Score: 10/10

The percentage increase in the prices of five items (A, B, C, D and E) are respectively 15%, 35%, -10% -7% and 12%. What is the mean percentage change? _ Answer: 9%

Given that group of girls and boys exist in equal number, and assuming that 5% of the boys are colour blind and that 10% of the girls are colour blind, evaluate the probability that, having drawn a colour-blind person, this is a female _ Answer: 0.6666

Of 12 accounts held in a file, four contain a procedural error in posting account balances. If an auditor samples three accounts randomly, what is the probability that at least one will contain the error? _ Answer: 0.75

Two cards are drawn from a deck of 52 cards. Find the probabilities of the event that the first card is a king and the second a figure _ Answer: 0.0165

The mean and the median wages of a group of workers are N350 and N340 respectively, what is the modal wage? _ Answer: N320

The number of apples sold on a particular day by a fruit seller are 2, 4, 7, 10, 10, 10, 12, 12, 14, 15. Determine the value at the 30th percentile _ Answer: 8.5

During one month the ratio of millet prices to corn was 4.5, whereas during the next month the ratio was 2.5. find the arithmetic mean of the ratios of corn to millet for the 2-month period. _

Answer: 0.3111

A principal of N1000 is invested at an 8% annual rate of interest. What will be the accrued interest after 6 years? _ Answer: N586.87

The mean, median, mode and the standard deviation of a set of numbers are 2360, 2340, 1980 and 650 respectively, what is the value of first coefficient of skewness? _ Answer: 0.5846

Of 300 business students, 100 are currently enrolled in economics and 80 are currently enrolled in business statistics. These enrollment figures include 30 students who are in fact enrolled in both courses. What is the probability that a randomly chosen student will be enrolled in either economics (E) or business statistics (B)? _ Answer: 0.5
