(CM) means adhering to core principles of constitutional democracy

At to Dr Ambedkar constitutional morality means effective coordination b/w conflicting interests of diff" people & administrative cooperation to reconcile them amicable.

Not limited to literal constitutional provisions but the values behind those provisions.

eg. individual autonomy & liberty, the right to privacy.

Individual → follows FD while exercising FRs

exercising freedom of religion but not disrespecting others

exercise right to dissent but within constitutional means

Aspire for better life but not harming others

Judiciary → Rule of law & due process of law

Counter social morality where it ~~puts someone at~~ discriminates

↳ Sabrimala case → gender equality enforced by discarding discriminatory social practice

Legislature & Executive → recognise pluralities & diversities in society while making & implementing rules

e.g. higher centre share in NE schemes

promoting inclusiveness

eg. taking public opinion on draft laws

Way forward

① CM not properly defined → need to define properly so that separation of power can be ensured

② being complex subject, public needs to be educated to make it inherent value rather than being enforced from outside.
