

CALL FOR EXPRESSION OF INTEREST

The war in the northern part of Ethiopia has resulted in unimaginable destruction on the already strained infrastructure of Ethiopia. Among the hardest hit facilities are school facilities. During its early assessments the **Ministry of Education (MoE)** has accounted for at least 7,000 school facilities that are seriously affected, while half of these have been completely destroyed. The Ethiopian government in its effort to reconstruct these facilities has vowed to rebuild better schools for the children of Ethiopia. To this end, on December 15, 2021, the MoE officially invited the Association of Ethiopian Architects (AEA) to develop the vision and design for the new Ethiopia schools (.nEs.) Pro bono. Since then, AEA has swiftly mobilized members and non-members to develop the vision for .nEs. through a design charrette Pro Bono. The .nEs. vision has now been approved by the Ministry of Education and Regional Education Bureaus.

Now AEA would like to call its members to give a Pro Bono service in developing the designs of these new schools on selected sites based on the vision and guidelines already developed. AEA urges firms and individual members to commit and be part of history by realizing this noble undertaking.

ELIGIBILITY CRITERIA:

1. For Consultancy firms

- members of AEA
- Firms who are in practice and are committed to work on. nEs. Project, pro bono

2. For Individual members of AEA
