NSC411

Question

Instruments for data collection include the following EXCEPT:

Answer

Hypothesis

Question

The variable that is influenced by the intervention of the researcher is called:

Answer

Independent variable

Question

_____is a systematic inquiry that uses disciplined methods to answer questions or solve problems

Answer

Research

Question

_____refers to the accuracy and consistency of information obtained in a study.

Answer

Reliability

Question

Quantitative data are:

Answer

Information in numerical form

Question

Variables that are not under study but are capable of creating some effects on the variables that are being studied are called:

Answer

Extreneous variables

Question

Statistical hypothesis which states that relationship exist between the variable under investigation is referred to as:

Answer

Alternative hypothesis

Question

Statistical hypothesis which states that no relationship exist between the variable under investigation otherwise referred to as:

Answer

Null hypothesis

Question

What is the range? Question 9 refers

Answer

100-160kg

Question

What is the Median weight? Question 9 refers

Answer

134.5kg

Question

What is the modal weight? Question 9 refers

Answer

130kg

Question

The following reflects the weights of obesed clients taken at a nutrition clinic:130kg, 139kg, 149kg, 120kg, 118kg, 130kg, 160kg, 145kg, 148kg & 123kg. Calculate the mean of the recorded weights

---

Answer

136.2 kg

Question

Which of the following questions is NOT relevant during the formulation of a research problem?

Answer

What type of sampling unit will be used in the study?

Question

One of these instruments is used for a focus group discussion:

Answer

An interview guide

Question

Validity of an instrument means that the instrument is:

Answer

Observing the same phenomenon when used by two or more independent observer

Question

The number of patients in a Surgical ward is an example of:

Answer

Discrete data

Question

The method of selecting a fraction of the population for inclusion in a study is called:

Answer

Sampling

Question

Quantitative data can only be measured with _____ and _____ scales.

Answer

Interval and ordinal

Question

The following are routine sources of data EXCEPT:

Answer

Epidemiological survey

Question

Random sampling include the following techniques EXCEPT:

Answer

Purposive Sampling

Question

Instruments for data collection include the following EXCEPT:

Answer

Hypothesis

Question

The variable that is influenced by the intervention of the researcher is called:

Answer

Independent variable

Question

_____is a systematic inquiry that uses disciplined methods to answer questions or solve problems

---

Answer

Research

Question

_____refers to the accuracy and consistency of information obtained in a study.

Answer

Reliability

Question

Quantitative data are:

Answer

Information in numerical form

Question

Variables that are not under study but are capable of creating some effects on the variables that are being studied are called:

Answer

Extreneous variables

Question

Statistical hypothesis which states that relationship exist between the variable under investigation is referred to as:

Answer

Alternative hypothesis

Question

Statistical hypothesis which states that no relationship exist between the variable under investigation otherwise referred to as:

Answer

Null hypothesis

Question

What is the range? Question 9 refers

Answer

100-160kg

Question

What is the Median weight? Question 9 refers

Answer

134.5kg

Question

What is the modal weight? Question 9 refers

Answer

130kg

Question

The following reflects the weights of obesed clients taken at a nutrition clinic:130kg, 139kg, 149kg, 120kg, 118kg, 130kg, 160kg, 145kg, 148kg & 123kg. Calculate the mean of the recorded weights

---

Answer

136.2 kg

Question

Which of the following questions is NOT relevant during the formulation of a research problem?

Answer

What type of sampling unit will be used in the study?

Question

One of these instruments is used for a focus group discussion:

Answer

An interview guide

Question

Validity of an instrument means that the instrument is:

Observing the same phenomenon when used by two or more independent observer

Question

The number of patients in a Surgical ward is an example of:

Answer

Discrete data

Question

The method of selecting a fraction of the population for inclusion in a study is called:

Answer

Sampling

Question

Quantitative data can only be measured with _____ and _____ scales.

Answer

Interval and ordinal

Question

The following are routine sources of data EXCEPT:

Answer

Epidemiological survey

Question

Random sampling include the following techniques EXCEPT:

Answer

Purposive Sampling

NSC409

Question

_____ is a way of organizing data for analysis by grouping them into convenient classes.

Answer

frequency distribution

Question

Mode is the _____ number occurring frequency

Answer

Highest

Question

Sample is a part of _____

Answer

Entities

Question

Population is the collection of _____

Answer

Entities

Question

Variability and dispersions are basics_____ in statistics

Answer

Phenomena

Question

The two basic types of statistics are _____ and _____

Answer

Descriptive and inferential

Question

Biostatistics is a branch of statistics that pays more attention to _____ and _____

Answer

Medicine and human quality of life

Question

The ---------- of every nation is assessed by several indicators

Answer

Health status

Question

Ingestion of adulterated paracetamol syrup occurred in --------- and ---------- states in 1090

Answer

Osun and Pleateau

Question

Immunization services were initiated in ---------- year under the EPI

Answer

1979

Question

According to your course material, the millennium goals are to be achieved between 1990 and ----------

---

Answer

2015

Question

The first ---------- plan was between 1962 and 1968.

Answer

National development

Question

---------- are collected from facilities and are channelled to the states through local goverment

---

Answer

Health data

Question

---------- year is the first ever formal pre-independence governmental planning for provision of health services for Nigeria population

Answer

1946

Question

Range is the difference between the ---------- and ---------- value in a set of observation

Answer

Smallest and largest

Question

There are ---------- types of samples according to your teaching materials

Answer

five

Question

A random sampling can be defined in one of the following

Answer

Each item with population has both equal and lowest opportunity of being selected

Question

---------- and ---------- are ways of presenting data in graphical forms

---

Answer

Histogram and pie charts

Question

---------- is a way of organizing data for analysis by grouping them into convenient classes.

Answer

Frequency distribution

Question

Statistics is the science of collecting, analysing and interpreting ----------

---

Answer

Numerical information

Question

_____ is a way of organizing data for analysis by grouping them into convenient classes.

Answer

frequency distribution

Question

Mode is the _____ number occurring frequency

Answer

Highest

Question

Sample is a part of _____

Answer

Entities

Question

Population is the collection of _____

Answer

Entities

Question

Variability and dispersions are basics_____ in statistics

Answer

Phenomena

Question

The two basic types of statistics are _____ and _____

Answer

Descriptive and inferential

Question

Biostatistics is a branch of statistics that pays more attention to _____ and _____

Answer

Medicine and human quality of life

Question

The ---------- of every nation is assessed by several indicators

---

Answer

Health status

Question

Ingestion of adulterated paracetamol syrup occurred in --------- and ---------- states in 1090

Answer

Osun and Pleateau

Question

Immunization services were initiated in ---------- year under the EPI

Answer

1979

Question

According to your course material, the millennium goals are to be achieved between 1990 and ----------

Answer

2015

Question

The first ---------- plan was between 1962 and 1968.

Answer

National development

Question

---------- are collected from facilities and are channelled to the states through local goverment

Answer

Health data

Question

---------- year is the first ever formal pre-independence governmental planning for provision of health services for Nigeria population

Answer

1946

five

Question

A random sampling can be defined in one of the following

Answer

Each item with population has both equal and lowest opportunity of being selected

Question

---------- and ---------- are ways of presenting data in graphical forms

Answer

Histogram and pie charts

Question

---------- is a way of organizing data for analysis by grouping them into convenient classes.

Answer

Frequency distribution

Question

Statistics is the science of collecting, analysing and interpreting ----------

Answer

Numerical information

NSC407

Question

_____ is a predetermined sum of money paid by HMOs on behalf of a contributor for services rendered by the provider

---

Answer

Capitation

Question

Government subsidies on drugs has the potential to cause supply of drugs to _____

Answer

Increases

Question

The basic determinants of supply include which of the following?

Answer

All of the above

Question

If the price of production of drug is higher, it may cause the supply to _____

Answer

Reduce

Question

Which one of the following factors influence demand for a good?

Answer

All of the above

Question

The following is true about the principles of NHIS EXCEPT

Answer

Those with higher health needs will subsidize for those with lower health needs

Question

A nurse manager wants to buy a hospital equipment for her facility, she gives up the value of the second best of that equipment after a first choice was made. This term is called _____?

Answer

Opportunity cost

Question

In defining economics, which one of the following does NOT apply?

Answer

Use of limited resources to achieve maximum satisfaction of human material wants

Question

Any tangible object that has the potential to satisfy human wants is called _____

Answer

Goods

Question

The concern of economists are centered on the _____ of human beings

---

Answer

Wants

Question

The set of rules that govern how scarce resources are used to produce goods and services that satisfy human wants is called _____

Answer

Economic systems

Question

NHIS establishment was informed by one of the following reasons EXCEPT

Answer

Over professionalism of health care workers

Question

The increase in sales or service tax will cause a corresponding _____ in cost of goods and services

Answer

Increase

Question

The quantity of product that consumers will purchase at each possible price is called _____

Answer

Demand

Question

If the price of a product increases, if is expected that the quantity of product supplied will _____

Answer

Increase

Question

When an individual makes a choice and gives up the value of the second best for the first choice made. He is said to have made _____

Answer

A rational choice

Question

The benefit consumers get from the purchase of goods and services is called _____

Answer

Utility

Question

The following are human basic needs EXCEPT

Answer

Self-actualization

Question

The implementation of NHIS is planned to be in phases to cover which category of Nigerians

Answer

All of the above

Question

Which of the following is not a reason why wants of a man change over time?

Answer

Material things

Question

_____ is a predetermined sum of money paid by HMOs on behalf of a contributor for services rendered by the provider

---

Answer

Capitation

Question

Government subsidies on drugs has the potential to cause supply of drugs to _____

Answer

Increases

Question

The basic determinants of supply include which of the following?

Answer

All of the above

Question

If the price of production of drug is higher, it may cause the supply to _____

Answer

Reduce

Question

Which one of the following factors influence demand for a good?

Answer

All of the above

Question

The following is true about the principles of NHIS EXCEPT

Which of the following is not a reason why wants of a man change over time?

Answer

Material things

NSC405

Question

Repetition of concept, theories and principles learnt in a curriculum is known as_____?

Answer

Continuity

Question

_____ is a document containing suggestion on programmes or topics to be learn for each class, subject or course

Answer

Syllabus

Question

A curriculum is_____?

Answer

Overall activities of an institution

Question

Education programmes are set up to teach or instruct leaders about knowledge, ideas, thought of old and current_____?

Answer

Knowledge

Question

The mirror of the society is

Answer

School

Question

Which of these is not a factor influencing the process of curriculum development

---

Answer

Climate factor

Question

The following are elements of a curriculum EXCEPT

Answer

List of class desired performance

Question

According to Zais model of curriculum development the four component making the curriculum are EXCEPT

Answer

Scheme of work

Question

Curriculum reflects the culture of

Answer

Society

Question

Which of the following approach to curriculum development is best in training health workers?

Answer

Competency based approach

Question

_____ design is the arrangement of organized knowledge for instruction by men of knowledge who command respect among academic colleagues and possess authority in their field of endeavor

---

Answer

Discipline design

Question

What the child studies in a class is decided by

Answer

Teacher

Question

Which of the following is not an evidence of learning?

Answer

Development of instinctive behaviours

Question

_____ designs’ area of focus is the problem of individual and social of living which have very general, broad and all embracing

---

Answer

Problem centred design

Question

Which of the following is an advantage of the broad field design?

Answer

It integrates different subject that are related together and so present a harmonious package to the learner

Question

One of the following is not a criticism against the progressive or learners centred design

---

Answer

The focus is narrow

Question

_____process enables us to see whether our objectives are being met?

Answer

Evaluation

Question

According to learning is a relatively permanent change in behavior which comes about as a result of experience

Answer

O’cornell

Question

Which of these is not a type of core curriculum

Answer

Domain’s core

Question

Which of the following is a feature of curriculum design?

Answer

All of the above

Question

Repetition of concept, theories and principles learnt in a curriculum is known as_____?

Answer

Continuity

Question

_____ is a document containing suggestion on programmes or topics to be learn for each class, subject or course

Answer

Syllabus

Which of the following is a feature of curriculum design?

Answer

All of the above

NSC403

Question

---------- is the level of analysis that deal with groups and group relations

---

Answer

Group level

Question

The following are barriers to communication except .....

Answer

Structural function

Question

..... Is the officially recognised route for task related messages in organization

---

Answer

Formal communication

Question

The following are the types of communication that show feelings through movement except .....

Answer

Dancing

Question

..... involves face to face discussion and interviews.

Answer

Verbal communication

Question

..... Is the decoder of the message.

Answer

Receiver

Question

The information the sending source may want to share must first be .....

Answer

Decoded

Question

The word communication are derived from the ..... Word communis.

Answer

Latin

Question

The following are the functions of manager except .....

Answer

Contemplating

Question

..... is the first manager's function

Answer

planning

Question

Organizational structure of NHIS was structured into ..... Programmes.

Answer

six

Question

…… Find what is causing the problem by divination, rituals and incantation.

Answer

Spiritist

Question

The following are the types of traditional healers except ……

Answer

Community Extension worker

Question

Community Services are called …… and ……

Answer

Improvement of excreta disposal and health education

Question

Organizational environment includes the following except ----------

Answer

Economic and cultural trends

Question

---------- depend on the technology of computers, telephone system and copiers.

Answer

Modern Organization

Question

The relationship that exist among these level of organization of health services is called ……

Answer

Referral

Question

There are ……. Hierarchical levels in the organization of health services in Nigeria?

Answer

3

Question

The following are basic terms in inventory model except …….

Answer

Lad time

Question

Interview can be closed into ---------- broad categories.

Answer

2

Question

---------- is the level of analysis that deal with groups and group relations

Answer

Group level

Question

The following are barriers to communication except …….

Answer

Structural function

Question

…… Is the officially recognised route for task related messages in organization

Interview can be closed into ---------- broad categories.

Answer

2

NSC401

Question

The term contusion refers to:

Answer

a soft tissue injury resulting from a blow or blunt trauma.

Question

The paraplegic client is being admitted to a medical unit from home with a stage IV pressure ulcer over the right ischium. Which assessment tool should be completed on admission to the hospital?

Answer

Complete the Braden Scale.

Question

The nurse in a long-term care facility is teaching a group of new unlicensed assistive personnel. Which information regarding skin care should the nurse emphasize?

Answer

Turn clients who are immobile at least every two (2) hours.

Question

What is the scientific rationale for placing lift pads under an immobile client?

Answer

The pads will help prevent friction shearing when repositioning the client.

Question

After completing a scheduled every-2-hour turn by turning the client to the left side, the nurse notices a reddened area over the coccyx. The area blanches when the nurse compresses it with thumb pressure. One hour later, the nurse reassesses the area and finds the redness has disappeared. How should the nurse document this area?

Answer

Reactive hyperemia

Question

A parent brings her child into the clinic due to skin lesions that fail to heal. The lesions are red, reported to be itchy, and exhibit exudate. You suspect the child may have impetigo. What is a hallmark finding with this condition?

Answer

Honey yellow crusts over the lesions.

Question

Select the most common infectious agent that causes impetigo:

Answer

Staphylococcus aureus

Question

You’re providing education to a group of parents about impetigo. Which statement is CORRECT about this disease?

Answer

“Cases of impetigo most likely to occur during the summer when the weather is warm.”

Question

A 4 year old is admitted to your unit with a severe case of impetigo. It is important the nurse follows _____ while providing care to this patient:

Answer

Contact precautions

Question

The nurse is caring for the client diagnosed with COPD. Which outcome requires a revision in the plan of care?

Answer

The client demonstrates intolerance to activity.

Question

The nurse is assessing a patient complaining of joint pain. Which of the following findings suggests the diagnosis of osteoarthritis?

Answer

Morning stiffness lasting more than an hour

Question

Intracapsular hip fractures are prone to non-union and avascular necrosis from the disrupted blood supply. In order to avert this, patient with hip fracture are usually scheduled for:

Answer

Hemiarthroplasty.

Question

Which of the following factors should be considered in deciding the levels of amputation?

Answer

Both A and B

Question

Which of the following factors are involved in the development of osteoporosis?

Answer

Cigarette smoking, inadequate physical activity, late menopause

Question

Which of the following conditions is the most common complication of osteoporosis?

Answer

Fragility fractures

Question

_____ is a metabolic disease that causes poor and delayed mineralization of the bone cells in mature bones

---

Answer

Osteomalacia

Question

Which signs/symptoms indicate to the nurse the client has developed osteoporosis?

Answer

The client has lost 1 inch in height.

Question

A client with rheumatoid arthritis is admitted to the hospital. On physical examination of this client, the nurse should expect to find:

Answer

Small joint involvement

Question

What is the indication for immobilization of affected part in the management of osteomyelitis?

Answer

To decrease discomfort and to prevent pathologic fracture of the weakened bone.

Question

Which foods should the nurse recommend to a client when discussing sources of dietary calcium?

Answer

Yogurt and dark-green, leafy vegetables

Question

The term contusion refers to:

Answer

a soft tissue injury resulting from a blow or blunt trauma.

Question

The paraplegic client is being admitted to a medical unit from home with a stage IV pressure ulcer over the right ischium. Which assessment tool should be completed on admission to the hospital?

Answer

Complete the Braden Scale.

Question

The nurse in a long-term care facility is teaching a group of new unlicensed assistive personnel. Which information regarding skin care should the nurse emphasize?

Answer

Turn clients who are immobile at least every two (2) hours.

Question

What is the scientific rationale for placing lift pads under an immobile client?

Answer

The pads will help prevent friction shearing when repositioning the client.

Question

After completing a scheduled every-2-hour turn by turning the client to the left side, the nurse notices a reddened area over the coccyx. The area blanches when the nurse compresses it with thumb pressure. One hour later, the nurse reassesses the area and finds the redness has disappeared. How should the nurse document this area?

Which foods should the nurse recommend to a client when discussing sources of dietary calcium?

Answer

Yogurt and dark-green, leafy vegetables

PHS426

Question

A prerequisite for effective drug control is that prescribing, dispensing and the sale of drugs be undertaken by duly authorized persons.

Answer

True

Question

The first step in the development of an essential drug programme is ..

Answer

Selection of essential drugs

Question

The following are steps involved in the preparation of an essential drug system, except

---

Answer

None of the options

Question

The following are steps involved in the preparation of an essential drug system, except

---

Answer

None of the options

Question

Measures adopted by the government to ensure effective monitoring and evaluation of the National Drug Policy include the following, except

---

Answer

Non-monitoring of the effects of international trade agreements on Nigerian’s access to essential drugs

Question

Which of the following is not an action taken by the government for proper planning and implementaton of the National Drug Policy?

Answer

None of the Options

Question

Which of the following is not an action taken by the government for proper planning and implementaton of the National Drug Policy?

Answer

None of the Options

Question

Regarding the dispensing of drugs, only duly licensed pharmacists shall have the authority to supply, sell and dispense drugs to the public

---

Answer

True

Question

In every health care facility where there is a qualified and licensed medical practitioner, there shall be a qualified and licensed pharmacist to manage drugs

---

Answer

True

Question

In order to enhance total patient care, particularly as regards in- patients, government shall not promote the practice of clinical pharmacy in secondary and tertiary health care institutions

---

Answer

False

Question

As part of the regulations surrounding drug prescription, the following statements are true, except

---

Answer

Prescriptions are to be made using trade names

Question

Effective inspection of drug production and manufacturing facilities is critical to ensuring the quality, safety, and efficacy of drugs

---

Answer

True

Question

Steps taken by the government to achieve the greater reliance of local drug production include the following, except

---

Answer

All of the options

Question

Steps taken by the government to achieve the greater reliance of local drug production include the following, except

---

Answer

All of the options

Question

The Federal Ministry of ___ shall put in place an adequate machinery for monitoring the distribution of donated drugs

---

Answer

Health

Question

Donated drugs shall have at least ___ months remaining shelf life after arrival in the Country

---

Answer

Twelve

Question

All drugs donations for use in the country shall be processed through the ___ Ministry of Health as a clearing house to ensure compliance with the guidelines for drug donations.

Answer

Federal

Question

All donated drugs are relevant to the emergency situation for which they have been donated

---

Answer

False

Question

Advantages of self-medication include the following, except

Answer

None of the options

Question

The minimum information requirement on the label of a dispensed medicine shall be the following, except

---

Answer

None of the options

Question

A prerequisite for effective drug control is that prescribing, dispensing and the sale of drugs be undertaken by duly authorized persons.

Answer

True

Question

The first step in the development of an essential drug programme is ..

Answer

Selection of essential drugs

Question

The following are steps involved in the preparation of an essential drug system, except

---

Answer

None of the options

Question

The following are steps involved in the preparation of an essential drug system, except

Answer

Non-monitoring of the effects of international trade agreements on Nigerian’s access to essential drugs

Question

Which of the following is not an action taken by the government for proper planning and implementaton of the National Drug Policy?

Answer

None of the Options

Question

Which of the following is not an action taken by the government for proper planning and implementaton of the National Drug Policy?

Answer

None of the Options

Question

Regarding the dispensing of drugs, only duly licensed pharmacists shall have the authority to supply, sell and dispense drugs to the public

Answer

True

Question

In every health care facility where there is a qualified and licensed medical practitioner, there shall be a qualified and licensed pharmacist to manage drugs

Answer

True

Question

In order to enhance total patient care, particularly as regards in- patients, government shall not promote the practice of clinical pharmacy in secondary and tertiary health care institutions

Answer

False

Question

As part of the regulations surrounding drug prescription, the following statements are true, except

---

Answer

Prescriptions are to be made using trade names

Question

Effective inspection of drug production and manufacturing facilities is critical to ensuring the quality, safety, and efficacy of drugs

---

Answer

True

Question

Steps taken by the government to achieve the greater reliance of local drug production include the following, except

---

Answer

All of the options

Question

Steps taken by the government to achieve the greater reliance of local drug production include the following, except

---

Answer

All of the options

Question

The Federal Ministry of ___ shall put in place an adequate machinery for monitoring the distribution of donated drugs

---

Answer

Health

Question

Donated drugs shall have at least ___ months remaining shelf life after arrival in the Country

---

Answer

Twelve

Question

All drugs donations for use in the country shall be processed through the ___ Ministry of Health as a clearing house to ensure compliance with the guidelines for drug donations.

Answer

Federal

Question

All donated drugs are relevant to the emergency situation for which they have been donated

Answer

False

Question

Advantages of self-medication include the following, except

Answer

None of the options

Question

The minimum information requirement on the label of a dispensed medicine shall be the following, except

Answer

None of the options

PHS424

Question

At the final ejaculate in males, sperm consists of ....

Answer

0.1

Question

Prenatal care generally consists of the following except ...

Answer

Teaching child spacing method

Question

The hormone controlling sperm production is.....

Answer

Follicle stimulating hormone

Question

The female gonads are.....

Answer

The ovaries

Question

The rugae part of the vagina is formed by.....

Answer

Stratified squamous epithelium

Question

The male hormone secreted after puberty is....

Answer

Testosterone

Question

During early foetal life, the testes develop in the....

Answer

Lumbar region of the abdominal cavity

Question

Spermatozoa (sperm) are produced in...

Answer

Seminiferous tubules

Question

The reproductive glands of the male...

Answer

Testes

Question

The scrotum consists of....

Answer

Two compartments

Question

One of these does not indicate intra uterine growth retardation

---

Answer

Maternal weakness and fatigue

Question

One of these is the complication of intra uterine death...

Answer

Hypofibrinogenaemia

Question

Excessive vomitting during the first trimester of pregnancy is called....

Answer

Hyperemesis gravidarum

Question

One of these is not a sign of intra uterine death

Answer

Maternal hyperexia

Question

One of these does not affect proper prenatal care

Answer

Multiparity

Question

One of these is not part of the internal organs of of the female reproductive system……

Answer

Two mammary glands

Question

Montgomery’s tubercles are made up of…….

Answer

Sebaceous glands

Question

The testes are surrounded by...

Answer

Three layers of tissue

Question

The proliferative phase of the mentrual cycle usually lastts.....

Answer

10 days

Question

Descent of the testes into the scrotum should be complete by.....

Answer

8th month of foetal life

Question

At the final ejaculate in males, sperm consists of ....

Answer

0.1

Question

Prenatal care generally consists of the following except ...

Answer

Teaching child spacing method

Question

The hormone controlling sperm production is.....

Answer

Follicle stimulating hormone

8th month of foetal life

PHS422

Question

A pulse rate of 120 beats per minute in an infant is normal

Answer

True

Question

A pulse rate of 50 beats per minute in an infant is normal

Answer

False

Question

A pulse rate of 75 beats per minute in an adult is normal

Answer

True

Question

The most convenient place to take a pulse is the ___ surface of the wrist.

Answer

Anterior

Question

The normal body temperature is ___ degrees Centigrade

Answer

Question

An individual's body temperature can be obtained from ...

Answer

All the options

Question

An individual's body temperature can be obtained from ...

Answer

All the options

Question

The thermoregulatory centre of the body is located in the ___ of the brain.

Answer

Hypothalamus

Question

The degree of hotness or coldness within a substance which can be measured against a scale is known as ...

Answer

Temperature

Question

___ is described as the degree of intensity of heat.

Answer

Temperature

Question

The act that makes use of a stethoscope during examination is known as ...

Answer

Auscultation

Question

Observation by sound is also known as...

Answer

Auscultation

Question

Tapping the finger over a body cavity is a procedure performed during..

Answer

Percussion

Question

Observation by sight is also known as..

Answer

Inspection

Question

Observation by sound is also known as...

Answer

Auscultation

Question

Which of the following signifies observation by touch?

Answer

Palpation

Question

Which of the following instruments in used in depressing the tongue during examination?

Answer

Spatula

Question

Which of the following instruments is used to examine the eyes?

Answer

Ophthalmoscope

Question

The following are examples of equipment used during physical examination, except..

Answer

Telescope

Question

Qualities of a good examiner include the following, except

Answer

None of the options

PHS404

Question

_____is one of the ways of protecting ourselves from radiations.

Answer

Time reduction

Question

_____counters measure the dose rate of ionizing radiation directly.

Answer

Geiger counters

Question

Ion-chamber_____resembles pen, and can be clipped toone's clothing.

Answer

Dosimeters

Question

_____measures an absolute dose received over a period of time.

Answer

Dosimeters

Question

Exposure to ionizing radiations over an extended period of time is called_____exposure.

Answer

Chronic

Question

_____radiation exposure is an exposure to ionizing radiation which occurs during a short period of time.

Answer

Acute

Question

_____is one of the examples of industries where occupational exposure is a concern

Answer

Fuel cycle

Question

Radon-222 is produced by the decay of _____

Answer

Radon-226

Question

One of the major radionuclides of concern for terrestrial radiation(external terrestrial sources) is_____

Answer

Potassium

Question

The sun produces solar particlesthat are mostly_____

Answer

Protons

Question

Aquous solution have_____vapour pressure.

Answer

Low

Question

_____means material used to dissolve another material.

Answer

Solvent

Question

_____is one of the effects of chemical hazard.

Answer

Mutagenicity

Question

_____is one of the effects on which chemical hazard depend.

Answer

Amount

Question

Some less tangible factors associated with poor illumination are_____ , in number

---

Answer

5

Question

Good and sufficient_____is aimed at promoting productivity, safety, health and wellbeing of workers.

Answer

Lighting

Question

_____is a health hazard in many occupational settings.

Answer

Noise

Question

_____in 1700 described how workers who hammer copper have their ears injured due to xposure to the sound

---

Answer

Ramazini

Question

Industry specific studies reveal that_____of Carpenters reported that they had a perceived hearing loss

---

Answer

0.44

Question

_____is defined as unwanted sound.

Answer

Noise

Question

_____is one of the ways of protecting ourselves from radiations.

Answer

Time reduction

Question

_____counters measure the dose rate of ionizing radiation directly.

Answer

Geiger counters

Question

Ion-chamber_____resembles pen, and can be clipped toone's clothing.

Answer

The sun produces solar particlesthat are mostly_____

Answer

Protons

PHS402

Question

_____ is principle concerning right and wrong or good and bad behaviour.

Answer

Morality

Question

The _____theory of law is basically an attempt to overcome the flaws of the natural and positive theories.

Answer

Utilitarian

Question

The War Against Indiscipline was made during _____ administration.

Answer

Idiagbon

Question

The third tier of government is _____.

Answer

Local government area

Question

The Senate and the House of Representatives constitutes the _____.

Answer

National Assembly

Question

The process by which a law is made by a legislative body is called _____.

Answer

Law making

Question

Overcrowding, poor ventilation and poor sanitory condition can be described as _____.

Answer

Nuisance

Question

During military administration, law making is by _____.

Answer

All of the options

Question

Resting on some ones fence or gate without permission constitues a _____.

Answer

Trespass

Question

The 1999 Constitution provides for a _____ legislature at the federal level.

Answer

Bi-camera

Question

Nigerian legislations, Judicial Precedent or case law, Customary Law, Law reform and legal writings are the _____ of Law in Nigeria.

Answer

Sources

Question

Nobody can invade the privacy of another is part of the _____.

Answer

Law

Question

The constitution, Acts of the National Assembly, Laws of a State and Bye-laws of a Local Government are examples of _____ law.

Answer

Statute

Question

Consumer protection laws, drug laws and human rights laws are some of the sources of _____.

Answer

Public health law

Question

The types of laws that are made during democractic government include _____.

Answer

All of the options

Question

_____ is a law making powers of government in Nigeria.

Answer

All of the options

Question

_____ law are those laws which are indigenous to members of a given community based on their customs and traditions.

Answer

Customary

Question

In Nigeria, the four children policy was made by _____administration?

Answer

Babaginda

Question

This statement "a marriage between a man and a person who had undergone a sex change was a nullity" is true.

Answer

I agree

Question

_____ is a very complex phenomenon which can be studied from many different perspectives.

Answer

Law

Question

_____ is principle concerning right and wrong or good and bad behaviour.

Answer

Morality

Question

The _____theory of law is basically an attempt to overcome the flaws of the natural and positive theories.

PHS421

Question

A two way systematic conversation between an investigator and respondent is called ___

Answer

interview

Question

Inadequate response,interviewer bias non response are some of the limitations of ____

Answer

interview

Question

A member of a population is called____

Answer

element

Question

References are important, because they allow others to build on your research

Answer

TRUE'

Question

Population value is called _____

Answer

parameter

Question

Questionaire is filled by ____

Answer

respondent

Question

In research reporting the introduction must come before ____

Answer

literature review

Question

Sampling which provides for a known non zero chance of selection

Answer

probability sampling

Question

An instrument used in method is called ____

Answer

tool

Question

Hypothesis which explain relationship between two variables is ____

Answer

relational hypothesis

Question

Population census is an example of research survey

Answer

TRUE

Question

Research conducted through experimentation and observation is called

Answer

empirical research

Question

Research conducted in class room atomsphere is called

Answer

empirical study

Question

A research which follow a case study method is called

Answer

clinical or diagnostic

Question

fundamental research is also known as pure research

Answer

TRUE

Question

Research conducted to find solution for an immediate problem is called

Answer

applied research

Question

Facts or information's are analysed and critical evaluation is made in

Answer

analytical research

Question

Example for fact finding study is

Answer

survey

Question

Research carried out for knowledge sake is

Answer

pure research

Question

Research is classified on the basis of intent and methods

Answer

TRUE

Question

A two way systematic conversation between an investigator and respondent is called ___

Answer

EHS409

Question

Self-cleansing velocity is required if there are solid sediments in sewerage pipes.

Answer

I agree

Question

Sewerage for conveying waste-water in a septic tank is called _____.

Answer

Settled sewerage

Question

_____ is used as a means to describe the amount of organic nitrogen present in the water.

Answer

NBOD

Question

_____ is the amount of oxygen dissolved in water.

Answer

COD

Question

A _____ test is performed when a quick determination of oxygen demand is needed.

Answer

COD

Question

According to Anuradha, 2006, the composition of suspended solids in aa average waste-water is _____.

Answer

200 mg/l

Question

The parameter that has the highest concentration in a typical waste water is _____.

Answer

Total Coliforms

Question

The peak flow rate in a residential building is influenced by the _____.

Answer

All of the options

Question

One of the highest users of water are _____.

Answer

Teenagers

Question

The amount of waste-water entering the treatment system is called the _____.

Answer

Hydraulic loading rate

Question

Another name for The sewers is _____.

Answer

Pipes

Question

_____ is the network of underground waste pipes which are employed to collect the waste-water from the community.

Answer

Sewerage system

Question

Sullage water is the same as _____.

Answer

Gray water

Question

_____ is synonymous to the liquid waste of a community.

Answer

Sewage

Question

The presence of bacteria in a water is an indication of _____.

Answer

Faecal contamination

Question

Black- water, gray-water and yellow-water are examples of _____.

Answer

Waste-water

Question

Water whose iron concentration is more than 5 ppm, requires _____ filtration.

Answer

Oxidation

Question

_____ water does not require further treatment.

Answer

A and C

Question

The waste-water that arises as result of surface run-off from rain is called _____.

Answer

Storm Wastes

Question

Sewage water flows under _____.

Answer

Gravity

Question

Self-cleansing velocity is required if there are solid sediments in sewerage pipes.

Answer

I agree

PHS403

Question

Armed conflicts between two states describe a ____ violence

Answer

collective

Question

Which of the following is not a category of violence?

Answer

None of the options

Question

___ broad categories of violence are recognised, depending upon who commits the violent act

Answer

3

Question

Irreversible brain damage occurs ____ following a drowning incident

Answer

4-6 minutes

Question

Males have higher drowning rates than females.

Answer

True

Question

Children under 5 years have the highest drowning mortality rate worldwide.

Answer

True

Question

Which of the following risk factors describe children under 5 years having the greatest drowning mortality rate worldwide?

Answer

Age

Question

The following are important risk factors for drowning, except

---

Answer

None of the options

Question

Drowning outcomes are classified as ___

Answer

All of the options

Question

___is the process of experiencing respiratory impairment from unintentional submersion/immersion in liquid

---

Answer

Drowning

Question

Irrigating the whole body with water after contamination is called…

Answer

Skin decontamination

Question

The act of transporting a patient in the head-down semi prone position to minimise the risk of inhalation of gastric contents is called…

Answer

Emergency stabilization

Question

Which of the following is not an basic management in the event of poisoning?

Answer

Gut contamination

Question

The ingestion of ___ is regarded as toxic.

Answer

Boron

Question

Consumption of the following substances constitute household toxic ingestion, except

Answer

Baby toys

Question

A ___ ingestion occurs after an individual consumes a non-edible product that usually does not produce symptoms

Answer

Non-toxic

Question

The following are the categories of poisoning, except

Answer

None of the options

Question

Suicidal behaviour is an example of ___ violence

Answer

self-directed

Question

Child abuse is an example of ___ violence.

Answer

Interpersonal

Question

Rape is an example of ____ violence

Answer

Interpersonal

Question

Armed conflicts between two states describe a ____ violence

Answer

collective

Question

Which of the following is not a category of violence?

Answer

None of the options

Question

___ broad categories of violence are recognised, depending upon who commits the violent act

---

Answer

3

Question

Irreversible brain damage occurs ____ following a drowning incident

---

Answer

4-6 minutes

Question

Males have higher drowning rates than females.

Answer

True

Question

Children under 5 years have the highest drowning mortality rate worldwide.

Answer

True

Question

Which of the following risk factors describe children under 5 years having the greatest drowning mortality rate worldwide?

Answer

Age

Question

The following are important risk factors for drowning, except

---

Answer

None of the options

Question

Drowning outcomes are classified as ___

Answer

All of the options

Question

___is the process of experiencing respiratory impairment from unintentional submersion/immersion in liquid

Answer

Drowning

Question

Irrigating the whole body with water after contamination is called…

Answer

Skin decontamination

Question

The act of transporting a patient in the head-down semi prone position to minimise the risk of inhalation of gastric contents is called…

Answer

Emergency stabilization

Question

Which of the following is not an basic management in the event of poisoning?

Answer

Gut contamination

Question

The ingestion of ___ is regarded as toxic.

Answer

Boron

Question

Consumption of the following substances constitute household toxic ingestion, except

---

Answer

Baby toys

Question

A ___ ingestion occurs after an individual consumes a non-edible product that usually does not produce symptoms

---

Answer

Non-toxic

Question

The following are the categories of poisoning, except

Answer

None of the options

Question

Suicidal behaviour is an example of ___ violence

Answer

self-directed

Question

Child abuse is an example of ___ violence.

Answer

Interpersonal

Question

Rape is an example of ____ violence

Answer

Interpersonal

PHS401

Question

The steps in the counseling process is described as _____

Answer

GATHER

Question

_____is a type of counseling.

Answer

Couple

Question

There are_____types of counseling.

Answer

3

Question

In postpartum infection, when white blood cells are present in numbers greater than_____high power field, infection is present.

Answer

5-10 per

Question

There are_____purposes of the postpartum visit.

Answer

6

Question

Multiparas with prolonged labor must be evaluated frequently to prevent uterine_____

Answer

Rupture

Question

There are_____types of abnormal labor.

Answer

Two

Question

Progress toward birth is usually made when the_____are frequent and strong.

Answer

Contractions

Question

Babies not born at home should be properly identified to prevent_____

Answer

Confusion

Question

Plastic clamps, rubber bands, and_____are often used for tying the baby's cord.

Answer

String

Question

The steps in the counseling process is described as _____

Answer

GATHER

Question

_____is a type of counseling.

Answer

Couple

Question

There are_____types of counseling.

Answer

3

Question

In postpartum infection, when white blood cells are present in numbers greater than_____high power field, infection is present.

Progress toward birth is usually made when the_____are frequent and strong.

Answer

Contractions

Question

Babies not born at home should be properly identified to prevent_____

Answer

Confusion

Question

Plastic clamps, rubber bands, and_____are often used for tying the baby's cord.

Answer

String

Question

Careful observation at the postpartum visit will lead to early_____of problem.

Answer

Identification

Question

Children are immunized against the six killers' diseases such as meales, whooping cough, tuberculosis, _____tetanus and Polio.

Answer

Diphtheria

Question

Good_____makes a child healthy and able to resist some infections.

Answer

Nutrition

Question

Conjunctivitis,_____red eyes with swelling and a sticky discharge, is common in children.

Answer

Painful

Question

A simple and inexpensive treatment for most cases of diarrhoea is oral rehydration_____

Answer

Salts

Question

Diarrhoea infections can cause mortality in children due to large loss of fluid and_____

Answer

Electrolytes

Question

The symptoms of malaria in infants in endemic area are; poor feeding, vomitting and_____

Answer

Pallor

Question

Staphylococcus aureus is the causative organism of_____

Answer

Mastitis

Question

Urinary tract infections should be treated with_____drugs for 5days or antibiotics for 5-7days.

Answer

Sulphur

Question

The patient with urinary tract infection will usually have urinary frequency and_____ on urination.

Answer

Burning

NSS412

Question

_____ is a predetermined sum of money paid by HMOs on behalf of a contributor for services rendered by the provider

---

Answer

Capitation

Question

Government subsidies on drugs has the potential to cause supply of drugs to _____

Answer

Increases

Question

The basic determinants of supply include which of the following?

Answer

All of the above

Question

If the price of production of drug is higher, it may cause the supply to _____

Answer

Reduce

Question

Which one of the following factors influence demand for a good?

Answer

All of the above

Question

The following is true about the principles of NHIS EXCEPT

Answer

Those with higher health needs will subsidize for those with lower health needs

Question

A nurse manager wants to buy a hospital equipment for her facility, she gives up the value of the second best of that equipment after a first choice was made. This term is called _____?

Answer

Opportunity cost

Question

In defining economics, which one of the following does NOT apply?

Answer

Use of limited resources to achieve maximum satisfaction of human material wants

Question

Any tangible object that has the potential to satisfy human wants is called _____

Answer

Goods

Question

The concern of economists are centered on the _____ of human beings

---

Answer

Wants

Question

The set of rules that govern how scarce resources are used to produce goods and services that satisfy human wants is called _____

Answer

Economic systems

Question

NHIS establishment was informed by one of the following reasons EXCEPT

Answer

Over professionalism of health care workers

Question

The increase in sales or service tax will cause a corresponding _____ in cost of goods and services

---

Answer

Increase

Question

The quantity of product that consumers will purchase at each possible price is called _____

Answer

Demand

Question

If the price of a product increases, if is expected that the quantity of product supplied will _____

Answer

Increase

Question

When an individual makes a choice and gives up the value of the second best for the first choice made. He is said to have made _____

Answer

A rational choice

Question

The benefit consumers get from the purchase of goods and services is called _____

Answer

Utility

Question

The following are human basic needs EXCEPT

Answer

Self-actualization

Question

The implementation of NHIS is planned to be in phases to cover which category of Nigerians

Answer

All of the above

Question

Which of the following is not a reason why wants of a man change over time?

Answer

Material things

Question

_____ is a predetermined sum of money paid by HMOs on behalf of a contributor for services rendered by the provider

Answer

Capitation

NSS410

Question

---------- is the level of analysis that deal with groups and group relations

---

Answer

Group level

Question

The following are barriers to communication except .....

Answer

Structural function

Question

..... Is the officially recognised route for task related messages in organization

---

Answer

Formal communication

Question

The following are the types of communication that show feelings through movement except .....

Answer

Dancing

Question

..... involves face to face discussion and interviews.

Answer

Verbal communication

Question

..... Is the decoder of the message.

Answer

Receiver

Question

The information the sending source may want to share must first be .....

Answer

Decoded

Question

The word communication are derived from the ..... Word communis.

Answer

Latin

Question

The following are the functions of manager except .....

Answer

Contemplating

Question

..... is the first manager's function

Answer

planning

Question

Organizational structure of NHIS was structured into ..... Programmes.

Answer

six

Question

..... Find what is causing the problem by divination, rituals and incantation.

Answer

Spiritist

Question

The following are the types of traditional healers except .....

Answer

Community Extension worker

Question

Community Services are called ..... and .....

Answer

Improvement of excreta disposal and health education

Question

Organizational environment includes the following except ----------

Answer

Economic and cultural trends

Question

---------- depend on the technology of computers, telephone system and copiers.

Answer

Modern Organization

Question

The relationship that exist among these level of organization of health services is called ……

Answer

Referral

Question

There are …… Hierarchical levels in the organization of health services in Nigeria?

Answer

3

Question

The following are basic terms in inventory model except ……

Answer

Lad time

Question

Interview can be closed into ---------- broad categories.

Answer

2

Question

---------- is the level of analysis that deal with groups and group relations

NSS403

Question

A hernia is a protrusion of the intestine through the abdominal wall, the risks factors include the following except _____

Answer

Irritability

Question

Increased pressure in the GI tract also can result in

Answer

Perforation and peritonitis

Question

The absence of bile in vomitus indicates_____

Answer

That bile is not regurgitating into the stomach

Question

Which of the following does not occur in acute cholecystitis?

Answer

Jaundice

Question

What diagnostic test would be used to evaluate Hyperthyroidism?

Answer

Serum thyroxine and triiodothyronine tests

Question

_____ occur when there is a weakening of the muscular collar around the oesophageal and diaphragmatic junction

Answer

Hiatal Hernia

Question

One of the following is a diagnostic Tests for stomatitis

Answer

Platelet count

Question

Diuretics are ordered for a patient. What would be the best time of day for the nurse to schedule this medication?

Answer

Morning

Question

Causes of hypercalcemia does not include one of the following

Answer

Decreased potassium excretion

Question

A condition where water and sodium loss in varying proportions from the body is known as

Answer

Hypovolemia

Question

_____is an acute or chronic infection involving a bone.

Answer

Osteomyelitis

Question

Which of the following is true about diverticulosis

Answer

Acquired small pouches

Question

One of the following is not a pharmacological management for haemorrhoids.

Answer

Anticholinergics

Question

Perianal pain and itching, bleeding, and intense pain are indicative of _____

Answer

External haemorrhoids

Question

Haemorrhoids are distended, tortuous veins found in the _____

Answer

Rectum and anus

Question

One of the following is a post-operative care for appendectomy

Answer

Diet

Question

Clinical manifestations of appendicitis is in three stages except _____

Answer

Late stage

Question

One of these is not a component of haemodialysis

Answer

Catheter

Question

Changes that occur in musculoskeletal system due to immobility

---

Answer

Decrease muscle endurance ,strength and mass

Question

Which of the following is the appropriate route of administration for insulin?

Answer

Subcutaneous

Question

A hernia is a protrusion of the intestine through the abdominal wall, the risks factors include the following except _____

NSS402

Question

The amount of drug needed to achieve maximal effect is called

Answer

Dosage

Question

The nurse is caring for a patient who is on Haloperidol. The patient complained of restless, muscle stiffness and excessive salivation, the drug of choice would be;

Answer

Trihexyphenidyl 5mg

Question

Which of the following disorders has been implicated with substantial psychopathology?

Answer

Epilepsy

Question

The most persistent adverse effect of ECT is

Answer

Retrograde amnesia

Question

rTMS is found to have antidepressant properties when applied to

---

Answer

Dorsolateral prefrontal cortex (DLPFC)

Question

The most common indication of ECT is:

Answer

Major depression

Question

Which of the following is NOT a recommended preparation for ECT procedure?

Answer

Administration of an anticonvulsant 30 minutes before ECT

Question

Which is the best unit for quantification of ECT stimuli?

Answer

Millicoulombs (mC)

Question

Factors predisposing to postictal confusional state include, all EXCEPT:

Answer

A younger age group

Question

What is the average mortality rate with ECT (modified)?

Answer

3-4 per 100,000

Question

What is considered as the gold standard for confirmation of seizure in ECT?

Answer

Electroencephalography (EEG)

Question

What is the best accepted placement of electrodes in unilateral ECT?

Answer

D'Elia position

Question

What is the minimum seizure duration required for effectiveness of ECT?

Answer

30 to 90 seconds

Question

Which of the following drugs is associated with lower seizure thresholds when administering ECT?

Answer

Lithium

Question

As per the current evidence, which statement is NOT correct?

Answer

Unilateral ECT is more likely to cause cognitive deficits.

Question

The sequece of administration of medications in anesthesia for ECT is:

Answer

Atropine---thiopentone/methohexitol---succinylcholine

Question

The first therapeutic use of electrically induced seizures in the treatment of mental disorders is related to

Answer

Luigi Bini and Ugo Cerletti

Question

The first use of convulsive therapy for the treatment of a psychiatric disorder in modern times is attributed to

Answer

Ladislaus von Meduna

Question

What does the common liability to addiction hypothesis postulate?

Answer

Addiction is attributed to underlying biological processes

Question

Which of these hypotheses reflects the idea that certain behaviors, such as using soft drugs, favor the later graduation to illicit and more addictive agents?

Answer

Gateway hypothesis

Question

The amount of drug needed to achieve maximal effect is called

Answer

Dosage

Question

The nurse is caring for a patient who is on Haloperidol. The patient complained of restless, muscle stiffness and excessive salivation, the drug of choice would be;

NSS411

Question

To select subject matter, one should consider students

Answer

I.Q

Question

_____ Theory suggest that learning will occur and behavior will be shaped in the direction the teacher wants if the behavior is rewarded.

Answer

B.F Skinner

Question

The acronym “PTA” refers to_____?

Answer

Parents teachers’ association

Question

When, what, why and how, to teach is the main task of_____?

Answer

Educational psychology

Question

The curriculum is affected by the following factors

Answer

All of the above

Question

Curriculum based on the thinking of John Dewey is_____?

Answer

Learner centred curriculum

Question

Which of the following is not a major factor affecting learning?

Answer

Religious factor

Question

Which of the following is not a natural factor influencing learning?

Answer

Home environment

Question

Subject centred designs revolve around

Answer

Content

Question

In the subject centred curriculum, the important element is

Answer

Division of knowledge

Question

_____ design is the arrangement of organized knowledge for instruction by men of knowledge who command respect among academic colleagues and possess authority in their field of endeavor

---

Answer

Discipline design

Question

What the child studies in a class is decided by

Answer

Teacher

Question

Which of the following is not an evidence of learning?

Answer

Development of instinctive behaviours

Question

_____ designs' area of focus is the problem of individual and social of living which have very general, broad and all embracing

---

Answer

Problem centred design

Question

Which of the following is an advantage of the broad field design?

Answer

It integrates different subject that are related together and so present a harmonious package to the learner

Question

One of the following is not a criticism against the progressive or learners centred design

Answer

The focus is narrow

Question

_____process enables us to see whether our objectives are being met?

Answer

Evaluation

Question

According to learning is a relatively permanent change in behavior which comes about as a result of experience

Answer

O’cornell

Question

Which of these is not a type of core curriculum

Answer

Domain’s core

Question

Which of the following is a feature of curriculum design?

Answer

All of the above

Question

To select subject matter, one should consider students

NSS409

Question

_____ is a way of organizing data for analysis by grouping them into convenient classes.

Answer

frequency distribution

Question

Mode is the _____ number occurring frequency

Answer

Highest

Question

Sample is a part of _____

Answer

Entities

Question

Population is the collection of _____

Answer

Entities

Question

Variability and dispersions are basics _____ in statistics

Answer

Phenomena

Question

The two basic types of statistics are _____ and _____

Answer

Descriptive and inferential

Question

Biostatistics is a branch of statistics that pays more attention to _____ and _____

Answer

Medicine and human quality of life

Question

The _____ of every nation is assessed by several indicators

Answer

Health status

Question

Ingestion of adulterated paracetamol syrup occurred in _____ and _____ states in 1090

Answer

Osun and Pleateau

Question

Immunization services were initiated in _____ year under the EPI

Answer

1979

Question

According to your course material, the millennium goals are to be achieved between 1990 and -_____

Answer

2015

Question

The first_____ plan was between 1962 and 1968.

Answer

National development

Question

_____ - are collected from facilities and are channelled to the states through local goverment

Answer

Health data

Question

_____ year is the first ever formal pre-independence governmental planning for provision of health services for Nigeria population

Answer

1946

Question

Range is the difference between the _____ and_____ -- value in a set of observation

---

Answer

Smallest and largest

Question

There are _____ types of samples according to your teaching materials

---

Answer

five

Question

A random sampling can be defined in one of the following

Answer

Each item with population has both equal and lowest opportunity of being selected

Question

_____ and _____ are ways of presenting data in graphical forms

---

Answer

Histogram and pie charts

Question

_____ is a way of organizing data for analysis by grouping them into convenient classes.

Answer

frequency distribution

Question

Statistics is the science of collecting, analysing and interpreting _____

Answer

Numerical information

Question

_____ is a way of organizing data for analysis by grouping them into convenient classes.

Answer

Histogram and pie charts

Question

_____ is a way of organizing data for analysis by grouping them into convenient classes.

Answer

frequency distribution

Question

Statistics is the science of collecting, analysing and interpreting _____

Answer

Numerical information

NSS407

Question

Probability sampling include

Answer

duster sampling

Question

___design does not allow the researcher to control assignments of subjects to conditions

Answer

Quasi experimental design

Question

Example of non-probability sample is _____

Answer

Quota Sampling

Question

The totality of the universe from which the subjects for a study are selected, and to whom the results of the study would be generalized is called ____

Answer

Study population

Question

Data can be collected by the following except

Answer

All of the above

Question

The choice of research design depend on all except _____

Answer

Researcher focus

Question

____ are not of primary importance in the research but the may influence the research negatively

---

Answer

Extraneous variables

Question

Non-experimental design included the following except

Answer

Descriptive study

Question

___ lacks randomization and control

Answer

The Ex Post Facto Design

Question

The steps in experimental design include

Answer

All of the above

Question

Predictive statement mode by the researcher which will be tested after data collection is called

Answer

Hypothesis

Question

The _____ sets a boundary for which the research intends to cover.

Answer

Scope of the study

Question

The ____ should identify the key variables in the study

Answer

Problem statement

Question

The first step of research process is _____

Answer

Problem formulation

Question

That variable that is not manipulated by the researcher is called

Answer

Dependant variable

Question

Examples of non experimental research is _____

Answer

Descriptive

Question

Guide to literature review include

Answer

Note other reader of the rtide

Question

_____ research provide a cause-effect relationship between variables under study

Answer

Experimental

Question

Study carried out to satisfy a desire to increase the knowledge base in an area of interest is _____

Answer

Basic research

Question

Effort to reduce interference in a study is called

Answer

Control

Question

Probability sampling include

Answer

duster sampling

Question

___design does not allow the researcher to control assignments of subjects to conditions

---

Answer

Quasi experimental design

Question

Answer

Control

NSS401

Question

. Delusion is a disorder of:

Answer

. Perception

Question

. Delusion is seen in all, excep

Answer

. Depression

Question

. A patient with pneumonia for 5 days ceases to recognize the doctor and staff, complains of scorpions attacking him and is in altered sensorium. This condition is known as:

Answer

Delirium

Question

. Pseudo-hallucinations are not said symptoms of:

Answer

. Hysteria

Question

A 50-year-old man complains of slowness of movements, postural instability, tremor, rigidity, and memory loss. The diagnosis is

Answer

Parkinsonism

Question

The best test for organic brain syndrome is:

Answer

Bender-gestalt test

Question

Tactile hallucinations are associated with

Answer

All of the above

Question

All the following are true about dementia, except_____

Answer

Hallucinations are not common

Question

. Auditory hallucinations are seen in all of the following except

Answer

Hysteria

Question

Delusion is a false belief which is

Answer

Comprehensible

Question

. A false belief unexplained by reality, which is shared by a number of people is:

Answer

. Superstition

Question

Mini mental scale in psychiatry interview is

Answer

Dose related in psychiatric interview

Question

Peptic ulcers are uncommon in:

Answer

Depressives

Question

Reversible dementia is a feature of

Answer

Hypothyroidism

Question

Fluctuating level of consciousness is seen in:

Answer

Delirium

Question

Condition tertiary to anxiety neurosis is seen in

Answer

Hyperthyroidism

Question

Depersonalisation is a disorder of:

Answer

Perceptions

Question

. One of the following is a disorder of thought

Answer

. Delusion

Question

The following is suggestive of an organic cause of the behavioural symptoms:

Answer

Prominent visual hallucinations

Question

Signs of organic brain damage are evident on

Answer

Bender gestalt test

Question
