2007	SPREADSHEETS	WORD PROCESSING	
2006	SPREADSHEETS	DATABASE	
			TOTAL
SPREADSHEETS	4	4	**8**
DATABASE	6	2	**8**
DTP	1	4	**5**
WORDPROCESSOR	3	4	**7**
	REASONS FOR THE PREDICTION		
1	No topic has been set 3-times in a row since 2006. database is out.		
2	No topic has ever been set twice in a row, one year skip and then another twice in a row. DTP is out		
3	This looks like a repetition of 2012 topics		
4	Word processing which is a serious contender has never been placed alongside DTP		
5	Since 2006, word processing has featured 1 less than spreadsheets and database, it is more likely to appear in 2020 than any other applications and DTP will most likely appear more in future to balance the equation
