Grade 9 Biology **Work sheet V**

I. Matching Items

A	B
1. $C_{12}H_{22}O_{11}$	A. Deficency disease caused by lack of vitamin D
2. Fibers	B. Formed when many simple sugars joined together
3. Stunting	C. The chemical formula of disaccharide
4. Balanced diet	D. Indigestable parts ofvegetableand other plant materials
5. Maltose	E. Low weight for height
6. Rickets	F. Make thyroid gland to work properly
7. Wasting	G. The chemical formula of polysaccharide
8. Iodine	H. Low weight for age
9. Proteins	I. Glucose +Glucose
10. Polysaccharide	J. Provides growth of the body and build up a new cells
	K. Diet contains all essential nutrients with correct proportions
	L. Glucose + Galactose

II. Blank Space Items

11. Methods of birth control that provides protections against both pregnancy and STI is _____
12. The nutrients that are needed in large quantities are termed as _____
13. Important chemical substances that are found in foods is _____
14. Deficiency disease caused by the lack of iron is_____
15._____is a molecule w/c carries oxygen in the blood.
16. _____ is organic substances needed for chemical reactions in human cells.
17._____is the process of taking in foods and converting into energy and other vital nutrients required for life.

III. Essay items

18. Explain the difference between Intra uterine device and (IUD) intra uterine system (IUS)?
19. Explain Male sterilization and Female sterilization?
20. Describe the causes of syphilis and Gonorrhoea?
21. List Natural and Artificial Birth Control (Contraceptive) Method?
22. Explain the importance of fat in human body?
23. List the benefits of family planning?
24. Explain the difference between Fat and Oils?
25. List the causes of malnutrition?
26. List some deficiency disease and its Causes?

IV. Describe the following with examples?

27. A/ Monosaccharide
    B/ Disaccharide
    C/ Polysaccharide
