Math Card Games

Addition Game

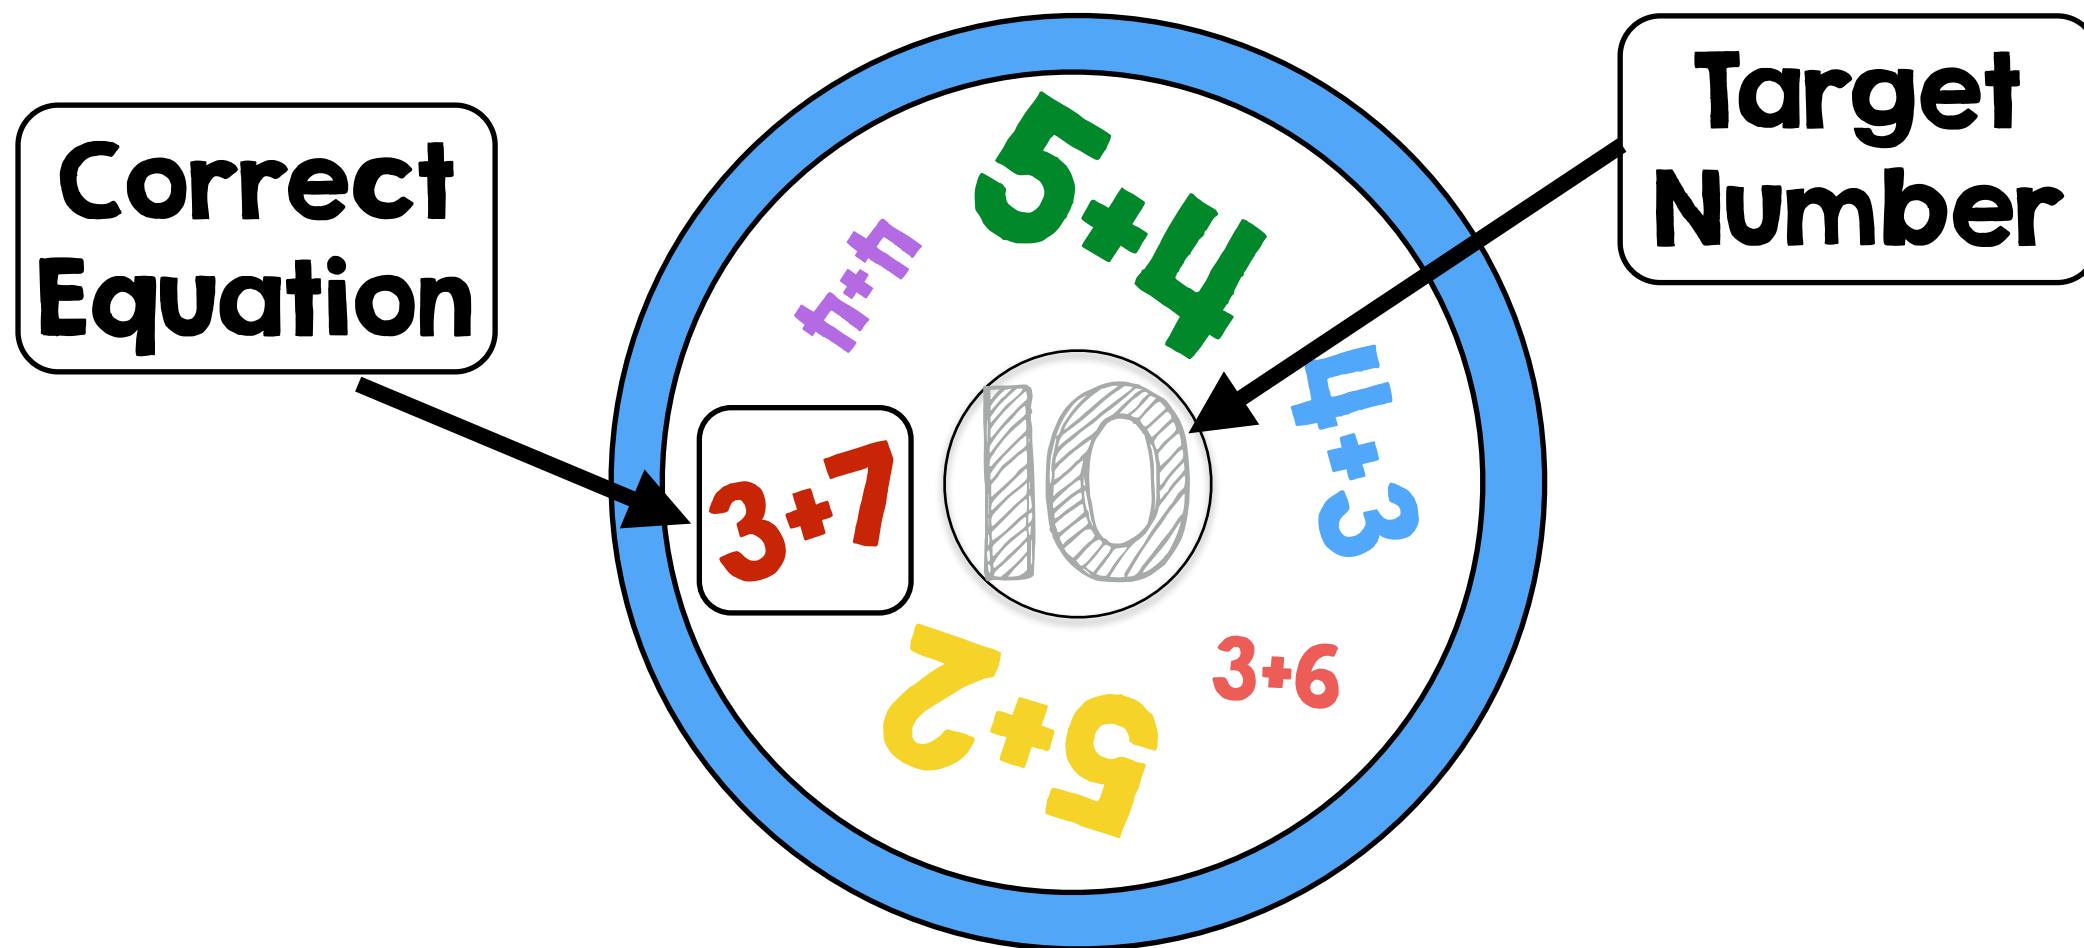

Look Around!

Instructions...

HOW TO PLAY...

1. Shuffle the cards. Stack them together face DOWN.
2. When ready to play, turn over the ENTIRE DECK (so that all cards are now facing up).
3. Look at the target number. Quickly scan the equations and find the ONE equation that equals the target number.

Look Around!

HOW TO PLAY (con't)...

4. The first player to find and call out the **correct equation** takes the card.
In the example card, the player would call out, "3+7!"
5. Repeat the process with the next card on the top of the deck.
6. In the event of a **tie** (two players call out the correct answer at exactly the same time), place that card to the side. The players who tied will go on to the next card in the deck. Whoever finds the equation first on this next card takes both cards (top card and the one placed to the side.)

WINNING THE GAME...

At the end of the game, the player with the most cards wins!

SINGLE PLAYER OPTION

The game can also be played by single players for review. If desired, players can time themselves and compete against their best time for completing the deck.
