- Battle of Plassy

Antonical comparision & Metaphoric comparision

Democracy vs Military state.

- Budha
- Ashoka Ex.

2 Para

(What negative words can do)

- Contempt of court
- Slangs used & then sociological consequences.

Topic = Words are sharper than the 2-edged sword

Just before throwing bomb in legislative assembly. Chandra Sekhar Ajad asked Bhagat Singh to throw original bomb to create fear in the mind of brithishers. But Bhagat Singh refused and told that our bomb and fear among few brithishers would not awake the Indian mass, but our words will awake the Indian mass to raise a mass moment and thus. Bhagat singh threw bombs at empty place of legislative assembly.

Similary E.B. Lytton says " Words are mightier than the sword.

Reason for above saying is words can impact a lange no. of people and that also for longer period. Litrary works always has been fundamental in raising any moment. With the sword we can win the hands, but words can win head and heart.

Words here signifies litrary works, intellectual creations and language whereas sward represents the physical ~~co-ercise~~ power. Above saying want to emphasize that intellectual labour holds more significance than the normal labour.

Words are more powerful than the Swards because of creation of win-win situation for both the parties i.e. In a war of sward there will be one winner at the cost of lose of other, but words are facilitator to have win-win situation for the opposite parties. that's why it is always advisable to resolve the issue with talk, not by going for war.

How words have played an important role in resouling issues?, How they have created impact for longer period? what makes them more powerful than swards? and How this can be proved in different fields of life? ... will explore in upcoming paragraphs.
