Equiped And Ready

What I'll be telling you now is for the building of your faith to grow in the spirit, so you'll not be shaken, because even if you don't meet the devil he'll always come to you and what do you think will happen if the fire of God is not burning in you, or if it's not hot enough. Just as you cannot dare to place your hands over a fire so also your spirit man should burn with the fire of God.

They're watching, the evil ones, they're always watching, they know those who are filled with the power of God and would want to try them. When a man is growing in the power of God, demons knows he'll become a threat to their Kingdom in the future, and so they'll do everything they can now, before it's too late, because when a man carries the weight of God glory he can never be touched, he becomes a destroyer of territories. Where the power of God lies, there is attraction an awareness in the spiritual realm.

I'm talking on the media today, it's one of the easiest medium of transferring or contacting a spirit, be it of God or of the devil. You know you can just see an image sent by agents of darkness, the moment you see it, if you're not strong in Christ you'll be influenced by demons. The media is a streamline, a medium in which light and darkness are been channeled, you just have to tune into the right channel, even if you're in the right channel you have to be heavily built in Christ, because at times you might come across what you don't expect, it's a free traffic with no regulations.

When a servant of God is on the media proclaiming God's word with power and life, he becomes a threat, because he can walk into any section or territory overrun by darkness, and bring light into it.

The difference between the physical and the media, virtual medium, is that; in the physical they can scan you spiritually and know that you're burning with the fire of God so they'll go their way, but in the media they can't see us physically in order to scan us, since it's a virtual realm, they lack much spiritual information, the way the physical realm operates is a poor copy of how the spiritual operates.

When a child of God is on the net, his avatar or messages carries the presence of God also, it carries fire and the light of God. it just like how your shirt will have the same aroma of you when it is taken far away, when someone get there he'll think you were there, because your shirt was taken there, or more like a radioactive particle that can be traced. That's how it is.

They see the signature of the presence of God you're carrying on your messages or whatever is attached to you, but since they don't know the intensity of that power they have to play dare to try it out if it is weak. But if it turns out the presence of God is overwhelming in you, burning with ravage, with the power of God, they'll catch fire and be subdued.

If they see you physically and then examine you, they can't touch you, because they know the consequences. However, in term of social media they don't know, since they have already send their signature of darkness through their messages,

pictures, videos, songs or whatever it is, they have already touched you accidentally without knowing the exact degree of the power of God in you and when they do the angels of the Lord will be assembled to disarm, subdue and torment them before they even breach your spiritual barrier.

Grow in the power of God, let the radar of His presence in you expand, so you can walk through any territory of darkness unscathed. The more you spend time in His presence, the more he teaches and trains you to be equipped ready for battle.

Always carry the fire of God and let it burn even more that whatever you touch will carry the fire of God, even your words and your presence, destroying the ploys of darkness. His word is like fuel and the fire is the fullness of his spirit engulfing you in flames.
