philosophy of Language and the theory of Logical Atomism.
Russell's

_____developed a metaphysical approach known as Process Philosophy
Whitehead

____was the founder of Phenomenology
Edmund Husserl

three main philosophical schools dominated Continental Philosophy in the second half of the 20th Century wich is _____
Structuralism, Post-Structuralism and Post-Modernism

___is the first school is the broad belief that all human activity and its products are constructed and not natural, and that everything has meaning only through the language system in which we operate **Structuralism**

_____is the second school dominated by continental philosophy and it's a reaction of the first shool called Structuralism and it stresses the culture and society of the reader over that of the Author **Post- Structuralism**

_____is the third school dominated by continental philosophy that is an even less welldefinedfield, marked by a kind of "pick'n'mix" openness to a variety of different meanings and authorities from unexpected places, as well as a willingness to borrow unashamedly from previous movements or traditions
Post-Modernism

Western civilization emanates from _____
Greece

_____is a critical reflection on African leaderships in the administration of their duties towards their citizens
African philosophy

philosophy functions on_____main attributes in a society
three(Culture, Civilization and Language)

_____used to record the beliefs found in African Cultures
Ethno-philosophy

_____argued in The Bantu Philosophy that the metaphysical categories of the Bantu people are reflected in their linguistic categories
Placide Tempels

Philosophical sagacity is also known as _____
Sage philosophy

_____is a sort of individualist version of ethno-philosophy, in which one records the beliefs of certain special members of a community.

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

Sage philosophy

According to_____, Sage philosophy is the expressed thoughts of wise men and women in any given community and is a way of thinking and explaining the world that fluctuates between popular wisdom and dialectic wisdom, an expounded wisdom and a rational thought of some given individuals within a community.
Odera Oruka

_____is usually identified as that produced by African philosophers trained in the Western philosophical tradition, that embraces a universal view of the methods and concerns of philosophy
Professional philosophy

_____is a philosophical current which insists that philosophy in Africa should be hermeneutic in nature.
Hermeneutic Philosophy

_____is a theory and method of interpretation, especially, the interpretation of philosophical texts
Hermeneutics

_____recognized that there are some African literary scholars whose writings reflects philosophical issues in their essays
Literary and Artistic philosophers

The Historical Trend was initiated by
Oguejiofor

_____contends that the idea of philosophy has been in existence in Africa even before the development of the Greek philosophy
Oguejiofor

the Egyptian philosophy on Greek philosophy was in ways namely_____
two

Greek philosophers like Pythagoras, Aristotle and some others were trained in_____
Egypt.

Directive function of language is also known as_____function
Evocative

Complete this argument (which moves from general proposition to a particular proposition as the conclusion): "All Senators are liars, Tunde Bakare is a Senator, therefore,_____"
Tuned Bakare is a liar

According to the law of_____, everything must choose to be either "A" or not "A"
Excluded middle

The definition of logic as the science of laws of thought implies a mutual relationship between logic and ___
Language

The weakness or strength of an inductive argument depends on the degree of_____contained in the conclusion
Evidence

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

The argument: "Janet is a Muslim, all Muslims are traders, therefore Janet is a trader" is valid but _____

Unsound

Complete this valid but unsound deductive argument: "All GST 203 Students are brilliant, the Vice President of Nigeria is a GST 203 Student, therefore_____"

The Vice President of Nigeria is brilliant

Complete this sound deductive argument: "Lagos is in Nigeria, Nigeria is in Africa, therefore_____."

Lagos is in Africa

For a____, the role of reason is basically one of interpreting and defending the dogma derived from sources whose authority and truth is dependent on faith.

Religionist

The field of research directed towards obtaining further knowledge of nature is called_____.

Science

The branch of philosophy concerned with the morality of human action is called_____.

Ethics

_____enables philosophers to make their arguments well stated and persuasive more than other people do.

Logic

The 'Dialectical method' of Hegel moves from thesis to_____and synthesis.

Anti-thesis

In Greek language, the word Sophia means_____.

Wisdom

The result of the philosophical doctrine, which sees knowledge as exclusively depending on sense experience is known as_____.

Master Scientist

In the Under-labourer conception, philosophy characterises a person's or group of persons_____.

Attitude to life

"All politicians are liars" is an example of_____proposition.

Universal affirmative

___is a form of definition that expresses the meaning of a word based on available theories in specific discipline.

Theoretical definition

"You don't know any of the accused persons, do you?" is an example of_____fallacy.

Leading question

FALCOLIS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

"My lord, if you send me to prison, my seven children will suffer, there will be no one to take care of my sick mother and my father will die of heart attack." is an example of_____fallacy
Appeal to Pity

"I look out at you all, and I tell you, I am proud to be here. Proud to belong to a party that stands for what is good for Nigeria. Proud to cast my lot with the kind of people who make this nation great. Proud to stand with men and women who can get our nation back on its feet. Yes, there are those who criticize us, as weak and insensitive. But when I look at you hard-working people, I know we are right, and the
critics are wrong." This is an example of_____fallacy
Appeal to Popular feeling

____is another word for recursive definition.
Induction

In the concept of 'Definition' that which is doing the defining is referred to as_____.
Definien

Ethno-Philosophy sees philosophy as an item of_____property rather than an activity of the individual
Communal

_____developed the theory of 'condensation and refraction' to explain the original stuff from which all things are made.
Anaximenes

"Segun is a boy" is an example of_____proposition
Particular affirmative

To____everything that exists is permanent, indestructible and unchanging.
Parmenides

A 'lexical definition' is identical with a_____definition of words.
Dictionary

In the currents of African philosophy,_____is a sort of individualist version of Ethno-Philosophy, in which one records the belief of certain special members of the community.
Sage philosophy

_____proposed the idea that the sources of all things must be a neutral element, different from all the elements we know.
Anaximander

The establishment of the world as being made up of a single underlying item or substance is referred to as _____
Monism

____is the branch of philosophy that refers to the study of the fundamental principles of the theory of education as distinguished from the science or art of education.

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

Philosophy of education

Socratic method

___is the name of the Greek philosopher and mathematician who likened philosophers to spectators at the "Ancient Games".
Pythagoras

____contrasted true lover of wisdom with those who merely parade themselves as lovers of wisdom when in actual fact they are mere lovers of words.
Socrates

Who first introduced the concept of "Tabula rasa"?
Avicenna

The belief that 'Virtue' is a kind of knowledge that we need to in order to reach the ultimate good is called
Eudemonism

The Renaissance age was marked by the movement away from religion and medieval scholasticism to
Humanism

"Ockham Razor", the methodological principle which states that "one should not multiply arguments beyond necessary" was developed by
Ockham

All the following belong to the same AGE of philosophy EXCEPT
Heidegger

What was Descartes' philosophical idea that set the agenda for Mind and Body problem?
Cartesian Dualism

The identification of the soul as having three parts namely Reason, Spirit and Appetite was done by
Plato

Who used the theory of Form to develop and explain epistemology?
Plato

Who among the following is NOT an ancient philosopher?
Baruch De Spinoza

Fallacy of "Begging the question" is also known as
Petitopricipii

The kind of definition which describes a special brand of stipulative and précising definition is known as
Theoretical definition

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

'Evidence' or 'Reason' in logic is also known as
Premise

The critical thinking of Africans on their experience of reality is called
African philosophy

In the Medieval age, philosophy was subservient to
Religion

The Ontological argument for the existence of God was developed by
St Anslem

The concept of "Methodic doubt" was part of the philosophies of
Rene Descartes

Utilitarian ethicists are also known as
Consequentialists

The idea that there is no absolute truth and that two point of views can be accepted at the same time is credited to
Sophism

What type of argument is that in which the conclusion is based on probability?
Inductive argument

The founder of 'Scepticism' is called
Pyrroh

One value of philosophy is that it enables a person to develop the habit of
Reflection

The following are members of the age of delivery of philosophy EXCEPT
Ockham

The scientist's main business is to explain
Natural phenomena

The word 'Epistemology' means
Theory of knowledge

: The argument that consists of as many arguments as possible with so many premise(s) and conclusion(s) is
A complex argument

Who is the proponent of 'Transcendental' method of philosophy?
Immanuel Kant

CALEB UNIVERSITY EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

2020_1 First semester use only

Socrates

____branch of philosophy is regrded as theory of knowledge
Epistemology

Aristotle named his book that deals with nature _____
Physics

____is regrded as the study of first principles
Metaphysics

An argument that rests on probability is called _____
inductive argument

Draw the conclusion of this argument: All lecturers will go to heaven; DrUthman is a lecturer; therefore___
DrUthman will go to heaven

Deductive argument move from_____to ____
general to particular

Arguments are either deductive or _____
Inductive

In standard argument conclusion is infered from
Premises

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

The fallacy that misrepresents a fact, and then goes ahead to attack that misrepresentation is called _____ fallacy
straw man

If you see any lecturer supporting the current administration, that person has been paid heavily." This is an example of_____fallacy
ad hominem

In informal fallacies_____does not render an argument fallacious
at least one premise is false

Errors in reasoning are called _____
Fallacies

____is not among Haliday's function of language
commissive

If you have ever heard of the book; "How to do things with words", kindly identify_____as the author
J. L. Austin

The abbreviation, L. A. D. means _
Language Acquisition Device

It shall be well with you," the pastor thundered to the congregation._____function of language is at play here
declarative function

Jamiu raised the veil that covered the face of his new bride, "I will be with you till the end of my life."
____is the function of language expressed here
commissive function

I am writing my TMA 3 of GST203."_____function of language is expressed here
informative function

_____is a function of language
expressive function

One of the values of philosophy is that it helps to develop the habit of _____
Ans: Reflection

"A is A is an example of_____law of logic
Ans: Identity

____fallacies occurs when the premises of an argument makes the conclusion to be doubted
Ans: Relevance

. The sole purpose of language under directive function is toproduce_____
Ans: Action

"Definiens is a term that refers to _____
Ans: That Which is doing the defining

_____is a definition that is identical with the dictionary definition

CHOICE US EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

Ans: Lexical

From your understanding, philosophy lends itset many_____
Ans: Interpretations

The type of argument that proceeds from particular to the general is called _
inductive argument

____is the middle term of the following syllogism: All Kanuris live in the North East. Galadima is a Kanuri. Therefore, Galadima lives in the North East
Kanuri

All Nigerians are rich; Dr Eric Omazu is a Nigerian; Therefore, Dr Eric Omazu is rich
Dr Eric Omazu is a Nigerian

All students cheat in exams; I am a student; Therefore, I cheat in exams is the major premise of this statement
All students cheat in exams

The NOUN vice-chancellor is good" The predicate term of the proposition is
good

An argument that contains three propositions is called_____
Syllogism

___is not a conclusion indicator
Therefore

Evidence for holding a conclusion is called _____
Premise

___is not a logical sentence
Shut up

Categorical syllogism asserts or deny_____between classes
Relationship

I am having my girlfriend for dinner," is a fallacy of ambiguity because
it coveys more than one meaning

The type of logic that deals with basic operation of truth values is known as_____logic
Ans: Boolean

Anaximander primary source of all things is describe as _____
Ans: Boundless

The founder of scepticism is called_____
Ans: Pyrroh

Scientific inquiry has_____steps procedure which cannot be avoided
Ans: 6

The use of language to arouse feelings or emotion which could be approved or disapproved shows that language performs_____function

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

Ans: Expressive

Every categorical syllogism contains _
three terms

____is the branch of ethics concerned with logic of ethical arguments
meta ethics

The Greek word for knowledge is _____
Episteme

A is A" expresses_____law of thought
Identity

Teachers are good. Adamu is a teacher. Therefore, Adamu is good._____is the major term of this categorical syllogism
Adamu

The letter "P" in categorical syllogism represents _____
Major term

The terms of a categorical syllogism does not include _____
inclusive term

____is not a characteristics of a syllogism
Has independent conclusion

All students are good" is an example of _____
univeral positive proposition

____and____are two types of affirm
univeral and particular

____type of definition has truth value
Lexical definition

My car is heavy. Therefore, the side mirrors to my car are heavy. This is an example of_____fallacy
fallacy of division

The scientist main business is the explaining of_____phenomenon
Ans: Natural

___is the immediacy of apprehension
Ans: Intuition

. In the medieval age, philosophy was subservient to _____
Ans: Religion

The informative function of language shows that language is use to_____information
Ans: correct

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

The art of attributing qualities of part of a whole to the whole is refered to as
fallacy of composition

"Let's eat grandma," is an example of_____fallacy
fallacy of amphiboly

____is not an example of fallacy of ambiguity
fallacy of pity

We are going to deal with anyone who fails to vote MrAjayi in the upcoming election." This is an example of_____fallacy
ad bacculum

"Pastor, you are advising me against armed robbery, were you not the one caught with Ogbuefi's wife?" This is an example of _____
tuquoque ad hominem

Etymologically, the word 'logic' is derived from the Greek word_____
Logike

_____was the first ancient Greek philosopher that developed some logical principles, and these are the principle of identity and the principle of non-contradiction
Parmenides

_____is the act by which the mind forms the concept of something without affirming or denying anything about it
Simple apprehension

_____also known as the act by which the mind passes from one, two or more judgments to a further judgment distinct from the preceding ones but implicitly contained in them
Reasoning and Argument

_____is the study of inference with purely formal content, where that content is made explicit.
Formal Logic

_____is often used as a synonym for symbolic logic. It is usually described as the logic of symbols and implication
Formal logic

____is the study of natural language arguments
Informal Logic

____refers to two important areas of research and they are the application of the techniques of formal logic to mathematics and mathematical reasoning
Mathematical Logic

_____type of logic deals with the basic operations of truth values
Boolean logic

___is concerned with inferential reasoning that follows necessarily from given premises.
Deductive logic

____is the opposite of deductive logic
Inductive Logic

CALEB EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

____is a logical process where a reliable generalization from observations is derived.
Inductive Logic

_____form of logic is concerned with testing the truth-value validity of propositions through logical rules and principles.
Prepositional Logic

_____simply says that truth values are not limited to truth or falsity
Fuzzy Logic

_____deals with the phenomenon that sub-parts of a sentence may have their semantics modified by special verbs or modal particles
Modal logic

___is the logic of knowledge and belief. It focuses on propositional knowledge and provides insight into the properties of individual knowers which has provided a means to model complicated scenarios involving groups of knowers and has improved our understanding of the dynamics of inquiry.
Epistemic Logic

_____type of logic directly involves topics of considerable practical significance such as morality, law, social and business organizations and security system
Deontic Logic

whenever a sentence expresses a statement without question or command it can also be called_____
logical statement

_____is known as evidence or reason.
Premise

____refers to that proposition or statement, within an argument, which provides support for or grounds for asserting the conclusion of that argument.
Premise

____are words and expression that indicate the premises within an argument.
Premise – Indicators

some expressions and words that function to indicate the conclusion within a passage. These are generally called_____
CONCLUSION –INDICATORS

_____is the process by which one proposition is arrived at and affirmed based on one or more other propositions accepted as the starting point of the process
an inference

_____is a group of propositions that can be structured into two parts that ispremise(s)', which is also known as 'reason' and 'conclusion' which can also be known as 'claim'.
An argument

An argument is said to be_____when the conclusion of that argument is derived from or follows from the premises
valid

in a_____, it is necessary that if the premises are true, then the conclusion is true
valid argument

All Americans are proud Peter is an American Therefore, peter is proud is an example of a _____

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

valid argument

_____is an argument that contains and must contain three propositions, two of which are called the premises and one the conclusion.
Syllogism

There are_____parts of Syllogism
Three(Major, minor and middle)

the premise containing the major of the syllogism is referred to as the_____
major premise

_____as that kind of argument in which the premises do not only support but also guarantee the conclusion
Deductive Argument

A deductive argument is said to be valid if and only if _____
(a) the premises imply the conclusion or (b) the premises entail the conclusion; or (c) the conclusion follows from the premises; or (d) the premises necessitate the conclusion; or(e) The conclusion can be inferred from the premises

an_____is one that the premises do not support the conclusion
invalid deductive argument

_____used to indicate the level and strength of evidence or data used as premises and the degree of certainty contained
Weak and strong inductive arguments

____are only used to qualify a valid (deductive) argument. In point of facts, all inductive arguments are unsound
Sound and Unsound Argument

The functions of language are classified under three major heading_____
Informative, **Expressive and Evocative**

When language is used to describe the state of affair about a thing, event or situation, either it affirms or deny the affair language is said to be performing the _____
informative function

Directive Function of language is also known as _____
evocative function

_____arguments are capable of misleading
Deceptive

_____kind of fallacies are concerned with the structure or form of an argument, rather than the content.
Formal Fallacies

Formal fallacies are also called_____
Pure Fallacy

The rule of_____states that in an argument, if a material conditional statement (the first premise), and its antecedent (the second premise) are true, then its consequent must be true
Modus Ponens

MACMILLUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

_____fallacy occurs when the rule of Modus Tollens is violated the rule of Modus Tollens holds that in an argument, if the material conditional statement (first premise) is true, and its consequent is false, then its antecedent (conclusion) must be false.
Fallacy of Denying the Antecedent

An argument in a categorical logic commits the_____if either there are more than three terms in the argument, or a term is assigned different meanings at different points in the argument
fallacy of four terms

syllogistic argument commits the_____if its conclusion is a 'particular' proposition and both of its premises are 'universal' propositions.
existential fallacy

_____fallacy occurs in any form of reasoning when the rule that every valid categorical syllogism must have at least one affirmative premise (A or I) is violated
Fallacy of Excusive Premises

Informal Fallacies is also known as _____
material fallacy

there are different types of Informal Fallacies which are _____
Fallacies of Ambiguity, Fallacies of Weak Induction, Fallacies of Relevance and Fallacies of Presumption

_____fallacies occur when ambiguous words, phrase or statements occur in arguments without carefully attending to the ambiguity
Fallacies of ambiguity

There are_____major facllacies of ambiguity
Four

_____occurs when such a word is used in a manner that implies different meanings or senses of the word within the same context
fallacy of equivocation

The word Baculum is a Latin word which stands for_
Staff
_____fallacy is mostly used whenever a conclusion is defended by a threat to the well- being of those who do not accept it.
Argumentum ad Baculum

Populum" is a Latin word with stands for _____
people" or "notion

Appeal to Popular feeling/ Mob Appeal is also means _____
Argumentum ad Populum

Fallacy of Attacking the person is also means _____
Argumentum ad Hominem

Misericordiam is a Latin word that stands for _____
pity" or mercy"

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

Appeal to pity is also means _____
Argumentum ad Misericordiam

_____is a fallacy that attempt to support a conclusion simply by evoking pity in one's audience even though the statements that evoke the pity are logically unrelated to the conclusion.
Argumentum ad Misericordiam

Fallacy of Irrelevant conclusion is
Ignoratio Elenchi

Fallacy of Irrelevant conclusion is also called the
fallacy of ignoring the issue

_____is committed when the person responding to an argument fails to address whichever issue(s) the arguer has raised.
Red-Herring Fallacy

___- fallacy is committed when a claim is based on a rule that is generally valid, but the arguer fails to see the case at hand as an exception
Fallacy of Accident

_____fallacy is committed, when there is the assumption in the argument's premises, of what the arguer is out to prove.
Fallacies of Presumption

_____is committed when two or more questions are asked together at once and as an answer to one question allows one to draw a conclusion regarding the other question
fallacy of complex question

_____occurs when an arguer attempts to base his claim on a 'prepared' answer, such as a witness under cross examination
Fallacy of Leading Question

_____- commonly used by Lawyers and any other investigative officers to extract information from suspects and criminals.
Fallacy of Leading Question

_____is a Latin word which means Begging the principle
Petito-pricipiii

Fallacy of Begging the question form of fallacy is otherwise called _____
Circular reasoning

_____fallacies are committed, when in an argument, the premises offer some but not enough evidence for the conclusion
Fallacies of Weak Induction

The latin word for the Fallacy of Appeal to Authority is
Argumentum ad Veracudiam

____is a fallacy based on accepting uncritically the judgment of an expert merely because he is an authority without mindful of the evident contained in the premises of the argument which ought to indicate the conclusion
Fallacy of Appeal to Authority

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

2020_1 First semester use only

The latin word for the Fallacy of Appeal to Ignorance is _____
Argumentum ad Ignoratiam

____means that the conclusion of an argument is proven simply because nobody has proved the opposite
fallacy of appeal to ignorance

the most common form of the Fallacy of False Cause is called in Latin post hoc, ergopropter hoc, which means _____
after this and therefore because of this

_____fallacy is an argument which applies not only to the premise cases, but also to cases that are different in kind from those referred to in the premises
Fallacy of Hasty Generalization

_____fallacy is committed when one argues that given the sequential or the frequent occurrences of an event in series, the probability of its (the event) reoccurrence will increase.
Gamblers' Fallacy

the_____simply means that you use a premise that unjustifiably reduces the number of alternatives to be considered
fallacy of false dilemma

A_____is a sine qua non tool for effective communication
Definition

_____definition is identical with a dictionary definition
Lexical

_____is directed at developing coherent theoretical account of the subject at hand.
Theoretical definitions

Recursive Definitions is sometimes referred to as _____
nductive definition

_____is a form of definition that defines a word in terms of itself, although in a useful way
Recursive Definitions

Whenever a definition attempt to attach emotive meaning to the use of term and thereby confuse the literal meaning of the term, such definition is said to be _____
be persuasive

_____is a form of definition that is used in contexts where the vagueness of a word, term proposition is unacceptable
Précising definition

-___is the simplest type of valid argument form that is constructed with hypothetical conditional statements
Modus Ponens

In a symbolic form the argument form of Modus Ponens become thus
p _ q, P Therefore q

In a symbolic form the argument form of Modus tollens become thus:
p _ q

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

-q
-P

In a symbolic form the argument form of Hypothetical Syllogismbecome thus:
p _ q
q _ r
Therefore, p _ r

In a symbolic form the argument form of **Disjunctive Syllogism** become thus:
P v q
- p Therefore
q

The_____is always stated as follows: "A is A". Here "A" stands for anything whatever
law of identity

The originality of law of identity is that it simply states that_____
anything is what it is.

____states that nothing can be both 'A' and not 'A'.
The law of non-contradiction

_____is the third law of thought and it states that everything is either A or not A.
The law of Excluded Middle

Directive function of language is also known as ____ function
Evocative

Complete this argument (which moves from general proposition to a particular proposition as the conclusion): "All Senators are liars, Tunde Bakare is a Senator, therefore, _____"
Tuned Bakare is a liar

According to the law of _____, everything must choose to be either "A" or not "A"
Excluded middle

The definition of logic as the science of laws of thought implies a mutual relationship between logic and ___
Language

The weakness or strength of an inductive argument depends on the degree of --____ contained in the conclusion
Evidence

The argument: "Janet is a Muslim, all Muslims are traders, therefore Janet is a trader" is valid but _____
Unsound

Complete this valid but unsound deductive argument: "All GST 203 Students are brilliant, the Vice President of Nigeria is a GST 203 Student, therefore ____ "
The Vice President of Nigeria is brilliant

Complete this sound deductive argument: "Lagos is in Nigeria, Nigeria is in Africa, therefore ____ ."
Lagos is in Africa

For a ___, the role of reason is basically one of interpreting and defending the dogma derived from sources whose authority and truth is dependent on faith.

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

Religionist

The field of research directed towards obtaining further knowledge of nature is called _____.
Science

The branch of philosophy concerned with the morality of human action is called ____.
Ethics

_____ enables philosophers to make their arguments well stated and persuasive more than other people do.
Logic

The 'Dialectical method' of Hegel moves from thesis to _____ and synthesis.
Anti-thesis

In Greek language, the word Sophia means ____.
Wisdom

The result of the philosophical doctrine, which sees knowledge as exclusively depending on sense experience is known as ____.
Master Scientist

In the Under-labourer conception, philosophy characterises a person's or group of persons _____.
Attitude to life

"All politicians are liars" is an example of ___ proposition.
Universal affirmative

___ is a form of definition that expresses the meaning of a word based on available theories in specific discipline.
Theoretical definition

"You don't know any of the accused persons, do you?" is an example of _____fallacy.
Leading question

"My lord, if you send me to prison, my seven children will suffer, there will be no one to take care of my sick mother and my father will die of heart attack." is an example of ____ fallacy
Appeal to Pity

FBQ21: "I look out at you all, and I tell you, I am proud to be here. Proud to belong to a party that stands for what is good for Nigeria. Proud to cast my lot with the kind of people who make this nation great. Proud to stand with men and women who can get our nation back on its feet. Yes, there are those who criticize us, as weak and insensitive. But when I look at you hard-working people, I know we are right, and the critics are wrong." This is an example of _____ fallacy
Appeal to Popular feeling

___ is another word for recursive definition.
Induction

In the concept of 'Definition' that which is doing the defining is referred to as ____.
Definien

Ethno-Philosophy sees philosophy as an item of _____ property rather than an activity of the individual
Communal

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

_____ developed the theory of 'condensation and refraction' to explain the original stuff from which all things are made.
Anaximenes

"Segun is a boy" is an example of ___ proposition
Particular affirmative

To ___ everything that exists is permanent, indestructible and unchanging.
Parmenides

A 'lexical definition' is identical with a ____ definition of words.
Dictionary

In the currents of African philosophy, ____ is a sort of individualist version of Ethno-Philosophy, in which one records the belief of certain special members of the community.
Sage philosophy

____ proposed the idea that the sources of all things must be a neutral element, different from all the elements we know.
Anaximander

The establishment of the world as being made up of a single underlying item or substance is referred to as ___
Monism

___ is the branch of philosophy that refers to the study of the fundamental principles of the theory of education as distinguished from the science or art of education.
Philosophy of education

___ is the method of philosophy which concerns itself with the establishment of correct concepts or definitions before trying to know their applications in life's instances.
Socratic method

___is the name of the Greek philosopher and mathematician who likened philosophers to spectators at the "Ancient Games".
Pythagoras

___ contrasted true lover of wisdom with those who merely parade themselves as lovers of wisdom when in actual fact they are mere lovers of words.
Socrates

Who first introduced the concept of "Tabula rasa"?
Avicenna

The belief that 'Virtue' is a kind of knowledge that we need to in order to reach the ultimate good is called
Eudemonism

The Renaissance age was marked by the movement away from religion and medieval scholasticism to
Humanism

"Ockham Razor", the methodological principle which states that "one should not multiply arguments beyond necessary" was developed by
Ockham

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

2020_1 First semester use only

All the following belong to the same AGE of philosophy EXCEPT
Heidegger

What was Descartes' philosophical idea that set the agenda for Mind and Body problem?
Cartesian Dualism

The identification of the soul as having three parts namely Reason, Spirit and Appetite was done by
Plato

Who used the theory of Form to develop and explain epistemology?
Plato

Who among the following is NOT an ancient philosopher?
Baruch De Spinoza

Fallacy of "Begging the question" is also known as
Petito pricipii

The kind of definition which describes a special brand of stipulative and précising definition is known as
Theoretical definition

'Evidence' or 'Reason' in logic is also known as
Premise

The critical thinking of Africans on their experience of reality is called
African philosophy

In the Medieval age, philosophy was subservient to
Religion

The Ontological argument for the existence of God was developed by
St Anslem

The concept of "Methodic doubt" was part of the philosophies of
Rene Descartes

Utilitarian ethicists are also known as
Consequentialists

The idea that there is no absolute truth and that two point of views can be accepted at the same time is credited to
Sophism

What type of argument is that in which the conclusion is based on probability?
Inductive argument

The founder of 'Scepticism' is called
Pyrroh

One value of philosophy is that it enables a person to develop the habit of
Reflection

The following are members of the age of delivery of philosophy EXCEPT
Ockham

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

The scientist's main business is to explain
Natural phenomena

The word 'Epistemology' means
Theory of knowledge

The argument that consists of as many arguments as possible with so many premise(s) and conclusion(s) is
A complex argument

Who is the proponent of 'Transcendental' method of philosophy?
Immanuel Kant

The method of philosophy that is confined to sense experience is called
Empiricism

What method of philosophy holds that everything is real when it tends to fruitful activity and results?
Pragmatic method

In the Socratic method of philosophy, the assumption of an ignorance of truth by the teacher is known as
Socratic Irony

The idea that 'Motion' is nothing but an illusion is credited to
Zeno of Elea

The part of ethics that deals with the logical language of ethical concept and terms is known as
Meta-ethics

The type of logic that is concerned with knowledge and belief is called
Epistemic logic

What kind of logic deals with the basic operations of truth value?
Boolean logic

The Logic that serves as the study of natural language argument is called
Informal

What branch of philosophy helps us to avoid claims for which we do not have enough reasons?
Logic

What includes the seeking of wisdom and the wisdom that is sought?
philosophy

Kant's critical method was taken much further and completed by Hegel in a staggering system of idealism built by means of what he termed the .....
dialectical method

The following are all sources of knowledge except
fear

The philosophical concept of arguing out the entire process of the subject question, in a manner of a dialogue is called?
Socratic method

MACOLUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY

2020_1 First semester use only

Etymologically, the word philosophy comes the Greek words Philos, Philia, Philein which means friend, love, and .....
to love

Philosophy is said to have begun with what?
Wonder

What is the branch of philosophy that deals with the structure and principles of reasoning or sound argument?
logic

Philosophy is reduced to the role of clarification of the meaning of words and concepts such as
all of the above

Which part of ethics deals with the logic and language of ethical concepts and terms?
meta-ethics

Which branch of philosophy studies reality in its most comprehensive scope and fundamental principles?
metaphysics

CALCULUS EDUCATIONAL CONSULT 2020_1 FIRST SEMESTER USE ONLY
