

African Evolution Summary. 22/2/16

The idea of African Evolution is the idea of an African, living as an African or pure African.

So in terms of African living or wanting to live as a European is definitely not African.

1: The African God or creator Umvelinqangi or Tlatlamacholo . The One who is from the beginning the spirit God of love and unconditional support, whom one cannot be separate from. Not the racist judgemental god of non Africans.

2: African Law, namely the law of damages and restitution whereby one is guaranteed rights and access to Justice. Not the present in-justice system that gives you no rights and allows the rulers to subjugate and dominate you.

3: African Medicine the holistic health system that treats you as a Human with a Spirit. Not a sickness based system that views a Human as a machine.

4: African education, the education of African values and one that teaches you who you are and what you can be. Not a system of schooling and indoctrination that seeks to destroy your sovereignty and free thinking. Turning you into a worker to pay taxes to your masters.

5: Sovereignty . The divine right to rule your own life. To be who, God created you to be. Without the first four principles in place an African can never be free.

Summary.

African culture and African principals are on the verge of collapse or have completely collapsed except maybe for a few sparks here and there. You who call yourself Africans stop! doing so immediately if you are living as a European or want to be a European. Or stand up now and proclaim that you want to be an African who lives as an African with African ideas and principles in place.
