Gregorian Rayne:

MTH 103, TMA2.

1. Given that a = –i + 2j + 2k, b = 2i – 4j – 3k and c = 3i – 2j + k Find the magnitude of this vector Âa + Âb + Âc.

SOLUTION

a = –i + 2j + 2k

b = 2i – 4j – 3k

c = 3i – 2j + k

a + b + c = (–1 + 2 + 3)i + (2 – 4 – 2)j + (2 – 3 + 1)k

a + b + c = 4i – 4j + 0k

a + b + c = 4i – 4j = 4(i – j)

a + b + c = 4 (√[(1)² + (–1)²]

= 4 (√2) = 4√2.

2. Find the equation of the line through the point (6, 5) which is parallel to $3x – 4y = 0$

SOLUTION.

$3x – 4y = 0$

$4y = 3x$

$4y = 3x$

$y = 3/4x$, where $m = 3/4$

$y = mx + c$

$5 = 3/4(6) + C$

$C = 5 – 9/2$

$C = 10–9/2 = 1/2$

$y = 3/4x + 1/2$

$4y = 3x + 2$

$4y – 3x – 2 = 0$

Final solution: $3x – 4y + 2 = 0$.

3. What is the angle between these vectors $A = –2i – 5j + 2k$ and $B = –4i – 2j – 3k$

SOLUTION

$A = –2i – 5j + 2k$ and $B = –4i – 2j – 3k$.

$A.B = –2(–4) –5(–2) + 2(–3) = 8 + 10 – 6 = 12$

$|a|•|b| = √33 × √29$

$Ø = \text{arc cos } (12 / √33 × √29)$

$Ø = 67.175° ≈ 67°$.

4. Find the magnitude of this vector a = –i + 2j + 2k.

SOLUTION

Magnitude, otherwise known as Modulus = $\sqrt{((-1)^2 + 2^2 + 2^2)} = \sqrt{(1 + 4 + 4)} = \sqrt{9} = 3$.

5. Find the centre of the circle with this equation $x^2 + y^2 + 2x – 4y – 15 = 0$

SOLUTION

$x^2 + y^2 + 2x – 4y – 15 = 0$

$x^2 + 2x + y^2 – 4y = 15$

Using method of completing the squares

$x^2 + 2x + 2 + y^2 – 4y + 4 = 15 + 2 + 4$

$(x + 1)^2 + (y – 2)^2 = 21$

Comparing the above equation with $(x – a)^2 + (y – b)^2 = r^2$

Hence, centre = (–1, 2)

6. Evaluate i.(j × k) + j.(i × k) + k.(i. × k).

SOLUTION

This is a dot product of vector. In this case, it's important to note that i.j = 0, i.k = 0, j.k = 0.

Hence, final solution is k.k = 1.

7. Find the value of y in order that the vectors 7i + yj + k, 3i + 2j + k, and 5i + 2j + k are linearly dependent.

SOLUTION

Please, note that if two or more vectors are linearly dependent, it means that the vectors are dependent ('they depend on one another') if there is some relation among them (in addition to the

one with all 0 present for any collection of vectors). So, dependent means there is some relation other than all 0.

So, in this question, we are considering a (3 × 3) matrix system.

The first vector takes the first rows, and it follows a consequential order.

$$\begin{vmatrix} 7 & y & 1 \\ 3 & 2 & 1 \\ 5 & 3 & 1 \end{vmatrix} = 0$$

$7(2 – 3) – y(3 – 5) + 1(9 – 10) = 0$

$–7 – 2y –1 = 0$

$2y = 7 + 1 = 8$

$y = 8/2 = 4$

Hence, the solution is 4.

8. Evaluate the eccentricity of a rectangular hyperbola $x^2/a^2 – y^2/a^2 = 0$

SOLUTION

Eccentricity = c / a

$x^2 / a^2 – y^2 / a^2 = 1$

Where focal length, $c = \sqrt{(a^2 + a^2)} = \sqrt{(2a^2)} = a\sqrt{2}$

Eccentricity = $c / a = a\sqrt{2}/a = \sqrt{2} = 1.414$

9. Find the vector joining the points P(2, 3, 0) and Q(–1, –2, –4) directed from P to Q.

SOLUTION

P(2, 3, 0) and Q(–1, –2, –4)

PQ = (–1 – 2)i + (–2 –3)j + (–4 – 0)k

PQ = –3i – 5j – 4k

10. The answer to this last question is 24, though from the question, when you work it out thoroughly, you'd get a different answer "42" from the options, but well, NOUN is NOUN. 😀

1. Book selection in the library is the role of

a. Circulation librarian

b. Cataloguer

C. Acquisition librarian.....ans

d. Reference librarian

2. Mr adetayo bisi is analysing president buhari's speech, what type of information will generate?

a. Secondary information.....ans

b. Primary information

c. Information literacy

d. Tertiary information

3. What type of information would an anthropologist he needing often?

a. Objective information

b. current

c . Historical.....ans

d. Subjective information

4. Mr Tunde is a librarian working in the circulation selection,below are all his roles in the library except.

a. Keeping statistics of books consulted

b. Cataloguing.....ans

c. Books shelving

d. Charging and discharging of books

5. Under what source of information would the paintings of president Muhammadu buhari be categorized?

a. Secondary

b. Primary.....ans

c. Print

d. Tertiary

6. What type of resources are in public domain at no cost?

a. Date base

b. Open educational resources (OER).....ans

c. Textbooks

d. Journal

7. Why would a library user prefer to browse the open shelve instead of using the catalogue?

a. It is less stressful

b. In order to assess other relevant material on same topic.....ans

c. In order to see all work by the same author

d. It saves time

8. In the course of your research work,when do you consult the catalogues?

a. Analysing the literature

b. Literature identification.....ans

c. Synthesizing the literature

d. Writing the review

9. Generally libraries are funded by

a. Philanthropist

b. Parent institution.....ans

c. NGOs

d. Community

10. Mrs charity abiodun is analysing the literature in her present research work,what will be her next stage?

a. choosing an appropriate topic

b. Synthesizing the literature.....ans

c. Writing the review

d. Identify the literature

Benzene is an example of which type of hydrocarbon?

Answer: Aromatic hydrocarbon

The hydrocarbons are broadly classified into___?

Answer: Aliphatic, alicyclic and aromatic

When a compound has a carbon-nitrogen single bond it is called?

Answer: Amine

When a compound has carbon-nitrogen double bond it is called?

Answer: Imine

When a compound has carbon-nitrogen triple bond it is called?

Answer: Nitrile

Depending on the number of alkyl group attached to the nitrogen atom, the amines are classified as?

Answer: Primary, secondary and tertiary amines

In alcohol in which the oxygen atom is replaced by a sulphur atom is called?

Answer: Thiol

An aromatic compound which contained side chain hydroxyl group is called?

Answer: Phenol

The earliest nomenclature of the organic compounds were based on?

Answer: Their origin or properties

A functional group can be defined as?

Answer: An atom or group of atoms in a molecule which exhibit a characteristic chemical properties

Benzene is an example of which type of hydrocarbon?

Answer: Aromatic hydrocarbon

The hydrocarbons are broadly classified into___?

Answer: Aliphatic, alicyclic and aromatic

When a compound has a carbon-nitrogen single bond it is called?

Answer: Amine

When a compound has carbon-nitrogen double bond it is called?

Answer: Imine

When a compound has carbon-nitrogen triple bond it is called?

Answer: Nitrile

Depending on the number of alkyl group attached to the nitrogen atom, the amines are classified as?

Answer: Primary, secondary and tertiary amines

In alcohol in which the oxygen atom is replaced by a sulphur atom is called?

Answer: Thiol

An aromatic compound which contained side chain hydroxyl group is called?

Answer: Phenol

The earliest nomenclature of the organic compounds were based on?

Answer: Their origin or properties

A functional group can be defined as?

Answer: An atom or group of atoms in a molecule which exhibit a characteristic chemical properties

n-1 is the_____ for a given set of ungroupped data .

A. Standard deviation

B. Variable

C. Sampling

D. Sample variance ✅

2. The paasacher's price index formula was introduced by German's statistician Paashe in

A. 1817

B. 1714

C. 1874 ✅

D. 1764

3. _ are the boundaries separating the items in a given distribution or set of data into quarters

A. Quartile ✅

B. Deviation

C. Dispersion

4. There are two main ways of approaching and obtaining solution

_ and

A. *Analytical and critical thinking ✅ *

B. Principal and creative thinking

C. Estate and estimate thinking

D. Primary and secondary thinking

5. _ are indicators which reflect the relative changes in the level of certain phenomenon in any given period of time called current period with respect to its value in some fixed period selected for comparison

A. Index numbers ✅

B. Trend number

C. Point numbers

D. Level numbers

6. _ is the logical approach, it answers questions like what, who, where, how, when and why

A. Principal examinations

B. Creative examinations

C. Heuristic examinations

D. Critical examinations ✅

7. The three types of kurtosis are _, and_____

A. High, medium and low

B. Random, quantity and value

C. Leptokurtic, platykurtic and mesokurtic ✅

D. Skewness, platykurtic and mesokurtic

8. _ can be defined as the logical and quantitative analysis of all the factor influencing a decision.

A. Systematic analysis

B. Decision analysis ✅

C. Quantitative analysis

D. Stratified analysis

9. is given by the arithmetic mean of laspeyrea's and pashe's price index.

Jonny, [18/11/2021 00:33]

A. Fisher's price index

B. Quantity price index

C. Value price index

D. Dorbish-Bowley price index ✅

$£x^2 - (£x)/n$

----------.

n-1 is the_____ for a given set of ungroupped data .

A. Standard deviation

B. Variable

C. Sampling

D. Sample variance ✅

2. The paasacher's price index formula was introduced by German's statistician Paashe in

A. 1817

B. 1714

C. 1874 ✅

D. 1764

3. _ are the boundaries separating the items in a given distribution or set of data into quarters

A. Quartile ✅

B. Deviation

C. Dispersion

4. There are two main ways of approaching and obtaining solution

_ and

A. *Analytical and critical thinking ✅ *

B. Principal and creative thinking

C. Estate and estimate thinking

D. Primary and secondary thinking

5. _ are indicators which reflect the relative changes in the level of certain phenomenon in any given period of time called current period with respect to its value in some fixed period selected for comparison

A. Index numbers ✅

B. Trend number

C. Point numbers

D. Level numbers

6. _ is the logical approach, it answers questions like what, who, where, how, when and why

A. Principal examinations

B. Creative examinations

C. Heuristic examinations

D. Critical examinations ✅

7. The three types of kurtosis are _, and_____

A. High, medium and low

B. Random, quantity and value

C. Leptokurtic, platykurtic and mesokurtic ✅

D. Skewness, platykurtic and mesokurtic

8. _ can be defined as the logical and quantitative analysis of all the factor influencing a decision.

A. Systematic analysis

B. Decision analysis ✅

C. Quantitative analysis

D. Stratified analysis

9. is given by the arithmetic mean of laspeyrea's and pashe's price index.

A. Fisher's price index

B. Quantity price index

C. Value price index

D. Dorbish-Bowley price index ✅

–

10 . X -N/s

√ñ formula is called the_____

A. Student T-test statistic ✅

B. Spearman's rank correlation

C. Pearson's correlation coefficient

D. Chi-square statistic

£x² -(£x)/n

----------.

n-1 is the_____ for a given set of ungroupped data .

A. Standard deviation

B. Variable

C. Sampling

D. Sample variance ✅

2. The paasacher's price index formula was introduced by German's statistician Paashe in

A. 1817

B. 1714

C. 1874 ✅

D. 1764

3. _ are the boundaries separating the items in a given distribution or set of data into quarters

A. Quartile ✅

B. Deviation

C. Dispersion

4. There are two main ways of approaching and obtaining solution

_ and

A. *Analytical and critical thinking ✅ *

B. Principal and creative thinking

C. Estate and estimate thinking

D. Primary and secondary thinking

5. _ are indicators which reflect the relative changes in the level of certain phenomenon in any given period of time called current period with respect to its value in some fixed period selected for comparison

A. Index numbers ✅

B. Trend number

C. Point numbers

D. Level numbers

6. _ is the logical approach, it answers questions like what, who, where, how, when and why

A. Principal examinations

B. Creative examinations

C. Heuristic examinations

D. Critical examinations ✅

7. The three types of kurtosis are _, and_____

A. High, medium and low

B. Random, quantity and value

C. Leptokurtic, platykurtic and mesokurtic ✅

D. Skewness, platykurtic and mesokurtic

8. _ can be defined as the logical and quantitative analysis of all the factor influencing a decision.

A. Systematic analysis

B. Decision analysis ✅

C. Quantitative analysis

D. Stratified analysis

Jonny, [18/11/2021 00:43]

9. is given by the arithmetic mean of laspeyrea's and pashe's price index.

A. Fisher's price index

B. Quantity price index

C. Value price index

D. Dorbish-Bowley price index ✅

10 . $\frac{X - \bar{N}/s}{\sqrt{n}}$ formula is called the_____

A. Student T-test statistic ✅

B. Spearman's rank correlation

C. Pearson's correlation coefficient

D. Chi-square statistic

GST203 TMA2 9/10*

the age of enlightenment was roughly in the

18TH CENTURY 📌

Jonny, [18/11/2021 00:43]

The philosophical concept of arguing out the entire process of the subject question, in a manner of dialogue is called?

THE ZENO OF ELEA 📌

traditionally, logic is divided into two, the formal and informal. the formal logic is also known as

SYMBOLIC LOGIC 📌

in a valid argument, does conclusion necessarily mean the last sentence?

NO 📌

who among the following philosophers blended ethics, metaphysics, political philosophy and epistemology?

PLATO 📌

the most popular American movement of the late 19th century was tagged what?

PRAGMATISM 📌

the ancient age philosophy includes the following except

CLASSIC 📌

identify the African author(s) who aptly described a philosopher as one who attempts to understand the world's phenomena among other things

JOSEPH OMOREGBE 📌

the period of revival of classicalcivilisation which occured in the 15th and 16th century is classified as

RENAISSANCE AGE 📌

Do you agree that an argument is valid when the conclusion of that argument is derived from the premises?

AGREED 📌

PHY 261 TMA 2

1)In oceanic crust layer1 the thickness form between ——— to——km

Ans:0.3 - 0.8

2)The semi-mobile region are formation of——— basin?

Ans:sedimentary

3)The formation of oceanic crust are mostly—— and —— rock?

Ans:basalt and gabbro

4)The mobile belts are characterized by ——— deformation?

Ans:strong

5)The oceanic crust thickness of layer 2 is —— to ——km?

Ans:1-2

6)The ocean crust has——km thickness?

Ans:5-11km

7)The semi-mobile region are characterized by differential———movement?

Ans:vertical

8)In oceanic crust layer1,the seismic velocity form between—— to——km/s

Ans:1.5 - 1.8

9)Geologically,crust has — formation based on geologic history?

Ans:three

10)In layer 1, oceanic crust layer is a non ——— sediment?

Ans:consolidated

1)In oceanic crust layer1 the thickness form between ——— to——km

Ans:0.3 - 0.8

2)The semi-mobile region are formation of——— basin?

Ans:sedimentary

3)The formation of oceanic crust are mostly—— and —— rock?

Ans:basalt and gabbro

4)The mobile belts are characterized by ——— deformation?

Ans:strong

5)The oceanic crust thickness of layer 2 is —— to ——km?

Ans:1-2

6)The ocean crust has——km thickness?

Ans:5-11km

7)The semi-mobile region are characterized by differential———movement?

Ans:vertical

8)In oceanic crust layer1,the seismic velocity form between—— to——km/s

Ans:1.5 - 1.8

9)Geologically,crust has — formation based on geologic history?

Ans:three

10)In layer 1, oceanic crust layer is a non ——— sediment?

Ans:consolidated

n-1 is the_____ for a given set of ungroupped data .

A. Standard deviation

B. Variable

C. Sampling

D. Sample variance ✅

2. The paasacher's price index formula was introduced by German's statistician Paashe in

A. 1817

B. 1714

C. 1874 ✅

D. 1764

3. _ are the boundaries separating the items in a given distribution or set of data into quarters

A. Quartile ✅

B. Deviation

C. Dispersion

4. There are two main ways of approaching and obtaining solution

_ and

A. *Analytical and critical thinking ✓ *

B. Principal and creative thinking

C. Estate and estimate thinking

D. Primary and secondary thinking

5. _ are indicators which reflect the relative changes in the level of certain phenomenon in any given period of time called current period with respect to its value in some fixed period selected for comparison

A. Index numbers ✓

B. Trend number

C. Point numbers

D. Level numbers

6. _ is the logical approach, it answers questions like what, who, where, how, when and why

A. Principal examinations

B. Creative examinations

C. Heuristic examinations

D. Critical examinations ✓

7. The three types of kurtosis are _, and_____

A. High, medium and low

B. Random, quantity and value

C. Leptokurtic, platykurtic and mesokurtic ✅

D. Skewness, platykurtic and mesokurtic

8. _ can be defined as the logical and quantitative analysis of all the factor influencing a decision.

A. Systematic analysis

B. Decision analysis ✅

C. Quantitative analysis

D. Stratified analysis

9. is given by the arithmetic mean of laspeyrea's and pashe's price index.

A. Fisher's price index

B. Quantity price index

C. Value price index

D. Dorbish-Bowley price index ✅

$$10.\ \frac{\bar{X} - N/s}{\sqrt{n}}$$ formula is called the_____

A. Student T-test statistic ✅

B. Spearman's rank correlation

C. Pearson's correlation coefficient

D. Chi-square statistic

n-1 is the_____ for a given set of ungroupped data .

A. Standard deviation

B. Variable

C. Sampling

D. Sample variance ✅

2. The paasacher's price index formula was introduced by German's statistician Paashe in

A. 1817

B. 1714

C. 1874 ✅

D. 1764

3. _ are the boundaries separating the items in a given distribution or set of data into quarters

A. Quartile ✅

B. Deviation

C. Dispersion

4. There are two main ways of approaching and obtaining solution

_ and

A. *Analytical and critical thinking ✅ *

B. Principal and creative thinking

C. Estate and estimate thinking

D. Primary and secondary thinking

5. _ are indicators which reflect the relative changes in the level of certain phenomenon in any given period of time called current period with respect to its value in some fixed period selected for comparison

A. Index numbers ✅

B. Trend number

C. Point numbers

D. Level numbers

6. _ is the logical approach, it answers questions like what, who, where, how, when and why

A. Principal examinations

B. Creative examinations

C. Heuristic examinations

D. Critical examinations ✅

7. The three types of kurtosis are _, and_____

A. High, medium and low

B. Random, quantity and value

C. Leptokurtic, platykurtic and mesokurtic ✅

D. Skewness, platykurtic and mesokurtic

8. _ can be defined as the logical and quantitative analysis of all the factor influencing a decision.

A. Systematic analysis

B. Decision analysis ✅

C. Quantitative analysis

D. Stratified analysis

9. is given by the arithmetic mean of laspeyrea's and pashe's price index.

A. Fisher's price index

B. Quantity price index

C. Value price index

D. Dorbish-Bowley price index ✅

$$10.\ \frac{X - N/s}{\sqrt{ñ}}$$ formula is called the_____

A. Student T-test statistic ✅

B. Spearman's rank correlation

C. Pearson's correlation coefficient

D. Chi-square statistic

Federal dominance in public policy initiatives is a feature of the__federalism

Ans: Nigeria

Which phase in comparative politics emphasised reason and science in philosophy and in the study of human culture and the natural world?

Ans: The age of Enlightenment

Which approach to the study of comparative government grew out of a response to the historicism of the nineteen centuries?

Ans: Traditional approachWhich of the following, according to the system theory, is not one of the three primary components of every political system

Ans: The institutions

A _ is a word, a term, or a label that applies to a whole class or category of phenomena or ideas

Ans: concept

A theory is a set of propositions and/or __ that are logically related to each other

Ans: hypotheses

David Easton developed a unique systemic approach for the purpose of____

Political Analysis

_ in the understanding of political phenomenon is referred to as the â€˜master strategyâ€™?

Ans: Comparative method

____approach to comparative government has been criticised as being static and formalistic

Ans: Descriptive

A simplified representation of reality in descriptive or abstract form is known as__

Ans: Model

The difference between the sales revenue and cost of sales is knomn as â€¦â€¦..

Gross profit

Information that must be capable of being compared from period to period within

the same entity or in a single period across entities is known as what?

Comparability

bank reconciliation statement is done using two basic transactions namely

I AND III Only

One of these is not an advantage of computerised accounting system.

Inaccurate data entry

The cheques in which an entity may issue to the third party and have been credited

to the cash book but not yet debited by the bank in the bank statement because the

bearers have not presented them to the bank for payment is known asâ€¦â€¦.

Unpresented cheques

One of these is not of accounting estimates;

Allowances for cost

The total amounts an entity owed its suppliers at a particular date is referred to as what?

Purchase ledger control account

IFRS stands for-----.

International financial reporting standard

TMA3 ACC204

Which of the following is an advantage of control account.

It is a useful instrument of fraud prevention and control

The process of allocating the cost of a wasting assets to the different accounting periods that are expected to benefit from it is calledâ€¦â€¦..

Depletion

The basic three types of inventories are; I)Raw materials II)Work-in-progress Finished goods Iv)Opening stock V)Closing stock

I,II,II only

The cash that is received by an entity for services they are to render or goods they are to deliver in a future accounting period is termed as what?

Income in advance

Profit and loss account is prepared to determine.

Strength of the company

An approach that maintains inventory record on a continous basis whenever there is movement in the level of inventory whether through purchases or sales isâ€¦â€¦.

Perpetual inventory approach

Non-current assets acquired by a business entity are treated as a?

Capital expenditure

TMA3 ACC206

Fixed cost are cost which does not vary but remains constant within a given period of time and a range of activity in spite of the fluctuation in production. Such

exampl is.

Insurance charges

The charging of the apportioned cost center overhead to cost units is referred to as?

Overhead absorption

One of these is an example of indirect labour.

Salary paid to the driver of the delivery van used for distribution product

The process of tracking the expenses incured on a job against the revenue produced by that job is known as;

Job costing

If the total factory overhead for the period was N50,000 and the total machine hours used was N40,000hrs; Calculate the overhead rate per machine hour

N1.25hrs

All materials which become an integral part of the finished products, the cost of which are directely and completely assigned to the specific physical units and charged to the prime cost are known as what?

Direct materials

An additional stock held by an organization over and above the minimum stock is regarded as?

Buffer stock

The three elements of cost are;

I,II,III, only

One among these is an example of unit cost.

Electrical companies

The assignment of overheads to cost centers directly without sharing but is specifically incurred in respect of a particular cost center is wholly assigned to the cost center is known as?

Overhead allocation

1)In oceanic crust layer1 the thickness form between ——— to——km

Ans:0.3 - 0.8

2)The semi-mobile region are formation of——— basin?

Ans:sedimentary

3)The formation of oceanic crust are mostly—— and —— rock?

Ans:basalt and gabbro

4)The mobile belts are characterized by ——— deformation?

Ans:strong

5)The oceanic crust thickness of layer 2 is —— to ——km?

Ans:1-2

6)The ocean crust has——km thickness?

Ans:5-11km

7)The semi-mobile region are characterized by differential———movement?

Ans:vertical

8)In oceanic crust layer1,the seismic velocity form between—— to——km/s

Ans:1.5 - 1.8

9)Geologically,crust has — formation based on geologic history?

Ans:three

10)In layer 1, oceanic crust layer is a non ——— sediment?

Ans:consolidated

1. All the under listed options have been the problems and challenges technology has created excep

It facilitate as well as complements human efforts at work

2.The process by which an organization is structured in terms of job tittle, tasks, duties, responsibilities, conditions, hazards/risks and the social context is known as

Job design

3. The under listed options account for an external factors for organizational change except

Product research, skills, knownledge, reduction of staff and culture

4.Organizational structure is about what kind of work architecture/design to be put in place. One of these options does not make a necessary factor when designing work in an organization

Monitoring the activities of the organization

5. A process where a natural stimulus (NS) becomes paired (associated) with an unconditional stimulus (UCS) to elicit a conditioned response (CR) is known as

Classical conditioning

6.A process where by a behaviour is rewarded each time it occurs is known as

Continuous Schedule

7. Which of the following options best define training

A human resource and personnel activities designed to facilitate the learning and development of new existing skills and to improve the performance of tasks or roles.

8. Which of the following options does not account for why workers in an organizations like to work

As a way of causing oppression

9. According to Mullins (2007), organizational structure can help achieve the under listed objectives except

The architecture of work is build around structure, organizational processes, available technology and the cardes of people meant to engage in various activities

10. Which year in Nigeria was the indigenization policy of the erstwhile foreign company transformed into indigenious organization

Which of the options does not include principal duties of computer programmers

Maintains log of computer operations for audit trails

TMA3 ACC204

The difference between the sales revenue and cost of sales is knomn as â€¦â€¦..

Gross profit

Information that must be capable of being compared from period to period within the same entity or in a single period across entities is known as what?

Comparability

bank reconciliation statement is done using two basic transactions namely

I AND III Only

One of these is not an advantage of computerised accounting system.

Inaccurate data entry

The cheques in which an entity may issue to the third party and have been credited to the cash book but not yet debited by the bank in the bank statement because the bearers have not presented them to the bank for payment is known asâ€¦â€¦.

Unpresented cheques

One of these is not of accounting estimates;

Allowances for cost

The total amounts an entity owed its suppliers at a particular date is referred to as what?

Purchase ledger control account

IFRS stands for-----.

International financial reporting standard

TMA3 ACC204

Which of the following is an advantage of control account.

It is a useful instrument of fraud prevention and control

The process of allocating the cost of a wasting assets to the different accounting periods that are expected to benefit from it is calledâ€¦â€¦..

Depletion

The basic three types of inventories are; I)Raw materials II)Work-in-progress

Finished goods Iv)Opening stock V)Closing stock

I,II,II only

The cash that is received by an entity for services they are to render or goods they are to deliver in a future accounting period is termed as what?

Income in advance

Profit and loss account is prepared to determine.

Strength of the company

An approach that maintains inventory record on a continous basis whenever there is movement in the level of inventory whether through purchases or sales isâ€¦â€¦â€¦.

Perpetual inventory approach

Non-current assets acquired by a business entity are treated as a?

Capital expenditure

TMA3 ACC206

Fixed cost are cost which does not vary but remains constant within a given period of time and a range of activity in spite of the fluctuation in production. Such exampl is.

Insurance charges

The charging of the apportioned cost center overhead to cost units is referred to as?

Overhead absorption

One of these is an example of indirect labour.

Salary paid to the driver of the delivery van used for distribution product

The process of tracking the expenses incured on a job against the revenue produced by that job is known as;

Job costing

If the total factory overhead for the period was N50,000 and the total machine hours used was N40,000hrs; Calculate the overhead rate per machine hour

N1.25hrs

All materials which become an integral part of the finished products, the cost of which are directely and completely assigned to the specific physical units and charged to the prime cost are known as what?

Direct materials

An additional stock held by an organization over and above the minimum stock is regarded as?

Buffer stock

The three elements of cost are;

I,II,III, only

One among these is an example of unit cost.

Electrical companies

The assignment of overheads to cost centers directly without sharing but is specifically incurred in respect of a particular cost center is wholly assigned to the cost center is known as?

Overhead allocation

TMA3 CIT202

Computers are connected to other peripheral devices by cables using plugs and sockets called what?

Port

Which device makes it possible for computer to display video and animation?

Video Cards

What is a multitasking operating system intended for applications with fixed deadlines ?

A real-time operating system (RTOS)

which board with series of electronic path ways and connections allowing the CPU to communicate with the other components of the computer?

Motherbboard

Which input device is used for the same purposes as a mouse and is popular on laptop computers?

Track Ball

Which input device is used as a pointing device and to select options from menus?

Mouse

Devices that return processed data, that is information back to the user is called what devices?

Output

The work that is produced using an application or program is also software and is usually referred to as what?

file

TMA2 ENT204

: _____change takes place within the context of the external competitive economic and social environment

Strategic

Manipulation involves providing incorrect or false _____ information

The need for formal _____ structure and the division of work

organization

firm can perform effectively only through interactions with the broader external environment on which it is part.

business

Team _____ is the process of helping the work team become more effective in accomplishing its tasks/roles and in satisfying the needs of the team members.

Building

can be used in conjunction with the cause and effect tool.

brainstorming

An appropriate _____ programme can help in overcomingresistance to change.

communication

The team building cycle starts with the _____ of the problem.

identification

True large scale organizational changes may require the use of threats or_____

force

TMA3 ENT204

The essence of_____ is to enhance skills necessary for improved job performance.

training

Organizations especially large-scale ones, pay much attention to maintaining

stability and _____

predictability

can be creative. Many entrepreneurs use their own creative ideas to make a product

or offer a service.

Entrepreneurs

may develop a company to a mature phase and then hire a good team of managers

to run the business on a daily basis.

Entrepreneurs

Entrepreneurship and ____ growth take place when the economic conditions are

favourable.

economic

is the ability to excel at one or more output goals.

Effectiveness

Effective financial management practice is necessary for____ of any firm.

sustained growth

According to Bowen, Marara and Mureithi _____ high production cost can result

from over employment of both human and material resources.

2009

entrepreneurs have a strong social ____ They are able to meet challenges, social

needs and in so doing create significant new social capital

facet

1)In oceanic crust layer1 the thickness form between ——— to——km

Ans:0.3 - 0.8

2)The semi-mobile region are formation of——— basin?

Ans:sedimentary

3)The formation of oceanic crust are mostly—— and —— rock?

Ans:basalt and gabbro

4)The mobile belts are characterized by ——— deformation?

Ans:strong

5)The oceanic crust thickness of layer 2 is —— to ——km?

Ans:1-2

6)The ocean crust has——km thickness?

Ans:5-11km

7)The semi-mobile region are characterized by differential———movement?

Ans:vertical

8)In oceanic crust layer1,the seismic velocity form between—— to——km/s

Ans:1.5 - 1.8

9)Geologically,crust has — formation based on geologic history?

Ans:three

10)In layer 1, oceanic crust layer is a non ——— sediment?

Ans:consolidated

1. All the under listed options have been the problems and challenges technology

has created excep

It facilitate as well as complements human efforts at work

2.The process by which an organization is structured in terms of job tittle, tasks, duties, responsibilities, conditions, hazards/risks and the social context is known as

Job design

3. The under listed options account for an external factors for organizational change except

Product research, skills, knownledge, reduction of staff and culture

4.Organizational structure is about what kind of work architecture/design to be put in place. One of these options does not make a necessary factor when designing work in an organization

Monitoring the activities of the organization

5. A process where a natural stimulus (NS) becomes paired (associated) with an unconditional stimulus (UCS) to elicit a conditioned response (CR) is known as

Classical conditioning

6.A process where by a behaviour is rewarded each time it occurs is known as

Continuous Schedule

7. Which of the following options best define training

A human resource and personnel activities designed to facilitate the learning and development of new existing skills and to improve the performance of tasks or roles.

8. Which of the following options does not account for why workers in an organizations like to work

As a way of causing oppression

9. According to Mullins (2007), organizational structure can help achieve the under listed objectives except

The architecture of work is build around structure, organizational processes, available technology and the cardes of people meant to engage in various activities

10. Which year in Nigeria was the indigenization policy of the erstwhile foreign company transformed into indigenious organization

Colour stability

solubility

oxidation state

6. IO$${3}{^2-}$$ + SO$${_3}{^2+}$$ Â-Â-â†’ I +SO$${_4}{^2-}$$ The oxidation state of oxygen in the productâ€™s equation is___

+3

--->> +6

-3

+6

7. Which of the following options is an indicator use for acid-base titration?

Methylbenzene

Bromohexane

phenol

--->> Methyl orange

8. In redox titration involving potassium permanganate, if the contents of the conical flask turn brown, it means ___was added

--->> Insufficient acid catalyst

Insufficient base catalyst

Insufficient catalyst

insufient base

9. The point at which stoicheometrically equivalent quantities of substance have been brought together is known as?

--->> Equivalence point of titration

Saturated point of titration

End point of titration

Neutralization point of titration

10. Volumetric analysis involving iodine are usually referred to as_____

iodotitration

iodine acid titration

halogenmetry

--->> iodometry

1).The Trichotomy property of the set of real numbers states that if a and b are elements of the set of real numbers , then either

(A)a = b or b = a or ab - b = b

(B)a =b or b =a or ab + b =b

(C)a > b or a = b or a < b

(D)a = 0 or b = 0 or ab = 5

Ans: a > b or a = b or a < b

2).Let the expression \(f:A\\rightarrow B \)be a function. The set A of all inputs or pre-images is called

(A)Range of f

(B)Domain of f

(C)Image of f

(D)Codomain of f

Ans: Domain of f

3).In a function f, the elements of the range R(f) are called

(A)inputs

(B)co-domains

(C)images

(D)pre-images

Ans: images

4).Let a and b be elements of the set of real numbers such that a + b = a. It must be that

(A)b = 0

(B)b = 3

(C)b=5

(D)b = 6

Ans: b = 0

5).Which of the following sets is finite?

(A)The set of natural numbers

(B)The set of integers

(C)The empty set

(D)The of rational numbers.

Ans: The empty set

6).The one-sided\(lim_{x\\rightarrow c^{+}} f(x)=L\) of at c is called the

(A)The right hand limit of f at c

(B)The top limit of f at c

(C)The bottom limit of f at c

(D)The left hand limit of at c

Ans: The right hand limit of f at c

7).Given that x and y are elements of the set of real numbers such that \(x\\dot y = y\), where \(\\do\) denotes the usual multiplication, it be that x is equal to

(A)3

(B)\\(0\\)

(C)1

(D)14

Ans: 1

8).Which of the following sets is largest?

(A)The set of natural numbers N

(B)The set of integers Z

(C)The set of real numbers R

(D)The set of rational numbers Q.

Ans: The set of real numbers R

9).Let f and g be two functions. Then the expression\((f\\dot g)(x)=f(g(x))\) is called

(A)Complement of f and g

(B)injection of f and g

(C)surjection of f and g

(D)composite of f and g

Ans: composite of f and g

10).If the number of elements in a set S is a unique number in the set of natural numbers , then the set S is said to be

(A)Infinite

(B)Empty

(C)Finite

(D)Nonempty

Ans: Finite

1 Avoid giving clear direction

2 Testing and Examination

3. To access the efficiency of the teacher who taught them

4. Pause questions

5. Student need additional marks to upgrade their grades

6. Scriven (1974)

7. Hard

8. The construction of the test requires much time

9. Socrates

10. All of the above

Edu 233 TMA 3 10/10

1. A & B

2. It proceeds from general laws or definition to particular cases

3. If it is not properly planned and organized, it will become a waste of time and resources

4. Field Trip

5. Open Education.

6. Demonstration method

7. Project method

8. Interest

9. Laboratory method

10. Initiative

PHY 261 TMA 2

1)In oceanic crust layer1 the thickness form between ——— to——km

Ans:0.3 - 0.8

2)The semi-mobile region are formation of——— basin?

Ans:sedimentary

3)The formation of oceanic crust are mostly—— and —— rock?

Ans:basalt and gabbro

4)The mobile belts are characterized by ——— deformation?

Ans:strong

5)The oceanic crust thickness of layer 2 is —— to ——km?

Ans:1-2

6)The ocean crust has——km thickness?

Ans:5-11km

7)The semi-mobile region are characterized by differential———movement?

Ans:vertical

8)In oceanic crust layer1,the seismic velocity form between—— to——km/s

Ans:1.5 - 1.8

9)Geologically,crust has — formation based on geologic history?

Ans:three

10)In layer 1, oceanic crust layer is a non ——— sediment?

Ans:consolidated

CIT 211 - TMA-3 ANSWERS

1. All of the options

2. Safe sequence

3. Pi is waiting for Pj to release a resource that Pi needs

4.

5. Max-Allocation

6. Then a deadlock exists

7. Less efficient

8. With multiple instances of each resource type

9. All resources have a single instances

10. Then the system will be in a safe state

CIT 215 TMA-2 ANSWERS

1. #

2. Source program

3. RECAL=

4. File Name

5. Integration testing

6. Exponentiation

1. All the under listed options have been the problems and challenges technology has created excep

It facilitate as well as complements human efforts at work

2.The process by which an organization is structured in terms of job tittle, tasks, duties, responsibilities,

conditions, hazards/risks and the social context is known as

Job design

3. The under listed options account for an external factors for organizational change except

Product research, skills, knownledge, reduction of staff and culture

4.Organizational structure is about what kind of work architecture/design to be put in place. One of

these options does not make a necessary factor when designing work in an organization

Monitoring the activities of the organization

5. A process where a natural stimulus (NS) becomes paired (associated) with an unconditional stimulus

(UCS) to elicit a conditioned response (CR) is known as

Classical conditioning

6.A process where by a behaviour is rewarded each time it occurs is known as

Continuous Schedule

7. Which of the following options best define training

A human resource and personnel activities designed to facilitate the learning and development of new

existing skills and to improve the performance of tasks or roles.

8. Which of the following options does not account for why workers in an organizations like to work

As a way of causing oppression

9. According to Mullins (2007), organizational structure can help achieve the under listed objectives

except

The architecture of work is build around structure, organizational processes, available technology and

the cardes of people meant to engage in various activities

10. Which year in Nigeria was the indigenization policy of the erstwhile foreign company transformed

into indigenious organization

1970

1. Potassium permanganate can be used to estimate the ____of a substance

Valency

water of hydration

reactivity

--->> percentage purity

2. IO$${3}{^2-}$$ + SO{_3}{^2}$$+ the oxidation state of oxygen in the equation is ___

-2

-4

--->> +4

+2

3. CO + H$${2}$$SO$${_4}$$ â†’ CO$${_2}$$ + SO$${_2}$$ + H$${_2}$$O The element(s) which undergo

change in oxidation state from the reactants to the products is(are)____

--->> Carbon and Sulphur

Hydrogen and Sulphur

Hydrogen and Oxygen

Oxygen only

4. The colour changes accompanying the varying change in oxidation states of iodine and its ion can be

used to indicate the____

Iodine complexity

ioniyial point

--->> end point

colourless point of titration

5. Potassium permanganate is a self-indicating reagent because of its different characteristic ___ in

either the acidic or basic medium

--->> Colour change

Colour stability

solubility

oxidation state

6. IO$${3}{^2-}$$ + SO$${_3}{^2+}$$ Â-Â-â†' I +SO$${_4}{^2-}$$ The oxidation state of oxygen in the

productâ€™ s equation is___

+3

--->> +6

-3

+6

7. Which of the following options is an indicator use for acid-base titration?

Methylbenzene

Bromohexane

phenol

--->> Methyl orange

8. In redox titration involving potassium permanganate, if the contents of the conical flask turn brown, it

means ___was added

--->> Insufficient acid catalyst

Insufficient base catalyst

Insufficient catalyst

insufient base

9. The point at which stoicheometrically equivalent quantities of substance have been brought together

is known as?

--->> Equivalence point of titration

Saturated point of titration

End point of titration

Neutralization point of titration

10. Volumetric analysis involving iodine are usually referred to as_____

iodotitration

iodine acid titration

halogenmetry

--->> iodometry

[12:17, 11/16/2021] Tony Old Man: TMA2 NSC211:MEDICAL MICROBIOLOGY AND PARASITOLOGY 10/10

Fungi are: eukaryotic

Fungi that exist in two forms are said to be : dimorphic

Microorganisms can be used to clean up pollution created by human activities in a process called :

bioremediation

When a bacterium is able to change its form, especially when grown on artificial media, it is:

pleomorphic

The site of antigenuc determinant of the bacterial cell surface is the : cell wall

Bacteria that derive carbon from preformed organic nutrients are: Heterotrophs

Microbially-produced substances or substances synthetically derived from natural sources that inhibit or

kill microorganisms are called: antobiotics

The following is a mordant: Lugol's iodine

A reproductive and metabolically dormant form which under appropriate condition can germinate to

form vegetative cell is: spore

Typical shape of Escherichia coli is: bacilli

TMA3 NSC211:MEDICAL MICROBIOLOGY AND PARASITOLOGY 10/10

The first step in the life cycle of a virus is: attachment of the virion

The protein used to build the capsids is called: protomer

The time required for a single cell or population of cells to double is called: generation time

An example of infection caused by fungi is: candidiasis

Viruses are: acellular

Poliomyelitis is caused by: polio virus

An example of infection caused by viruses is: measles

Yeasts reproduce sexually through: spore formation

Which word best desribes yeasts as a fungi with single nucleus: unicellular

Transport systems that use metabolic energy and membrane carrier protein to concentrate substances

by transporting them across a gradient is: active transport

can some one explain to me the meaning of this after i have done the TMA finish.

18:01

Emperor

You

can some one explain to me the meaning of this after i have done the TMA finish.

General issue

18:31

Is fixed now

18:31

update TMA1 ends in few hours time, most of us have not completed their TMA1. Let's just submit

random answers at least you might score 5 out of 10 rather than folding hands and score 0/10.

20:17

Another TMA2 is starting tomorrow I will be submitting with app, send in your works early so that I can meet.

Thanks

Attention; Project and Non- Examinable Update The university has discovered that a large number of

Students could not be cleared for graduation becos they dont have projet or a non-examinable course

result. In this view a Mop- up Project Moderation and Defence Exercise is being scheduled to hold in

December 2021 so as to harvest and clear more students for graduation. 2. Students who have completed their

project are here informed that the Project Administration System (PAS) is open for upload of Project and nonexaminable courses (UG & PG) 3. Sprial band copy of Completed Projects are to be submitted along with it

soft copy in a CD. 4.*PG students should note that their project work must pass the plagiarism test before

final submission and such are expected to submit early in order to subject it for plagiarism check. 5. Schedule

for the Project Moderation and Defence exercise will be communicated soonest. Thank you and communicate

to others. -Bauchi Study Centre

This a Notice for everyone writing CIT351. CIT351 has two different course materials online. One seems to be

the old one while the other is the recent. If you were not given the hardcopy check to confirm the one you

downloaded online is the recent one, otherwise your chances of passing ur exam will drop. I noticed the

discrepancy a while back when answering past questions but couldn't figure out why I'm not seeing the answer

to the question in the material I have. It was this morning I figured it out. Both course materials have 5

modules but the new one is less voluminous with 76 pages as well as some differences in topics. Inform others

you know.

indicator use for acid-base titration? Methylbenzene Bromohexane phenol --->> Methyl orange 8. In redox

titration involving potassium permanganate, if the contents of the conical flask turn brown, it means ___was

added --->> Insufficient acid catalyst Insufficient base catalyst Insufficient catalyst insufient base 9. The point

at which stoicheometrically equivalent quantities of substance have been brought together is known as? --->>

Equivalence point of titration Saturated point of titration End point of titration Neutralization point of titration

10. Volumetric analysis involving iodine are usually referred to as_____ iodotitration iodine acid titration

halogenmetry --->> iodometry

TMA2 NSC211:MEDICAL MICROBIOLOGY AND PARASITOLOGY 10/10 Fungi are: eukaryotic Fungi

that exist in two forms are said to be : dimorphic Microorganisms can be used to clean up pollution created by

human activities in a process called : bioremediation When a bacterium is able to change its form, especially

when grown on artificial media, it is: pleomorphic The site of antigenuc determinant of the bacterial cell

surface is the : cell wall Bacteria that derive carbon from preformed organic nutrients are: Heterotrophs

Microbially-produced substances or substances synthetically derived from natural sources that inhibit or kill

microorganisms are called: antobiotics The following is a mordant: Lugol's iodine A reproductive and

metabolically dormant form which under appropriate condition can germinate to form vegetative cell is: spore

Typical shape of Escherichia coli is: bacilli TMA3 NSC211:MEDICAL MICROBIOLOGY AND

PARASITOLOGY 10/10 The first step in the life cycle of a virus is: attachment of the virion The protein used

to build the capsids is called: protomer The time required for a single cell or population of cells to double is

called: generation time An example of infection caused by fungi is: candidiasis Viruses are: acellular

Poliomyelitis is caused by: polio virus An example of infection caused by viruses is: measles Yeasts reproduce

sexually through: spore formation Which word best desribes yeasts as a fungi with single nucleus: unicellular

Transport systems that use metabolic energy and membrane carrier protein to concentrate substances by

transporting them across a gradient is: active transport

PHY 261 TMA 2

1)In oceanic crust layer1 the thickness form between ——— to——km

Ans:0.3 - 0.8

2)The semi-mobile region are formation of——— basin?

Ans:sedimentary

3)The formation of oceanic crust are mostly—— and —— rock?

Ans:basalt and gabbro

4)The mobile belts are characterized by ——— deformation?

Ans:strong

5)The oceanic crust thickness of layer 2 is —— to ——km?

Ans:1-2

6)The ocean crust has——km thickness?

Ans:5-11km

7)The semi-mobile region are characterized by differential———movement?

Ans:vertical

8)In oceanic crust layer1,the seismic velocity form between—— to——km/s

Ans:1.5 - 1.8

9)Geologically,crust has — formation based on geologic history?

Ans:three

10)In layer 1, oceanic crust layer is a non ——— sediment?

Ans:consolidated

10… The receiver is the _ of the message

DECODER

[12:17, 11/16/2021] Tony Old Man: TMA2 NSC211:MEDICAL MICROBIOLOGY AND PARASITOLOGY 10/10

Fungi are: eukaryotic

Fungi that exist in two forms are said to be : dimorphic

Microorganisms can be used to clean up pollution created by human activities in a process called :

bioremediation

When a bacterium is able to change its form, especially when grown on artificial media, it is:

pleomorphic

The site of antigenuc determinant of the bacterial cell surface is the : cell wall

Bacteria that derive carbon from preformed organic nutrients are: Heterotrophs

Microbially-produced substances or substances synthetically derived from natural sources that inhibit or

kill microorganisms are called: antobiotics

The following is a mordant: Lugol's iodine

A reproductive and metabolically dormant form which under appropriate condition can germinate to

form vegetative cell is: spore

Typical shape of Escherichia coli is: bacilli

TMA3 NSC211:MEDICAL MICROBIOLOGY AND PARASITOLOGY 10/10

The first step in the life cycle of a virus is: attachment of the virion

The protein used to build the capsids is called: protomer

The time required for a single cell or population of cells to double is called: generation time

An example of infection caused by fungi is: candidiasis

Viruses are: acellular

Poliomyelitis is caused by: polio virus

An example of infection caused by viruses is: measles

Yeasts reproduce sexually through: spore formation

Which word best desribes yeasts as a fungi with single nucleus: unicellular

Transport systems that use metabolic energy and membrane carrier protein to concentrate substances

by transporting them across a gradient is: active transport

1)In oceanic crust layer1 the thickness form between ——— to——km

Ans:0.3 - 0.8

2)The semi-mobile region are formation of——— basin?

Ans:sedimentary

3)The formation of oceanic crust are mostly—— and —— rock?

Ans:basalt and gabbro

4)The mobile belts are characterized by ——— deformation?

Ans:strong

5)The oceanic crust thickness of layer 2 is —— to ——km?

Ans:1-2

6)The ocean crust has——km thickness?

Ans:5-11km

7)The semi-mobile region are characterized by differential———movement?

Ans:vertical

8)In oceanic crust layer1,the seismic velocity form between—— to——km/s

Ans:1.5 - 1.8

9)Geologically,crust has — formation based on geologic history?

Ans:three

10)In layer 1, oceanic crust layer is a non ——— sediment?

Ans:consolidated

CIT 211 - TMA-3 ANSWERS

1. All of the options

2. Safe sequence

3. Pi is waiting for Pj to release a resource that Pi needs

4.

5. Max-Allocation

6. Then a deadlock exists

7. Less efficient

8. With multiple instances of each resource type

9. All resources have a single instances

10. Then the system will be in a safe state

1. All the under listed options have been the problems and challenges technology has created excep

It facilitate as well as complements human efforts at work

2.The process by which an organization is structured in terms of job tittle, tasks, duties, responsibilities,

conditions, hazards/risks and the social context is known as

Job design

3. The under listed options account for an external factors for organizational change except

Product research, skills, knownledge, reduction of staff and culture

4.Organizational structure is about what kind of work architecture/design to be put in place. One of

these options does not make a necessary factor when designing work in an organization

Monitoring the activities of the organization

5. A process where a natural stimulus (NS) becomes paired (associated) with an unconditional stimulus

(UCS) to elicit a conditioned response (CR) is known as

Classical conditioning

6.A process where by a behaviour is rewarded each time it occurs is known as

Continuous Schedule

7. Which of the following options best define training

A human resource and personnel activities designed to facilitate the learning and development of new

existing skills and to improve the performance of tasks or roles.

8. Which of the following options does not account for why workers in an organizations like to work

As a way of causing oppression

9. According to Mullins (2007), organizational structure can help achieve the under listed objectives

except

The architecture of work is build around structure, organizational processes, available technology and

the cardes of people meant to engage in various activities

10. Which year in Nigeria was the indigenization policy of the erstwhile foreign company transformed

into indigenious organization

3. CO + H$${2}$$SO$${_4}$$ â†’ CO$${_2}$$ + SO$${_2}$$ + H$${_2}$$O The element(s) which undergo

change in oxidation state from the reactants to the products is(are)____

--->> Carbon and Sulphur

Hydrogen and Sulphur

Hydrogen and Oxygen

Oxygen only

4. The colour changes accompanying the varying change in oxidation states of iodine and its ion can be

used to indicate the____

Iodine complexity

ioniyial point

--->> end point

colourless point of titration

5. Potassium permanganate is a self-indicating reagent because of its different characteristic ___ in

either the acidic or basic medium

--->> Colour change

Colour stability

solubility

oxidation state

6. IO$${3}{^2-}$$ + SO$${_3}{^2+}$$ Â-Â-â†’ I +SO$${_4}{^2-}$$ The oxidation state of oxygen in the

productâ€™ s equation is___

+3

--->> +6

-3

+6

7. Which of the following options is an indicator use for acid-base titration?

Methylbenzene

Bromohexane

phenol

--->> Methyl orange

8. In redox titration involving potassium permanganate, if the contents of the conical flask turn brown, it

means ___was added

--->> Insufficient acid catalyst

Insufficient base catalyst

Insufficient catalyst

insufient base

9. The point at which stoicheometrically equivalent quantities of substance have been brought together

is known as?

--->> Equivalence point of titration

Saturated point of titration

End point of titration

Neutralization point of titration

10. Volumetric analysis involving iodine are usually referred to as_____

iodotitration

iodine acid titration

halogenmetry

--->> iodometry

1. All the under listed options have been the problems and challenges technology has created excep

It facilitate as well as complements human efforts at work

2.The process by which an organization is structured in terms of job tittle, tasks, duties, responsibilities,

conditions, hazards/risks and the social context is known as

Job design

3. The under listed options account for an external factors for organizational change except

Product research, skills, knownledge, reduction of staff and culture

4.Organizational structure is about what kind of work architecture/design to be put in place. One of

these options does not make a necessary factor when designing work in an organization

Monitoring the activities of the organization

5. A process where a natural stimulus (NS) becomes paired (associated) with an unconditional stimulus

(UCS) to elicit a conditioned response (CR) is known as

Classical conditioning

6.A process where by a behaviour is rewarded each time it occurs is known as

Continuous Schedule

7. Which of the following options best define training

A human resource and personnel activities designed to facilitate the learning and development of new

existing skills and to improve the performance of tasks or roles.

8. Which of the following options does not account for why workers in an organizations like to work

As a way of causing oppression

9. According to Mullins (2007), organizational structure can help achieve the under listed objectives

except

The architecture of work is build around structure, organizational processes, available technology and

the cardes of people meant to engage in various activities

10. Which year in Nigeria was the indigenization policy of the erstwhile foreign company transformed

into indigenious organization

1. Given that a = –i + 2j + 2k, b = 2i – 4j – 3k and c = 3i – 2j + k Find the magnitude of this vector Âa + Âb + Âc.

SOLUTION

a = –i + 2j + 2k

b = 2i – 4j – 3k

c = 3i – 2j + k

$a + b + c = (–1 + 2 + 3)i + (2 – 4 – 2)j + (2 – 3 + 1)k$

$a + b + c = 4i – 4j + 0k$

$a + b + c = 4i – 4j = 4(i – j)$

$a + b + c = 4 (\sqrt{[(1)^2 + (–1)^2]}$

$= 4 (\sqrt{2}) = *4\sqrt{2}*.$

2. Find the equation of the line through the point (6, 5) which is parallel to $3x – 4y = 0$

SOLUTION.

$3x – 4y = 0$

$4y = 3x$

$4y = 3x$

$y = 3/4x$, where $m = 3/4$

$y = mx + c$

$5 = 3/4(6) + C$

$C = 5 – 9/2$

$C = 10–9/2 = 1/2$

$y = 3/4x + 1/2$

$4y = 3x + 2$

$4y – 3x – 2 = 0$

Final solution: $*3x – 4y + 2 = 0*$.

3. What is the angle between these vectors $A = –2i – 5j + 2k$ and $B = –4i – 2j – 3k$

SOLUTION

$A = –2i – 5j + 2k$ and $B = –4i – 2j – 3k$.

A.B = –2(–4) –5(–2) + 2(–3) = 8 + 10 – 6 = 12

|a|•|b| = √33 × √29

Ø = arc cos (12 / √33 × √29)

Ø = 67.175° ≈ *67°*.

4. Find the magnitude of this vector a = –i + 2j + 2k.

SOLUTION

Magnitude, otherwise known as Modulus = √((–1)² + 2² + 2²) = √(1 + 4 + 4) = √9 = *3.*

5. Find the centre of the circle with this equation $x^2 + y^2 + 2x – 4y – 15 = 0$

SOLUTION

$x^2 + y^2 + 2x – 4y – 15 = 0$

$x^2 + 2x + y^2 – 4y = 15$

Using method of completing the squares

$x^2 + 2x + 2 + y^2 – 4y + 4 = 15 + 2 + 4$

$(x + 1)^2 + (y – 2)^2 = 21$

Comparing the above equation with $(x – a)^2 + (y – b)^2 = r^2$

Hence, centre = *(–1, 2)*

6. Evaluate i.(j × k) + j.(i × k) + k.(i. × k).

SOLUTION

This is a dot product of vector. In this case, it's important to note that i.j = 0, i.k = 0, j.k = 0.

Hence, final solution is k.k = *1.*

7. Find the value of y in order that the vectors 7i + yj + k, 3i + 2j + k, and 5i + 2j + k are linearly dependent.

SOLUTION

Please, note that if two or more vectors are linearly dependent, it means that the vectors are dependent ('they depend on one another') if there is some relation among them (in addition to the one with all 0 present for any collection of vectors). So, dependent means there is some relation other than all 0.

So, in this question, we are considering a (3 × 3) matrix system.

The first vector takes the first rows, and it follows a consequential order.

$$\begin{vmatrix} 7 & y & 1 \\ 3 & 2 & 1 \\ 5 & 3 & 1 \end{vmatrix} = 0$$

$7(2 – 3) – y(3 – 5) + 1(9 – 10) = 0$

$–7 – 2y –1 = 0$

$2y = 7 + 1 = 8$

$y = 8/2 = 4$

Hence, the solution is *4*.

8. Evaluate the eccentricity of a rectangular hyperbola $x^2/a^2 – y^2/a^2 = 0$

SOLUTION

Eccentricity = c / a

$x^2 / a^2 – y^2 / a^2 = 1$

Where focal length, $c = \sqrt{(a^2 + a^2)} = \sqrt{(2a^2)} = a\sqrt{2}$

Eccentricity = $c / a = a\sqrt{2}/a = \sqrt{2}$ = *1.414*

9. Find the vector joining the points P(2, 3, 0) and Q(–1, –2, –4) directed from P to Q.

SOLUTION

P(2, 3, 0) and Q(–1, –2, –4)

PQ = (–1 – 2)i + (–2 –3)j + (–4 – 0)k

PQ = *–3i – 5j – 4k*

10. The answer to this last question is 24, though from the question, when you work it out thoroughly, you'd get a different answer "42" from the options, but well, NOUN is NOUN. 😁
