PHS318

Question

Gigar is caused by _____.

Answer

Anthropods

Question

_____ causes candidiasis, tinea Capitis and histoplasmosis.

Answer

Fungi

Question

Counseling is used in sickle cell disease to reduce _____.

Answer

Genetic core

Question

_____emphasises that the contribution of the different components is not equal in any specific disease.

Answer

The Wheel Model

Question

If the _____ is stable then the disease does not occur very easily.

Answer

Equilibrium

Question

_____ are intrinsic factors in a person.

Answer

Host factors

Question

_____ are other factors necessary for the development of disease .

Answer

All of the above

Question

In disease causation, _____ factors are important.

Answer

Ecological

Question

_____ is the basic tool for epidemiology studies.

Answer

Rate

Question

A _____ is the age and sex structure of the population.

Answer

Population pyramid

Question

_____ are a combination of vital statistics and other data pertinent to health.

Answer

Health statistics

Question

The virus that utilises _____ is called X4 HIV.

Answer

CXCR4

Question

Observational study is a type of _____.

Answer

Analytical studies

Question

Retrospective study, case study, prospective and cohort study are types of _____.

Answer

Analytical studies

Question

_____ is the second major type of epidemiological studies.

Answer

Analytical studies

Question

Epidemiologist employ carefully designed strategies to determine _____ and _____.

Answer

Disease occurrence and risk factors

Question

_____ are the three components in epidemiology.

Answer

Disease frequency, distribution and determinants

Question

HIV DNA that enters the DNA of the cell is called a _____.

Answer

Provirus

Question

_____ was coined from a Geek word meaning, "the science of people".

Answer

Epidemiology

Question

The virus that utilises CCR5 is called _____.

Answer

R5 HIV

Question

Gigar is caused by _____.

Answer

Anthropods

Question

_____ causes candidiasis, tinea Capitis and histoplasmosis.

Answer

Fungi

Question

Counseling is used in sickle cell disease to reduce _____.

Answer

Genetic core

Question

_____emphasises that the contribution of the different components is not equal in any specific disease.

Answer

The Wheel Model

Question

If the _____ is stable then the disease does not occur very easily.

Answer

Equilibrium

Question

_____ are intrinsic factors in a person.

Answer

Epidemiology

Question

The virus that utilises CCR5 is called _____.

Answer

R5 HIV

PHS322

Question

The local nature of community participation is a hindrance to _____.

Answer

Scaling up

Question

_____ tools can be used for determining the subjective quality of participation.

Answer

Qualitative

Question

One of the rationales for community mobilisation is that it establishes _____ among stakeholders.

Answer

A and C

Question

_____ establishes strong relationships between Federal governments, local governments, businesses and community members.

Answer

Mobilisation

Question

_____ committee monitors the activities of health workers.

Answer

LGA PHC Technical

Question

Another name for the Village Development Committee is _____ Committee.

Answer

Community Development

Question

Development committees take the _____ up concept of planning.

Answer

Down

Question

Adolescent reproductive and sexual health programming are good examples of _____.

Answer

Community participation

Question

Community mobilisation or participation is put in place for the first stage of planning health programmes which is _____.

Answer

Need Assessments

Question

One of the primary goals of mobilisation is that it should be _____.

Answer

Community driven

Question

Contributive participation involves contribution of _____.

Answer

All of the options

Question

_____ involves putting a community in a state of readiness for action.

Answer

Community mobilisation

Question

One of these is not a part of the organisational structure of a community.

Answer

Local government members

Question

Locus, sharing, action and diversity are the core dimensions of a _____.

Answer

Community

Question

Strengthening community organisations aimed at improving health is one of the key task of _____.

Answer

Community mobilisation

Question

One of the _____ of mobilisation is to make sure mobilisation efforts are community driven.

Answer

Primary goals

Question

_____ will be more sustainable than ill-fitted external solutions.

Answer

Community mobilisation

Question

_____ can be used to improve their sexual and reproductive health.

Answer

Community participation

Question

_____consolidates on local expertise.

Answer

A facilitator

Question

The process by which individuals and families take ownership of their health is called _____.

Answer

Community participation

Question

The local nature of community participation is a hindrance to _____.

Answer

Scaling up

Question

_____ tools can be used for determining the subjective quality of participation.

Answer

Qualitative

Question

One of the rationales for community mobilisation is that it establishes _____ among stakeholders.

Answer

A and C

Question

_____ establishes strong relationships between Federal governments, local governments, businesses and community members.

Answer

Answer

Community mobilisation

Question

_____ can be used to improve their sexual and reproductive health.

Answer

Community participation

Question

_____consolidates on local expertise.

Answer

A facilitator

Question

The process by which individuals and families take ownership of their health is called _____.

Answer

Community participation

PHS312

Question

The premolar resembles the molar except that they are

Answer

smaller

Question

The part of the tooth that is visible is called

Answer

crown

Question

Directly under the enamel is another bony-like called

Answer

dentin

Question

How many teeth are found in each of the dental arches

Answer

8

Question

The risk factors of oral cancer are except

Answer

exercise

Question

Fluoridation reduces decay by providing strength and reducing ……

Answer

Aand B

Question

Which of these cause damage to tooth enamel

Answer

ALL

Question

Common oral problem in elderly include the following except

Answer

loss of tongue

Question

Another word for tooth decay is called

Answer

dental caries

Question

Degeneration is a disease found in……set people

Answer

old

Question

Tenaciously jelly like material on tooth surface is

Answer

dental plague

Question

Which of the following is the most effective method of preventing dental caries in a population

Answer

systemic fluoride

Question

Which of the following preventive measure should be recommended for an 18 year old person who has no caries or restoration

Answer

oral hygiene and prophylaxis

Question

Chemoprophylaxis, water and food fortification, protection from hazard is a

Answer

primary prevention

Question

The common method used in health is ------

Answer

pathfinder surveys

Question

…….prevention helps to halt the progress of disease at the early stage before it will cause further damage

Answer

secondary prevention

Question

All of these are health education pathway except

Answer

sincerity

Question

Dental caries is mostly virulent ---------when there is decrease in saliva

---

Answer

night

Question

Dental caries is found in all age group but common among

Answer

b and c

Question

One these is not a problems associated with poor oral care

Answer

none

Question

The premolar resembles the molar except that they are

PHS308

Question

one of these lays down the objectives and broad policies of the enterprise.

Answer

top management

Question

the ultimate source of authority and it manages goals and policies for an enterprise.

Answer

top management

Question

a line of demarcation between various managerial positions in an organization

---

Answer

Levels

Question

Those who manage public sector undertakings.

Answer

Political Managers

Question

managers by virtue of their being owners or relatives of the owners of company.

Answer

Patrimonial / Family Manager

Question

A manager appointed on account of their specialized knowledge and degree.

Answer

Professional Managers

Question

which the followings is not a types of manager

Answer

Public managers

Question

all those persons who perform the task of managing an enterprise.

Answer

Management as aPolitics

Question

branch of knowledge that fulfils following requirement "The knowledge should be formally imparted by education and training programmes"

Answer

Management as a discipline

Question

that branch of knowledge which is connected to study of principles and practices of basic administration is.

Answer

Management as a discipline

Question

the category of management where managers are continuously involved in decisions of different kinds since the decision made by one manager becomes the basis of action to be taken by other managers

---

Answer

management as a activity

Question

which of these is not a components of management as a process

---

Answer

compulsion process

Question

which category of management refers to a series of inter – related functions. It is the process by which management creates, operates and directs purposive organization through systematic, coordinated and co-operated human efforts

---

Answer

management as a Process

Question

Management is a distinct process consisting of planning, organizing, actuating and controlling, performed to determine and accomplish stated objective by the use of human beings and other resources. Whose description of management is this

---

Answer

George R. Terry

Question

Management can not be defined in one of the following categories

---

Answer

management as a Politics

Question

the responsibility of ensuring availability of raw materials, determination of wages and salaries, formulation of rules and regulations is for?

Answer

Management

Question

which of these is described as "the process of working with and through others to effectively achieve the goals of the organization, by efficiently using limited resources in the changing world".

PHS302

Question

OPV vaccine dose is ----------

Answer

2 drops

Question

Measels Route of Administration is ----------

Answer

Subcutaneous

Question

Hepatitis B Route of Administration is ----------

Answer

Intra muscular

Question

Routine Immunisation, Vaccination site for BCG vaccin is site

---

Answer

Upper left arm

Question

which of these is not a sign of Influenza an acute viral disease

---

Answer

swolling nose and sore throat

Question

The incubation period of influenza, ranging from

Answer

24 – 72 hours

Question

(biting, sucking, rocking, enuresis, over or under eating without physical cause) are indicators of which mental abuse or neglect

---

Answer

Habit disorders

Question

Circumstances that put a child at high risk of abuse and neglect include---------- except

Answer

school feeding services

Question

Patterns of emotional maltreatment include ---------- except

Answer

rehabilitation

Question

a pattern of acts by the childs caretaker that results inpsychological or emotional harm to the child s physical health and developmen describe

Answer

Emotional Maltreatment

Question

highly acute/ communicable viral infection characterised by fever, catarrhal symptoms, followed by a typical rash and is spread worldw ide is known as

Answer

Measles

Question

diphtheria toxoid at risk include ---------- except

Answer

cleaner

Question

The causative agent ---------- is a bacterial species known as corynebacterium

---

Answer

Diphtheria

Question

an acute infectious disease of tonsils, pharynx, larynx or nose is ----------

---

Answer

Diphtheria

Question

Poliomyelitis should be managed and controled using ---------- except

---

Answer

Medications for 6 to 12 months

Question

An infantile” paralysis is caused by which of these diseases

Answer

Poliomyelitis

Question

Children and adults with acute hepatitis A should be excluded from school for one week after the onset of the illness and until ----------

---

Answer

jaundice has disappeared

Question

TB is not spread by ---------- except

Answer

sneezes

Question

a state of complete physical, mental and social well-being and not merely the absence of disease or infirmity.” is

---

Answer

health

Question

the most commonly area of tobacco infection is----------

Answer

respiratory tract

Question

OPV vaccine dose is ----------

Answer

2 drops

Question

Measels Route of Administration is ----------

Answer

Subcutaneous

Question

PHS303

Question

Physical examination is also called _____

Answer

Clinical examination

Question

Charles Baldwin was a _____health engineer.

Answer

Environmental

Question

The biohazard symbol was developed in the_____ by Charles Baldwin.

Answer

Year 1966

Question

_____is an example of biohazards

Answer

Medical waste

Question

_____is an example of a way in which infection can occur in the laboratory.

Answer

Scratches

Question

_____is an example of macroparasites

Answer

Tapeworm

Question

_____is an example of infectious agent.

Answer

Viroids

Question

Infectious disease is also known as_____disease

Answer

Transmissible

Question

The practice of medical/clinical laboratory science is associated with hazards and_____

Answer

Accidents

Question

Recombinant DNA_____involves DNA sequencing and DNA hybridization.

Answer

Technology

Question

_____are dominant genetic diseases.

Answer

Huntingtons

Question

Recessive genetic diseases require the inheritance of_____genes to be expressed.

Answer

Erroneous

Question

Cystic fibrosis is an example of inherited disease that is caused by a _____

Answer

Mutation

Question

_____is an example of inherited disease.

Answer

Down syndrome

Question

_____is an example of environmental/nutritional diseases.

Answer

Obesity

Question

_____are the leading cause of death globally.

Answer

NCDs

Question

_____is an example of re-emerging diseases.

Answer

Malaria

Question

Persons who have been exposed to Syphilis can be given_____to prevent the possibility of their developing Syphilis

Answer

Penicillin

Question

The last case of naturally occurring smallpox in a human was in the_____

Answer

Year 1977

Question

_____is the specialized application of information technology to optimize and extend laboratory operations

Answer

Lab informatics

PHS301

Question

Qualitive Data Collection methods includes, except

Answer

Observations Records

Question

what is the frequency of data collection in LGA

Answer

Quarterly

Question

at what interval is Data collected in a health facility

Answer

2 weeks after month

Question

Who are responsible for Data collection in the community

Answer

CHEWs

Question

Tally sheet of tracer diseases and outpatient attendance in the health facility

---

Answer

2HF – 1, 2HF – 2, and 2HF – 6

Question

Tally sheet of antenatal care and pregnancy outcome

Answer

3HF – 1, 3HF – 2, and 3HF – 5

Question

Tally sheet for immunization

Answer

5HF – 1, 5HF – 2, and 5HF – 4

Question

among different forms which LGA health staff is expected to complete which of these describe Growth monitoring and promotion tally sheet

---

Answer

8Hf – 1, 8HF – 2, 8HF – 3

Question

Basic approach to Data analysis

Answer

estimate the confidence interval

Question

essential steps in data process using questionnaire methods are, except

---

Answer

estimate the confidence interval

Question

a set of components and procedures organized with the objective of generating information which will improve health care management decisions at all levels of the health system, is referred to as

Answer

Health Information System

Question

the techniques of storing and recovering and often disseminating recorded data especially through the use of computerized system

Answer

Information retrieval

Question

the source of data which contains a magnitude of information available to users from e-libraries, e- Journals, websites Blogs

Answer

internet activities

Question

which of the following source of data reveals the underlying population characteristics which may be related to health.

Answer

census activities

Question

Data from the ---------- are used to determine important epidemiological rates for various segments of the population.

Answer

Community Activities

Question

In-patient Care is a data collected ---------- source

Answer

Hospital Activities

Question

Corresponding forms from facility based reports (HMI 001is a source of data form

---

Answer

Local Government based Data

Question

Sources of Health Data that include the PHC Child Health cards and Child Treatment Card, is

---

Answer

Home-Based Records

Question

that data used for a purpose different from the purpose for which the data was collected originally

---

Answer

Secondary Health Data

Question

data collected and used only for the purpose for which they were collected

---

Answer

Primary Health Data

Question

Qualitive Data Collection methods includes, except

Answer

Watson

Question

Caring is the essence and central unifying, a dominant domain that distinguishes nursing from other health disciplines. Care is an essential human need

---

Answer

Leininger

Question

Which of the following is example of how values are formed in nursing profession? i Observing ii Modelling iii. Moralizing iv. Reward and punishment

---

Answer

i and ii only

Question

The philosophy of nursing will do the following EXCEPT

Answer

Assist nurses to identify probable career development in settings where pay is high

Question

which of the following is correct about the concept of philosophy in nursing?

Answer

Nursing is not the only profession in the health sector that have a philosophical basis for practice

Question

_____was the first University to start a degree program in in Nigeria?

Answer

University of Ibadan

Question

One of the standards pioneering nurses in Nigeria who later became the first Nigerian Registrar of the Nursing Council is_____

Answer

Adetoun Barley

Question

The following factors influenced the development of nursing in Nigeria. i.Religion ii. British colonial administration iii. Inter-professional rivalry in health sector iv. The Nigerian civil wars

---

Answer

a. I and ii only

Question

The US has produced theorists whose theories are influencing all aspects of nursing worldwide. Such persons include the following except_____

Answer

Afaf Melies

Question

Many nurses contributed to the development of nursing in the USA and Canada. The nurse that was instrumental to affiliation of nursing education with universities is____

Answer

Mary Adelaide Nutting

Question

Florence Nightingale cared soldier at----

Answer

Barracks Hospital in Sentari

Question

Which of the following statement is NOT true about the Pre-Nightingale era of development of nursing?

Answer

Nurses never worked under priests

Question

Which of the following is not a significant reason for a student nurse who is studying the historical development of Nursing?

Answer

Ability to follow past methods of care

Question

Which of the following activities of a nurse best describes nurses as a care provider?

Answer

Determine client’s need

Question

As a nurse manager, which of the following best describes your function?

Answer

Provide in service education programs, Use accurate nursing audit, formulate philosophy and vision of the institution

Question

_____refers to the moral values and beliefs that are used as guides to personal behaviour and actions

---

Answer

Character

Question

_____ is the distinctive individual qualities that differentiate a person to another

---

Answer

Personality

Question

The most unique characteristic of nursing as a profession is _____

Answer

Caring

Question

Which of the following is NOT an attribute of a professional?

Answer

Concerned with quantity

Question

Caring means that person, events, projects and things matter to people. It reveals stress and coping options. Caring creates responsibility. It is an

inherent feature of nursing practice. It helps the nurse assist clients to recover in the face of the illness

---

Answer

Henderson

Question

---

Answer

Watson

Question

Caring is the essence and central unifying, a dominant domain that distinguishes nursing from other health disciplines. Care is an essential human need

---

Answer

Leininger

Question

Which of the following is example of how values are formed in nursing profession? i Observing ii Modelling iii. Moralizing iv. Reward and punishment

---

Answer

i and ii only

Question

The philosophy of nursing will do the following EXCEPT

Answer

Assist nurses to identify probable career development in settings where pay is high

Question

which of the following is correct about the concept of philosophy in nursing?

Answer

Nursing is not the only profession in the health sector that have a philosophical basis for practice

Question

_____was the first University to start a degree program in in Nigeria?

Answer

University of Ibadan

Question

One of the standards pioneering nurses in Nigeria who later became the first Nigerian Registrar of the Nursing Council is_____

Answer

Adetoun Barley

Question

The following factors influenced the development of nursing in Nigeria. i.Religion ii. British colonial administration iii. Inter-professional rivalry in health sector iv. The Nigerian civil wars

---

Answer

a. I and ii only

Question

The US has produced theorists whose theories are influencing all aspects of nursing worldwide. Such persons include the following except_____

Answer

Afaf Melies

Question

Many nurses contributed to the development of nursing in the USA and Canada. The nurse that was instrumental to affiliation of nursing education with universities is____

Answer

Mary Adelaide Nutting

Question

Florence Nightingale cared soldier at----

Answer

Barracks Hospital in Sentari

Question

Which of the following statement is NOT true about the Pre-Nightingale era of development of nursing?

Answer

Nurses never worked under priests

Question

Which of the following is not a significant reason for a student nurse who is studying the historical development of Nursing?

Answer

Ability to follow past methods of care

NSC316

Question

The mode of transmission of disease causing agents from mother directly to baby is through:

Answer

Vertical transmission

Question

Direct mode of transmission include

Answer

Droplet spread

Question

The traditional model of infectious disease causation is known as

Answer

Epidemiology triangle

Question

Demographic factors of individual characteristics include all but_____

Answer

Parity

Question

_____is a set of standard criteria for deciding whether a person has a particular disease or other health-related condition

Answer

Case definition

Question

Data are organised and summarised according to time, place, and person in_____

Answer

Descriptive epidemiology

Question

The following are the missions of nurses working with communities except

Answer

Provision of health services at individual and institutional’s level

Question

Which of the following models incorporated the realization of one potential for complete development

Answer

Eudaemonistic model

Question

The adaptive role model incorporates both the

Answer

clinical and role performance model

Question

_____model combines social and psychological standards to the concept of health

---

Answer

The role performance model

Question

_____model assumes that a person’s vital role is the work roles.

Answer

The role performance model

Question

One of the focuses of community health nursing is to

Answer

maintain equilibrium between man and environment

Question

Distributing educational information on safe sex, self-protection, the dangers of substance abuse is easier in a which of the following communities?

Answer

Geographic communities

Question

Communities with a collection of people sharing physical space, located in a specific place and are made up of institutions are

---

Answer

Geographic communities

Question

Communities that work together to ensure provision of drainages and gutters when community roads suddenly became flooded during rainy season is

---

Answer

Communities of solution

Question

Communities of Interests are responsible for

Answer

formation of communities widely

Question

Communities of interest imply

Answer

Communities within communities

Question

One of the main functions of a community include

Answer

Provision of resources at time of illness and disaster

Question

A community is not

Answer

an organization of human beings framed for the purposes of serving differently

Question

One of the basic characteristics of a community is

Answer

Permanence

Question

The mode of transmission of disease causing agents from mother directly to baby is through:

NSC307

Question

The following steps are required for a drug to achieve its pharmacological effect:

Answer

All of the above.

Question

Drug are named based on the following except

Answer

Official name

Question

The advantages of oral drug administration are ---------- except

---

Answer

Quick on set of action

Question

Drug must be ---------- for drug-receptor interaction

Answer

All of the above

Question

The major organ for drug metabolism is the:

Answer

Liver

Question

Choice of suppository is based is based on the following except

---

Answer

It passes through the liver

Question

Criteria for selecting essential drugs include

Answer

Single compound

Question

Which of the following routes of administration affords the MOST rapid absorption and action?

Answer

Intramuscular

Question

Any substance that is used to modify the activities of the body is called--

---

Answer

drug

Question

The process whereby a drug reversibly leaves the blood stream and enters the interstitium (extracellular) and / or the cells of the tissues is called:

Answer

Drug distribution

Question

Which of the following routes of administration is likely to afford the LEAST dependable absorption?

Answer

Oral

Question

When providing nursing care to clients, the nurse understands that drugs are:

Answer

Substances or products that are used or are intended to be used to modify or explore physiological systems or pathological states for the benefit of the recipient.

Question

-------- started animal experiment in pharmacology

Answer

Megende

Question

Which of the following factors exert no influence on bioavailability of a drug:

Answer

Pharmaco-genetic factors.

Question

The nurse understands that though the oral route the most common route of drug administration, is not without some flaws. The following but one are the demerits of the oral route:

Answer

Expensive and difficult to administer.

Question

Chemotherapies are used for the following except

Answer

Acute infection

Question

When a drug has been absorbed, is available at the site of action, and produces its effect in the client, the nurse knows which process has occurred?

Answer

Bioavailability

Question

Pharmacology is the study of actions of drug on

Answer

All of the above

Question

The drug name accepted by a competent body such as the United States Adopted Name (USAN) Council is referred to as

---

NSC111

Question

Mr. Martin is an energetic 80-year-old, admitted to the hospital with complaints of difficulty urinating, bloody urine, and burning on urination. In assessing Mr. Martin, which of the following is a priority?

Answer

Focusing on altered patterns of elimination common in the elderly

Question

Which of the following sources of patient data is usually the primary and best source?

Answer

Patient

Question

During which of the following phases of the nurse–patient interview does the nurse gather all the information needed to form the subjective database?

Answer

Working phase

Question

Data that can be observed by one person and verified by another person observing the same patient are known as:

Answer

Objective data

Question

Which of the following healthcare providers is responsible for the comfort and well-being of the patient on arrival to the unit?

Answer

Nurse

Question

The factors influencing Response to Stressors include all the following EXPECT:

Answer

The event

Question

Needs are an integral part of each person’s human dimension. Which needs are met when a person feels a sense of belonging to a group or community and being loved by others?

Answer

Sociocultural needs

Question

During the recovery and rehabilitation stage of illness, the person who is ill is expected to do which of the following?

Answer

Give up the dependent role.

Question

Which of the following best describes a period of remission in a patient with a chronic illness?

Answer

Symptoms are not experienced.

Question

In which of the following stages of acute illness does the patient decide to accept the diagnosis and follow the prescribed treatment plan?

Answer

Stage 3

Question

Which of the following conditions occurs when an adult has a pulse rate of 100 to 180 beats/minute?

Answer

Tachycardia

Question

Which of the following statistics regarding blood pressure is accurate?

Answer

Blood pressure tends to be lower in a prone or supine position than in a seated or standing position.

Question

Needs are an integral part of each person’s human dimension. Which needs are met when a person feels a sense of belonging to a group or community and being loved by others?

Answer

Sociocultural needs

Question

The act of discrediting the reputation of someone else i.e. an act of creating wrong or false impression of somebody is _____

Answer

Defamation

Question

Instances when consent may not be required include all the following EXCEPT_____

NSC305

Question

Which of the following accurately captures the very essence of preoperative teaching:

Answer

Clients and family members can better participate in recovery if they know what to expect.

Question

The following hold true of care of valuables preoperatively EXCEPT:

Answer

It is totally a client’s responsibility to take care of his/her valuables while going for surgery.

Question

The following are true concerning skin preparation prior surgery EXCEPT:

Answer

None of the above.

Question

Which of the following is not a strong indication for administration of enemas or laxatives on patients prior to having abdominal or pelvic surgery?

Answer

For reasons of aesthesis.

Question

The nurse may need to insert an indwelling urinary catheter preoperatively for some surgeries, particularly of the lower abdomen because:

Answer

a distended bladder increases the risk of bladder trauma.

Question

The nurse is instructing the preoperative client on what items to bring to the hospital for an anticipated two-day stay. Identify the client statement that indicates the need for additional teaching:

Answer

If I bring in my laptop computer, maybe I can catch up on some office work

Question

A client with a known infection must be managed by using which identified method of precaution?

Answer

Standard precautions

Question

The nurse is evaluating a postoperative patient for infection. Which sign or symptom would be most indicative of infection?

Answer

Redness, warmth, and tenderness at the incision site

Question

Which one of the following is not a communicable disease?

Answer

Sickle-cell anaemia

Question

When planning care for a client, which intervention would be appropriate to reduce the risk of infection?

Answer

Wash hands.

Question

The term used to describe a disease that can be transferred from person to person by social ordinary contact is

Answer

Contagious disease

Question

Increased neutrophil count may be indicative of

Answer

Bacterial infection

Question

The following statements about dendritic cells are true EXCEPT:

Answer

The dendritic cells are not a potent activator of lymphocytes.

Question

Which of the following is a phagocytic cell?

Answer

Neutrophils

Question

During repair, the injured tissue is replaced by:

Answer

Both A & B

Question

Chronic inflammation can be caused by all of these except:

Answer

A response to a normal body substance such as low-density lipoprotein lodged in excess in an arteriole wall

Question

Fever that is seen in a client with an infectious disease is most likely caused by:

Answer

Increased release of interleukin

Question

The classic sign of swelling seen in the inflammatory process results from:

Answer

Leakage of plasma into the injured area

Question

The following statements about inflammation are true EXCEPT:

Answer

Inflammation and repair can never induce harm.

Question

The immune system is tasked with the following distinct and interrelated duties EXCEPT:

Answer

None of the above.

Question

The production of Oestrogen by the Graafian follicle inhibits the production of which hormone?

Answer

Progesterone

Question

Which hormone causes the maturation of an immature Graafian follicle?

Answer

LH

NSC301

Question

One of the following is not a characteristic of social network

Answer

Mindset

Question

According to humoral theory of illness, choleric temparament is as a result of excess of ----

Answer

Yellow bile

Question

A reflex action usually exists without:

Answer

Experience

Question

A vital characteristics of a stimulus is that:

Answer

It influences activity

Question

A ----- is a co-occurrence of disease signs and symptoms

Answer

Syndrome

Question

An innate behaviur is said to be:

Answer

Inborn

Question

Accordind to Suchman 1965, stages of illness behaviour can be disrupted by:

Answer

Denial

Question

Substances such as Ginger tea, honey, whisky and lemon juice are not utilized in ------

Answer

Faith healing

Question

An Otorhinolaryngologist takes care of ---

Answer

Nose

Question

An Endocrinologist takes care of ----

Answer

Metabolic disorder

Question

The humoral theory of illness proposes the influence of ------ fluids in the body as causative factors of illness

Answer

Four

Question

The following entails the use of machine to control voluntary bodily functions

Answer

Biofeedback

Question

Shiatsu therapy originated from:

Answer

Japan

Question

Aryuveda therapy originated from -----

Answer

India

Question

There are generally ------ stages of illness behaviour

Answer

Five

Question

A psychotic condition characterised by severe memory deficit and confusion is known as:

Answer

Wermick-Korsakoff Syndrome

Question

Here, behaviour is performed willingly and controlled, and not forced.

Answer

Voluntary

Question

Health-related behaviour that are firmly established and often performed automatically, without awareness is ----

---

Answer

Health Habits

Question

One of the following is not categorised as faith healing as proposed by Denton 1978

Answer

Healing by purging

Question

The functionalist perspective was embedded by the sick role theory in order to provide insight on---

---

Answer

Social role of sickness

Question

One of the following is not a characteristic of social network

---

Answer

Mindset

Question

According to humoral theory of illness, choleric temparament is as a result of excess of ----

---

Answer

Yellow bile

Question

A reflex action usually exists without:

Answer

Experience

Question

A vital characteristics of a stimulus is that:

Answer

It influences activity

Question

The functionalist perspective was embedded by the sick role theory in order to provide insight on---

Answer

Social role of sickness

EHS321

Question

10. The efficient and effective development of an organizations resources when they needed is known as

Answer

(d) resource management

Question

9. One of the following is not a factor affecting the allocation of resources in emergency

---

Answer

(b) rudimentary knowledge

Question

8. The distribution of resources-financial, human and material among competing cases of emergency is best known as

---

Answer

(c) Resource allocation

Question

7. The component of resource mobilization cycle are

Answer

(b) Plan, Act and Reflect

Question

6. Resources needed in emergency management include all but one of the following

---

Answer

(d) none of the options

Question

5. Which of these statement is not true of resource mobilization?

Answer

(d) it doesn’t strengthen the capacity to better assist more vulnerable people

Question

4. The full meaning of UNDP is

Answer

(d) United Nations Development Programme

Question

3. .....Offers live saving care and life-changing assistance to refugees

Answer

(a) IRC

Question

2. One of these organization provides international protection and assistance for refugees

Answer

(c)UNHCR

Question

1. Foreign emergency management collaboration Agencies include all of the following except:

Answer

(c) LASEMA

Question

Which of these may not be a function of the nations emergency management outfit?

Answer

dis-orientate activities relating to disaster management

Question

The nations emergency management agency is known as:

Answer

National Emergency Management Agency

Question

Emergency services includes all but one of these:

Answer

priest

Question

The procedures for employees and volunteers to follow in a work place does not include one of the following

---

Answer

disuse of fire extinguishers in cases of fire

Question

Some of the guiding principles that have been developed to capture the core characteristics of emergency response include all but one of the following:

Answer

all of the options

Question

Weather emergencies include

Answer

tornadoes

Question

Botulism and bio-terrorism are examples of

Answer

biological emergencies

Question

Fire, collapse of buildings are some of the examples of

Answer

mechanical emergencies

Question

Emergencies may be divided into two parts which are

Answer

natural and man-made

Question

The definition of emergency covers a wide range of incidents but not including

Answer

none of the options

Question

10. The efficient and effective development of an organizations resources when they needed is known as

---

Answer

(d) resource management

Question

9. One of the following is not a factor affecting the allocation of resources in emergency

---

Answer

(b) rudimentary knowledge

Question

8. The distribution of resources-financial, human and material among competing cases of emergency is best known as

---

Answer

(c) Resource allocation

Question

7. The component of resource mobilization cycle are

Answer

(b) Plan, Act and Reflect

Question

6. Resources needed in emergency management include all but one of the following

---

Answer

(d) none of the options

Question

5. Which of these statement is not true of resource mobilization?

Answer

(d) it doesn’t strengthen the capacity to better assist more vulnerable people

Question

4. The full meaning of UNDP is

Answer

(d) United Nations Development Programme

Question

3. .....Offers live saving care and life-changing assistance to refugees

---

Answer

(a) IRC

Question

2. One of these organization provides international protection and assistance for refugees

---

Answer

(c)UNHCR

Question

1. Foreign emergency management collaboration Agencies include all of the following except:

Answer

(c) LASEMA

Question

Which of these may not be a function of the nations emergency management outfit?

Answer

dis-orientate activities relating to disaster management

Question

The nations emergency management agency is known as:

Answer

National Emergency Management Agency

Question

Emergency services includes all but one of these:

Answer

priest

Question

The procedures for employees and volunteers to follow in a work place does not include one of the following

---

Answer

disuse of fire extinguishers in cases of fire

Question

Some of the guiding principles that have been developed to capture the core characteristics of emergency response include all but one of the following:

Answer

all of the options

Question

Weather emergencies include

Answer

tornadoes

Question

Botulism and bio-terrorism are examples of

Answer

biological emergencies

Question

Fire, collapse of buildings are some of the examples of

Answer

mechanical emergencies

Question

Emergencies may be divided into two parts which are

Answer

natural and man-made

Question

The definition of emergency covers a wide range of incidents but not including

Answer

none of the options

EHS311

Question

Ionizing _____ are radioactive materials that decay spontaneously

---

Answer

Radiation

Question

The engineering of functional systems at the molecular scale can best be described as

---

Answer

Nanotechnology

Question

Which of the following is a positive effect of the advances in technology

---

Answer

it doesn’t allow companies to reduce shipping and manufacturing impact and to reach a broader audience.

Question

Technology can harm the environment through all these except:

Answer

Enrichment of natural resources

Question

The distribution of sand, salt and clay in the soil is known as

---

Answer

Soil texture

Question

Which of these is not a medium of environmental media

Answer

Air

Question

Environmental Media refers to the _____ components of the natural environment

---

Answer

Abiotic

Question

The following are principles of environmental management except

---

Answer

Principle of discretion

Question

Which of these can be used to described our physical surroundings

---

Answer

all of the options

Question

Keeping control of our activities so that we do what we can to conserve the physical resources and avoid polluting them can best be described as

---

Answer

Environmental management

Question

The science of deriving information about the earths land, water areas from images acquired at a distance is known as ____

Answer

Remote sensing

Question

Which of these statements is not true about EIA

Answer

It may not be necessary for planning

Question

_____ is the activity designed to identify and predict the impact on the biogeochemical environment and on human health

---

Answer

Environmental assignment

Question

One of these layers is responsible for protecting earth from harmful ultr-violet rays

---

Answer

Ozone layer.

Question

Which of these is important for maintaining balance to the ecosystem

---

Answer

biodeveray

Question

Loss of biodiveray can be attributed to all of the following except

---

Answer

Afforestation

Question

The effects of Nitro compounds in the environments is believe to retard the _____ of the oxidation reduction potential of the sewage to the region favorable for development of the sulphate - reducinganaenbe

---

Answer

Lowering

Question

The presence of _____ groups in a compound makes it to be explosive

---

Answer

Nitro

Question

_____ Compounds are organic compounds that contain one or more nitro-functional groups (-NO2)

Answer

Nitro

Question

Which of these are the classical steps in hygiene practice in occupational hygiene practice.

Answer

Recognition, evaluation and prevention

Question

Ionizing _____ are radioactive materials that decay spontaneously

---

Answer

Radiation

Question

The engineering of functional systems at the molecular scale can best be described as

---

Answer

Nanotechnology

Question

Which of the following is a positive effect of the advances in technology

---

Answer

it doesn’t allow companies to reduce shipping and manufacturing impact and to reach a broader audience.

Question

Technology can harm the environment through all these except:

Answer

Enrichment of natural resources

Question

The distribution of sand, salt and clay in the soil is known as

---

Answer

Soil texture

Question

Which of these is not a medium of environmental media

Answer

Air

Question

Environmental Media refers to the _____ components of the natural environment

---

Answer

Abiotic

Question

The following are principles of environmental management except

---

Answer

Principle of discretion

Question

Which of these can be used to described our physical surroundings

---

Answer

all of the options

Question

Keeping control of our activities so that we do what we can to conserve the physical resources and avoid polluting them can best be described as

---

Answer

Environmental management

Question

The science of deriving information about the earths land, water areas from images acquired at a distance is known as ____

Answer

Remote sensing

Question

Which of these statements is not true about EIA

Answer

It may not be necessary for planning

Question

_____ is the activity designed to identify and predict the impact on the biogeochemical environment and on human health

---

Answer

Environmental assignment

Question

One of these layers is responsible for protecting earth from harmful ultr-violet rays

Answer

Ozone layer.

Question

Which of these is important for maintaining balance to the ecosystem

Answer

biodeveray

Question

Loss of biodiveray can be attributed to all of the following except

Answer

Afforestation

Question

The effects of Nitro compounds in the environments is believe to retard the _____ of the oxidation reduction potential of the sewage to the region favorable for development of the sulphate - reducinganaenbe

Answer

Lowering

Question

The presence of _____ groups in a compound makes it to be explosive

Answer

Nitro

Question

_____ Compounds are organic compounds that contain one or more nitro-functional groups (-NO2)

Answer

Nitro

Question

Which of these are the classical steps in hygiene practice in occupational hygiene practice.

Answer

Recognition, evaluation and prevention

EHS305

Question

_____ are two long jointed feelers that grow from the insects head

Answer

Antennae

Question

The _____ is the second section of an insects body

Answer

Thorax

Question

Insects have how many anatomical sections

Answer

three

Question

The most common liquid used for killing and preserving insects is the _____ solution

Answer

Alcohol

Question

The simplest way to catch insects is by using

Answer

hand

Question

The skeleton of an insect is _____ type

Answer

Exoskeleton

Question

The abdomen of a typical insect is _____

Answer

smooth

Question

Chewing lice belongs to the order _____

Answer

Mallophaga

Question

The order Dermaptera have special wings called

Answer

Skin wings.

Question

Insects with double tail belongs to what order

Answer

Diplura

Question

The Insect life cycle with three stages of development is referred to as_____ metamorphoses

---

Answer

incomplete

Question

Insects have how many orders

Answer

29

Question

____ is a box with one piece of glass on the top

Answer

Riker mounting

Question

One who evaluates insects population and damages, recommend insect management programs is called

---

Answer

Pest controller

Question

An area of Entomology concerned with insects that influences the health of humans is called _____

Answer

Medical

Question

_____ Monitors crop fields and take samples of the type quantities of insects presents

---

Answer

crop scout

Question

Insects are used in research and development of the following except

---

Answer

Gum.

Question

The body of a typical insect is divided into

Answer

Three

Question

One of the following is the importance of studying Entomology

---

Answer

understanding of Entomology is need to reduce extensive economic losses in crop damage caused by insects

Question

The study of insects is called _____

Answer

Entomology.

Question

_____ are two long jointed feelers that grow from the insects head

---

Answer

Antennae

Question

The _____ is the second section of an insects body

Answer

Thorax

Question

Insects have how many anatomical sections

Answer

three

Question

The most common liquid used for killing and preserving insects is the _____ solution

Answer

Alcohol

Question

The simplest way to catch insects is by using

Answer

hand

Question

The skeleton of an insect is _____ type

Answer

Exoskeleton

Question

The abdomen of a typical insect is _____

Answer

smooth

Question

Chewing lice belongs to the order _____

Answer

Mallophaga

Question

The order Dermaptera have special wings called

Answer

Skin wings.

Question

Insects with double tail belongs to what order

Answer

Diplura

Question

The Insect life cycle with three stages of development is referred to as_____ metamorphoses

Answer

incomplete

Question

Insects have how many orders

Answer

29

Question

____ is a box with one piece of glass on the top

Answer

Riker mounting

Question

One who evaluates insects population and damages, recommend insect management programs is called

---

Answer

Pest controller

Question

An area of Entomology concerned with insects that influences the health of humans is called _____

Answer

Medical

Question

_____ Monitors crop fields and take samples of the type quantities of insects presents

---

Answer

crop scout

Question

Insects are used in research and development of the following except

Answer

Gum.

Question

The body of a typical insect is divided into

Answer

Three

Question

One of the following is the importance of studying Entomology

Answer

understanding of Entomology is need to reduce extensive economic losses in crop damage caused by insects

Question

The study of insects is called _____

Answer

Entomology.

EHS303

Question

Females that requires mating but produce offspring pathogenically without the male gametes are called

Answer

Pseudogenous

Question

Ruler blindness is caused by _____

Answer

Onchocerca volvulus

Question

An organism that lives in another organism which it often harm is known as _____

Answer

Parasite

Question

In parasite infestation of host in which they cannot complete their life cycles, these hosts are called ____

Answer

Accidental host

Question

A host that do not allow parasites to reproduce is called ____

Answer

Intermediate host

Question

The science concerned with the study of growth an reproduction mechanism in parasites is known as _____

Answer

Parasite physiology

Question

_____ is the situation whereby an investment in an organisms resources fitness component goes at the detriment of another fitness component.

Answer

Trade off

Question

The molecular, physiological and behavioral mechanism that leads to harmful effect on a host is called.

Answer

Pathogenesis

Question

_____ is the reduction in vast fitness as a result of infection caused by parasite

---

Answer

Virulence

Question

The additive tree in which the terminal taxa are equidistant from the root of the tree is known as _____

Answer

Dendrogram

Question

The following are parasites infection in united states except

---

Answer

Yellow fever

Question

Parasites that lives on their hosts are called

Answer

Ecto parasite

Question

_____ is a common infection of the human gastro-intestinal tract

Answer

Amoebaisis

Question

Parasites that feeds on another parasites are called

Answer

Epiparasite

Question

The ability of the host to reduce the effect of an infection on a host fitness is known as

Answer

Tolerance

Question

The following are methods of diagnosing parasite infection except

Answer

Physical examination

Question

Blastocystosis are parasites that affect the _____

Answer

Intestine

Question

When a parasite infect more than one host species to complete their life cycle, such cycle is known as

Answer

Indirect life cycle

Question

The followings are types of parasites except

Answer

Crabs

Question

If a parasite infects a host but does not undergo any development those hosts are called ____

Answer

Paratenicor transport host

Question

Females that requires mating but produce offspring pathogenically without the male gametes are called

Answer

Pseudogenous

Question

Ruler blindness is caused by _____

Answer

Onchocerca volvulus

Question

An organism that lives in another organism which it often harm is known as _____

Answer

Parasite

Question

In parasite infestation of host in which they cannot complete their life cycles, these hosts are called ____

Answer

Accidental host

Question

A host that do not allow parasites to reproduce is called ____

Answer

Intermediate host

Question

The science concerned with the study of growth an reproduction mechanism in parasites is known as _____

Answer

Parasite physiology

Question

_____ is the situation whereby an investment in an organisms resources fitness component goes at the detriment of another fitness component.

Answer

Trade off

Question

The molecular, physiological and behavioral mechanism that leads to harmful effect on a host is called.

Answer

Pathogenesis

Question

_____ is the reduction in vast fitness as a result of infection caused by parasite

---

Answer

Virulence

Question

The additive tree in which the terminal taxa are equidistant from the root of the tree is known as _____

Answer

Dendrogram

Question

The following are parasites infection in united states except

Answer

Yellow fever

Question

Parasites that lives on their hosts are called

Answer

Ecto parasite

Question

_____ is a common infection of the human gastro-intestinal tract

Answer

Amoebaisis

Question

Parasites that feeds on another parasites are called

Answer

Epiparasite

Question

The ability of the host to reduce the effect of an infection on a host fitness is known as

Answer

Tolerance

Question

The following are methods of diagnosing parasite infection except

Answer

Physical examination

Question

Blastocystosis are parasites that affect the _____

Answer

Intestine

Question

When a parasite infect more than one host species to complete their life cycle, such cycle is known as

Answer

Indirect life cycle

Question

The followings are types of parasites except

Answer

Crabs

Question

If a parasite infects a host but does not undergo any development those hosts are called ____

Answer

Paratenicor transport host

EHS301

Question

Balloons that stay at a constant altitude for a long period of time are known as

Answer

Transosondes

Question

The instrument use for measuring atmospheric pressure is called

Answer

Barometer

Question

The following are types of air sampling methods except

Answer

stratified air sampling

Question

Laboratory devices used for separating fluids, gas or liquid based on density is _____

Answer

Centrifuge

Question

The following are function incubator except

Answer

control the speed of the chamber

Question

The electrical devices which uses dry heat for sterilization has an air filled space in-between to aid

---

Answer

Insulation

Question

_____ enables the uniform distribution of heat

Answer

Circulating fan

Question

_____ are electrical devices which uses dry heat for sterilization

---

Answer

Hot air oven

Question

Hot air over Temperature can be controlled using

Answer

Thermostat

Question

The function of the condense lens is to _____ the light into the specimen

---

Answer

Focus

Question

Compound microscope was invented by _____

Answer

Lacharias Janssen

Question

The following are classifications of microscopes except

Answer

Ordinary microscope

Question

The lens further from the eye is known as

Answer

Objective lens

Question

Microscope with only one lens is called

Answer

Simple

Question

The following are the uses of pH except

Answer

Solvent separation

Question

Spectrophotometers measure _____

Answer

Light beam intensity

Question

The following are strategies for safe laboratory operation except

Answer

E-technology

Question

Stress violence and other workplace disturbance are known as

Answer

Psycho-social hazard

Question

The biological substance that threatens the health of living organisms are known as

---

Answer

Biohazard

Question

The following are physical hazards except

Answer

Carcinogens

Question

Balloons that stay at a constant altitude for a long period of time are known as

---

Answer

Transosondes

Question

The instrument use for measuring atmospheric pressure is called

---

Answer

Barometer

Question

The following are types of air sampling methods except

Answer

stratified air sampling

Question

Laboratory devices used for separating fluids, gas or liquid based on density is _____

Answer

Centrifuge

Question

The following are function incubator except

Answer

control the speed of the chamber

Question

The electrical devices which uses dry heat for sterilization has an air filled space in-between to aid

---

Answer

Insulation

Question

_____ enables the uniform distribution of heat

Answer

Circulating fan

Question

_____ are electrical devices which uses dry heat for sterilization

---

Answer

Hot air oven

Question

Hot air over Temperature can be controlled using

Answer

Thermostat

Question

The function of the condense lens is to _____ the light into the specimen

---

Answer

Focus

Question

Compound microscope was invented by _____

Answer

Lacharias Janssen

Question

The following are classifications of microscopes except

Answer

Ordinary microscope

Question

The lens further from the eye is known as

Answer

Objective lens

Question

Microscope with only one lens is called

Answer

Simple

Question

The following are the uses of pH except

Answer

Solvent separation

Question

Spectrophotometers measure _____

Answer

Light beam intensity

Question

The following are strategies for safe laboratory operation except

Answer

E-technology

Question

Stress violence and other workplace disturbance are known as

Answer

Psycho-social hazard

Question

The biological substance that threatens the health of living organisms are known as

---

Answer

Biohazard

Question

The following are physical hazards except

Answer

Carcinogens

EHS315

Question

_____ is light-scattering cloudiness or lack of transparency of a solution due to the presence of suspended particles

---

Answer

Turbidity

Question

_____ does not represent any significant risk to health over a lifetime of consumption, including different sensitivities that may occur between life stages.

Answer

Potartable water

Question

During food preparation, storage and service operations any area through which unprepared or prepared food is transported through _____

Answer

food transport area

Question

Any area where food or food products are stored is referred to as _____

Answer

Food storage area

Question

_____ is any area where food is stored, processed, prepared or served.

Answer

Food handling area

Question

Cholera has an incubation period of_____

Answer

5 days

Question

The incubation period for plague is_____

Answer

6 days

Question

Documented comprehensive strategy for managing and operating a water supply system is referred to as ____

Answer

water safety plan

Question

Final monitoring for reassurance that the system is operating safely is known as _____

Answer

Verification

Question

Which of these options is not among diseases of international health regulation?

Answer

chelosis

Question

In which year was fatalyellow fever infections impoted into United states and switzerland?

Answer

1996

Question

Rodents if not controlled can _____

Answer

all of the options

Question

Statutory duties of port health authority include all except _____

Answer

baby delivery

Question

Provision of mooring station which should always be kept clean is one of the requirements of a designated _____

Answer

approved port

Question

Screening of passengers from countries affected by internationally notifiable diseases and taking appropriate action as necessary is one of the seaport health _____

Answer

control measures

Question

_____ unit is a section directly responsible to the medical and clinical services division.

Answer

Medical laboratory and immunisation

Question

In response to the antigen, the immune system developes either antibodies or white blood cells called ___

Answer

T-lymphocytes

Question

Which immunization approach provide long- lasting immunity?

Answer

active immunity

Question

___ stimulates the body to resist future infections by particular diseases.

Answer

vaccination

Question

One of the major means of addressing the concerns about communicable disease in both developed and developing countries is through_____

Answer

Strong survillance

Question

_____ is light-scattering cloudiness or lack of transparency of a solution due to the presence of suspended particles

---

Answer

Turbidity

Question

_____ does not represent any significant risk to health over a lifetime of consumption, including different sensitivities that may occur between life stages.

Answer

Potartable water

Question

During food preparation, storage and service operations any area through which unprepared or prepared food is transported through _____

Answer

food transport area

Question

Any area where food or food products are stored is referred to as _____

Answer

Food storage area

Question

_____ is any area where food is stored, processed, prepared or served.

Answer

Food handling area

Question

Cholera has an incubation period of_____

Answer

5 days

Question

The incubation period for plague is_____

Answer

6 days

Question

Documented comprehensive strategy for managing and operating a water supply system is referred to as ____

Answer

water safety plan

Question

Final monitoring for reassurance that the system is operating safely is known as _____

Answer

Verification

Question

Which of these options is not among diseases of international health regulation?

Answer

chelosis

Question

In which year was fatalyellow fever infections impoted into United states and switzerland?

Answer

1996

Question

Rodents if not controlled can _____

Answer

all of the options

Question

Statutory duties of port health authority include all except _____

Answer

baby delivery

Question

Provision of mooring station which should always be kept clean is one of the requirements of a designated _____

Answer

approved port

Question

Screening of passengers from countries affected by internationally notifiable diseases and taking appropriate action as necessary is one of the seaport health _____

Answer

control measures

Question

_____ unit is a section directly responsible to the medical and clinical services division.

Answer

Medical laboratory and immunisation

Question

In response to the antigen, the immune system developes either antibodies or white blood cells called ___

Answer

T-lymphocytes

Question

Which immunization approach provide long- lasting immunity?

Answer

active immunity

Question

___ stimulates the body to resist future infections by particular diseases.

Answer

vaccination

Question

One of the major means of addressing the concerns about communicable disease in both developed and developing countries is through_____

Answer

Strong survillance

NSS311

Question

Which of the following is an example of the emotional dimension?

Answer

All of the above

Question

Reading a book, studying, and wanting to understand are examples of which wellness dimension?

Answer

Mental

Question

Being disease free by exercising daily is an example of which wellness dimension?

Answer

Physical

Question

Jeremy has made a point to always try his best in Track and Field events. At the beginning of the season it took Jeremy 8 minutes to run a mile. By the end of the season, he could run the mile in 7 minutes. Jeremy attainment could be attributed to

---

Answer

Attitude

Question

Practicing safe sex and avoiding drugs or alcohol is an example of which wellness dimension?

Answer

Physical

Question

Being at peace with oneself after meditating is an example of which wellness dimension?

Answer

NSC307

Question

The following steps are required for a drug to achieve its pharmacological effect:

Answer

All of the above.

Question

Drug are named based on the following except

Answer

Official name

Question

The advantages of oral drug administration are ---------- except

---

Answer

Quick on set of action

Question

Drug must be ---------- for drug-receptor interaction

Answer

All of the above

Question

The major organ for drug metabolism is the:

Answer

Liver

Question

Choice of suppository is based is based on the following except

---

Answer

It passes through the liver

Question

Criteria for selecting essential drugs include

Answer

Single compound

Question

Which of the following routes of administration affords the MOST rapid absorption and action?

Answer

Intramuscular

Question

Any substance that is used to modify the activities of the body is called--

---

Answer

drug

Question

The process whereby a drug reversibly leaves the blood stream and enters the interstitium (extracellular) and / or the cells of the tissues is called:

Answer

Drug distribution

Question

Which of the following routes of administration is likely to afford the LEAST dependable absorption?

Answer

Oral

Question

When providing nursing care to clients, the nurse understands that drugs are:

Answer

Substances or products that are used or are intended to be used to modify or explore physiological systems or pathological states for the benefit of the recipient.

Question

-------- started animal experiment in pharmacology

Answer

Megende

Question

Which of the following factors exert no influence on bioavailability of a drug:

Answer

Pharmaco-genetic factors.

Question

The nurse understands that though the oral route the most common route of drug administration, is not without some flaws. The following but one are the demerits of the oral route:

Answer

Expensive and difficult to administer.

Question

Chemotherapies are used for the following except

Answer

Acute infection

Question

When a drug has been absorbed, is available at the site of action, and produces its effect in the client, the nurse knows which process has occurred?

Answer

Bioavailability

Question

Pharmacology is the study of actions of drug on

Answer

All of the above

Question

The drug name accepted by a competent body such as the United States Adopted Name (USAN) Council is referred to as

---

Answer

Non-proprietary (Brand) or approved name

Question

Which of the following is the name assigned to a drug by the manufacturer that produces it?

Answer

Proprietary (Brand) name

Question

Question

The final closure of Ductus arteriosus occurs within

Answer

First 1 year after birth

Question

An increase in baby's head circumference occurs at

Answer

First month of life

Question

The respiratory tract, eyes and skin of the newborn are protected from specific viral infections by

---

Answer

IgA

Question

All are true about new born's skeleto-muscular system except

Answer

Growth occurs by hyperplasia

Question

Increase level of IgG at birth is suggestive of

Answer

Intrauterine infection

Question

Baby regains back weight by

Answer

8th-10th day after birth

Question

All is true about the Urinary system of a new born except

Answer

30-60mls of urine is produced in the 1st 1-2 days

Question

Meconium, the first stool is present in the rectum as early as

Answer

16th week of pregnancy

Question

Pulse rate at birth of new baby is

Answer

100-120 b/min

Question

All is true about normal infant except

Answer

Weighs 2.5-5kg

Question

Baby's skin is protected from infection by

Answer

Vernix Caseosa

Question

In pregnancy, iron is stored in the last

Answer

3 months

Question

The baby's meconium changes to yellowish brown by

Answer

3rd to 5th day after birth

Question

The baby's heart beats at

Answer

the mean of 140b/min

Question

The fetal cardiac ligament is formed within

Answer

5 minutes of birth

Question

The average occipito-frontal head circumference of a baby is

Answer

34-35cm

Question

Some passive immunity crosses the placental barrier and protect baby for

Answer

4-6 months after birth

Question

The organ of gaseous exchange of the fetus is

Answer

Placenta

Question

Weight loss in the newborn occurs through all except

Answer

Excessive fluid intake

Question

Physiological weight loss of the newborn occurs in the first

Answer

3 days

Question

The final closure of Ductus arteriosus occurs within

Answer

First 1 year after birth

NSS322

Question

The nurse is assessing the client diagnosed with chronic gastritis. Which symptom(s) support this diagnosis?

Answer

Epigastric pain relieved by eating food

Question

Which instruction should be discussed with the client diagnosed with gastroesophageal reflux disease (GERD)?

Answer

Do not eat spicy foods or acidic foods.

Question

Which outcome should the nurse identify for the client diagnosed with aphthous stomatitis?

Answer

The client will be able to cope with perceived stress

Question

The nurse is doing discharge planning and establishing long-term goals for an infant who had a cleft lip repair. The baby also has a cleft palate. Which long-term goal is most appropriate and necessary for this child?

Answer

Promote adequate speech

Question

A 3-month-old infant is hospitalized for repair of a cleft lip. Following surgery, the baby returns to the unit with a Logan bow in place. The baby is awake and beginning to whimper. The baby’s colour is pink, and pulse is 120 with respirations of 38. An IV is ordered in the baby’s right hand at 15 cc per hour. The fluid is not infusing well. Her right hand is edematous. The jacket restraint has loosened, and one arm has partially come out. What is the priority nursing action?

Answer

Replace the restraints securely

Question

The nurse is teaching the mother of an infant with a cleft palate. Which teaching point should the nurse tell the mother?

Answer

Surgical repair is delayed until the child is 18 months old

Question

The risk factor(s) for cleft lip/palate include:

Answer

All of the above

Question

To confirm a diagnosis of benign or malignant tumour of the gastrointestinal tract, the healthcare practitioner should order for:

Answer

Exfoliative cytology and biopsy of gastrointestinal tissues.

Question

The client diagnosed with tuberculosis has been treated with anti-tuberculosis medications for six (6) weeks. Which data would indicate the medications have been effective?

Answer

The client’s symptoms are improving.

Question

In order to prescribe appropriate treatment, patients with tuberculosis are classified as new case, treatment failure, relapse and defaulter. A defaulter is:

Answer

a patient who completed at least one month of treatment and later defaulted but returns with a positive smear after at least 8 weeks of interruption.

Question

The nurse is discussing the results of a tuberculosis skin test. Which explanation should the nurse provide the client?

Answer

A wheal of 5 millimetres or more signifies that the person has been exposed to the tubercle bacilli.

Question

The nurse is collecting data on a client admitted with pneumonia. When should the nurse begin assisting with discharge planning for this client?

Answer

At the time of admission

Question

A client with acquired immunodeficiency syndrome (AIDS) develops Pneumocystis carinii pneumonia. Which nursing diagnosis has the highest priority for this client?

Answer

Impaired gas exchange

Question

A client with bacterial pneumonia is admitted to the paediatric unit. What would the nurse expect the admitting assessment to reveal?

Answer

High fever with chills

Question

Which of these medication orders for a client who has asthma should the nurse question?

Answer

Timolol (Timoptic)

Question

Prior to discharging a fifteen-year-old who is asthmatic, the nursing should include which of the following measures in the teaching plan?

Answer

Identifying specific environmental triggers

Question

A cardinal part of the nursing management of a patient with asthma is patient teaching. A nurse teaches a client with asthma how to use an inhaler with a spacer. Which of these client statements would indicate that teaching was INEFFECTIVE?

Answer

“I should inhale before using the inhaler.”

Question

Two weeks after a 10-year-old has been treated in the hospital for an acute asthma attack, he asks the nurse, “Can I rejoin my baseball team because practice starts in two weeks?” Which of these responses would be appropriate for the nurse to make?

Answer

“You should continue in any activities that you can tolerate.”

Question

A client has been hospitalized with a diagnosis of laryngeal cancer. Which factor is most significant in the development of laryngeal cancer?

Answer

A history of alcohol and tobacco use

Question

The prognosis of laryngeal cancer depends on:

Answer

A and B

Question

The nurse is assessing the client diagnosed with chronic gastritis. Which symptom(s) support this diagnosis?

Answer

Epigastric pain relieved by eating food

Question

Question

Nutritive value by additive do not include

Answer

Vitamin B12

Question

To Create consistency in food include

Answer

Leaven agent

Question

Desirable food additive include

Answer

All these

Question

A class of food is

Answer

Energy food

Question

Foods are grouped according t similarity in

Answer

None of these

Question

Food spoilage may be due to

Answer

All these

Question

The most preferred meat is

Answer

Lean

Question

Pastureization of milk involved heating to

Answer

62oC

Question

Food additives are

Answer

improve value

Question

Cereal group is agood provider of

Answer

Lysine

Question

Milk group provide the following except

Answer

Iron

Question

--- is an empty Calory

Answer

Oil

Question

Nutrient fuctions are to provide

Answer

All these

Question

Thiamin deficiency

Answer

Beriberi

Question

Nutritional deficiency include all except

Answer

Diabetis

Question

Nutrition concerns

Answer

all of above

Question

Fruit juice should be stored in

Answer

room temperature

Question

Vegitables are good sources except

Answer

Protiens

Question

Organ meat are good sourses of

Answer

All these

Question

Egg should be stored with

Answer

small end down

Question

Nutritive value by additive do not include

Answer

Vitamin B12

Question

To Create consistency in food include

Answer

Leaven agent

Question

Desirable food additive include

Answer

All these

Question

A class of food is

Answer

Energy food

Question

Foods are grouped according t similarity in

Answer

None of these

Question

Food spoilage may be due to

Answer

All these

NSS302

Question

Which of the following is true?

Answer

All of the above

Question

Which is true about fruit/vegetable Group of foods

Answer

All of the above

Question

Concerning, Starchy Fruit/Tuber Group, which is false

Answer

They are superior to cereals in terms of starch content

Question

Cereals contain

Answer

All of the above

Question

Edible insects include

Answer

All of the above

Question

An important source of protein in African diets include

Answer

Legumes

Question

The milk group of foods is low is

Answer

Iron

Question

Pork is prohibited among

Answer

The Muslims

Question

The following discourage breastfeeding except?

Answer

None of the above

Question

The number of food groups based on the geographical distribution of the tropical foods are

Answer

5

Question

The human infant gets its first taste of a diet from the

Answer

The milk group

Question

Foods are grouped according to the similarity of

Answer

Nutrient content

Question

Currently, foods are usually classified as

Answer

All of the above

Question

The body-building nutrients include all except

Answer

Vitamins

Question

The body processes regulatory substances include all except

Answer

Carbohydrates

Question

The most common forms of food contamination/poisoning are

Answer

All of the above

Question

All are energy-giving nutrients except

Answer

The Vitamins

Question

Proteins are chiefly responsible for all except

Answer

Energy generation

Question

The Father of Nutrition is

Answer

Antoine Laurent Lavoisier

Question

The diet of bushmen of Northern Botswana was high in

Answer

Vegetables

Question

Which of the following is true?

Answer

All of the above

Question

Which is true about fruit/vegetable Group of foods

Answer

All of the above

NSS327

Question

Public health nurse promote nursing services by--------- except

Answer

Counselling of patient

Question

Area of responsibility of community health nurse include

Answer

All of the above

Question

Objective of community health nursing include to promote

Answer

All of the above

Question

Mosquitoes are vectord for all except _____

Answer

Sleeping sickness

Question

Group of people primary or initially communicating or interacting with each other by means of information technologies are called ____

Answer

Virtual community

Question

Process of building a widely accessible power structure often with end goal of distributing power, equally throughout the community is called _____

Answer

Community organization

Question

Community diagnosis is used for all except _____

Answer

Identifies family

Question

The purpose of community mobilization is to generate active

Answer

Community involvement

Question

Community health nursing has knowledge that is applied to meet------ needs except

Answer

National needs

Question

A systematic examination of the health status indicators for a given Population that is used to identify key problems in a community is called _____

Answer

Community diagnosis

Question

The component of environmental health include the following except

Answer

Spiritural

Question

Motor group handicap include all except _____

Answer

Dyslexia

Question

_____ involves encouraging, inspiring and raising the interest of the community to make them actively involved in finding solutions to some of their own problems

Answer

Community mobilization

Question

Components of cold chain system include all except ____

Answer

Weighing scale

Question

_____ needs are things in the people’s lives

Answer

Felt needs

Question

Socioeconomic indicators include all except _____

Answer

Adult literacy

Question

Role of Community Mobilization in Community Health Care include all except ____

Answer

Working together as a team.

Question

Community may not be defined as ----------

Answer

No statutory law

Question

In community health nursing service is shaped by-------- of community

Answer

All of the above

Question

The objective of community health nursing is to help family to-------- except

Answer

Get bank loan

Question

Public health nurse promote nursing services by--------- except

Answer

Counselling of patient

Question

Area of responsibility of community health nurse include

Question

The following steps are required for a drug to achieve its pharmacological effect:

Answer

All of the above.

Question

Drug are named based on the following except

Answer

Official name

Question

The advantages of oral drug administration are ---------- except

---

Answer

Quick on set of action

Question

Drug must be ---------- for drug-receptor interaction

Answer

All of the above

Question

The major organ for drug metabolism is the:

Answer

Liver

Question

Choice of suppository is based is based on the following except

---

Answer

It passes through the liver

Question

Criteria for selecting essential drugs include

Answer

Single compound

Question

Which of the following routes of administration affords the MOST rapid absorption and action?

Answer

Intramuscular

Question

Any substance that is used to modify the activities of the body is called--

Answer

drug

Question

The process whereby a drug reversibly leaves the blood stream and enters the interstitium (extracellular) and / or the cells of the tissues is called:

Answer

Drug distribution

Question

Which of the following routes of administration is likely to afford the LEAST dependable absorption?

Answer

Oral

Question

When providing nursing care to clients, the nurse understands that drugs are:

Answer

Substances or products that are used or are intended to be used to modify or explore physiological systems or pathological states for the benefit of the recipient.

Question

-------- started animal experiment in pharmacology

Answer

Megende

Question

Which of the following factors exert no influence on bioavailability of a drug:

Answer

Pharmaco-genetic factors.

Question

The nurse understands that though the oral route the most common route of drug administration, is not without some flaws. The following but one are the demerits of the oral route:

Answer

Expensive and difficult to administer.

Question

Chemotherapies are used for the following except

Answer

Acute infection

Question

When a drug has been absorbed, is available at the site of action, and produces its effect in the client, the nurse knows which process has occurred?

Answer

Bioavailability

Question

Pharmacology is the study of actions of drug on

Answer

All of the above

Question

The drug name accepted by a competent body such as the United States Adopted Name (USAN) Council is referred to as

---

Answer

Non-proprietary (Brand) or approved name

Question

Which of the following is the name assigned to a drug by the manufacturer that produces it?

Answer

Proprietary (Brand) name

Question

The following steps are required for a drug to achieve its pharmacological effect:

Answer

All of the above.

Question

Lochia Alba lasts from

Answer

10-15 days

Question

Diagonal conjugate is

Answer

12-13cm

Question

Coccyx is made up of

Answer

Four Vertebrae

Question

All is true about Pelvic ligaments except

Answer

They are six

Question

In female pelvic there are

Answer

One Symphysis Pubis

Question

All is true about Fetal skull except

Answer

Ossification starts as early as 3 weeks

Question

All is true about the Pelvic floor except

Answer

The Pelvic floor is formed by deep tissues

Question

Oblique diameter is

Answer

12cm

Question

All is true about Sacrum except

Answer

Sacrum is made up of six vertebrae

Question

The most important landmark in female pelvis is

Answer

Sacral Promontory

Question

In the pelvic joint, there are

Answer

Two Sacroiliac joints

Question

Pelvic joints are

Answer

Four

Question

All is true about female pelvis except

Answer

Cavity is deep

Question

All is true about the pelvis except

Answer

The Pelvis is divided into four parts

Question

All is true about innominate bone except

Answer

It has five bones

Question

The Transverse diameter of outlet is taken between two ischial spines at

Answer

10-11cm

Question

The Pelvic bone has

Answer

One Coccyx

Question

All is true about Sacrum except

Answer

Sacrum is made up of six vertebrae

Question

In the Pelvic inclination, the cavity is

Answer

90°

Question

Transverse diameter is

Answer

Question

The last step in nursing care plan is ----------

Answer

Objective

Question

The first step in nursing care plan is ----------

Answer

Nursing diagnosis

Question

The nursing care plan is divided into how many parts --------

Answer

five

Question

The taxonomy of nursing diagnoses have how many major categories

Answer

Nine

Question

In nursing theory, ---------- is generally represented as being a helping discipline

Answer

Nature of nursing

Question

The following are components of nursing theories EXCEPT ------

Answer

Nurse

Question

…….. provides the orienting scheme that helps focus our thinking

Answer

Concetual framework

Question

A statement that describes, explain the relationship between concepts is --------

Answer

Theory

Question

A concept is a building block of ------

Answer

Theory

Question

Fluid in interstitial spaces of the lungs is called ----------

Answer

pulmonary edema

Question

Parathormone is produced by ----------

Answer

parathyroid glands

Question

Aldosterone is secreted by ------

Answer

Adrenal cortex

Question

Antidiuretic hormone is produced ------

Answer

Hypothalamus

Question

The water loss that occurs through the lungs and skin the amount in adult is -

Answer

600-1.000ML

Question

With intestinal suction, ------- of fluid per day can be lost

Answer

3,000ML

Question

In a 24-hour period, ---------- of fluid can be lost through diarrhea

Answer

17, 000ML

Question

The main electrolyte in Extracellular fluid is ------

Answer

Sodium

Question

The main electrolyte in intracellular fluid is ---------

Answer

potassium

Question

All are skills required in nursing process EXCEPT ----

Answer

personal

Question

Question

_____ is one of the most serious causes of these degenerative metabolic diseases

Answer

Sugar

Question

A _____ history identifies the elderly who are or may be at risk of malnutrition

Answer

Nutritional

Question

People over the age of _____ have much less of the friendly bacteria in their gut

Answer

60

Question

_____is present in thirty percent of elderly person above 75 and worldwide

Answer

Cataract

Question

The HIV genome is approximately _____ kilobases which is larger than the HTLV

Answer

20

Question

Age, sex, cause specifics, case fatality, and standardized rate are examples of_____

Answer

Demographic characteristics

Question

Counselling is used in Sickle Cell Disease SCD to reduce _____ core

---

Answer

Genetic

Question

The focus of analytical study is to_____

Answer

Test hypothesis

Question

If the equilibrium is _____ then the disease does not occur very easily

Answer

Stable

Question

Disease develops as a result of _____ of position of a complex genealogy of Antecedence

Answer

Chain

Question

Our state of health depends on a balance of forces in a dynamic_____

Answer

Equilibrium

Question

The proportion of the population affected by a disease at a particular time is_____ rate

Answer

Prevalence

Question

_____causes foamy vacuolation in infected cells

Answer

Human foamy virus

Question

Fever, muscle aches and a sick feeling are _____symptoms

Answer

Flue-like

Question

The organism that causes syphilis is called Treponema _____

Answer

Pallidun

Question

Early detection of disease is necessary for prompt intervention. Which one of the following does not constitute early detection of diseases?

Answer

Case series control

Question

The sequence in propagation of epidemics comprise the following EXCEPT_____

Answer

Decrease of the epidemics

Question

The difference between Crude Birth Rate and Crude Death Rate is _____

Answer

Rate of Natural Population Increase

Question

In epidemiology, the following are demographic characteristic data EXCEPT_____

Answer

Genetic
