Choose the beast answer

1. The step in preparation of plant specimen that comes first is known as

A. Mounting the plant C. Collecting the plant

B. Pressing the plant D. drying the plant

2. Which of the following is not the form of vegetative reproduction?

A. Spore formation C. Buds

B. Runners D. Bulbs

3. In which of the following parts of a leaf does most of photosynthesis take place?

A .Palisade mesophyll C. Spongy mesophyll

B. Guard cell D. Epidermal cell

4. Which one of the following organism would be the first to die if sun were to go out?

A. Herbivores C. Decomposers

B. Carnivores D. Green plants

5. Which of the following human parasites can be controlled by meat inspection before eating?

A. Hookworm C. Tapeworm

B. Ascaris D. Bilharzias

6. Cones are the reproductive structures of

A .Ferns C. Mosses

B. Gymnosperms D. Monocots

7. To which of the following types of underground stems does a ginger belong?

A. Tuber C. Rhizome

B. Corm D .Bulb

8. Which of the following plants have tow cotyledons or seed leaves?

A. Wheat and Maize C. Sunflower and Rice

B. Barely and teff D. Beans and peas

9. Which of the following are arboreal animal?

A. apes and monkeys C. birds and bats

B. fish and whales D. lions and tigers

10. Which association is correct?

A. Invertebrates – frogs and fishes C. Domestic animals – elephant and lions

B. wild animals _ zebra and hyenas D. vertebrates _ worms and termites

11. What name is given to larva?

A. nymph C. caterpillar

B. pupa D. Instar

12. Which statement is correct about a worker bee?

A. it develops unfertilized egg C. it lays eggs

B. it is unfertile female D. it mates with a drone

13. When compared to a traditional hive, a modern hive

A. yield more bees wax but less honey

B. yields more honey but less bees wax

C. cause damage of bees during honey harvest

D. is not suitable to form a new colony

14. A device into which small insects are sucked by an intake of breath is called

A .Pooter C. tullgren funnel

B. pitfall trap D. sweep net

15. To which group do herbivores belong?

A. Fourth tropic level C. second tropic level

B. Third tropic level D. first tropic level

16. Which of the following is the correct sequence of organisms in a food chin?

A. grass------- snake----- rabbit-----hawk

B. grass------rabbit------snake----- hawk

C. hawk---- snake------grass------ rabbit

D. grass-----rabbit----- hawk-----snake

17. Most of the modern drugs prepared from

A. plants B. animals C. viruses D. algae

18. The thorax of an insects consist of

A. compound eyes and antenna

B. proboscis and legs

C. wings and reproductive structures D. wings and legs

19. Which one of the following shows the life cycle of a mosquito?

A. egg, nymph, adult, pupa C. egg, nymph, larva, adult

B. egg, larva, pupa, adult D. adult, egg, nymph, pupa

20. Which statement is true about a queen honey bee?

A. it collects food from flower C. it lays egg and kills rival queen

B. it build new comp for egg D. it defends the hive against intruders

Matching

A	B
21. Angiosperms	A. all the d/t population live in particular area
22. Gymnosperms	B. carrier of disease
23. Complete metamorphosis	C. egg, nymph, adult
24. Incomplete metamorphosis	D. diseases of cattle
25. Vector	E. animal and plant interconnected d/t path
26. Gendi	F. animal and plant interconnected in single path
27. Population	G. flowering plant
28. Community	H. not have flower
29. Food webs	I. egg, larva, pupa, adult
30. Food chin	J. organism of the same species live in particular area

Fill in the blank space

31. ----------is the transfer of pollen from anther to stigma

32. ----------is a mature ovule ready for fertilization

33. Animals living in water and on land are called----------

34. ----------is disease of a blood

35. Each level in a food chain is called---------

Give short answer

36. List some uses of life

37. List some uses of root

38. What is the d/c between sexual and asexual reproduction

39. Why insects are the most diverse group of animal? Write 3 reasons

40. What is environment?

@Timehirtbebet
