As per the results (provisional) of latest Agriculture Census 2015-16, the State-wise average size of operational holdings in the country is given at Annexure.

To improve production/productivity of various agricultural crops, the Government is promoting adoption of modern technologies and practices like multiple cropping, intercropping and integrated farming systems etc.

In the "India Rural Development Report 2012-13" prepared by the IDFC Rural Development Network, it has been observed that Small farms are more efficient, especially in cultivating labour-intensive crops or tending livestock, but land holdings are too small to generate sufficient household income.

With a view to improve the condition of Small and Marginal farmers and to double the income of farmers by 2022, Government is realigning its interventions from production-centric approach to farmers' income-centric initiatives, with focus on better and new technological solutions.

These include implementation of schemes like, Pradhan Mantri Krishi Sinchai Yojana (PMKSY), Paramparagat Krishi
