BIOLOGY QUESTIONS

True/false

- 1) More than fifty percent of total world population depends on the traditional medicine-----
- 2) Rosemary is used to treat headache and body illness-----
- 3) Sebsebe Demissew is the professor of animal diversity-----
- 4) The root system usually grows down ward in plants-----
- 5) Water is an example of polar molecules-----

Choose the correct answer

- 6) More energy is required to raise the temperature of water since water molecules has high
 - A) heat of vaporization
 - B) heat of capacity
 - C) surface tension
 - D) cohesion force
- 7) The physical and chemical properties of water is due to
 - A) polarity of water

B) hydrogen bonding

C) molecular shape

D) all are answer

8) The process of photosynthesis in plants is because of water

A) cohesion

B) surface tension

C) solvent

D) boiling point

9) The freezing points properties of water is relevant to

A) Temperature regulation in animals

B) transportation of aquatic animals

C) survival of aquatic animals

D) body cooling mechanisms in animals

10) Highest boiling point is exhibited by

A) Ethanol

B) Acetic acid

C) Hydrogen sulphuhides

D) Water

11) Which one of the following is different from the rest?

A) Phosphorus

B) Sulfur

C) Copper

D) Chloride

12) Balance and equilibrium in living system is maintained by

A) hydrogen ions

B) sodium ions

C) potassium ions

D) calcium ions

13) an example of negatively charged ion responsible for maintaining more pressure in living body is

A) phosphorus

B) copper ions

C) chloride ions

D) calcium ions

14) the body requirements of calcium ion in our daily diet is

A) 3 to 4 gm

B) 3 to 6 gm

C) 5 to 10 gm

D) 800mg

15) Type of mineral found naturally in the earth's soil is

A) iodine

B) copper

C) iron

D) chlorine
