SN	CRSCODE	Question	A
1	ACP305	An insect is	A Reptile
2	ACP305	Which of these is not a category of pests	Higher pests
3	ACP305	Pest control methods include all except one of the following. Which is it?	Prevention
4	ACP305	Which of the following options is correct?	Zonocerus variagatus is a key pest of many cultivated crops in West Africa
5	ACP305	Economic damage is:	The amount of injury that would justify the cost of artificial control measures
6	ACP305	What is meant by economic injury level in pest management?	The highest pest population level that would cause damage to a crop population
7	ACP305	Why is it important to reduce crop losses due to pest and diseases?	In order to kill the organisms
8	ACP305	Which of the following is not a factor that encourages pest and disease incidence?	Introduction of new crops
9	ACP305	A pest is:	Any organism causing damage to plants
10	ACP305	Boring insects lower farmers' income by	reducing the quality of timber and stored produce

B	C	D
A Mollusca	A Mammal	An Arthropod
Occasional pests	Migratory pests	Minor pests
Physical	Biological	Deforestation
Dydercus volkerii is a major pest of cowpea	Marmara spp. is a key pest of cocoa in Nigeria and Ghana	Maruca testulalis is an occasional pest of cowpea
The highest level of damage that would make the crop unuseable	The amount of injury that results after artificial control measure has been introduced	damage caused on crop as a result of the use of chemicals to control pests
The lowest pest population density that would cause economic damage to a crop population	The highest population level of a pest that would enhance crop yield	The lowest pest population density that would cause injury to a crop population
To increase the efficiency of crop production	To create more jobs	To ensure that crops are protected
Intercontinental transport and trade	Monocropping and inadequate storage facilities	Preservation of natural vegetations and ecosystems
An insect that causes economic loss to a crop plant	Any organism causing significant damage in quantity and quality of crops and crop produce	Any insect or microorganism that causes damage to a crop
by boring holes	chewing and piercing	peching on farm produce

Answer	TMA NO
D	TMA3
A	TMA3
D	TMA3
A	TMA3
A	TMA3
B	TMA3
B	TMA3
D	TMA3
C	TMA3
A	TMA3
