BASIC DESIGN AND VISUAL ARTS

PART 5

Continued……..

7 Integral components used in the creation of a design: known as elements of art

0. Point
1. Line
2. Color
3. Form
4. Shape
5. Space
6. Texture
7. Value

5. SPACE

Actual space is three-dimensional volume that can be empty or filled with objects. It has width, height, and depth. Space that appears three-dimensional in a two-dimensional painting is an illusion that creates a perception of depth.

Architectural form occurs at the juncture between mass and space. In executing and reading design drawings, we should concerned with both the form of the mass containing a volume of space as well as the form of the spatial volume itself.

Space ማለት ባለ 3 ልኬት መጠን ነው። ልኬቶቹም ስፋት፣ ርዝመት፣ ቁመት ናቸው።

Space can be either full or empty A void is an empty volume,

While a mass is a filled volume. Voids and masses can be

Referred to as:

Negative space / Positive space

Negative form / Positive form

Volume / Solid or Space / Void

By incorporating the use of space in our design, we enlarge or reduce the visual space that communicate with us differently.

Types

- Open, uncluttered spaces
- Cramped, busy spaces
- Unused vs. good use of space

Dear @etconp members how simple use of positive and Negative space communicate with us?

6. TEXTURE

Texture- is about surface quality either tactile or visual. Texture can be real or implied by different uses of media. It is the degree of roughness or smoothness in objects.

5.1 Types of textures

In architecture we classify texture tactile texture and Visual texture

Tactile texture

Tactile texture is the tactile quality of a surface, such as rough, smooth, sticky, fuzzy, soft or slick. A real texture is one you can actually feel with your hand, such as a piece of sandpaper, a wet glass, or animal fur.

Visual texture

Visual texture is a visual quality of a surface. It is the result from painting or drawing as the real texture. Visual texture is an illusion of texture created by an artist. Paint can be manipulated to give the impression of texture, while the paper surface remains smooth and flat.
