AGRICULTURE (443/1)
PAPER 1
FORM THREE (3)
TIME: 2 HOURS

Instructions:
-This paper has three sections A,B and C.
- Answer all questions in sections A and B.
-Answer any two questions in section C.

For Examiners use:

SECTION	QUESTIONS	MAXIMUM SCORE	STUDENTS SCORE
A	1-19	30	
B	20-23	20	
	24	20	
	25	20	
	26	20	
TOTAL		90	

1. Name two situations under which irrigation is practiced **(1mk)**

……

……

……

……

2. Give a reason why ranching is an improvised pastoral nomadism **(1mk)**

……

……

……

3. State two ways by which a soil of PH 3 can be raised to a PH of 6 **(1mk)**

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

4. Outline two effects of adding organic matter to sandy soil **(1mk)**

……

……

……

……

5. State **two** causes of forking in carrots **(1mk)**

……

……

……

……

6.. Give **two** disadvantages of hydram pumps (1mk)

……

……

……

……

7. Give four conditions that necessitate clearing of land. **(2mks)**

……

……

……

……

……

……

8. State four factors that determine the depth of planting **(2mks)**

……

……

……

……

……

……

9. State four minimum tillage practices **(2mks)**

……

……

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

10. State **two** methods of harvesting Maize **(2mks).**

……

……

……

……

……

……

11. Give **four** farming practices that may help in achieving minimum tillage**.** **(2mks)**

……

……

……

……

……

……

12. A farmer plants maize on his piece of land measuring 40m by 30m at a seed rate of I seed per hole. If he used a spacing of 75cm by 25cm, Calculate this plant population. **(3mks)**

13. State four reasons for conserving forage **(2mks)**

……

……

……

……

……

……

14. Give four benefits of a land title deed **(2mks)**

……

……

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

15. State four steps of gully formation **(2mks)**

……

……

……

……

……

16. State two characteristics of a good root stock for grafting **(1mk)**

……

……

……

17. State two main causes of silage loses **(1mk)**

……

……

……

18. State four aims of land settlement programmes in Kenya **(2mks)**

……

……

……

……

……

19. Give two factors that influence the stage at which crop is harvested **(1mk)**

……

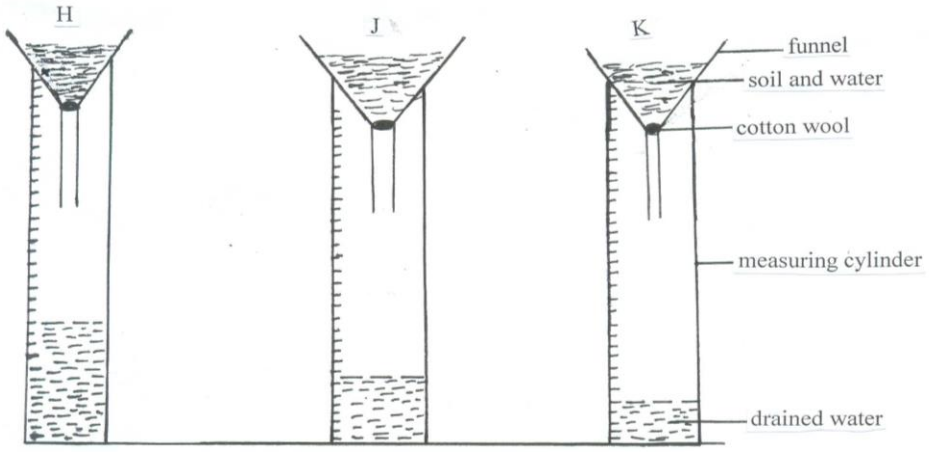

……

……

……

SECTION B (20MARKS)

20. The illustrations below represent an experiment to compare the porosity and water holding capacity of three types of soils. Carefully study the experiment and then answer the questions that follow

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(a) Identify the soil in each of the funnels labeled **(3mks)**

H ……..

J……

K……..

(b) Which of the three types of soil can be said to have the highest porosity rate? **(½ mk)**

……

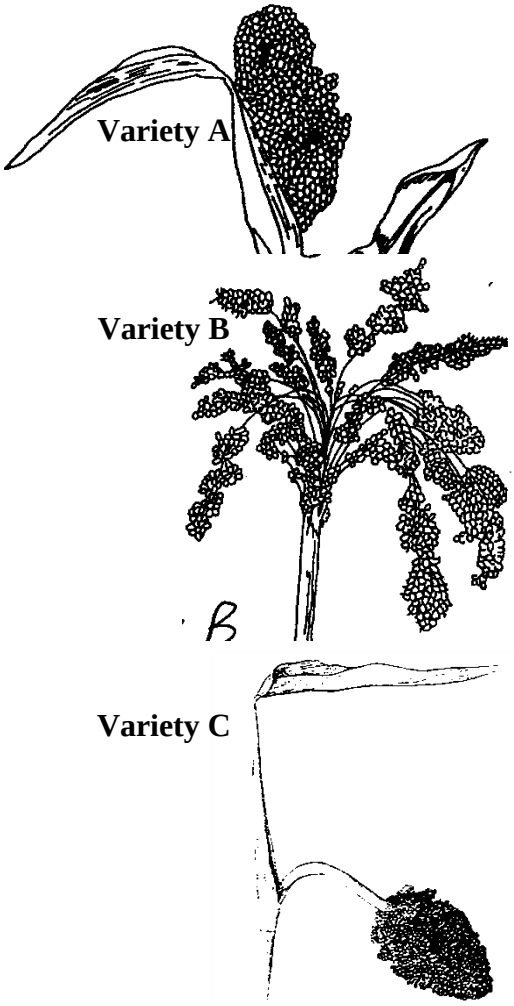

……

(c) Which type of soil would be suitable for planting paddy rice? **(½mk)**

……

……

21. The diagrams below represent some panicles of varieties of Sorghum crop growing in the field. Study them carefully and answer the questions that follow.

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

a) Identify the types of panicles in each of the varieties represented by A,B and C

Variety **A** ……. **(1mk)**

Variety **B** …….. **(1mk)**

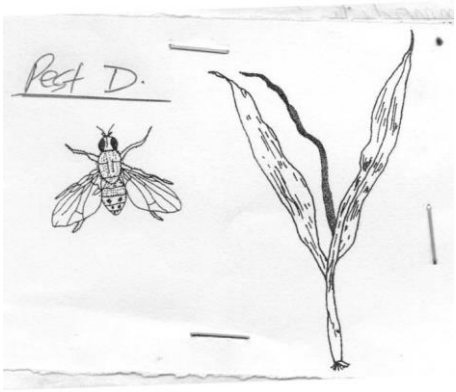

Variety **C** …… **(1mk)**

b) Which of the varieties named in (a) above is less easily damaged by bird pests **(1mk)**

……

……

c) The diagram below represents a pest labeled D that infests Sorghum plants during early stages of establishment

i) Identify the pest **(1mk)**

……

……

ii) State two methods of controlling the pest named in C(i) above **(2mks)**

……

……

……

……

22. Study diagram below and answer questions that follow.

(i) Name the farming practice illustrated above. **(1mk)**

……

……

(ii) Give the procedure followed to carry out the practice you have named in (i) above **(3mks)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

……

……

……

……

(iii) State the importance of carrying out the farming practice named above. **(1mk)**

……

……

……

23. The diagram below shows common weeds, study them and answer the questions that follow.

a) Identify the weeds J and K. **(2mks)**

……

……

……

b) State the effects of weed labeled J to livestock. **(1mk)**

……

……

c) Give **one** reason why it is difficult to control the weed labeled L? **(1mk)**

……

……

……

SECTION C (40 MARKS)

Answer *only two* questions in this section in the spaces provided.

24.(a) Describe the production of onions under the following sub headings

I.Ecological requirements **(3mks)**

II. Planting **(5mks)**

III. Field practices **(2mks)**

IV. Harvesting and marketing **(5mks)**

b) State **five** safety measures that a farmer must consider to prevent danger to other people and environment when using pesticides. **(5mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

25a. Outline five uses of farm records **(5mks)**

b. Outline the harvesting of coffee under following subheadings

i) Stage of harvesting **(2mks)**

ii) Procedure of harvesting **(5mks)**

iii) Precautions when harvesting **(3mks)**

c. State **five** precautions taken when harvesting pyrethrum **(5mks)**

26a. Describe any **five** cultural methods of controlling weeds. **(5mks)**

b. Describe **eight** advantages of land consolidation and registration**.** **(8mks)**

c. Explain **seven** objectives of land reform under taken in Kenya**.** **(7mks)**

……

……

……

……

……

……

……

……

……

……

……

……

……

……

……

……

……

……

……

PAPER 2
FORM THREE (3)
TIME: 2 HOURS

INSTRUCTIONS TO THE CANDIDATES

1.Write your name, admission number and class in the spaces provided
2.Answer all questions in the spaces provided
3.Answer all questions in section A and B and two questions in section C
4.The exam carries 90 marks

FOR EXAMINERS USE ONLY

SECTION	QUESTION	MAXIMUM SCORE	CANDIDATES SCORE
A	1 – 16	30 MARKS	
B	17– 20	20 MARKS	
	21	20 MARKS	
	22	20 MARKS	
	23	20 MARKS	
TOTAL		90 MARKS	

SECTION A (30 MARKS)

1.Give two benefits of providing enough nutrients to livestock for proper health. **(1mk)**

……

……

……

……

2.Give two harmful effects of ticks in sheep. **(2mks)**

……

……

……

……

3.State four roles of worker bees in a colony. **(2mks)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

……

……

……

……

4. State the role of the crop in digestive system of a hen. **(2mks)**

……

……

……

……

……

……

5. State <u>four</u> reasons for castration in pig production. **(2mks)**

……

……

……

……

……

……

6. State <u>two</u> benefits of guard rails to piglets in a farrowing pen? **(1mk)**

……

……

……

……

7. State the role of a foot bath in a cattle Dip. **(1mk)**

……

……

……

8. Distinguish between the following practices as used in livestock production.

(a). Crutching and ringing in sheep production. **(2mks)**

……

……

……

(b). Cropping and harvesting in fish farming. **(2mks)**

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

9. Give **four** disadvantages of inbreeding. **(2mks)**

……

……

……

……

……

……

10. Give **four** factors that a farmer may consider while carrying out culling in livestock production. **(2mks)**

……

……

……

……

……

……

11. State **four** predisposing factors of pneumonia in lambs **(2mks)**

……

……

……

……

……

……

12. Name **four** tools used in dehorning. **(2mks)**

……

……

……

……

……

……

13. Give **two** ways in which infectious diseases can spread from one livestock to another within a farm. **(1mks)**

……

……

……

……

14. State **four** reasons for castration in pig production. **(2mks)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

……

……

……

……

15. State **four** characteristics of roughage livestock feeds. **(2mks)**

……

……

……

……

……

……

16. State **four** roles of worker bees in a colony. **(2mks)**

……

……

……

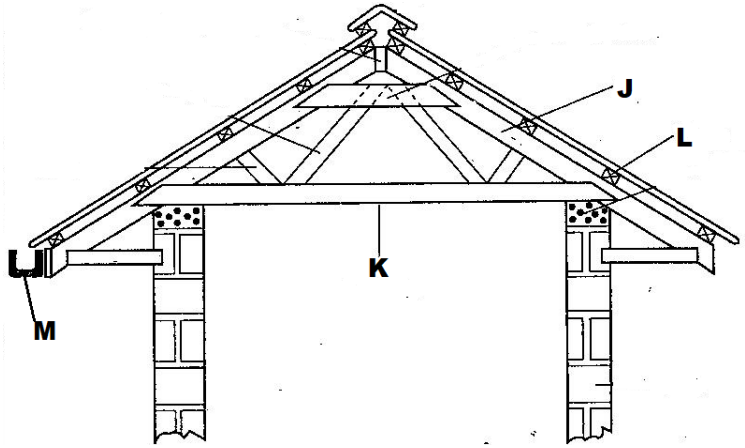

……

……

……

SECTION B (20MARKS)

17. Study the illustration below and answer the questions that follow.

(a). Identify the parts labeled **(2mks)**

J ……

K ……

L ……

M ……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(b) State **two** uses of the part labelled L. **(2mk)**

……

……

……

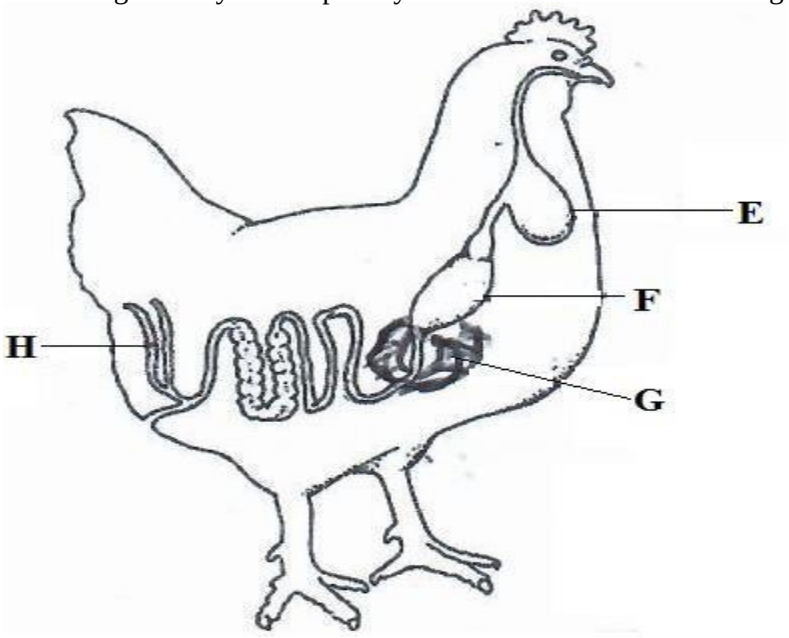

……

(c) State **one** reason why it is important to have the structure labelled M at the edge of the roofing materials. **(1mk)**

……

……

18. The diagram below shows the digestive system in poultry. Use it to answer the following questions.

(a) Name the parts labelled **E** and **H.** **(2mks)**

……

……

……

……

(b) Give the function of part **F**. **(1mk)**

……

……

……

(c) State **two** ways in which the part labelled **G** is adapted to its function**.** **(2mks)**

……

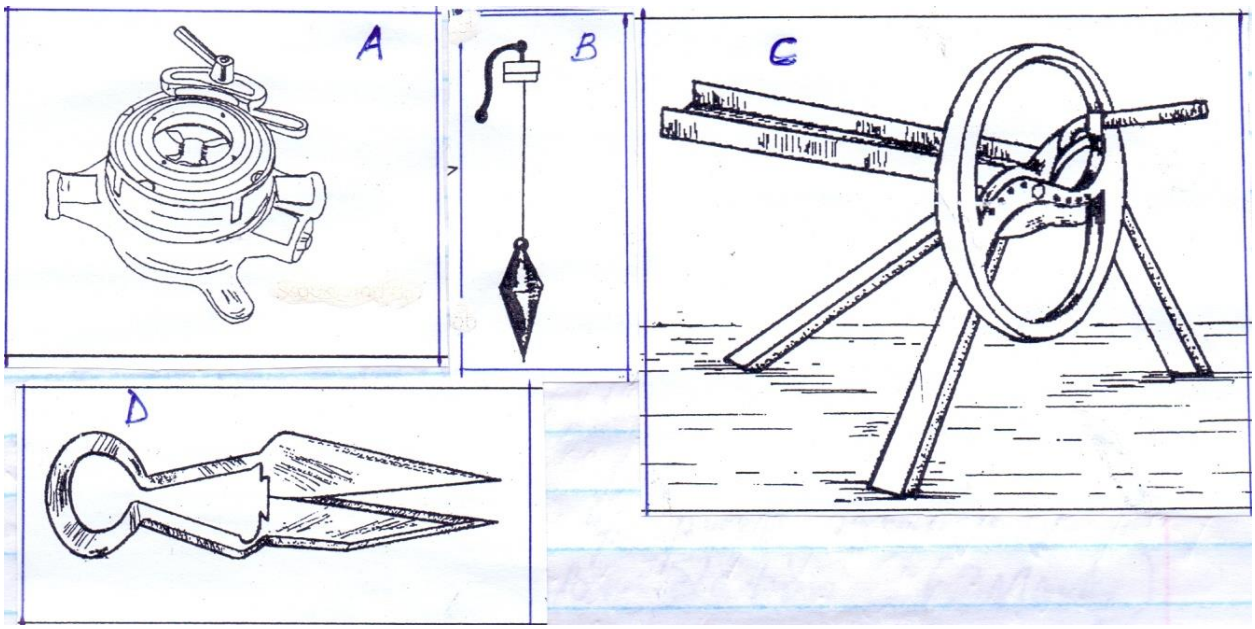

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

19. The diagrams below represent some farm tools and equipment .Study them and answer the questions that follow.

[a] Identify the tools labeled A and B **(2mks)**

……

……

……

[b] State one use of each of the tools labeled C and D **(2 mks)**

……

……

……

……

[c] Explain one maintenance practice carried out on tool D . **(1mk)**

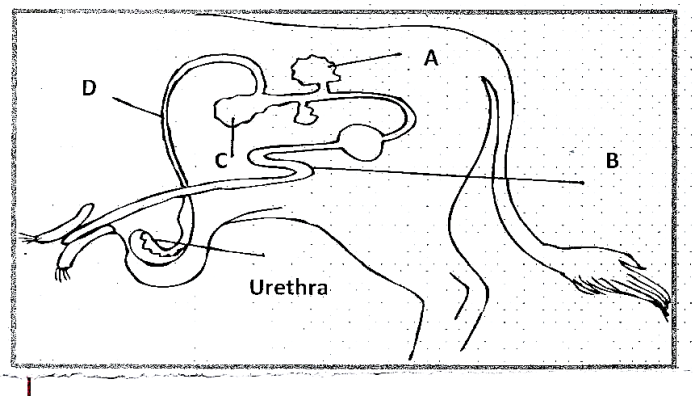

……

……

……

……

20. Study the illustration below and use it to answer the questions below

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

a) Label the parts A,B,C and D **(2mks)**

……

……

……

……

……

……

b) Give the functions of parts B and C **(2mks)**

……

……

……

……

c) Give the name of the part in the animal affected when the animal is attached by brucellosis **(1mk)**

……

……

SECTION C (40 MARKS)
ANSWER ANY 2 QUESTIONS IN THIS SECTION

21. a) Describe brucellosis under the following subheadings:

i) Causal organism **(1mk)**

ii) Transmission **(1mk)**

iii) Symptoms **(4mks)**

iv) Control measures **(4mks)**

b) State the function of any five parts of a zero grazing unit in dairy farming. **(5mks)**

c) Explain **five** factors that should be considered when choosing tools and equipment to use in the farm. **(5mks)**

22. (a) State **five** functions of water in the body of an animal. **(5mks)**

(b) Discuss **five** factors that affect digestibility of feed in livestock. **(10mks)**

(c) Give **five** reasons for keeping livestock healthy. **(5mks)**

23. (a) State **ten** general characteristics of beef cattle. **(10mks)**

(b) Discuss **five** factors that determine the amount of maintenance ration and animal should be given. **(10mks)**

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

BIOLOGY(231/1)

FORM THREE (3)

Time: 2 *Hours*

INSTRUCTIONS

1.All Questions are Compulsory

2.Write your Answers in the Spaces Provided

3.Wrong Spelling of Technical Terms shall be Penalized

Max Score	Student's Score
80	

1.Define the term guttation (1mk)

……

……

……

2.a) Name the muscle that regulates entry of food bolus into the stomach **(1mk)**

……

……

b) How is parotid gland important in starch digestion? **(2mks)**

……

……

……

……

3.a) Why are proteins said to be amphoteric? **(1mk)**

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

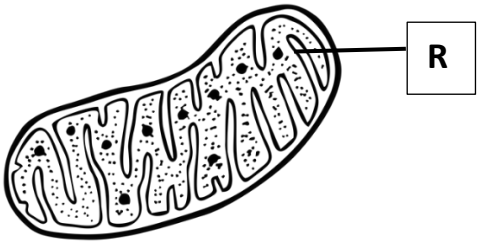

b) Under which condition does the body resort to using protein as a respiratory substrate? **(1mk)**

……

……

……

4. Use the diagram shown below to answer the question that follows

a) Name the organelle shown above **(1mk)**

……

……

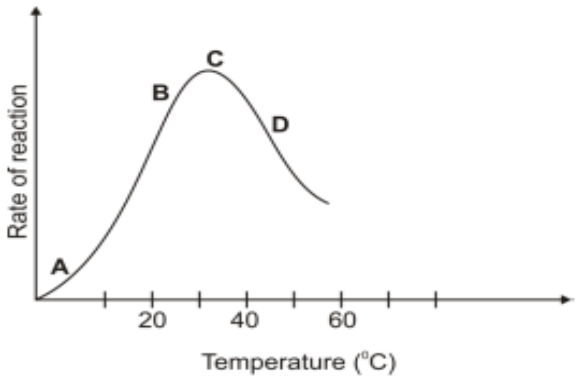

b) Name structure **R** and give its importance to the functioning of the organelle shown? **(1mks)**

……

……

……

5. The illustration shown below is a graph of enzymatic reaction

a) Account for the rate of reaction shown at **D** **(2mks)**

……

……

……

……

b) Why is the rate of reaction maximum at **C**? **(1mk)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

6.a) Name an enzyme and co-enzyme important in blood clotting **(2mks)**

i) Enzyme ……

ii) Co-enzyme ……..

b) How is blood clotting important in defense of the body? **(1mk)**

……

……

……

7.a) Why are members of Kingdom Monera referred to as Prokaryotes? **(1mk)**

……

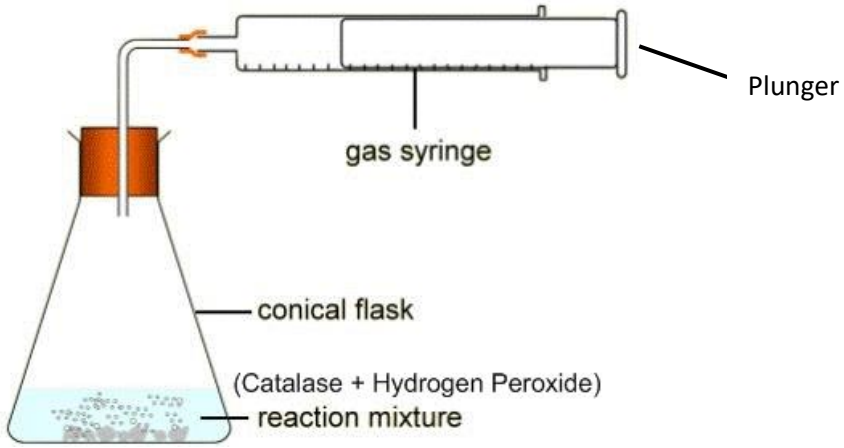

……

……

b) Distinguish Class Insecta and Arachnida in terms of the following features **(3mks)**

Feature	Insecta	Arachnida
Antennae		
Number of legs		
Cephalothorax		

8.Form 3 students in Garisa High school used the set up below to investigate a physiological process

a) Account for the observation made on movement of the plunger after 5 minutes **(2mks)**

……

……

……

……

b) State the importance of the physiological process investigated to human body? **(1mk)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

……

……

9. State the importance of the absence of the following organelles in the erythrocytes

i) Nucleus **(1mk)**

……

……

ii) Mitochondria **(1mk)**

……

……

10. Even after Susan had placed a few living fish, crabs and some worms in an aquarium filled with water, his teacher of Biology told him that the aquarium did not qualify to be referred as an ecosystem. Give **TWO** reasons why the teacher made that observation. **(2mks)**

……

……

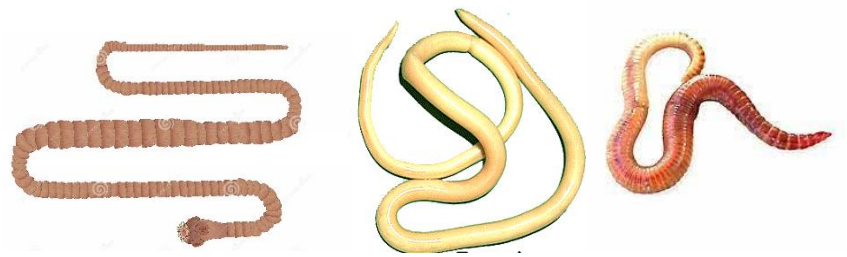

……

……

11. The following are common worms encountered by learners in their ecology lesson. Construct a 2-step dichotomus key using the following features **(4mks)**

(i) Body Segmentation

(ii) Suckers

Tapeworm Roundworm Earthworm

……

……

……

……

……

……

12. Describe double fertilization in flowering plants **(4mks)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

……

……

……

……

……

13. Use the diagram shown below to answer questions that follow

a) Give **TWO** reasons why the jaw shown above is of a carnivorous animal **(2mks)**

……

……

……

……

b) Use **X** to label the tooth used in seizing prey on the diagram above **(1mk)**

14. A photograph of a common animal is shown below

a) Give the name of the Class to which the animal shown above belongs **(1mk)**

……

……

b) Give **TWO** reasons for your answer in a) above **(2mks)**

……

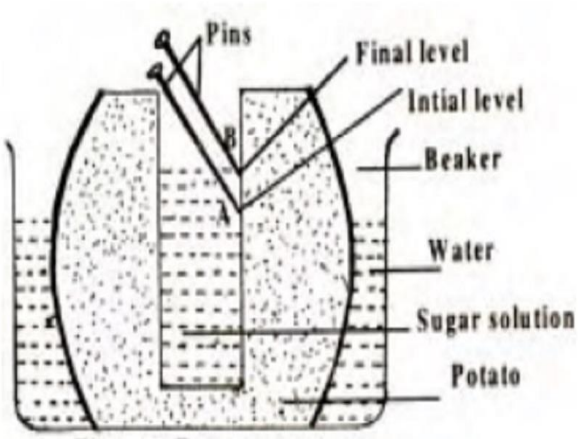

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

15. The diagram shows the position of the pin after an experiment

a) Which physiological process was being investigated **(1mk)**

……

……

b) Account for the observation made in the experimental set up above **(3mks)**

……

……

……

……

……

16. The table below shows the nitrogenous wastes released by various animals

Animal	Nitrogenous Waste
Human Beings	Urea
Desert Rat	Uric acid
Freshwater Fish	Ammonia

a) What is the advantage of a desert rat excreting its nitrogenous waste as uric acid? **(1mk)**

……

……

b) Explain why freshwater fish excretes its nitrogenous waste as Ammonia **(2mks)**

……

……

……

……

17. a) Name the tissue in the pancreas that forms insulin **(1mk)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

b) Describe how glucagon hormone helps regulate blood sugar **(2mks)**

……

……

……

……

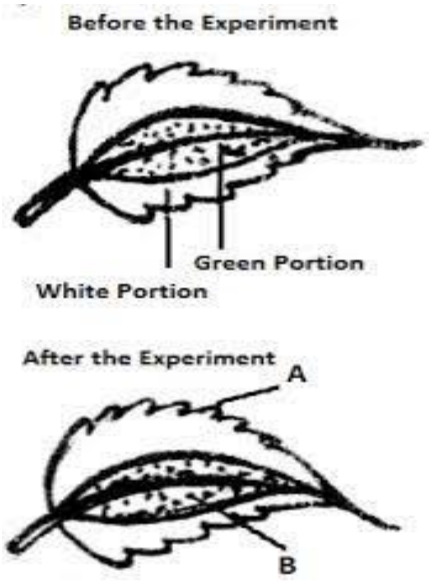

18. a) Samson observed 9 cells along the diameter of field view of microscope that had a radius of 1.5mm. Determine the diameter of one cell in micrometers **(3mks)**

b) Why is fine adjustment knob used when the high power objective lens is in position? **(1mk)**

……

……

19. The diagram shown below shows a leaf that was used to study photosynthesis. After the experiment, drops of Iodine solution were placed on the processed leaf

a) Which food substance was being tested for? **(1mk)**

……

……

b) Fill in the table below to show the colours observed in the following regions **(2mks)**

Region	Colour
A	
B	

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

c) Account for observation made on part of the leaf labelled **A** **(2mks)**

……

……

……

……

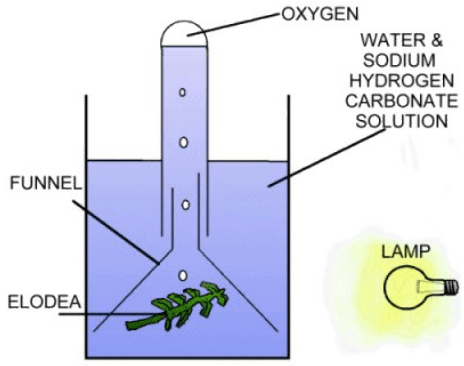

20. State the economic importance of the following metabolic wastes from plants **(3mks)**

i) Papain ……

ii) Colchicine ……

iii) Tannin ……

21. The experiment set up shown below was used to investigate a physiological process

a) What was the aim of the experiment? **(1mk)**

……

……

b) Why was Sodium Hydrogen Carbonate added in the water **(2mks)**

……

……

……

……

c) How can one confirm that the gas released in the experiment is Oxygen **(1mk)**

……

……

22. Give **TWO** advantages of using glucose as a respiratory substrate **(2mks)**

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

23. Account for the following observations about human reproductive system **(2mks)**

a) The male releases millions of spermatozoa in one ejaculation during copulation

……

……

……

b) The semen is alkaline

……

……

……

24. a) Why is blood group **AB** said to be a universal recipient? **(2mks)**

……

……

……

……

b) State **TWO** precautions observed before blood transfusion **(2mks)**

……

……

……

……

25. State the role of the following during seed germination

a) Water **(1mk)**

……

……

b) Oxygen **(2mks)**

……

……

26. Give the differences between insect-pollinated and wind-pollinated flowers in terms of the following features **(3mks)**

Feature	Insect pollinated	Wind-pollinated
Size of pollen grain		
Length of Filament		
Size of petals		

END

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

SECTION A (40 MARKS)

1. The diagram shown below is an illustration of enzyme-substrate interaction

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

a) Identify the following in the reaction above **(2mks)**

i) M ……..

ii) N ……..

b) What is the effect of removal of element **N** in the reaction above? **(1mk)**

……

……

……

c) i) Why are enzymes denatured by high temperatures? **(1mk)**

……

……

……

ii) Provide **TWO** properties of enzymes **(2mks)**

……

……

……

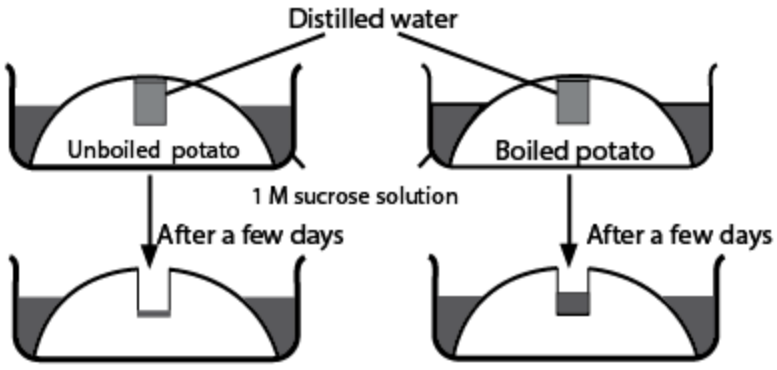

……

d) If the reaction shown above is blood clotting process and the substrate is prothrombin. Give the correct identity of the following: **(2mks)**

i) Enzyme …..……..

ii) M …….

2. The following diagram shows a set up before and the results after the experiment.

a) What was the aim of the experiment? **(1mk)**

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

b) Account for the observation made in the unboiled potato **(2mks)**

……

……

……

……

c) State **TWO** importance of the physiological process investigated to a human cell **(2mks)**

……

……

……

……

d) Which property of the cell membrane of cells is revealed by the results shown by:

i) Boiled potato **(1mk)**

……

……

ii) Unboiled potato **(1mk)**

……

……

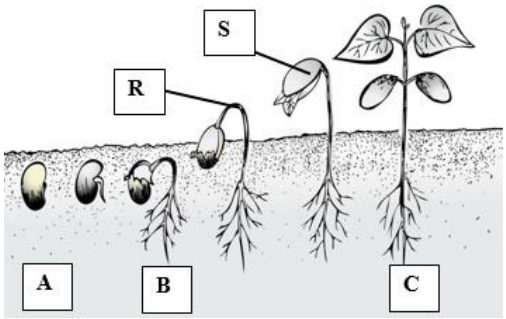

e)How is active transport different from the physiological process investigated above? **(1mk)**

……

……

……

3.The following is an illustration of germination process of a seed

a) Identify the type of germination represented above **(1mk)**

……

……

b) Give **TWO** reasons for your answer in a) above **(2mks)**

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

……

……

c) Account for the expected change in dry weight of the cotyledon at stages **A** and **B** **(2mks)**

……

……

……

……

d) Explain the significance of part **R** being curved **(1mk)**

……

……

……

e)Explain why stage **C** has the highest dry weight compared to the other stages **(2mks)**

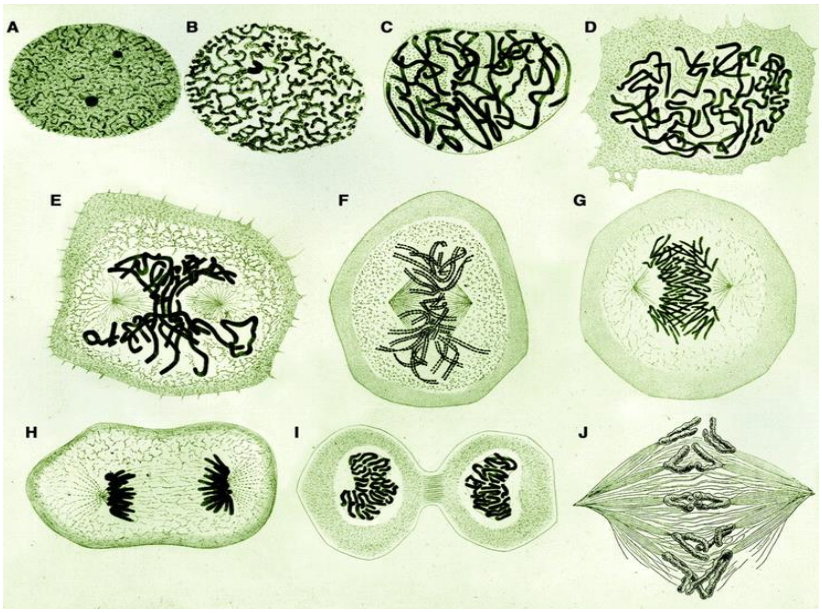

……

……

……

……

4.The following is an illustration of various stages of cell division in a cell

a) Give a reason to show that the process illustrated above is:

i) Mitosis **(1mk)**

……

……

ii) Taking place in an animal. **(1mk)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

b) With a reason identify the stage labelled **F**: **(2mks)**

Stage……

Reason ……

c)What is the significance of the stage labelled **H** in cell division process **(1mk)**

……

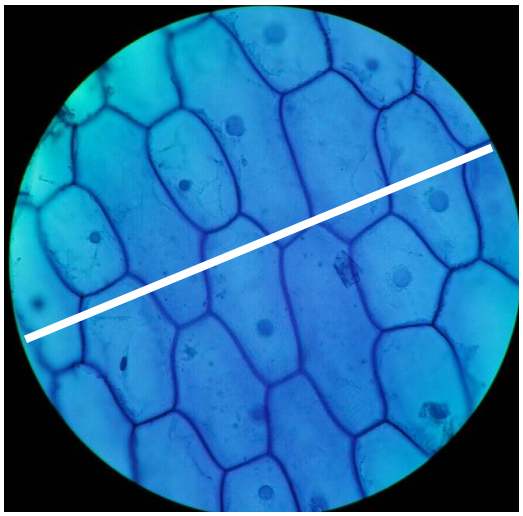

……

……

d) State the differences between meiosis and mitosis in terms of the following **(3mks)**

Feature	Meiosis	Mitosis
Number of Daughter Cells		
Crossing over		
Nucleus of Daughter cells		

5.The following diagram shows onion cells as observed in a field of view of a light microscope

a) Determine the following along the white line that run across the field of view: **(2mks)**

i) Number of cells ……..

ii) Diameter of field of view …….. **mm**

b) i) From the information generated in a) above determine the diameter of one cell in micrometers **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

ii) If the field of view has a total magnification of **X1500**. Determine the actual diameter of one cell **(2mks)**

iii) Give **ONE** weakness of this method of calculating size of a cell **(1mk)**

……

……

……

SECTION B (40 MARKS)

Question 6 is Compulsory. Choose to do either Question. 7 or Qn. 8

6. The table shown below is the result of an experiment on the effect of temperature on the rate of photosynthesis of different batches of plants of same species by measuring the volume of Oxygen gas released at different temperatures

Batch	Temperature (^{0}C)	Volume of Oxygen (cm^3)
1	10	18
2	15	21
3	20	25
4	25	35
5	30	48
6	35	48
7	40	38
8	45	20
9	50	5
10	55	0

a) On the graph provided, draw a graph of volume of Oxygen produced against temperature **(6mks)**

b) Account for the shape of the graph at temperature of:

i) 10-20^{o}C **(3mks)**

……

……

……

……

……

ii) 40-50 ^{o}C **(3mks)**

……

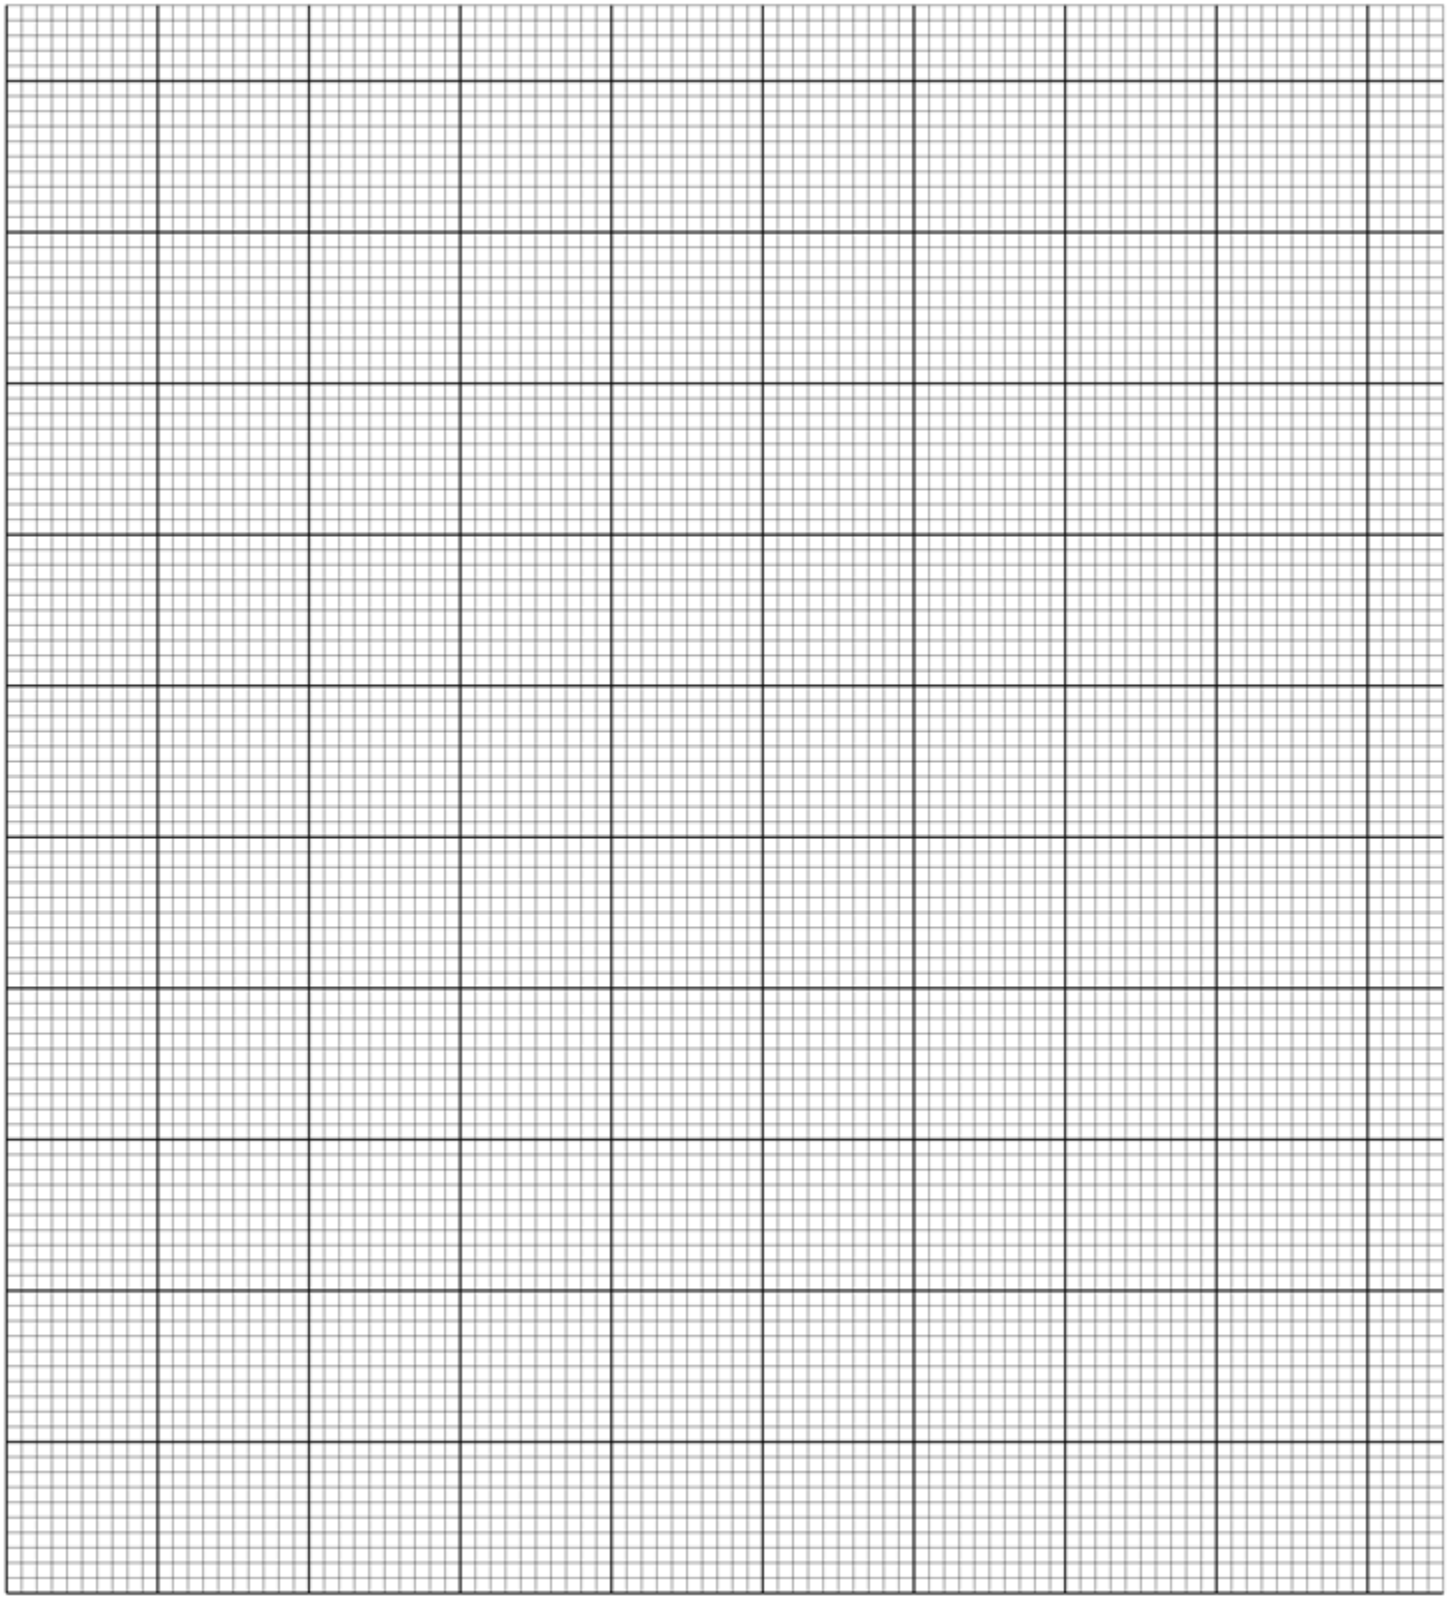

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

c) i) Determine the following from the graph

i) Optimum temperature for the process of photosynthesis in the plant studied **(1mk)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

ii) Volume of Oxygen produced at 23 ^{o}C **(1mk)**

d) Write a word equation to represent photosynthesis process **(1mk)**

……

……

e) Apart from temperature, give **THREE** factors that increase rate of photosynthesis **(3mks)**

……

……

……

……

……

f) Explain how optimum temperature during photosynthesis increases biodiversity in an ecosystem **(2mks)**

……

……

……

……

7.a) Outline various ways of controlling air pollution **(4mks)**

b) Describe adaptations of the mammalian heart to its functions **(16mks)**

8.a) Explain the effect of increased physical body activity on the following organs: **(13mks)**

i) Heart

ii) Kidneys

b) Outline structural differences that exist between members of Class Dicotyledonae and Class Monocotyledonae **(7mks)**

……

……

……

……

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

BIOLOGY (231/3)

FORM THREE (3)

Time: $1\frac{3}{4}$ *Hours*

INSTRUCTIONS TO CANDIDATES:

(a) Write your **name, admission number** and **school** in the spaces provided above.
(b) **Sign** and write the **date** of examination in the spaces provided above.
(c) Answer all the questions in the spaces provided.
(d) You are required to spend the first **15** minutes of the **1¾** hours allowed for
(e) this paper reading the whole paper carefully before commencing your work.
(f) This paper has **three** questions.
(g) Students should check the question paper to ascertain that all the papers are printed as indicated and that no questions are missing.
(h) Candidates should answer the questions in English.

FOR EXAMINER'S USE ONLY:

Question	Maximum Score	Candidate's Score
1	**14**	
2	**14**	
3	**12**	
Total Score	**40**	

1. You are provided with specimen T.

a) Cut a 1 cm slice from the specimen and remove its peel. Place the soft inner part into a boiling tube labelled A. Cut another 1 cm slice from the specimen and remove its peel. Using a pestle mash the soft inner part into a paste. Place the paste into a boiling tube labelled B.

Add 4 cm^3 of dilute hydrogen peroxide solution into each of the boiling tubes A and B.

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

i) Record your observations **(2mks)**

……

……

……

……

……

ii) Account for the results in 1. a) i) above **(2mks)**

……

……

……

……

……

iii) Write an equation for the breakdown of hydrogen peroxide **(1mk)**

……

……

b) Cut a 2 cm slice from specimen T and remove its peel. Place the soft inner part in a mortar, and using a pestle mash it into a fine paste. Add a little of distilled water and stir the mixture. Pour the mixture into a beaker and allow it to stand for 2 minutes. Using the reagents provided, test for the food substances in the mixture. Record procedure, observation and conclusion in the table below **(9mks)**

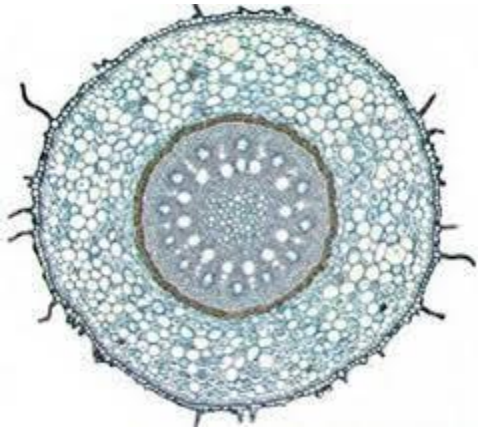

Food substance being tested	Procedure	Observation	Conclusion
Starch			

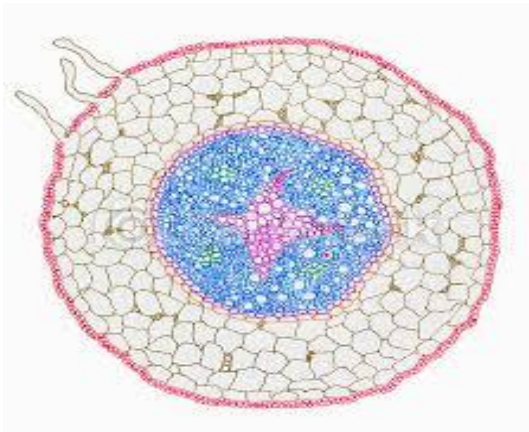

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

Vitamin C			
Reducing Sugar			

2. The following photomicrographs K and L illustrate cross sections of an organ as found in different plants. Use the photomicrographs to answer the questions below.

K L

(a) Name the organ from which the above cross- sections have been obtained giving a reason for your answer.
(2mks)

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

……

……

(b) Label the following parts on the photomicrograph K**;** **(3mks)**

Xylem

Phloem

Endodermis

(c) State the differences between cross section K and cross section L**.** **(2mks)**

cross section K	cross section L

(d) Identify any two differences between xylem and phloem. **(2mks)**

……

……

……

……

(e) State two adaptations of xylem to their function. **(2mks)**

……

……

……

……

(f) Name a tissue present in photomicrograph K that is absent in photomicrograph L. **(1mk)**

……

……

(g) Give the function of each of the following tissues; **(2mks)**

Cortex ……

Endodermis ……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

3. Below are photographs labelled **L_1, L_2, L_3, L_4** and **L_5** of twigs obtained from plants. Examine them.

L_1

L_2

L_3

L_4

L_5

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

a) Using observable features in the photographs, complete the dichotomous key given below **(2mks)**

i. a) Leaves compound **……** go to 2

b) _____ **……** go to 3

ii. a) Leaf bipinnate **……** Mimosaceae

b) Leaf trifoliate **……** Oxalidaceae

iii. a) Leaf with network venation **……** go to 4

b) _____ **……** go to 5

iv. a) Leaf with entire margin **……**Nyctaginaceae

b) Leaf with serrated margin **……**Verbenaceae

v. a) Leaf with solid petiole **……** Agavaceae

b) Leaf with sheath like petiole **……**Graminae

b) Use the completed dichotomous key to identify the family to which each plant belongs. In each case show the steps you followed to arrive at the identity **(10mks)**

BUSINESS STUDIES (565/1)

FORM THREE (3)

Time: 2 *Hours*

ANSWER ALL QUESTIONS IN THIS PAPER

1. State the level of production that each of the following activities belong **(4mks)**

Activity	**Production level**
(a) Harvesting sand	……..
(b) Marking exams	……..
(c) Welding work	……..
(d) Oil Retailing	……..

2. State **four** circumstances under which a firm may be located near a raw material source **(4mks)**

……

……

……

……

……

……

3. For each of the following transactions. State the account to be debited and the account to be credited **(4mks)**

Transaction	A/c to be debited	A/c to be credited
(i) Cash deposited in business Bank account		
(ii) Owner withdrew cash for personal use		
(iii) Purchase of goods on credit		
(iv) Purchase of furniture by cheque		

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

4. Outline **four** drawbacks that accrue to a society that practice subsistence production **(4mks)**

……

……

……

……

……

……

5. Give **four** benefits that are likely to result from the new standard Gauge Railway line in Kenya **(4mks)**

……

……

……

……

……

……

6. State **four** measures that a trader should take to ensure smooth functioning of his private warehouse **(4mks)**

……

……

……

……

……

……

7. Describe **four** channels that can be used to distribute coffee from Kenya to a consumer in USA **(4mks)**

……

……

……

……

……

……

8. Highlight **four** barriers associated with written communication **(4mks)**

……

……

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

9. Give **four** reasons why a firm may not realize any benefits from free publicity **(4mks)**

……

……

……

……

……

……

10. Outline four disciplines incorporated in the business studies course **(4mks)**

……

……

……

……

……

……

11. List four types of partners in a partnership formed by professionals **(4mks)**

……

……

……

……

……

……

12. Highlight four factors that may cause a shift in supply curve to the left **(4mks)**

……

……

……

……

……

……

13. State four consequences of poor arrangement of goods in a warehouse **(4mks)**

……

……

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

14. Complete the following table by filling in the blank spaces **(4mks)**

PROFIT	DRAWINGS	INITIAL CAPITAL	ENDING CAPITAL
	5,000	200,000	250,000
40,000		350,000	380,000
50,000	15,000		400,000
60,000	10,000	500,000	

15. Outline four circumstances under which a commodity may be distributed directly to the consumers **(4mks)**

……

……

……

……

……

……

16. State four challenges that a country with a young population experience. **(4mks)**

……

……

……

……

……

……

17. A car and a garage was insured for shs. 1,500,000 instead of shs. 2,000,000. Later the property was destroyed and a loss of shs. 1,000,000 was suffered. Determine the amount of claim, giving a reason for your answer. **(4mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

18. Classify the following staff as under: Senior, Junior, or Subordinate **(4mks)**

	STAFF	CATEGORY
a)	Clerk	_____
b)	Accountant	_____
c)	Personal Secretary	_____
d)	Messenger	_____

19. Outline four roles of Kenya Bureau of standards in Consumer protection **(4mks)**

……

……

……

……

……

……

20. Highlight **four** features of oligopoly market structures. **(4mks)**

……

……

……

……

……

……

21. The following features relate to warehousing. Indicate the most suitable type of warehousing described. **(4mks)**

i) Mostly situated entry points and are available at a fee **.....**

ii) Warehouse designed to suit ones particular needs **.....**

iii) Used to store locally produced goods until excise duty is paid. **.....**

iv) Warehouse used to store non dutiable goods originating from within or outside the Country

…….....

22. State whether each of the following transactions will increase, decrease or have no effect on the business capital. **(4mks)**

	Transaction	Effect on capital
i)	Bought stock on credit	_____
ii)	Owner withdrew some goods for personal use	_____
iii)	Business made profit during the year	_____
iv)	Paid wages by cheque	_____

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

23. State four factors that determine the size of a country's national income. **(4mks)**

……

……

……

……

……

……

24. The information given below was extracted from books of accounts of Vijana Traders as at 30th June 2021.

	Sh.
Land and building	450,000
Motor vehicles	640,000
Debtors	30,000
Creditors	80,000
Bank over drafts	400,000
Net profit	104,000
Drawings	104,000

Using the information above, prepare Tenda Traders Balance Sheet as at 30th June 2021. **(4mks)**

25. Outline four limitations of consumers association. **(4mks)**

……

……

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

BUSINESS STUDIES (565/2)
FORM THREE (3)
Time: $2\frac{1}{2}$

1. (a) Explain **five** advantages that may be associated with operating a tied shop. **(10Mks)**

(b) Explain **five** challenges of a young population. **(10Mks)**

2.(a) Explain five factors that may have led to the increasing use of *boda boda* as a meansof passenger transport in Kenya **(10Mks)**

(b) With the aid of a diagram, explain the effects of an increase in supply to the equilibrium price and quantity. **(10mks)**

3.(a) Explain five benefits of entrepreneurship to the Kenyan economy **(10Mks)**

(b) On 1st March, 2021, Faulu Traders had sh. 18,000 in cash and a bank overdraft of sh. 6,700. During the month, the following transactions took place:

March 2:	Made cash sales sh. 14,500
3:	Kimani, a debtor settled his account of sh. 45,000 by cheque less 5% cash discount
4:	Paid salaries sh. 5,000 by cash
6:	Sold goods worth sh. 3,000 to Mumo on credit
8:	Settled Rehema's account of sh. 6,000 by cheque less 3% cash discount
12:	Bought goods worth sh. 4,000 on credit from Otieno
18:	Received a cheque of sh. 8,460 from Achieng after deducting 10% cash discount
22:	Withdrew sh. 9,500 from the bank for office use
24:	Cash sales paid direct into bank sh. 3,400
28:	Withdrew sh. 2,500 from the bank for family use
31:	Banked all the money except sh. 3,600

Required: Prepare a duly balanced three column cash book **(10mks)**

4.(a) Explain five reasons that may make an insurance company refuse to compensate the insured in the event that a risk occurs. **(10Mks)**

(b) Explain five circumstances under which a manufacturer would sell his goods directly to a consumer. **(10Mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

5.(a) Explain five factors which constitute the external business environment which may negatively affect the operations of a business **(10Mks)**

(b) Explain five differences between a private limited company and a public corporation **(10Mks)**

6.(a) Explain 5 advantages of written communication **(10Mks)**

(b) The following balances were extracted from the books of Onyonka Traders on 1st January 2021.

	Ksh
Capital	600,000
Creditors	180,000
Motor van	200,000
Furniture	200,000
Stock	60,000
Debtors	80,000
Cash	240,000

The following transactions took place during the year ended 31st December 2021:
Sold furniture worth Ksh 60,000 for which Ksh 20,000 cash was received and the balance was due at the end of the year.

Brought 35,000 cash from private sources into the business
Purchased goods worth Ksh 200,000 for which cash of Ksh 40,000 was paid and the balance was still outstanding at the end of the year.

Cash Ksh 10,000 was taken from the business by the proprietor to buy a present for the daughter

Required:
Outline the effect of each transaction on the items of the balance sheet **(10mks)**

FORM THREE (3)

Time: 2 Hours

Instructions to candidates

(a) Write your name, admission number, index number, and stream in the spaces provided above.

(b) Sign and write the date of the examination in the spaces provided

(c) Answer **ALL** the questions in the spaces provided.

(d) Candidates **MUST** answer all questions in English.

(e) KNEC mathematical tables and silent non-programmable electronic calculators may be used.

(f) Candidates should **check** the question paper to ascertain that **ALL** the pages are printed as indicated and that **NO QUESTIONS ARE MISSING**

FOR EXAMINER'S USE ONLY.

QUESTION	MAXIMUM SCORE	CANDIDATE'S SCORE
1 – 26	80	

1.The table below shows the number of valence electrons in atoms of elements **W, X,** and **Y**.

Element	W	X	Y
No. of valence electrons	1	5	2

a) Elements **W** and **Y** cannot combine to form a compound. Explain **(1mk)**

……

……

……

b) The carbonate of **W** was heated in a test tube, using a Bunsen burner flame. State and explain the observations made. **(2mks)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

……

……

……

2.One mole of ethyne reacted with one mole of hydrogen chloride gas:

a) Draw the structure and give the name of the compound formed **(2mks)**

b) Excess hydrogen was bubbled through the product in the presence of nickel catalyst. Three drops of acidified potassium manganate (VII) were then added to the product of reaction. State the observation made when this oxidising agent was added. **(1mk)**

……

……

……

……

3.A certain carbonate has the formula **WCO_3**. If 1g of the carbonate reacts completely with $20cm^3$ of 1M hydrochloric acid, calculate the relative atomic mass of **W** **(3mks)**

(O =16, C = 12)

4.Starting with aqueous magnesium sulphate, describe how you would obtain a sample of magnesium oxide. **(3mks)**

5.Under certain conditions, ethanol and butanoic acid react to form a compound with a pleasant smell.

a) State the conditions necessary for the reaction to occur (1 mark)

……

……

b) Name the process that forms the pleasant-smelling compound (1 mark)

……

……

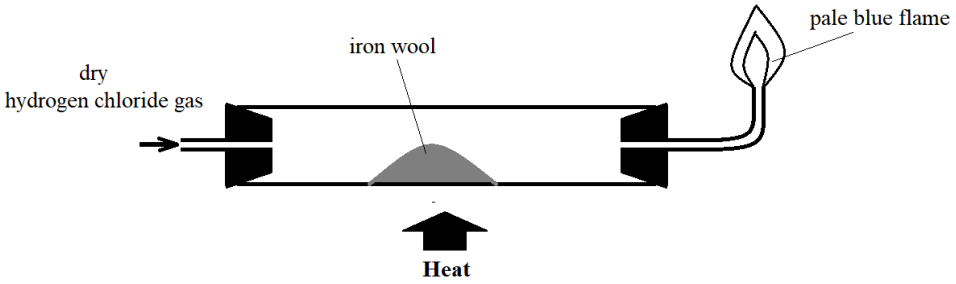

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

c) Name the compound formed in the reaction above. (1 mark)

……

……

6.Iron wool was heated in the presence of hydrogen chloride gas as shown in the diagram below

a) State the observation that was made in the combustion tube **(1mk)**

……

……

b) The flame at the nozzle burns quietly. Explain this observation **(1mk)**

……

……

……

c) Write an equation for the formation of the flame at the nozzle **(1mk)**

……

……

7.

a) At room temperature and pressure hydrogen fluoride is a volatile liquid, while hydrogen chloride is a gas. Explain **(2mks)**

……

……

……

……

b) Name the group of compounds to which hydrogen fluoride and hydrogen chloride belong. **(1mk)**

……

……

8.Sodium chloride and aluminium chloride are chlorides of metals found in period 3 of the Periodic table. State and explain the observations made on methyl orange indicator when the compounds were added to separate samples of water in test tubes. **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

9. Concentrated sulphuric (VI) acid was added to a sample of table sugar.

a) State and explain the observation made. **(2mks)**

……

……

……

b) Give an example of application of the reaction in **a)** above **(1mk)**

……

……

……

10. Manganese (IV) oxide is mixed with hydrogen peroxide to form oxygen gas and mixed with concentrated hydrochloric acid to form chlorine gas in the laboratory.

a) State the role of manganese (IV) oxide in

i) Preparation of Chorine **(1mk)**

……

……

……

ii) Preparation of Oxygen **(1mk)**

……

……

……

b) Write chemical equations for the reactions that lead to:

i) Production of Oxygen **(1mk)**

……

……

ii) Production of Chlorine **(1mk)**

……

……

11. A white **powder J** was heated. A colourless gas was formed, and fumes of a brown gas observed along with a yellow **residue V** which cooled to form a white substance. When sodium hydroxide solution was added to cold **residue V**, a white precipitate which dissolved in excess sodium hydroxide to form a colourless **solution X** was observed.

a) Identify

i) Powder J _____ **(½mk)**

ii) Residue V _____ **(½mk)**

b) Why does **residue V** react with sodium hydroxide? **(1mk)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

……

……

c) Write an equation that leads to the formation of the colourless **solution X** **(2mks)**

……

……

12. Hydrogen sulphide gas is considered more poisonous than carbon (II) oxide. However, carbon (II) oxide poisoning accounts for more fatalities than hydrogen sulphide gas. Explain this observation **(2mks)**

……

……

……

……

13. The melting point of halogens increases down the group, while that of the alkali metals decreases down the group. Explain this observation. **(3mks)**

……

……

……

……

……

14. Dry chlorine gas is bubbled through a solution of sodium sulphite. Describe a test that shows chemical change took place. **(3mks)**

……

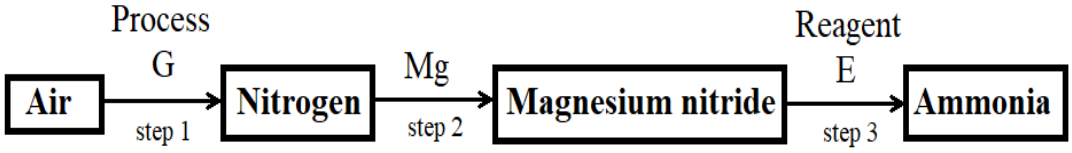

……

……

……

……

15. The sequence below shows how air can be used as a raw material for obtaining ammonia.

a) Name **Process G** **(1mk)**

……

……

b) Name **Reagent E** **(1mk)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

c) Write a balanced chemical equation for the reaction in **step 2** **(1mk)**

……

……

16. If 280cm^3 of nitrogen gas diffuses through a porous membrane in 70 seconds. How long will 400cm^3 of carbon (IV) oxide diffuse through the same membrane? **(3mks)**

(C = 12, O = 16, N = 14)

17. The following results were obtained from an experiment to determine the quantity of water of crystallization in the crystals of $ZnSO_4 \bullet XH_2O$:

Mass of crucible	21.30g
Mass of crucible + crystals	27.04g
Mass of crucible + residue	24.52g

Determine the value of **X** **(3mks)**

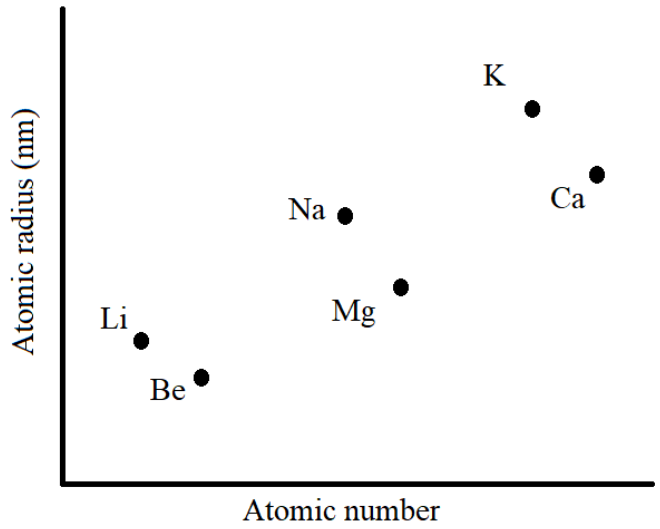

(Zn = 65, S = 32, O = 16, H = 1)

18. Determine the volume of hydrogen gas, at room temperature and pressure, produced in a class experiment when 4.333g zinc granules react completely with excess dilute sulphuric (VI) acid. **(3mks)**

(Zn = 65, Molar Gas Volume at R.T.P. = 24dm^3)

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

19. The graph below shows the atomic radii of some elements in groups I and II plotted against their atomic numbers.

Explain:

a) The trend shown by Li, Na, and K. **(1mk)**

……

……

……

……

b) Why the atomic radii of elements Be, Mg, and Ca are **lower** than those of Li, Na, and K **(2mks)**

……

……

……

……

20. An element **Y** forms an ion $\mathbf{Y^{3-}}$. This ion contains 18 electrons.

a) State the group and period of this element. Explain **(2mks)**

……

……

……

……

b) Write the formula of the compound which would be formed if **Y** reacts with chlorine. **(1mk)**

……

……

21.

a) State Gay-Lussac's law. **(1mk)**

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

b) When $30cm^3$ of a gaseous hydrocarbon reacted completely with $90cm^3$ of oxygen, $60cm^3$ of carbon (IV) oxide was produced. If all volumes of the gases were measured at room temperature, determine the formula of this hydrocarbon. **(2mks)**

22. The oxide of an element G contains 47.06% oxygen by mass. Determine the empirical formula of the oxide (G = 27, O = 16) **(2mks)**

23. Name and draw **two** structural isomers of pentyne **(4mks)**

Name	Name
Structure	Structure

24. Sulphur is soluble in ethanol but not in water. Sodium chloride is soluble in water but not in ethanol. Sand is insoluble in both ethanol and water. Describe how to obtain sand from a mixture of sand, sodium chloride, and sulphur. **(2mks)**

……

……

……

……

25. Ammonium chloride reacts with calcium hydroxide in the Solvay Process to generate ammonia gas.

a) Write a chemical equation for the reaction **(1mk)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

b) Calculate the volume of ammonia produced, at room temperature, when 2.14g of ammonium chloride reacts with calcium hydroxide. **(2mks)**

(N =14, H = 1, Cl = 35.5, Molar Gas Volume = 24dm^3)

26. Calcium oxide is used as a drying agent in the laboratory.

a) Calcium oxide is not suitable for drying hydrogen chloride gas. Explain **(2mks)**

……

……

……

……

b) Name **one** suitable drying agent for hydrogen chloride gas. **(1mk)**

……

……

c) In terms of structure and bonding, why is graphite used as a lubricant? **(2mks)**

……

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(a) Select from the table;

(i) The most reactive metal **(1mk)**

……

……

(ii) The least reactive element **(1mk)**

……

……

(b) State and explain the trend in :

(i) Reactivity of elements **A** and **E**. **(2mks)**

……

……

……

……

(ii) Atomic radii of elements **F** and **G**. **(2mks)**

……

……

……

……

(c) What name is given to the elements in the same group as element **H**? **(1mk)**

……

……

(d) Write down the formula of the sulphite of element **E** **(1mk)**

……

……

(e) The atomic number of an **element J** is 8. Locate **element J** on the grid. **(1mk)**

(f) Name the type of structure present in :

(i) Chloride of **F** **(1mk)**

……

……

(ii) Element **C** **(1mk)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(g) A sample of the oxide of **I** was dissolved in distilled water. Both blue and red litmus papers were dipped into this solution. State and explain the observations made. **(2mks)**

……

……

……

……

(h) Give **one** use of element **B** **(1mk)**

……

……

……

2 (a) One of the naturally occurring allotropes of carbon is graphite.

(i) Give the other allotrope of carbon. **(1mk)**

……

……

(ii) Name **one** use of the allotrope in **a (i)** above **(1mk)**

……

……

……

(iii) Name **one** other element which exhibit allotropy **(1mk)**

……

……

……

(b) Fullerenes are synthetic allotropes of carbon obtained by manipulating carbon using laser beams. Given that the molecular formula of fullerene is C_{60} , determine its molar mass. (C=12.0) **(2mks)**

(c) Carbon (IV) oxide may be prepared by reacting dilute sulphuric (VI) acid and a carbonate.

(i) Explain why lead (II) carbonate wouldn't be suitable for use in this reaction. **(2mks)**

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

……

……

(ii) State and explain the observations made when carbon (IV) oxide is bubbled through a solution of calcium hydroxide. **(2mks)**

……

……

……

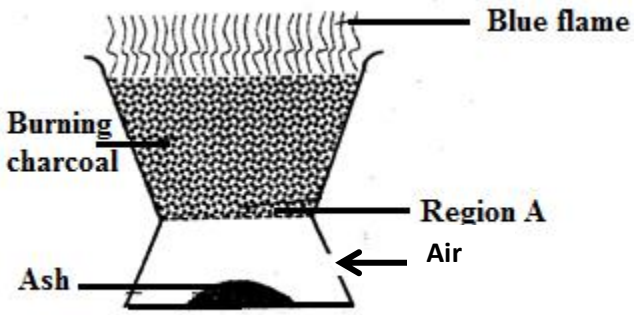

……

(iii) Name **one** use of carbon (IV) oxide other than in fire extinguishers. **(1mk)**

……

……

(d) The diagram below shows a Jiko when in use. Study it and answer the questions that follow.

(i) Write the equation taking place at region **A**. **(1mk)**

……

……

(ii) Why is not advisable to place such a Jiko in a closed room? **(2mks)**

……

……

……

……

3 (a) What is the effect of impurities on the;

(i) Boiling point of water **(1mk)**

……

……

(ii) Melting point of naphthalene **(1mk)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(b) Why is rock salt poured on roadways during winter in some countries in Europe? **(1mk)**

……

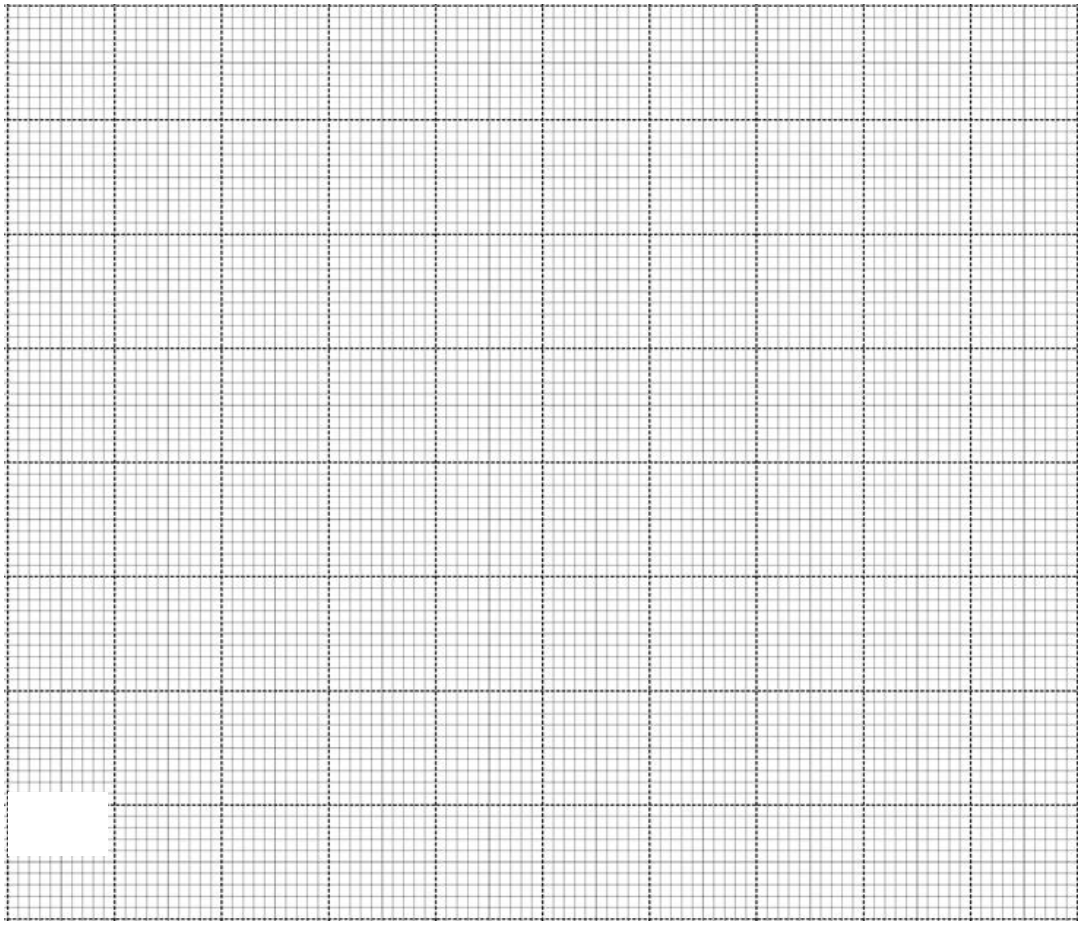

……

……

(c) In an experiment to determine the freezing point of a certain solid, solid **G**, students heat the solid to melting and then allowed to cool. The temperature was recorded after every 30 seconds and the table below was obtained

Time (seconds)	0	30	60	90	120	150	180	210	240	270
Temperature (^oC)	85.0	80.0	75.5	72.0	70.0	68.0	66.0	65.0	65.0	62.5

(i) On the grid provided, plot a graph of temperature (vertical axis) against time. **(3mks)**

(ii) From the graph determine the freezing point of **solid G** **(1mk)**

(d) Give the type of change that occurs when;

(i) Iron nail rusts **(½mk)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(ii) lead (II) nitrate is heated **(½mk)**

……

……

4 (a) Other than manufacture of dyes and fireworks, Name **two** uses of sulphur **(2mks)**

……

……

……

……

(b) Sodium sulphite reacts with hydrochloric acid according to the equation below.

$$Na_2SO_3(aq) + 2HCl(aq) \longrightarrow 2NaCl(aq) + SO_2(g) + H_2O(l)$$

25.0 cm^3 of 2 M sodium sulphite was reacted with excess hydrochloric acid. Determine the volume of SO_2 (g) produced. (Molar gas volume at r.t. p = 24 dm^3) **(3mks)**

(c) State and explain the observations made when a moist blue litmus paper is dropped in gas jar full of sulphur (IV) oxide gas. **(2mks)**

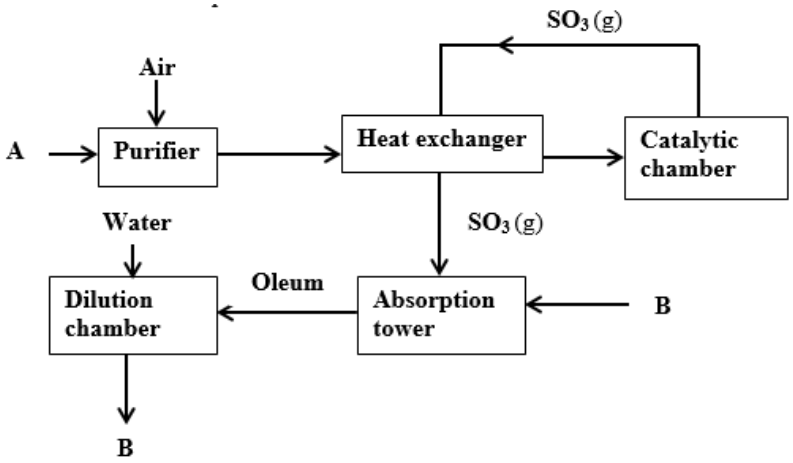

……

……

……

……

(d) Study the flow chart below which shows the preparation of sulphuric (VI) acid and answer the questions that follow

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(i) Give the name of substances;

(I) A …… **(1mk)**

(II) B …… **(1mk)**

(ii) Name the catalyst used in the above process. **(1mk)**

……

……

(iii) Write the equation for the reaction between water and oleum **(1mk)**

……

……

(iv) State **two** uses of sulphuric (VI) acid **(2mks)**

……

……

……

……

5 (a) Give the name of the following organic compounds;

(i) $C(CH_3)_4$ **(1mk)**

……

……

(ii) $CH_3CHCHCH_2CH_3$ **(1mk)**

……

……

(iii) $CHCCH_2CH_3$ **(1mk)**

……

……

(b)(i) Name **two** reagents that can be used to prepare ethyne **(1mk)**

……

……

……

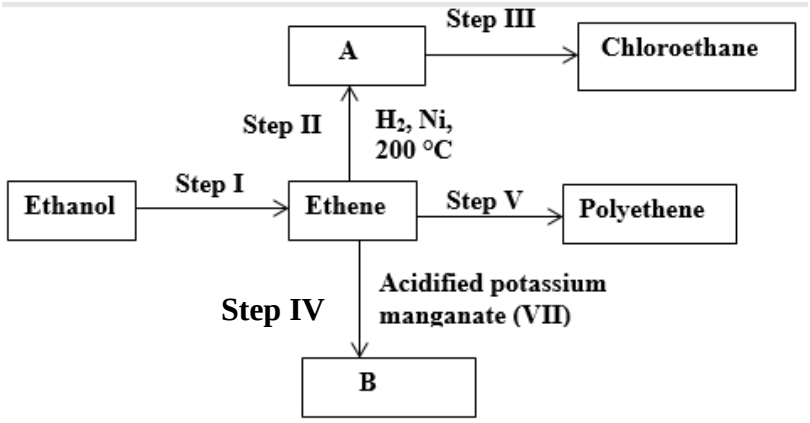

(ii) Write the equation for the reaction that takes place in b (i) above **(1mk)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(c) Study the flow chart below and answer the questions that follow

(i) Give the reagent and condition for the reactions in **step I** and **step III**

Step I

Reagent……..…….....….. **(1mk)**

Condition(s)……..……..... **(1mk)**

Step III

Reagent……..……..……..….. **(1mk)**

Condition(s)……...…….....…..... **(1mk)**

(ii) Draw the structure of compound **B** **(1mk)**

(iii) Give the name of compound **A** **(1mk)**

……

PAPER 3 (233/3)

FORM THREE (3)

Time: 2 ¼ Hours

INSTRUCTIONS

* Write your **name** and the indicated details in the spaces provided on this page.
* Answer **ALL** questions in the spaces provided in the question paper.
* You are **NOT** allowed to start working with the apparatus for the first 15 minutes of the 2¼ hours allowed for this paper.

  This time is to enable you to read the question paper and make sure you have all the chemicals and apparatus you may need.
* Mathematical tables and silent electronic calculators may be used.
* All working must be clearly shown where necessary.

For Examiner's Use Only

Question	Maximum score	Candidate's score
1	14	
2	16	
3	10	
Total score	40	

1.You are provided with:

- Solution **P** containing 0.2 moles in 1.0 dm^3 of HCl
- Solid **Q**, 0.5 g of metal carbonate (MCO_3)
- Solution **R**, sodium hydroxide solution containing 4.0 g in one litre of solution.

You are required to:

(a)Determine the R.A.M of metal M

Procedure

Using a 100 ml measuring cylinder, measure 100 cm^3 of solution **P** into a clean 250 ml conical flask and add all the 0.5 g of the solid **Q**. Shake well and wait for effervescence to stop. Label this as solution **S**. Pipette 25cm^3 of solution **S** into a conical flask and add 2-3 drops of phenolphthalein indicator. Fill the burette with solution **R** and titrate against the solution **S** until the end-point. Repeat the titration two more times and record your results in the table below.

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

Table I

Titre	1	2	3
Final burette reading (cm^3)			
Initial burette reading (cm^3)			
Volume of solution R used (cm^3)			

(4mks)

(a) Calculate the average volume of solution **R** used. **(1mk)**

(b) Calculate the number of moles of sodium hydroxide, solution **R** used. **(1mk)**

(c) Calculate the number of moles of HCl in solution **S** used. **(1mk)**

(d) Calculate the number of moles of HCl solution **S** in 100 cm^3 of solution. **(1mk)**

(e) Calculate the number of moles of HCl in the 100cm^3 of the original solution **P**. **(1mk)**

(f) Calculate the number of moles of HCl solution **P** that reacted with solid **Q**. **(1mk)**

(g) Calculate the number of moles of MCO_3 that reacted. **(2mks)**

(h) Calculate R.F.M of MCO_3 and hence the R.A.M of M. (C=12, O=16). **(2mks)**

2.You are provided with **solid V.** Carry out the following tests and record your observations and inferences in the spaces provided.

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(a) Describe the appearance of **solid V**. **(1mk)**

……

……

……

(b) Add all solid **V** to about $10cm^3$ of distilled water in a boiling tube and shake well. Place $2cm^3$ portions of the resulting mixture into 5 separate test tubes to be used for the following tests.

Observations	Inference
(1mk)	**(1mk)**

(c) To the first portion add 2M sodium hydroxide solution dropwise until in excess.

Observations	Inference
(1mk)	**(1mk)**

(d) Clean one end of the glass rod provided. Dip the clean glass rod end into the second portion and heat it in a non-luminous flame. Note the colour of the flame and record it below.

Observations	Inference
(1mk)	**(1mk)**

(e) To the third portion, add 2 or 3 drops of lead (II) nitrate solution.

Observations	Inference
(1mk)	**(1mk)**

(f) To the fourth portion add 2 drops of barium nitrate solution followed by 2 cm^3 of nitric (V) acid provided.

Observation	Inference
(2mks)	**(1mk)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(g) To the fifth portion, add 3 drops of acidified potassium manganate (VII) solution.

Observations	Inference
(1mk)	**(1mk)**

(h) Give possible identities of the cation and anion present in solid **V**. **(2mks)**

Cation ……

Anion ……

3. You are provided solid **T**. Carry out the following test and write your observations and inferences in the spaces provided.

(a) Describe the appearance of **solid T**. **(1mk)**

……

……

……

(b) Place a spatulaful of solid **T** in a test tube. Heat it gently and record your observations.

Observations	Inference
(1mk)	**(1mk)**

(c) Add all the remaining solid **T** to about $10cm^3$ of distilled water in a boiling tube and shake well. Place $2cm^3$ portions of the resulting mixture into 5 separate test tubes to be used for the following tests.

(i) To the first portion add 2M sodium hydroxide solution dropwise until in excess.

Observations	Inference
(1mk)	**(1mk)**

(ii) To the second portion add ammonia solution dropwise until in excess.

Observation	Inference
(2mks)	**(1mk)**

(iii) Give the name and the formula of the complex ion formed in test (ii) above. **(2mks)**

Name…….

Formula …….

……

(c) A bookshop owner contracted a programmer to design a program that can be used to manage book orders in his business as follows;

- Enter the order ID and Order amount
- Calculate the discount and New order amount

The book shop gives a discount of 13% for orders of a books worth Ksh.5, 000, 8% for orders of books worth Ksh.1000 and none for orders worth Ksh.1,000 and below.

Draw a flowchart to represent the information above, display the discount and new order amount **(8mks)**

17.

(a) List the process used by the computer to perform the following arithmetic operations **(3mks)**

(i) Addition

……

……

(ii) Multiplication

……

……

(iii) Subtraction

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(b) Convert the following numbers to binary number

(i) 10AH **(3mks)**

(ii) $23\frac{13}{64}$ base 10 **(3mks)**

(c) Perform the binary arithmetic below and write your answer in decimal notation **(3mks)**

0001101_2+000111_2-001011_2

(d) Identify three ways of representing negative signed binary numbers **(3mks)**

……

……

……

……

……

18.

(a) Give four ways of in which parents can protect their children from accessing inappropriate content from the internet **(4mks)**

……

……

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(b) Due to the risks involved in using the traditional classroom teaching method during this covid-19 period, many colleges have embraced online teaching via Zoom, google classroom and Webex. Mention four items that a student must have in order to attend lessons through the platforms indicated above **(4mks)**

……

……

……

……

……

……

(c) Briefly describe four benefits of backing up data in your phone in the clouds **(4mks)**

……

……

……

……

……

……

(d) Explain the following types of security threat **(3mks)**

(i) Malware attack

……

……

……

(ii) Social Engineering

……

……

……

(iii) System failure

……

……

……

19.

(a) Repetitive Strain and eye strain may results from use of computers. State two ways of minimizing each of the mentioned health problems **(4mks)**

……

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

……

……

(b) Describe the effects of the following actions in a computer laboratory **(3mks)**

(i) Drinking Tea

……

……

……

(ii) Cleaning the computers with soft cloth soaked in water

……

……

……

(iii) Smoking

……

……

……

(c) Mr. J.O Were the Principal and the Basketball coach of Kisumu Day High school wants to invite several schools for Basketball tournament .He was advised to use mail merging technique to create invitation letters for the respective schools identified. Give three benefits of this technique **(3mks)**

……

……

……

……

……

(d) A student from Maranda High School was typing a document using Ms-word. He typed Maseno School as the title of the document. He was requested by his teacher to insert High in between Maseno and School. Explain what will happen if the Ms-word editing mode is set to type over **(2mks)**

……

……

……

……

(e) Name three transformation techniques supported by Ms-Word which enable users to format graphic and fit them nicely in a document **(3mks)**

……

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

20.

(a) Study Table A and B then use it to answer questions that follows

Table I

Field Name
ID Number
Last Name
First Name
Address
Town

Table II

Field Name
ID Number
Product ID
Product Name
Unit cost
Quantity
Date of Birth
Total

(i) Identify the most appropriate data type for ID Number, Product Name and Quantity **(3mks)**

……

……

……

……

(ii) Given that the data type for Total is calculated write an expression to be entered in the expression builder **(2mks)**

(iii) Suggest how date birth can be validated to restrict entries of date that follow in 2010 only **(2mks)**

……

……

……

(iv) Explain how a relation can be created between Table A and B **(2mks)**

……

……

……

(b)

(i) State the difference between a line printer and page printer **(2mks)**

……

……

……

(ii) List four features of a Laser printer **(4marks)**

Question One

(a) Type the following passage exactly as it appears using a word processor and save it as Information System

(20 marks)

PROCESS OF INFORMATION SYSTEM DEVELOPMENT

INTRODUCTION TO INFORMATION SYSTEM DEVELOPMENT

The methodology area can justly be described as a jungle. Firstly there appears to exist many hundreds of the system development methodologies. Longworth (1985) in a recent study identified over 300. If all these are different, then it is no wonder that there is so much confusion. However, it may be that the differences are trivial and are made solely to differentiate methodologies in the market place.

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

WHAT IS A METHODOLOGY?

The term methodology is not well defined either in Literature or by practitioners. There is very little agreement as to what it means other than at a general level. The term is usually used very loosely and yet it is used very extensively.

This loose use does not mean that there are no definitions, simply that there are no universally agreed definitions. At the general level, it is regarded as a recommended series of steps and procedures to be followed in the course and developing an information system. In a brief *adhoc* survey, this proves to be about the maximum that people will agree to and of course such a definition raises many more questions than it answers.

For example:

- What is the difference between a methodology and a method?
- Does a methodology include a specification of the techniques and tools which are to be used?
- Does a collection of techniques and tools constitute a methodology?
- Should the use of a methodology produce the same results each time?

The questions that arise are fundamental as well as numerous. Unfortunately the most that can be achieved is to air the issues. The information system community is in the process of debating the meaning of the term methodology in an information system context, and it may one day have a universal definition. However, it may be more realistic to assume that this will never be achieved. An information system's methodology has been defined as *a recommended collection of philosophies, phase, procedures, rules, techniques, tools, documentation, management and training for developers of information systems.* (Madison 1983).

According to this definition, a methodology has a number of components.

Which specify:

(i) How a project is to be broken down into stages

(ii) What tasks are to be carried out at each stage

(iii) What outputs are to be produced

(iv) When they are to be carried out

(v) What constraints are applied

(vi) What support tools may be utilized

In addition, the methodology is supposed to specify how the project is to be managed and controlled and support the training needs of the users of the methodology. This is all encompassed in a view or philosophy concerning the important and critical aspects of information systems development.

Required to

a) Remove the underline from all the underlined and change the text to bold and italics. Apply hanging indent to the first two paragraphs. **(5mks)**

b) Proof read the document. **(2mks)**

c) On the paragraph starting with "The questions…….apply in margin drop cap covering two lines. **(3mks)**

d) Apply expanded character spacing on the sub heading "What is Methodology" at 10 points. **(3mks)**

e) Select the text starting from the words "For example:….. information systems development" (at the end of the passage) and move it to a new page. **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

f) Convert the entire document it to two columns of the separated by a line. **(3mks)**

g) Double space the first paragraph. **(2mks)**

h) Insert your name into the passage as a footer so as to appear as © your name **(3mks)**

i) Insert page number at the top of the page of the format x of y at the center. **(4mks)**

j) Save the changes as Methodology. **(1mk)**

k) Print information system and methodology **(2mks)**

Question Two

The table below shows the payment schedule of Sunshine Company Employees.

Below is a list of allowances and basic salaries for ten employees in the month of July 2022.

NAME	REGION	MEDICAL ALLOWANCE	HOUSE ALLOWANCE	BASIC SALARY	HARDSHIP ALLOWANCE
MURTAZA	EAST	5,000	10,000	20,000	
WASIM	EAST	3,000	8,000	16,000	
MWANGI	WEST	3,500	8,000	16,000	
ISHO	WEST	6,000	12,000	25,000	
MITESH	WEST	2,500	6,500	12,000	
MITHEU	EAST	2,500	6,500	12,000	
KRISHNA	EAST	7,000	15,000	30,000	
MBUGUA	WEST	3,500	8,000	16,000	
KASOO	WEST	3,500	8,000	16,000	
SARU	WEST	3,500	8,000	16,000	

a) Using the above information, design an appropriate spreadsheet and enter the given sample data. Give the spreadsheet an appropriate title and save as Sunshine. **(10mks)**

b) Insert heading titled. SUNSHINE COMPANY EMPLOYEES' PAYROLL. **(2mks)**

c) Format the title as follows: bold, underline, font size 21, font color blue, background color yellow, merge the cells to center. **(3mks)**

d) Count the number of employees from West and East respectively. **(2mks)**

e) In cell B15 and C15 inset the 20% and 30% respectively. Given that employees from East were paid Hardship allowance of 20% of basic salary and those from West were paid 30% of basic salary. Using absolute cell reference calculate hardship allowance for all the employees. **(9mks)**

f) Gross salary is calculated as the total of basic salary and all the allowances. Calculated the gross

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

salary for all employees in column G. **(3mks)**

g) All the employees pay tax of 15% in column H calculate the tax for all the employees. **(3mks)**

h) In column I calculate the net salary of the employees as Gross salary less Tax. **(3mks)**

i) In cell G14 calculate the average gross salary, and cell I14 count the number of employees whom are paid 30,000 and above. **(4mks)**

j) Create a bar chart comparing every employee and the net salary, label the chart title, axis appropriately and place the chart on its own sheet. **(6mks)**

k) Copy the data in sheet 2 and calculate the subtotal of the net of every region and the grand total. **(4mks)**

l) Print the two sheets and the graph. **(3mks)**

1. COMPREHENSION (20MARKS)

Read the passage below and answer the questions that follow.

America has a long tradition of creativity. The expression Yankee **ingenuity** is an acknowledgement of this trait present Americans with a novel problem, especially technological and they are likely to come up with the solution sooner rather than later.

That is the positive side. The downside is that in policy matters, Americans sometimes come up with the solutions and then look for personal problems on which to test them. Washington D.C, perhaps more than any other city in the world, has many solutions seeking problems to lock onto.

If the solutions are successful, domestically or internationally, you can expect any amount of excitement and chest thumping, which is another **hallmark** of the American character. Modesty is frowned upon as something for sissies or failures. Countries and peoples are ready paradigm of winners and losers. Woe unto you if you are a 'loser'. You will endure all manner of taunts and putdowns.

To escape this fate, most Americans-including those who are demonstrably poor, call themselves middle class, which probably they are when compared to the poor in other places. But poverty is relative to immediate environment not to some distant places.

One of the more recent American inventions is spinning not as in making clothes (the American textile industry has long being outsourced, notably from China another low wage country),but rather as in using words and other symbols amplified by the media to paint a picture of anything and everything in alight favorable to the presenter's side.

This past week, the world witnessed, yet again, this peculiar American habit of hype and more hype, in this instance, designed to drive the point home that America's declared policy to force-feed democracy to recalcitrant

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

societies has just scored a **humongous** victory. Following the Iraqi elections the turn out in particular, has been hailed as a stunning victory of American policy. Pitted against Iraqi Jihadists who are waging a relentless and ruthless insurgency, a scintilla of validation of America's Iraqi policy was all that was necessary to set off celebratory fireworks.

To those who recount narratives (the spinners), whose job it is to put a bright glass on things a clear picture of winners and losers are the Neanderthals; "thugs and assassins" in the words of the newly sworn in secretary of state Condeleeza Rice-the insurgents who threatened to wreak havoc on election day in Iraq but were thwarted. The high turnout was read as a violation of many things that were most likely absent from the minds of those Iraqi voters who cast their ballots. Before it was even known whom they had voted for and why, the whole enterprise was turned into cause for chest thumping by some American politicians, prompting John Kerry the loser in the November presidential race, to warn against hyping the Iraqi election.

Who will listen to a loser? This is America! By the time Kerry spoke, the spinning was in full gear. It was another turning point, declared elated talking heads. Never mind that there have been numerous "turning pints" in Iraq's tortured post-invasion experience. The winners were emerging.

A few voices have urged caution but they are drowned out by the self-congratulation that has **engulfed** just about every major media outlet here.

It is reminiscent of the chatter that followed Saddam Hussein's capture. That was another turning point. The irony is that America has been through this before, in a different place, with almost the exact same headlines. In the late 1967, many American newspapers published flowery and upbeat stories on the elections held in South Vietnam at the height of the war. The turnout was nearly 83% despite Vietcong terror. The election was declared a success and a turning point that would lead to stabilization of the country and eventual defeat of the insurgents. Of course, nothing of the sort happened.

History does not **invariably** repeat itself. Sometimes it does. Whatever one might think of it, history does always serve up many lessons. One of them is that a dose of modesty is always in order when confronted with vast historical forces or when seeking to rearrange complex societies their go hundreds, if not thousands, of years back.

What may look like victory as first sight may turn out to be another opening to a complex and trying situation that control produce winners or losers. It looks like this what is emerging in Iraq. The millions who headed to the polls on the instructions of their electrical leaders (remember Grand Ayatollah Sistani declared it a religious duty to vote? May or may not have had a clear idea of what society were hoping to create. Their leaders probably do. Iraqis voted and they are justifiably proud of it. However, this should not be made to look like a first in the Islamic world, as it is being painted in the media. Not too long ago, an Islamic party had won a clear and convincing victory in a free and fair election in Algeria. It was never allowed to assume power. The international authorities desisted from calling the denial an affront to democratic practice. The man who cancelled the Algerian election results is feted in the very same quarter that now preach democracy.

Society's broken tyranny, war, fragmentation and other ills are not served by putdowns of important segments within them.

The approach may produce winners in the short term but for more losers in the end. Moreover, here we are talking of those who could lose everything, including their lives, on a mass scale. A little modesty may just be what is needed to get people across the divide talking. After all, in the end, we are all losers.

2.

Read the excerpt below and answer the questions that follow (25 marks)

"Believe me, officer," he told the youth. "Without this medicine, I couldn't live a day."
"Is that right?" The youth yawned, making even more obvious his indifference to what he hadjust heard.
"I wouldn't know, sir," he added, meaning he could not be any less interested, his interestbeing zero already. Then, suddenly, he snapped to alert. He had remembered something. "Hey! You could hurt other people with that."
"With this needle?"
"Yes, with that needle."
"And what would I use for my next shot?" "Just as I thought. What next shot?""Officer, let me ask you something. How old do you think I am? seventy?" "Yes, plus or minus five."
"That's correct. Now, out of every one hundred people in that age range, thirty of us are diabetic. We are unable to regulate the sugar level in our blood, and that kills most of us. Thismedicine is what keeps those of us who survive alive." He brandished his cellophane pouch again. "We shoot it into our veins with needles like that one."
"That may be so, sir. But you cannot take that stuff in. Leave it here with me.""I'll do no such thing if I have to wait here until the cows come home."
"What cows? Sir, you are holding up the line." "This needle is my life, officer."

3. Read the narrative below and answer the questions that follow. (20 marks)

THE WISE MAN AND HIS SONS

A long time ago there was a wise old man who was respected throughout Kenya because of his wisdom.

When he grew old and feeble and realized that his days were coming to an end, he called his six sons to his bedside to deliver his will.

'My dear sons,' he said, 'I am growing weak and old, and one of these days am going to die and leave you to take care of my wealth and perpetuate this family. I have great confidence in you, but I want to warn you that unless you live in unity and harmony you could easily get destroyed by your enemies.'

'We promise you father,' they replied, 'that we shall live in unity, and we shall uphold the respect you gained over the years, and we shall take care of this family and defend our property.'

'Once upon a time,' he began, 'cows lived in the wilderness like other wild beasts. They grazed in the jungle in large herds and were not afraid of the other animals. But they were constantly attacked by the other strong beasts like lions, leopards, elephants and when the cows realized that they could not live in peace in the jungle, they decided to seek help from men. They all agreed to live under the protection of men except for three stupid sister cows. Their names were Ndune (Red), Nyange (White), and Nguno (hornless). Ndune was as red as ochre and her eyes were fierce and had sparks like fire when she was angry. Her horns were long, sharp, and strong and she could scare any beast. Ndune was loved by her sisters dearly. Nyange had a white coat, as white as snow. She also had fierce horns, but looked more peaceful than Ndune, and was not so much feared, but when she was angry her white fur became whiter, and blinding to other animals. Nguno looked like a clown without horns, and annoyed other animals who regarded her as an abnormal creature of God who should not be attacked.

'I think you know this story,' he said

'Yes,' they replied, 'but please continue, father.'

'One day lion, who was very clever, decided to divide the three sister cows, kill them one by one, and eat them. Lion had tried to catch them before. But the three cows had fought and killed many beasts. Nyange and Nguno would charge their assailant from back and front while Ndune would come from the side and, with her sharp fierce horns, fierce the enemy's stomach, tear it open, and kill him instantly. Lion could not kill any of them unless he divided them and attached them separately.

'So one day the clever lion went and spoke to Ndune. He told her that she was respected in the jungle for her fierce horns and her beautiful red coat. He told her that if she lived apart from her sisters she would never be attacked by anyone. She would be made the duchess of the whole jungle kingdom. Her sisters were very ugly and annoying and that is why the three of them were constantly attacked. Ndune was very much tempted to leave her sisters when she heard what the clever lion told her. Next the lion went to Nyange and praised her beauty. He told her that she was born a peacemaker because of her white coat, and that she should have spent much of her time seeking peace in the jungle. He told her that if she left her fierce and domineering sister Ndune, and also avoid the company of her monstrous and abnormal sister Nguno, then lion would make her the beauty queen of the jungle and find her a good husband there. Nyange was flattered and started to think about the idea of living apart from her sisters.

'Finally the lion went to see Nguno. He told her that she was the most peaceful cow that ever existed, and that she was highly respected for her elegant hornless head. It was risky on her part to live with her sisters who were constantly attacked by savage beasts because of their fierce horns and their provocative coats. Lion promised to protect Nguno if she deserted her sisters at once. Nguno, who was getting tired of fighting ceaseless battles was happy about this friendly gesture, and at once decided to desert her sisters without pausing to think it over.'

'No sooner did she leave her sisters than she was caught by lion and killed.

'Nyange also slipped away from Ndune the following day and went to look for lion so that she could be made the jungle queen of beauty. She too was caught and killed. Now Ndune was left alone, and she was also caught and

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

killed. That was the fate of the three stupid cows. Had they continued to live together in unity, they would have lived.'

'It is a very good story, father,' said the six sons,' and it has a great lesson in it. We shall continue to live in unity.'' Good, my sons,' the old man continued, 'I am very pleased to hear that, and I know that you will not let me down. I have one more example to show you, come closer.' At this point he showed them six sticks, equal in size. He gave one to each of the sons. 'Break them in two, please,' he commanded. The sons broke the sticks at one go. He asked them to break them into smaller bits, and this they did. Then he produced a bundle to his sons, and asked to pass it to one another, to examine it closely and see how it was bound. Then he asked them to break the bundle, and they all tried one after the other. None of them could manage to break the bundle, and he took it back intact.

'You see, my sons,' each one of you is like these cows or these sticks,' he said. 'If you are not united you will be destroyed like the three cows that were devoured by lion, or like the six sticks you have just destroyed. But if you stay together like this bundle of sticks, you will defeat your enemies, and you will be able to protect your property and sustain this family.'

'Yes, father,' replied his sons, 'unity is strength and we shall always remain united.'

SECTION C: (40 marks)

*Answer any **two** questions from this section in the spaces provided at the end of the section.*

23. Use the diagram of the skirt below to answer the questions that follow:

a. Label the features labelled A to D. **(4mks)**

b. Mention **two** possible ways of finishing the top of the skirt. **(2mks)**

c. List **three** ways of finishing of the lower edge other than using feature D. **(3mks)**

d. (i) Name the seam used in joining feature A to the skirt. **(1mk)**

(ii) Outline **four** qualities of this seam when well-made. **(4mks)**

e. Give **three** rules to observe when working feature B. **(3mks)**

f. Briefly explain **three** qualities of a well-made feature C. **(3mks)**

24.

a. Explain **four** qualities of a good charcoal iron. **(4mks)**

b. Highlight **five** advantages of machine washing over hand washing. **(5mks)**

c. Discuss **three** points to consider when buying washing equipment for laundry. **(6mks)**

d. Outline **five** advantages of drying clothes on a clothes line. **(5mks)**

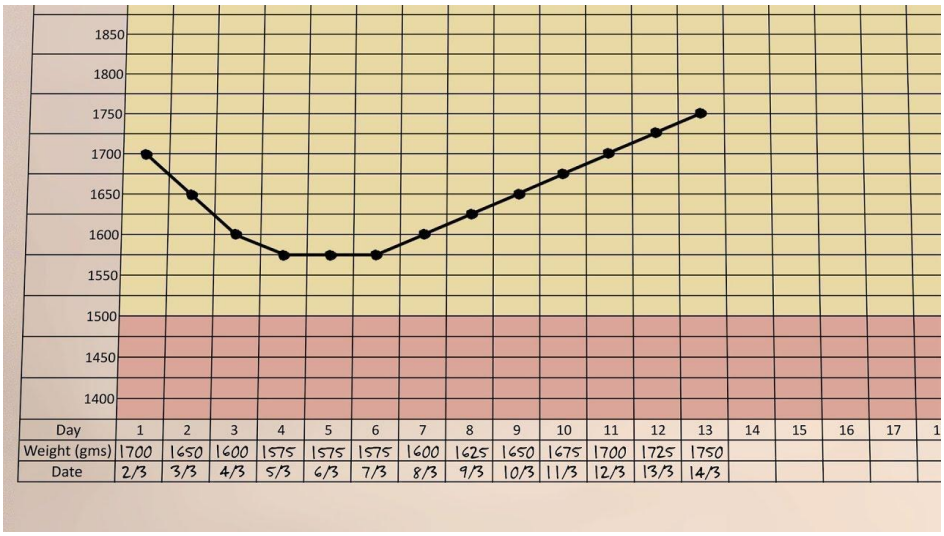

25.

a. Highlight **four** dangers of rising obesity in the population. **(4mks)**

b. Discuss **three** qualities of a good kitchen work surface. **(6mks)**

c. Study the baby growth chart graph below and answer the questions that follow.

Time: 2½ Hours

Instructions to candidates

This paper consists of 3 printed pages

Candidates should check the question paper to ascertain that all the pages are printed as indicated and that no questions are missing

GIRL'S SKIRT

A pattern of a girl's skirt is provided. You are advised to study the sketches, instructions and layout carefully before you begin the test.

MATERIALS PROVIDED

1.PATTERN PIECES

- **A.** Skirt back
- **B.** Yoke [front]
- **C.** Lower skirt [front]
- **D.** Front waistband
- **E.** Back waistband
- **F.** Frill
- **G.** Pocket

2.Plain light weight cotton fabric 56 cm long by 90 cm wide.

3.Sewing thread to match the fabric

4.One large envelope.

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

THE TEST

Using the materials provided, cut out and make the left half of the girl's skirt to show the following processes;

a) Cutting out. **(20½mks)**

b) Making of the dart at the back skirt. **(5½mks)**

c) Joining of the yoke front to the lower skirt front using an overlaid seam. **Do not trim**.

Neaten half of the seam using loop stitches. **(12mks)**

d) Preparation and attaching of the patch pocket **(9mks)**

e) Attaching of the frill to the lower skirt front using a plain seam.

Do not trim the seam allowance. **(10mks)**

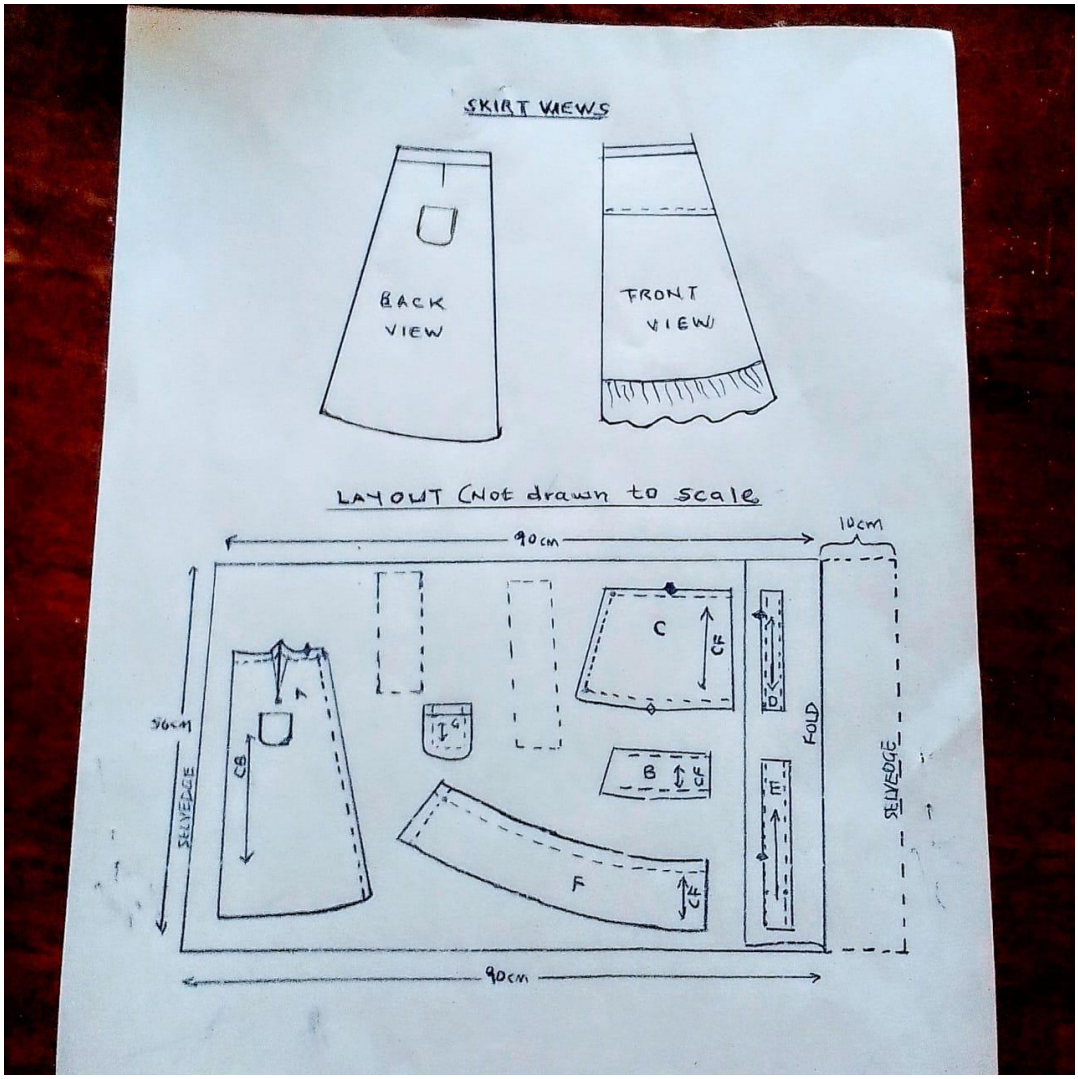

f) Making of the skirt side seam from the yoke to the hemline using an open seam. **(7mks)**

g) Attaching of the front and back waistbands and holding them in place using even tacking stiches. **(20mks)**

OMIT

h) The management of the skirt hem

i) Overall presentation **(6mks)**

FORM THREE (3)

Time: $1\frac{3}{4}$ *Hours*

PLANNING; 30 MINUTES
PRACTICAL TEST SESSION; 1 ¼ HOURS

INSTRUCTION TO CANDIDATES

1.Read the test carefully
2.Write your name and admission number on every sheet of paper used
3.Textbooks and recipes may be used during the planning session as reference materials
4.You will be expected to keep to your order of work during the practical session
5.You are allowed to take away ONLY your reference materials at the end of the planning session
6.You are not allowed to bring additional noted to the practical session.

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

THE TEST

You are visiting your grand mother over the holiday and you are to prepare supper. Using all the ingredients listed below, prepare, cook and present a suitable meal for the two of you. In addition, prepare a beverage for your grandmother.

INGREDIENTS

Irish potatoes/maize meal
Beef/green grams
Sugar
Oil/Cooking fat
Carrots
Salt
Onion
Tea leaves/cocoa
Tomatoes
Green leafy vegetable
Milk

PLANNING SESSION- 30 MINUTES

Use separate sheets of paper for each tasks listed below and a carbon paper to make duplicate copies. Then proceed as follows:

1.Identify the food items and write down their recipes.
2.Write down your order of work
3.Make a list of foodstuff, materials and equipment you will require.

Maagizo;
Karatasi hii ina maswali manne
Majibu yote yaandikwe katika nafasi ulizopewa

A.**UFAHAMU (ALAMA 15)**
Soma kifungu kifuatacho kisha ujibu maswali

Kijiji cha Matumaini kilikuwa na utulivu wa aina yake.Mwakio alikuwa miongoni mwa wazaliwa wa eneo hili.Katika miaka ya tisini alikuwa ameanza safari yake ya masomo ya Shule ya Msingi ya Majaliwa. Enzi hizo mshawasha na imani za watu zilihusu tu maswala ya elimu.
Mwakio alifurahishwa na utangamano wa kijiji chao.Watu walishirikiana kazini,sherehe za harusi, matanga aghalabu shughuli ya mtu iligusa mwigine.Anakumbuka vizuri ngoma zilizopigwa katika sherehe mbalimbali na wanakikundi cha 'Akali' wakiongoza ilkuwa burudani ya aina yake.Na je, baragumu lilipulizwa na Achwari kuwaita watu kununua nyama na kujuza watu kuwa fulani ameaga? Kwa kweli Matumaini kilikuwa kijiji chenye ufanisi.
Kando na hayo, vyakula walivyokuwa navyo hasa samaki waliovuliwa katika mto Anyako hususan kamabare walikuwa na ladha ya kupendeza. Mwakio alifurahia sana samaki wa kukaushwa ,'***kerewa'*** namna wanakijiji wavyoiita. Huyu alikuwa chaguo lake, mamake alipopika siku hiyo basi ukamilifu ulijaa moyoni mwake.Mwakio alitumai atakapooa, basi mkewe ni sharti afahamu kuwa ***'kerewa'*** ndicho chakula chake. Mto huu pa ulikuwa kitovu cha michezo ya kitoto , ulikuwa na vivukio vitatu , kwa Alaki, kwa Nikola na kwa Bobobo.Kidimbwi kizuri cha kupiga mbizi kilikuwa kivukio cha Nikola .Vivukio hivi viliitwa majina haya kutokana na mwenye ardhi palipo kivukio hicho.Mazingira ya pale pia yalimpendeza .Hili humfanya akumbuke hadithi aliyosoma katika chuo kikuu ya E. Kezilahabu kuhusu Mayai Wazuri wa Maradhi wakiogolea mtoni. Enzi hizo miaka ya tisini mwanzo , mtu hakujisumbua na lazima lazima za sabuni. Mradi umeona maji ,kulikuwa na mawe ya kusugua mguu pale mtoni ,wengine wangetumia mchana nayo sabuni ilkuwa hariita au matawi ya mti walioita 'sabuni ya wazee '.Yaani wakati huo binadamu alitumia mali asili kwenye shughuli zake za kila siku. Leo hii anapojitia marashi na mkewe kumkumbusha aina za sabuni nzuri, hucheka pasi yeyote kutambua kiini cha kicheko hiki.
Je, ukarimu nao wa wanakijiji?Enzi hizo wangu walisaidiana. Anakumbuka babake akiwaalika wanakijiji katika sherehe tu za burudani. Atoka akiongea burudani huku wengine wakila na kunywa.***Bangaradesi*** mmoja wa wanakijiji angecheza wimbo wa Atoka kwa miondoko yote. Huo ndio ukamilifu uliokuwepo .Anakumbuka wagema wawili waliofahamika sana, Akongo na Majimaji alikuwa rafiki wa dhati wa babake .Kila mara babake

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

angetaka kuonja kinywaji,Mwakio angeshika njia hadi kwake.Pombe aliyoenzi sana ni ***chang'aa*** .Akongo alikuwa mmoja wa wagema wapenzi wa babake, alipotumwa kununua pombe, kila mara Akongo angempa kiasi kwenye gilasi kama mbinu ya kukumbusha ukamilifu wa mwanamume Matumaini kwani waliokosa kunywa walionekana wanyonge katika jamii.Ukweli ni kuwa Mwakio alionja zote , hata zingine kubugia.Lililompiga mshipa kila mara ni habari ingewafikia walimu wake , hilo tu lingempa kwaheri ya masomo.

Katika shughuli zote , Mwakio alishauriwa na mamake kutilia maanani masomo.Ni kutokana na hali hii akaamua kupea masomoni kwa matumaini ya kuajiriwa na vilevile kufaa kijiji chake.

Ni miaka kumi na mitano baada ya Mwakio kutimiza ndoto yake. Leo hii ni mkurugenzi wa matibabu katika mojawapo wa hospitali nchini.Hatua zake za mwanzo alizofanya ni kuenda kuwafaa wenzake na wanyonge kijijini, hususan wale waliosoma nao ambao hawakufaulu kielimu.Amefadhili wanafunzi wengi mayatima hadi shule ya upili. Ndoto yake ya kufaa kijiji chake ni ule ustaarabu na ujamaa ndiyo ilikuwa azma yake.Gari alilonunua aghalabu humsaidia yeyote mwenye safari dharura au hata mgonjwa.Kwa kuwa anafanya kazi mjini , yeye hupenda kuwaletea kanga.Kwa miaka mitano tu, jina lake lilienea na kutawala Matumaini na kuvuka mipaka zaidi . Japo babake ameaga , amewahi kuita kikundi cha wacheza ngoma cha 'Alaki' katika hafla ya kumbukuka babake.

Kwa kweli , malezi aliyopata kwa msingi wa ujamaa ni tiyara inayompeperusha .Kila atokapo mjini yeye husalimia aghalabu kila jirani yake.Mapeni yakiwa mfukoni hakosi kumwauni mwenye tabu.Lakini sasa , Mwakio ameanza kusadiki kisa alichokisoma kwenye riwaya ya Said Ahmed ya Utengano kuwa hakuwa kijichobadilika ila mabadiliko yenyewe.Mwakio amejipata tu ni yeye anayegonga mlango watu kuwajulia hali. Hata majirani waliofaana naye hawajali. Kutia msumari kwenye kidonda ni kuwa ukarimu wake umekuwa mada ya minong'ong'ono kijijini.

Alipotangaza kuwania udiwani hakujua kuwa ilikuwa ni mbinu ya kuchunguza uafanisi wake. Juzi amepata habari kuwa kuna baadhi ya wanaodai kuwa yeye ni mwizi wa mali ya umma. Wengine wanadai ana mazingaombwe. Ajabu ni kuwa wanaodai kuwa aila yake haijawahi kuwa kiongozi hata mzee wa kijiji ,hivyo basi hana nafasi pale. Kinachomkata maini zaidi ni kuna vidudu watu wanaopiga simu mjini kuchunguza kitovu cha hela zake. Lililomfikisha hatua ya leo ni kuwa kuna wale wanaokejeli mamake kuwa muuza mboga tu atawezaje kuzaa kiongozi ?Lo! Dunia ni hadaa amesalimu amri!

B.MUHTASARI (ALAMA 15)

Soma kifungu kifuatacho kisha ujibu maswali:

Katika kipindi cha miaka iliyopita , kumekuwa na mfumko wa bei ya bidhaa muhimu hivi kwamba idadi kubwa ya raia wanalala njaa.Uchunguzi uliofanywa na mashirika ya kijamii kuhusu bei ya bidhaa hizo umeonyesha kuwa familia za kawaida zinatumia nusu ya mapato yao kununua chakula. Bila shaka yoyote , hili janga linaendelea kutokota.Tunafahamu kuwa kupanda bei ya petroli kimtaifa kumechangia kuongezeka kwa bei ya vyakula kwa namna moja hadi nyingine.

Mbali na vyakula , gharama ya kupanga nyumba , maji ,stima na mafuta imepanda kwa miezi mitatu iliyopita kati ya Disemba na Januari 2017.Kwa mujibu wa Benki ya dunia iliyozinduliwa hivi majuzi, kupanda kwa bei ya vyakula kumesukuma familia nyingi katika lindi la umaskini.

Ingawa serikali haina uwezo wa kuthibitishia baadhi ya sababu zinazochochea kuongezeka kwa bei ya chakula nchini, haipaswi kutulia tuli ikisubiri suluhisho litokee kisadfa.Inasikitisha kwamba viongozi wetu wanatumia muda mwingi kuchapa siasa huku raia wa kawaida wakiendelea kuumia.Iweje basi katika vikao vyao vya hadhara wanasiasa wanatumia muda mwingi kuzungumzia masuala ya kugawanya wananchi na kufichua njama za kuwaangamiza wapinzani wao badala ya kueleza namna watakavyokabiliana na janga lililopo la njaa? Ni lini watafahamu kwamba hauwezi kumtawala mtu mwenye njaa?

Kwa muda mrefu baa la njaa limekuwa likihusishwa na maeneo ya kaskazini mwa nchi yetu;lakini kama uchunguzi ulivyoonyesha familia nyingi nchini zinaumia na wengi hawawezi kumudu bei ya bidhaa kama sukari ,unga, mafuta ya kupikia na kadhalika.

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

Wakati umewadia kwa serikali kuchukua hatua madhubuti kwa kuwa kama ilivyo ni vigumu kumtawala mtu aliye na tumbo tupu na ambaye hajijui wala hatambui kuhusu atakapopata lishe.

a) Lipe shairi hili anwani mwafaka **(alm2)**

b) Eleza arudhi zilizofuatwa katika shairi hili **(alm4)**

c) Onyesha jinsi malenga alivyotumia uhuru wake**.** **(alm3)**

d) Tambua bahari katik shairi hili kwa kutegemea;

i) Vipande vya msihororo

ii) Mpangilio wa vina

iii) Idadi ya mishororo **(alm3)**

e) Andika ubeti wa tatu kwa lugha ya nathari **(alm3)**

f) Tambua mbinu za lugha zilizotumika katika shairi. **(alm3)**

g) Eleza toni ya shairi hili **(alm2)**

SEHEMU YA B: Hadithi ya Mapambazuko na machweo na hadithi nyingine

2.”Ondoa wasiwasi mhibaka ,***you are in very safe hands*** .Usiulize maswali , its okay. Tulikuja sote jana baada ya ***dance*** , umesahau hivi?’

i) Fafanua muktadha wa dondoo hili. **(alm4)**

ii) Taja na ueleze mbinu za lugha zinazojitokeza katika dondoo. **(alm4)**

iii) Jadili madhara ya pombe katika jamii kama inavyodhihirika katika hadithi ya Kila mchezea wembe**.** **(alm12)**

Au

3. Eleza matatizo yanayomkumba mtoto wa kike kwa mujibu wa hadithi ya Sabina. **(alm20)**

SEHEMU YA YA C: Tamthilia ya Bembea ya maisha na Timothy Arege

4. Tambua nafasi ya mwanamke jinsi alivyoshughlikiwa na mwandishi katika Tamthilia hii.. **(alm20)**

AU

5. ’Ulimwengu umeendelea sana”

a)Weka dondoo katika muktadha wake**.** **(alm4)**

b) Fafanua sifa sita za msemaji. **(alm6)**

c) Eleza kwa nini huku kwa msemaji hakujaendelea. **(alm10)**

SEHAMUA YA D: Fasihi simulizi

6.a) Taja na ufafanue hatua zozote nne za utafiti nyanjani kwa mfuatano wake. **(alm8)**

b)Tambua baadhi ya changamoto ambazo mtafiti anaweza kumbana nazo akiwa nyanjani **(alm8)**

c) Data iliyohifadhiwa kwa njia ya maandishi inafisha vipi uhalisia wa Fasihi simulizi? **(alm4)**

PAPER 1
FORM THREE (3)
Time: 2 ½ Hours

INSTRUCTIONS TO CANDIDATES

(a) Write your name and index number in the spaces provided at the top of this page.
(b) Write your school name, sign and write the date of the examination in the spaces provided above.
(c) This paper consists of **Two** sections: **Section I** and **Section II**
(d) Answer **ALL** questions in Section I and **any five questions** from Section II
(e) Show all the steps in your calculations, giving your answers at each stage in the spaces provided below each question.
(f) Marks may be given for correct working even if the answer is wrong.
(g) Non-Programmable silent electronic calculators and KNEC Mathematical Tables may be used.
(h) Candidates should check the question paper to ensure that all the pages are printed as indicated and no questions are missing**.**
(i) Candidates should answer the questions in English**.**

For Examiners' Use Only

SECTION I

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	Total

SECTION II

17	18	19	20	21	22	23	24	Total

Grand Total	

SECTION I (50 Marks)

*Answer **all** the questions in this section*

1.Use logarithms only to evaluate to 4 decimal places: **(4mks)**

$$\left(\frac{0.7089 \times 124.5}{(86.73)^2}\right)^{\frac{1}{3}}$$

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

2.Evaluate without using tables or calculators. **(3mks)**

$$\sqrt[3]{\frac{\left(\sqrt[3]{27}\right)^2 \times \left(\sqrt[4]{16}\right)^3}{243}}$$

3.Three tellers in a bank can each serve a customer in 42 seconds, 56 seconds and 84 seconds respectively. Determine the shortest time, in minutes they can take to serve a total of 117 customers. **(4mks)**

4.A tourist exchange X US dollar for Kenya shillings on arrival in Kenya. She spent in Kenya for some days and paid Ksh 45 600 for her expenses. She later left the country and exchanged the remainder back to US dollars. She went back with 1200 US dollars.

Given that the dollar buys and sells as shown in the table below.

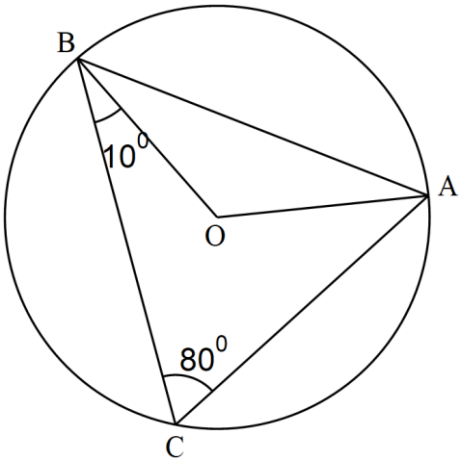

Currency	Buying	Selling
1 US dollar	Kshs 98.36	Kshs 98.54

Find the value of X to the nearest dollar **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

5. Mr. Abdiaziz who deals in electronics sells a radio to a customer at Kshs. 1,440 after giving him a discount of 10% but finds that he still makes a 20% profit. Find the profit Mr. Abdiaziz would make if he does not give a discount. **(3mks)**

6. In the figure given below (not drawn to scale), O is the centre of circle. If $\angle BCA = 80^0$ and $\angle CB0 = 10^0$.

Determine the size of $\angle$CAB. (3 marks)

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

7.Solve the inequality below and represent the solution on a number line. **(3mks)**

$$5 - 2x < \frac{1}{2}x \leq \frac{x+2}{3}$$

8.The heights of two similar pails are 12 cm and 8 cm. The larger pail can hold 2 litres. What is the volume of the smaller pail? Give your answer to 2 decimal places. **(3mks)**

9.Simplify the expression: **(3mks)**

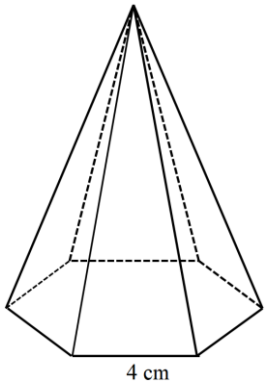

$$\frac{3a^3 - 27ab^2}{a^3 + a^2b - 6ab^2}$$

10. Determine the value of $\tan(\theta + 14^0)$ given that **(2mks)**

$$\cos\frac{1}{2}\theta^0 = \sin(3\theta - 36^0) \text{ for } 0^0 \leq \theta \leq 90^0$$

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

11. The figure below shows a pyramid whose base is a regular hexagon of side 4 cm.

Calculate the volume of the pyramid correct to 3 decimal places, given its height is 10 cm. **4mks)**

12. Using a ruler and pair of compasses only,

(a) construct a rhombus KLMN whose base is the line KL provided below and angle KLM=120^0 **(2mks)**

K L

(b) Use KM and NL to calculate the area of the rhombus. **(2mks)**

13. Given that $\mathbf{OT} = -3\boldsymbol{i} + 6\boldsymbol{j} - 2\boldsymbol{k}$ and $\mathbf{OS} = 4\boldsymbol{i} + 5\boldsymbol{k}$, find $|\mathbf{ST}|$ **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

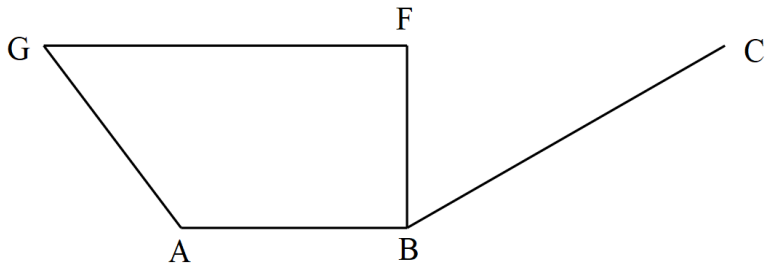

14. Solve the following pair of simultaneous equations by substitution method. **(3mks)**

$5x - 8y = 2$

$7x + 3y = 17$

15. A sales lady earns a basic salary of Ksh 24 800 per month. In addition, she gets a 4% commission on the first Ksh 80 000 worth of goods and a further 5% commission on goods worth over Ksh 80 000. In a certain month, she sold goods worth Ksh. 200,000 Calculate her total income in that month. **(3mks)**

16. In the figure below ABFG is a uniform cross-section of a prism. BC is one of the visible edges of the prism.

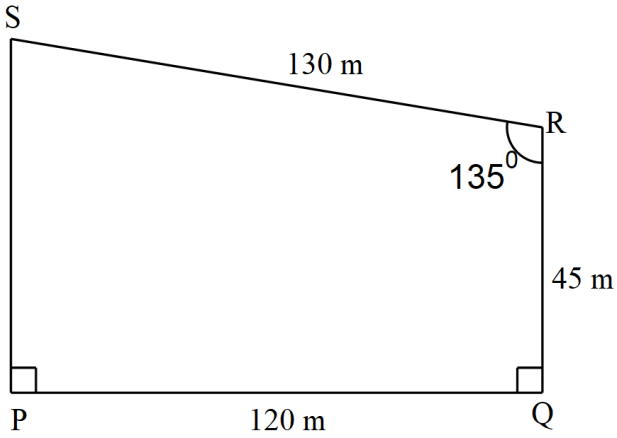

Complete the sketch of the solid showing the hidden edges with broken lines. **(2mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

SECTION II (50 Marks)

*Answer **any five** questions in this section*

17. The diagram below shows a garden in the shape of a quadrilateral PQRS in which PQ=SR=120 m, QR=45 m, $\angle PQR=\angle SPQ=90^0$ and $\angle 135^0$

(a) Calculate to 1 decimal place:

(i) The size of angle QPR. **(2mks)**

(ii) The length PS **(5mks)**

(b) Calculate the area of the garden in hectares, correct to 3 decimal places. **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

18. The equation of line L_1 is $2x + 3y + 6 = 0$.

(a) Find the gradient of line L_1 **(1mk)**

(b) The line L_2 is perpendicular to L_1 and passes through the point P with coordinates (7, 2), find the equation of L_2 , giving the answer in the form $y = mx + c$ where m and c are constants. **(3mks)**

(c) The line L_1 and L_2 intersect at point Q. Find the coordinates of Q**.** **(3mks)**

(d) The line L_3 is parallel to l_1 and passes through point P. Find the equation of L_3 giving the answer in the form $ax + by = c$, where a , b and c are constants**.** **(2mks)**

(e) Determine the coordinates of the x intercept of the line L_3. **(1mk)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

19. Three towns P, Q and R are such that Q is 120km on a bearing of 060^0 from P. R lies on a bearing of 120^0 from P. The bearing of R is 165^0 from Q.

(a) Using the scale of 1 cm to represent 20 km, show the relative positions of P, Q and R. **(3mks)**

(b) Use the scale drawing in (a) above to determine:

(i) The distance of R from P. **(2mks)**

(ii) The bearing of P from R. **(1mk)**

(c) Two police patrol cars leave P and Q such that the one from P travels due east while the one from Q travels due south. The two cars meet at S.

(i) On the scale diagram, locate S **(2mks)**

(ii) Measure the distance of S from R. **(2mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

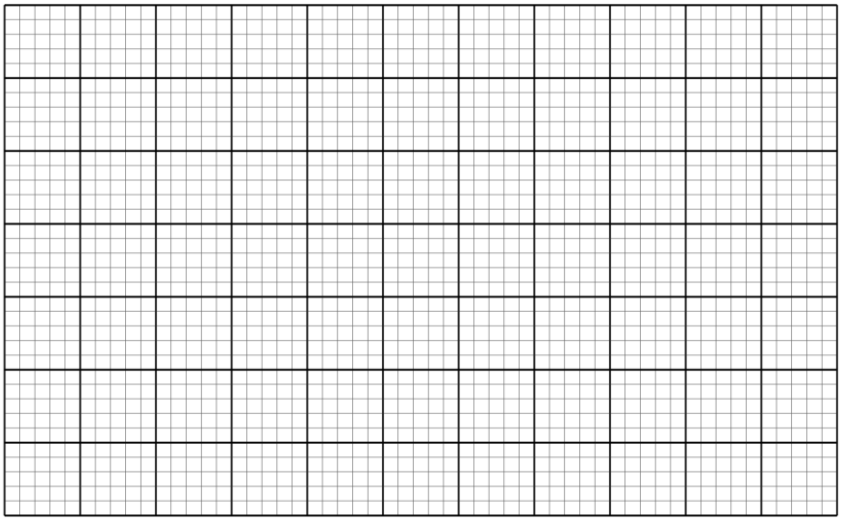

20. The height of a number of students was recorded in the table below. Each measurement is given to the nearest cm.

Height(cm)	Mid-point (x)	Frequency (f)	fx
138 – 142	140	3	420
143 – 147		8	
148 – 152		12	
153 – 157		20	
158 – 162	160	30	4800
163 – 167		14	
168 – 172		7	
173 – 177		4	
178 – 182	180	2	360
		$\Sigma f =$	$\Sigma fx =$

(a) Complete the table. **(3mks)**

(b) Use the completed table to calculate the mean height of the students. **(2mks)**

(c) Draw a histogram to represent the information. **(2mks)**

(d) Use the histogram above to estimate the median height. **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

21. The distance between two towns Athi River town and Busia town is 750 km. A minibus left town Athi River at 8.15 a.m. and traveled towards Busia at an average speed of 90 km/h. A matatu left Busia at 10.35 a.m. on the same day and traveled towards Athi River at an average speed of 110 km/h.

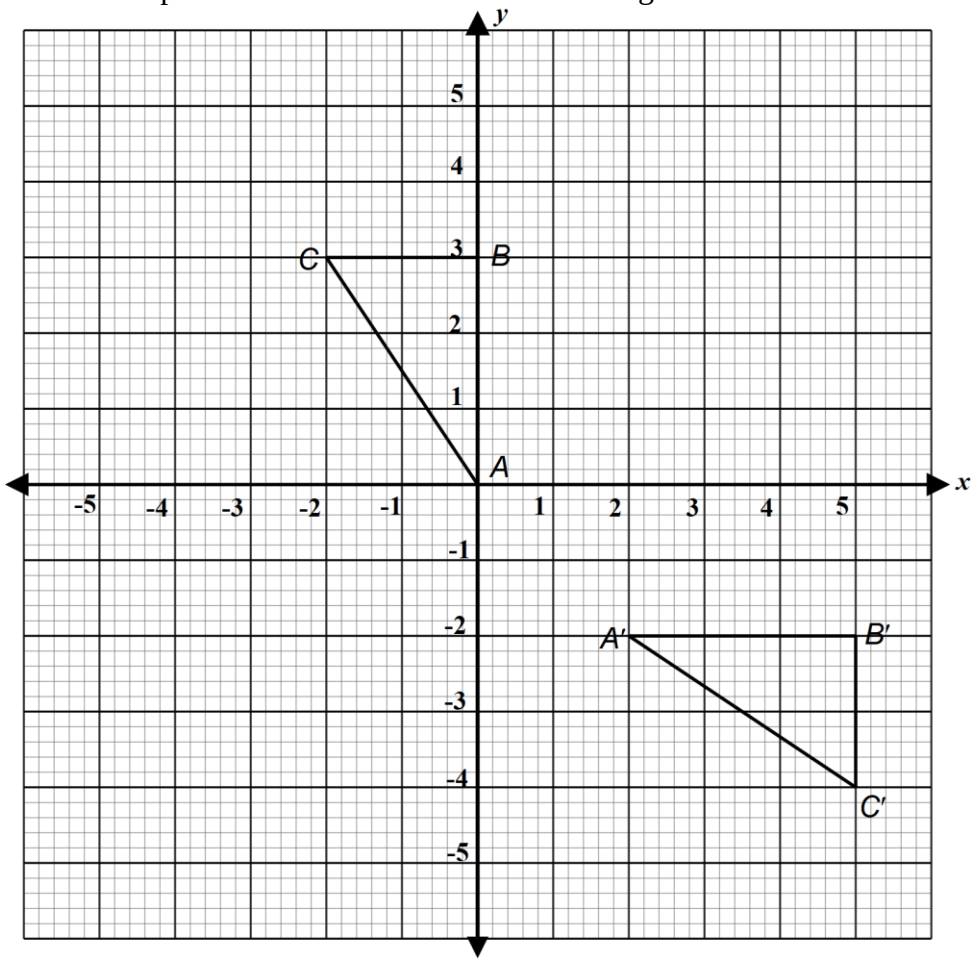

(a) (i) How far from Athi River did the two vehicles meet? **(5mks)**

(ii) At what time of the day did the two vehicles meet? **(1mk)**

(b) A motorist starts from his home at 10.30 a.m. on the same day and traveled at an average speed of 120 km/h. He arrived at the same time as the minibus. Calculate the distance from Busia to his home.**(4mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

22. The cartesian coordinate plane below shows ΔABC and its image $\Delta A'B'C'$ under a transformation **T**.

(a) Describe fully the transformation **T** fully. **(3mks)**

(b) $\Delta A''B''C''$ is the image of $\Delta A'B'C'$ under a rotation $+90^0$ about (0, 0). On the same axes, draw $\Delta A''B''C''$ and state its coordinates **(3mks)**

(c) $\Delta A'''B'''C'''$ is the image of $\Delta A''B''C''$ under an enlargement of scale factor -1 about (0, 0) Draw $\Delta A'''B'''C'''$. **(2mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(d) Name two pairs of triangles that are oppositely congruent. **(2mks)**

23. (a) Find the quadratic equation whose roots are $\frac{-3}{4}$ and $\frac{2}{3}$ and write it in the form $ax^2 + bx + c = 0$ where a, b and c are integral values. **(3mks)**

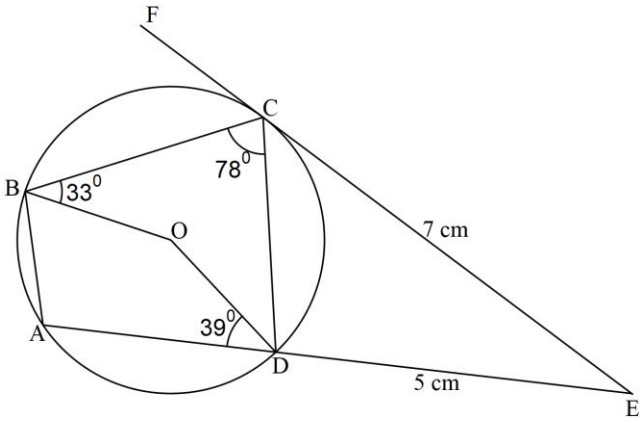

(b) The length of a floor of a rectangular hall is 9 m longer than its width. The area of the floor is 136 m^2. Calculate the perimeter of the floor. **(4mks)**

(c) Solve the quadratic equation below by completing the square, correct to 3 decimal places. **(3mks)**

$\frac{1}{2}x^2 - \frac{7}{3}x + \frac{3}{4} = 0$

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

24. In the figure below, O is the centre of the circle, $\angle ADO = 39^0$, $\angle OBC = 33^0$ and $\angle ECD = 45^0$. EC is a tangent to the circle at C.

(a) Calculate, giving reasons

(i) $\angle CDE$ **(3mks)**

(ii) Reflex $\angle BOD$ **(3mks)**

(iii) $\angle BDC$ **(2mks)**

(b) Given that EC=7 cm and DE = 5 cm, calculate the length of AD **(2mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

For Examiners' Use Only

SECTION I

1	2	3	4	5	6	7	8	9	10	11	12	13	14	15	16	Total

SECTION II

17	18	19	20	21	22	23	24	Total

Grand Total	

SECTION I (50 Marks)

*Answer **all** the questions in this section*

1. The dimensions of a rectangular coffee plantation are 600 m by 150 m. If they are measured to the nearest 100 m and 10 m respectively, calculate the percentage error in the area of the plantation. **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

2.The expression below is a perfect square, where b is a constant.

$25x^2 - bx + \frac{1}{9}$

Find the value of b. **(2mks)**

3.Without using a calculator or mathematical tables, write the expression below in the form $p + q\sqrt{r}$, where p, q and r are integers. **(3mks)**

$$\frac{3}{2-\sqrt{3}} + \frac{2}{\sqrt{3}+2}$$

4.PQ, QR and PR are boundaries of a piece of land such that Q is 472 m on a bearing $N70^0W$ from P. Town R is directly south of P. The distance between P and R is 600 m. Calculate the distance QR correct to 2 decimal places. **(4mks)**

5.Solve for θ in the trigonometric equation below

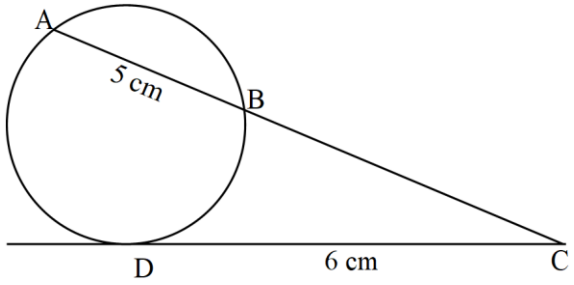

$2\cos(3\theta + 30^0) = -1$ for $0^0 \leq \theta \leq 360^0$ **(4mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

6. $\boldsymbol{B} = \begin{pmatrix} 3 & 2 \\ 2 & 2 \end{pmatrix}$ and $\boldsymbol{C} = \begin{pmatrix} 9 & -3 \\ 2 & 1 \end{pmatrix}$. If $\boldsymbol{A}$ is a square matrix of order 2 and $\boldsymbol{AB} = \boldsymbol{C}$, determine matrix $\boldsymbol{A}$ **(3mks)**

7. A school buys a bus at Kshs. 3 758 000. The bus depreciates as follows: by 10% at the end of the first year, by 15% at the end of the second year and by 20% in the subsequent years after the second year. Calculate the value of the bus at the end of the fourth year. Give the answer to the nearest Ksh. 100. **(3mks)**

8. In the figure below (not drawn to scale), CD is a tangent to the circle at D. CD = 6 cm and AB = 5 cm.

Calculate AC **(2mks)**

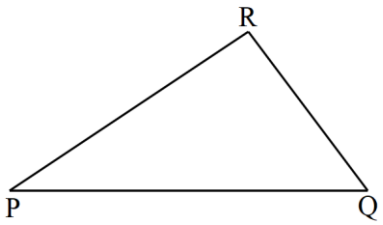

9. Without using a mathematical table or a calculator, simplify **(3mks)**

$$\frac{\log 49 + \log 7}{2\log 7 - \log 343}$$

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

10. Using a ruler and a pair of compasses only in this question.

(a) On the triangle PQR below, draw a circle that touches the side QR externally at exactly one point. **(2mks)**

(b) Measure its radius. **(1mk)**

11. Make x the subject of the formula **(3mks)**

$$p = \frac{qx}{\sqrt[3]{m + tx^3}}$$

12. The cash price of a bicycle is set as Kshs. 13,800. Osketo opts to buy the bicycle on hire purchase terms by paying a deposit of Kshs. 2, 280. If simple interest of 20% per annum is charged on the balance and Osketo repays by 24 equal monthly installments, calculate the amount of each installment. **(3mks)**

13. Tap A can fill a tank in 10 minutes, tap B can fill the same tank in 20 minutes. Tap C can empty the tank in 30 minutes. The three taps are left open for 5 minutes, after which tap A is closed. How long does it take to fill the remaining part of the tank **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

14. Find the radius and the centre of a circle whose equation is given by $4x^2 + 4y^2 = 12x - 12y + 7$ **(4mks)**

15. (a) Expand and simplify in ascending powers of x. **(2mks)**

$\left(1 - \frac{1}{4}x\right)^5$

(b) Use the first four terms of the expansion in (a) above to approximate the value of $(0.75)^5$ **(2mks)**

16. A solid sphere of diameter 5 cm is melted and recast into a cone of height 4.5 cm. Calculate the radius of the cone correct to 2 decimal places. **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

SECTION II (50 Marks)

*Answer **any five** questions in this section*

17. A sugar processing company imported two types of sugar: P and Q for blending. The sugar were packed in 50 kg bags. For every 3 bags of type P, the company used 5 bags of type Q to blend.

(a) If a bag of type P costs Ksh 3 000 and a bag of type Q costs Ksh 4 000. Determine:

(i) The cost of one bag of the mixture. **(3mks)**

(ii) The selling price of a 2 kg packet of the mixture if a 20% profit was to be realized. **(3mks)**

(b) The company later decided to mix the blend of type P and Q sugar with another type R sugar which costs Ksh 4 800 per 50 kg bag. Determine:

(i) The ratio of the mixture of the blend and type R sugar that will cost Ksh 4 200 per bag. **(2mks)**

(ii) The ratio of types P, Q and R sugar in the mixture **(2mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

18. Income tax is charged on monthly income at the rates shown in the table below.

Taxable Income (Ksh per month)	Tax Rate (%)
1 – 6 000	10
6 001 – 11 600	15
11 601 – 17 200	20
17 201 – 22 800	25
22 801 – 28 400	30
28 401 and over	35

Mr. Otieno is a civil servant and earns a basic salary of Ksh 21 000 per month. He is entitled to house and medical allowances of Ksh 3 500 per month and Ksh 2 080 per month respectively. He is given a personal relief of Ksh 1 056 per month and an insurance relief of 4% of his basic salary.

Calculate:

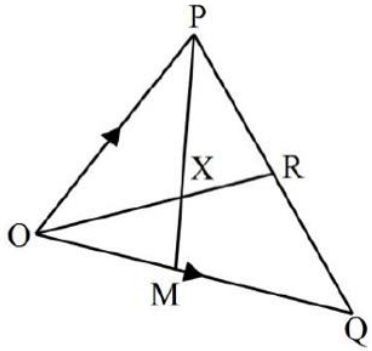

(a) Mr. Otieno's taxable income per month. **(2mks)**

(b) Mr. Otieno's Pay As You Earn. **(5mks)**

(c) Mr. Otieno's net monthly salary if he pays Ksh. 500 per month for health insurance and a loan repayment of Ksh 3, 680 per month. **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

19. In the figure below, **OP = p** and **OQ = q**. R is the mid-point of **PQ** and **OM:MQ** = 2:3. **OR** and **PM** intersect at X.

(a) Express the following vectors in terms of **p** and **q**.

(i) OR **(2mks)**

(ii) PM **(1mk)**

(b) If **PX** = h**PM** and **OX** = k**OR**,

(i) Express **PX** in two ways **(3mks)**

(ii) Hence find the values of h and k. **(3mks)**

(c)Find the ratio **PX: XM** **(1mk)**

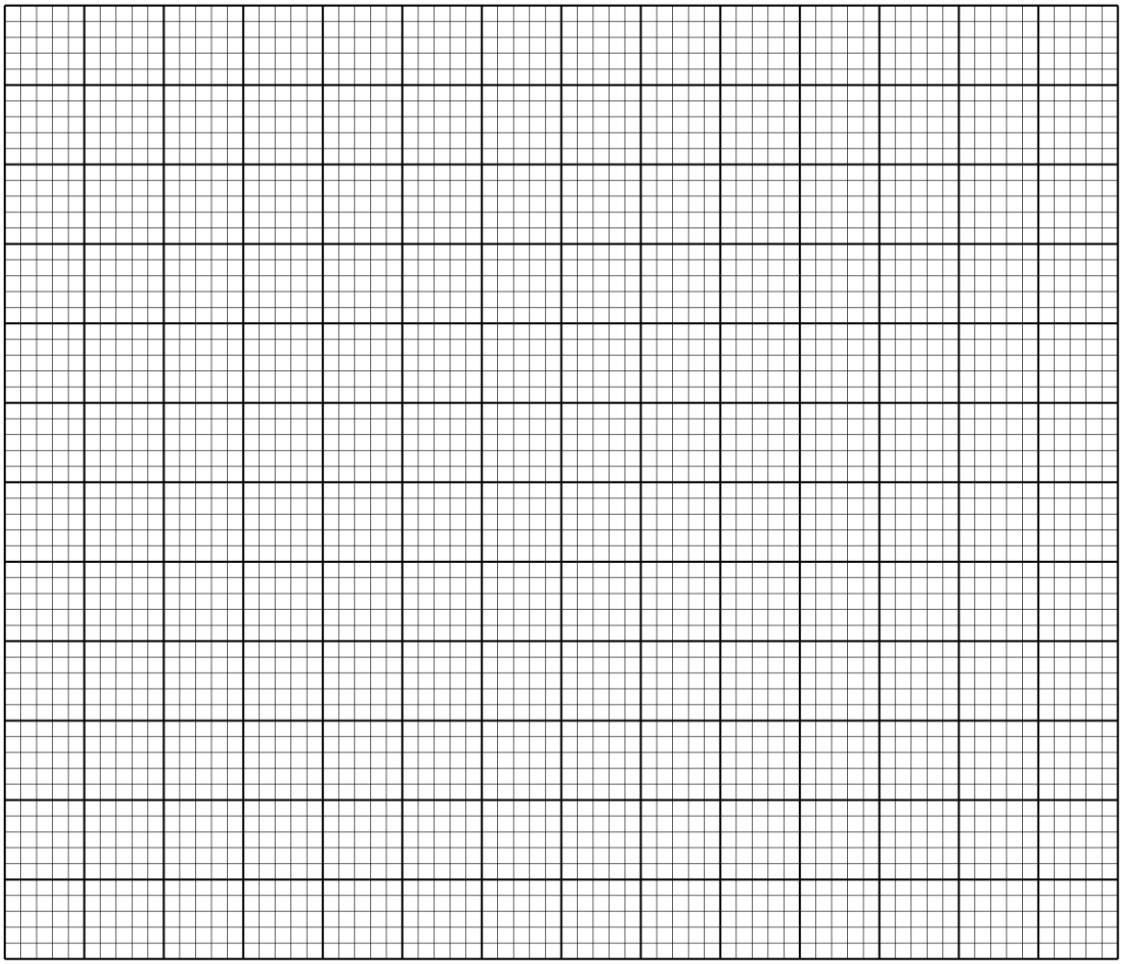

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

20. (a) Complete the table below for the functions $y = -2\cos 2x$ and $y = 3\sin(2x + 30^0)$ for $0^0 \leq x \leq 180^0$

(3mks)

x^0	0	15	30	45	60	75	90	105	120	135	150	165	180
$-2\cos 2x$		-1.73	-1.00				2.00		1.00			-1.73	-2.00
$3\sin(2x + 30^0)$	1.50					0.00				-2.60	-1.50		

(b) Using the scales of 1 cm for 15^0 on the x – axis and 2 cm for 1 unit on the y – axis, draw the graphs of $y = -2\cos 2x$ and $y = 3\sin(2x + 30^0)$ for $0^0 \leq x \leq 180^0$ on the same axes. **(5mks)**

(c) Using the graphs in (b) above, solve the equation $3\sin(2x + 30^0) + 2\cos 2x = 0$ **(1mk)**

(d) Find the range of values of x for which $3\sin(2x + 30^0) \leq -2\cos 2x$ **(1mk)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

21. A cupboard has 7 white cups and 5 brown ones all identical in size and shape. There was a blackout in the town and Mrs. Maina had to select three cups, one after the other without replacing the previous one.

(a) Draw a tree diagram to represent the above information. **(2mks)**

(b) Calculate the probability that she chooses:

(i) Two white cups and one brown cup. **(2mks)**

(ii) Two brown cups and one white cup. **(2mks)**

(iii) At least one white cup. **(2mks)**

(iv) Three cups of the same colour. **(2mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

22. (a) In a geometrical progression, the sum of the second and the third terms is 12 while the sum of the third and the fourth terms is -36. Find the first term and the common ratio of the progression. **(4mks)**

(b) In an arithmetic progression, the 12^{th} term is 25 and the 7^{th} term is three times the second term. Find:

(i) The first term and the common difference. **(4mks)**

(ii) The sum of the first 12 terms of the arithmetic progression. **(2mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

23. A quantity X varies partly as the square of Y and partly as Z. When $X = 13$, $Y = 3$ and $Z = 5$. Also, when $X = -5$, $Y = 1$ and $Z = 7$

(a) Find;

(i) The law connecting X, Y and Z. **(4mks)**

(ii) The value of X when $Y = 0.5$ and $Z = -10$ **(1mk)**

(b) Express Y in terms of X and Z. **(2mks)**

(c) If X and Z are each decreased by 19%, find the percentage change in Y. **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

24. (a) Given that matrix $\mathbf{P} = \begin{pmatrix} 15 & 20 \\ 14 & 24 \end{pmatrix}$, find $\mathbf{P}^{-1}$. **(2mks)**

(b) Two traders, Maina and Owino bought goats and sheep at Kshs. g per goat and Kshs. s per sheep. Maina paid a total of Kshs. 60,000 for 15 goats and 20 sheep while Owino paid Kshs. 4,000 more than Maina for 14 goats and 24 sheep.

(i) Form a matrix equation to represent this information. **(2mks)**

(ii) Use the inverse matrix $\mathbf{P}^{-1}$ in (a) above to find the cost of a sheep and a goat. **(4mks)**

(c) Find the total cost of 9 sheep and 10 goats by using matrices of orders 1×2 and 2×1 respectively. **(2mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

FORM THREE (3)
Time: 2 Hours

Instructions to candidates

- This paper consists of two sections ***A*** and ***B***.
- Answer **all** the questions in the two sections in the spaces provided after each question
- All working **must** be clearly shown.
- Electronic calculators, mathematical tables may be used.
- All numerical answers **should be expressed** in the **decimal** notations.
- You may use 'gravitational acceleration, g, as $10m/s^2$

For Examiner use only

SECTION	QUESTION	MAX MARKS	CANDIDATE'S SCORE
A	1 – 13	25	
	14	12	
	15	11	
	16	10	
	17	10	
	18	12	
	TOTAL	80	

SECTION A (25 MARKS)

1.The scale of the micrometer screw gauge below has a zero error of +0.05mm.

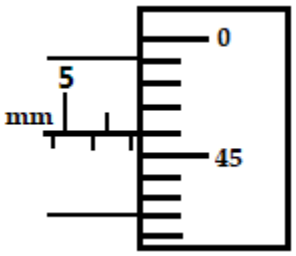

Figure 1

What is the actual reading of the micrometer screw gauge? **(2mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

2.In a ball and ring experiment, the ball goes through the rings at room temperature. When it is heated it does not go through the ring, but when left on the ring for some time, it goes through. Explain this observation **(2mks)**

……

……

……

……

3.The set up shown below, figure 2, was used to study behavior of water when heated from room temperature at 20^0C.

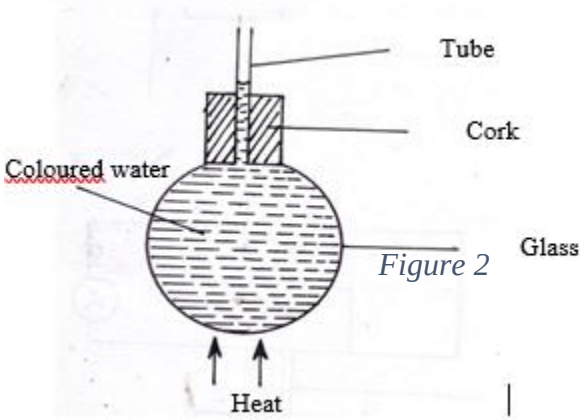

Figure 2

When heat was introduced, it was observed that the level of the water initially drops before starting to rise. Explain this observation **(2mks)**

……

……

……

……

4.Figure 3 shows some air trapped by mercury in a glass tube. The tube is inverted in a dish containing mercury.

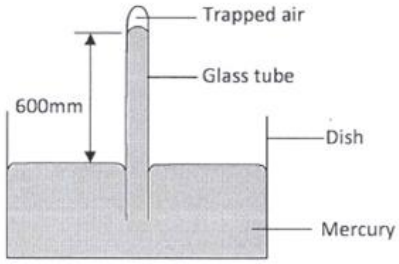

Figure 3

Given that the atmospheric pressure is 760 mmHg and the height of mercury column in the tube is 600 mm, determine the pressure of the air trapped in the tube in mmHg. **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

5. State **two** measurements you would take in an experiment to determine the upthrust of an object which is immersed in a fluid. **(2mks)**

……

……

……

……

6. State how the measurements in question (5) are used to determine the upthrust of the object. **(1mk)**

……

……

……

7. It is easier to bend an iron rod than a glass rod of the same dimensions at room temperature. Give a reason for this **(1mk)**

……

……

……

8. An experiment was performed to find out how the length L of a spiral spring varies with the compression force, F. The figure, 4 shows the variation.

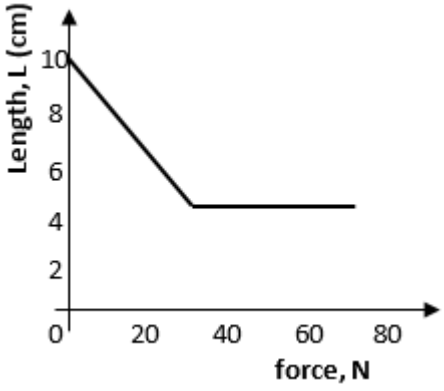

Figure 4

i. Draw a diagram of a possible set up of the apparatus **(3mks)**

ii. Determine the length of the spring when it is not being used (1 marks)

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

9. Why is it that boiling water is not used for sterilization of clinical thermometer? **(1mk)**

……

……

……

10. Figure 5 shows two identical balloons A and B. The balloons were filled with equal amounts of the same type of gas. The balloons are suspended at equal distances X1 and X2 from a metal cube filled with boiling water and placed on an insulating material. One side of the metal cube is shiny while the other side is dull (use this information to answer question 10 and 11).

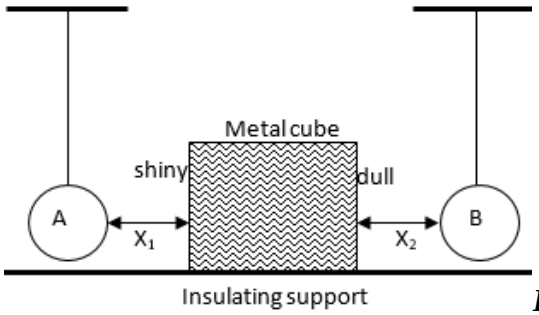

Figure 5

State the mode by which heat travels from the cube to the balloons **(1mk)**

……

……

……

11. Compare the size of the balloons after some time. Give reason for your comment **(2mks)**

……

……

……

……

12. A pupil blows a current of air over the surface of a sheet of paper held close to its mouth. State and explain what happens to the paper. **(2mks)**

……

……

……

……

13. An object is projected horizontally at a velocity of 40m/s from a cliff 20m high. Calculate the time taken to hit the ground **(2mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

SECTION B (55 MARKS)

14.

a) Define the following terms:

i. Mechanical advantage **(1mk)**

……

……

……

ii. Efficiency **(1mk)**

……

……

……

iii. Velocity ratio **(1mk)**

……

……

……

……

b) A crane lifts a load of 200 kg through a vertical distance of 3.0m in 6 seconds. Determine the;

i. Work done **(3mks)**

ii. Power developed by the crane **(3mks)**

iii. Efficiency of the crane given that it is operated by an electric motor rated 2.5kW **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

15.

a) Distinguish between speed and velocity **(1mk)**

……

……

……

b) The diagram shows a tall measuring cylinder containing a viscous liquid. A very small steel ball is released from rest at the surface of the liquid as shown.

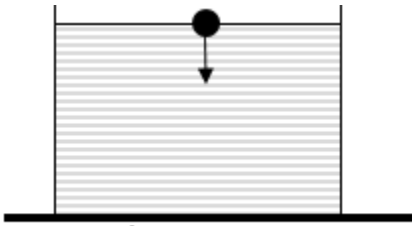

Figure 6

On the space alongside, sketch the velocity- time graph for the motion of the ball from the time it is released to the time just before it reaches the bottom of the cylinder. **(1mk)**

c) A body is initially in motion. If no external force acts on the body, describe the subsequent motion. **(1mk)**

d) Two trolleys of masses 2 kg and 1.5 kg are traveling towards each other at 0.25m/s and 0.40 m/s respectively. The two trolleys combine on collision.

i. Calculate the velocity of the combined trolleys. **(3mks)**

ii. In what direction do the trolleys move after collision? **(1mk)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

e) The graph bellows shows how the velocity varies with time for a body thrown vertically upwards.

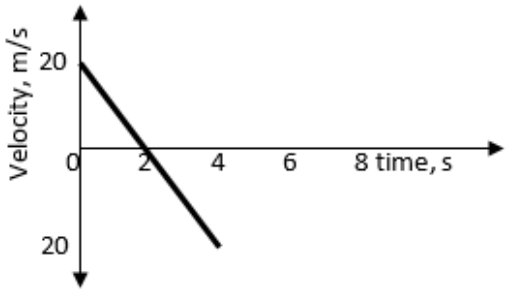

Figure 7

Determine:

i.Time taken to reach maximum height **(1mk)**

ii. The total distance moved by the body. **(3mks)**

16.

a)

i.Define pressure and state its SI unit **(2mks)**

……

……

……

ii. State Pascal's principle **(1mk)**

b) The figure below shows a hydraulic lift system. The radius of the small piston is 3cm while that of the larger piston is 9 cm. A force of 90N is applied to the smaller piston.

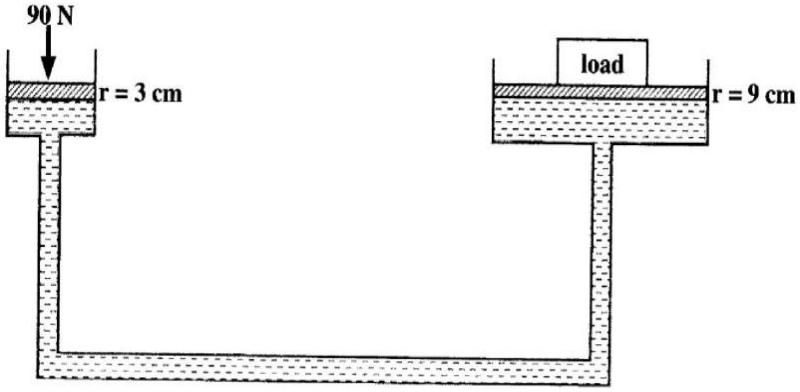

Figure 8

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

Determine the maximum load it can lift **(3mks)**

c) State two factors that affect pressure at a point in a liquid **(2mks)**

……

……

……

……

d) The figure 9 below shows two cylinders of different cross-sectional areas connected with a tube. The cylinders contain an incompressible fluid and are fitted with pistons of cross-sectional areas 4 cm^2 and 24 cm^2.

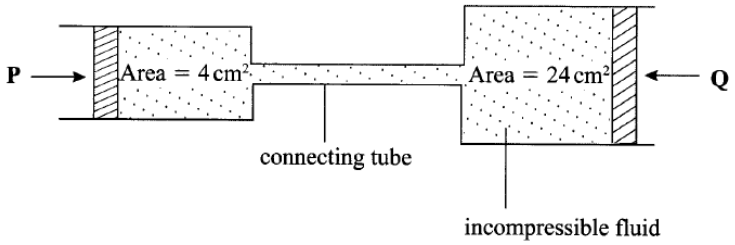

Figure 9

Opposing forces P and Q are applied to the pistons such that the pistons do not move. If the pressure on the smaller piston is 5N/cm^2, determine the force, Q. **(2mks)**

17.

a) A student is provided with five 20g masses, a metre-rule, a spring with pointer, a stand, boss and clamp. In the space provided, sketch a labelled diagram of the set-up that may be used to verify the hookes' law using this apparatus **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

b) State two measurements that should be recorded in order to plot a suitable graph so as to verify hooke's law **(2mks)**

c) Describe how the measurements made in b, above can be used to determine the spring constant **(2mks)**

……

……

……

……

d) A helical spring stretches by 0.6 cm when supporting a weight of 40g. determine the extension when the same spring supports a weight of 65g. **(3mks)**

18.

a) State the principle of moments **(1mk)**

……

……

……

b) The figure10 shows two identical trolleys with loads A and B. The loads are identical in shape and size.

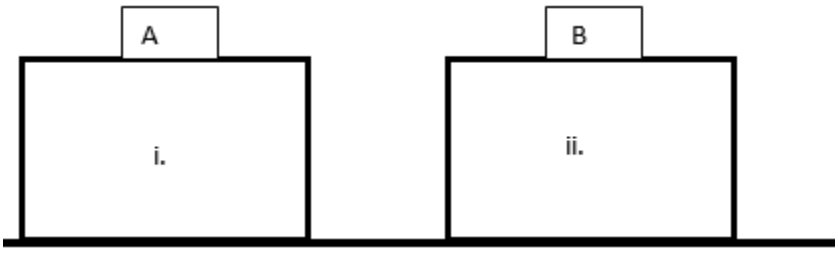

Figure 10

Given that the density of A is greater than that of B, explain why the trolley in (ii) is more stable. **(2mks)**

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

c) The figure below shows beaker containing water at 0^0 C. The beaker is placed on a bench.

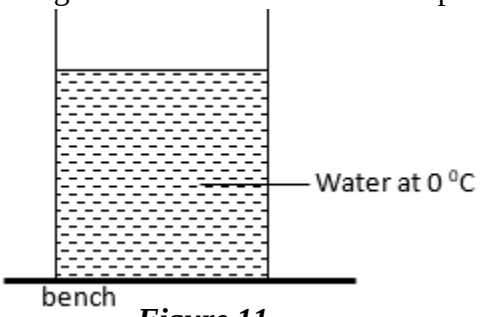

Figure 11

State and explain the changes in stability of beaker when water freezes **(2mks)**

……

……

……

……

d) A uniform half- metre rod is balanced by a weight of 38N at one end. If the pivot is placed 10cm from the same end, calculate the weight of the rod. **(3mks)**

e)

i.Distinguish between streamline flow and turbulent flow **(1mk)**

ii. Water flows along a horizontal pipe of cross sectional area $30cm^2$. The speed of the water is 4m/s but it reaches 7.5m/s in a constriction in the pipe. Calculate the area of the constriction. **(3mks)**

This is the last printed page.

FORM THREE (3)

Time: 2 *Hours*

Instructions

- Write your name, admission number, class, signature and date of examination in the spaces provided at the top of the page.
- This paper consists of two sections A and B.
- Answer all the questions in the two sections in the spaces provided after each question.
- Electronic calculators and mathematical tables may be used.
- All numerical answers should be expressed in decimal notations.

FOR EXAMINER'S USE ONLY

SECTION	QUESTION	MAXIMUM MARKS	CANDIDATE'S SCORE
A	1 – 11	25	
	12	10	
	13	10	
	14	13	
	15	10	
	16	12	
	TOTAL	80	

SECTION A 25 MARKS

Answer all the questions in this section in the spaces provided

1. A pin hole camera forms on the screen an image which appears upside down and magnified with the aid of a ray diagram, explain how this happens. **(2mks)**

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

2. A form one student has the following apparatus two cells, a switch, connecting wires and two bulbs. Draw a possible circuit diagram for the arrangement that will allow the two bulbs to light simultaneously **(2mks)**

3. An object is placed 30cm from a concave mirror of focal length 20cm. Calculate the magnification **(3mks)**

4. You are given three bars. One is magnetized with opposite poles at its ends. Another is magnetized with consequent poles. The third is not magnetized. Describe an experiment which you would perform to identify each. **(2mks)**

……

……

……

……

5.The diagram below shows a ray of light XY traveling through a glass block of critical 42^0 to point A

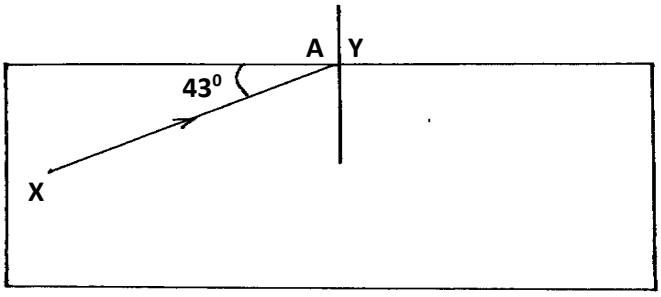

Figure 12

On the same diagram, draw the path of the ray as it travels past point A. **(2mks)**

6. Sketch a displacement time graph of a wave of frequency 4HZ and amplitude 3.0cm over a time interval of 1.5 seconds **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

7. The figure 2 below shows a diagram of circuit breaker .

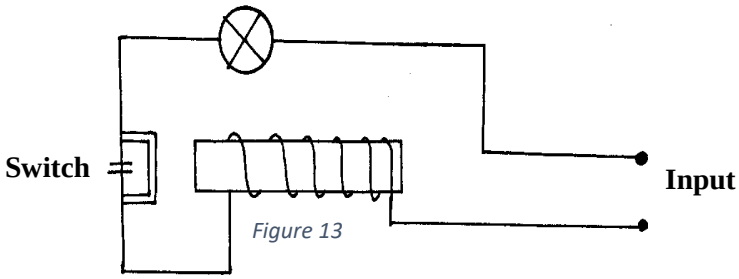

Figure 13

Explain how it operates **(3mks)**

……

……

……

……

8. Differentiate between longitudinal wave and transverse wave **(1mk)**

……

……

……

9. A man standing between two walls claps his hands once and two echoes are heard; one after 1.0 seconds and another 1.8 seconds later. If the nearer wall is 170 m away from the man, calculate the distance between the two walls **(3mks)**

10. A positively charged rod is brought close to two neutral spheres A and B held by insulating handles as shown below.

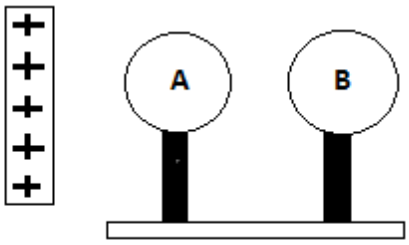

Fig. 3

Figure 14

Identify the charge(s) on A and B, in figure 3 above. (2mks)

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

11. Water waves from a given source move from a deep to a shallow end. What effect would this have on the;

(i) Speed **(1mk)**

……

……

(ii) Wavelength **(1mk)**

……

……

SECTION B (55 MARKS)

Answer all the questions in this section in the spaced provided

12. Figure 4 below shows an electromagnetic relay being used to switch an electric motor on and off. The electromagnet consists of a coil of wire wrapped around a core. The motor in figure is switched off.

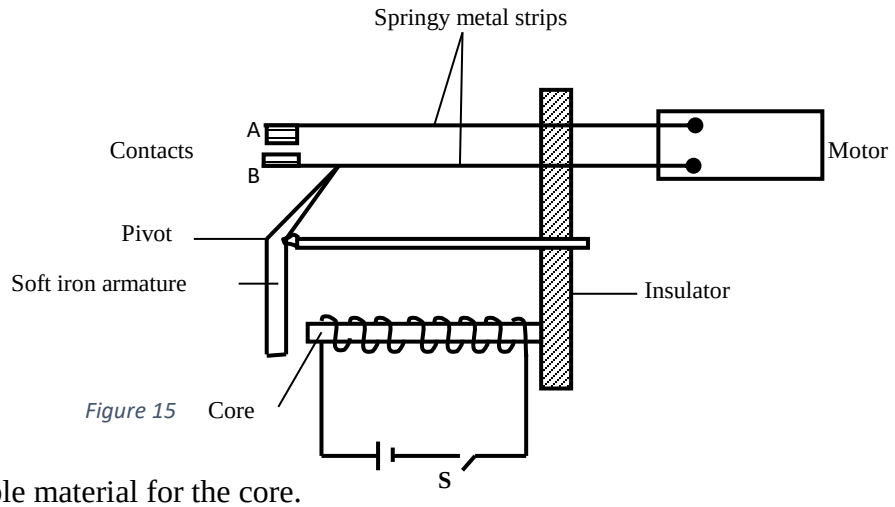

Figure 15

(a) Suggest suitable material for the core. **(1mk)**

……

……

(b) What happens to the core when switch S is closed? **(2mks)**

……

……

……

……

(c) Why do the contacts A and B close when the switch S is closed. **(2mks)**

……

……

……

……

(d) When the switch S is opened, what will happen to;

(i) The core **(1mk)**

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

……

……

(ii) Soft iron armature. **(1mk)**

……

……

……

(e) Give one other application of an electromagnet. **(1mk)**

……

……

……

(f) State two ways in which an electromagnet could be made more powerful. **(2mks)**

……

……

……

……

13.(a) The figure 5 below shows a displacement-time graph of a wave. The velocity of the wave is 100m/s.

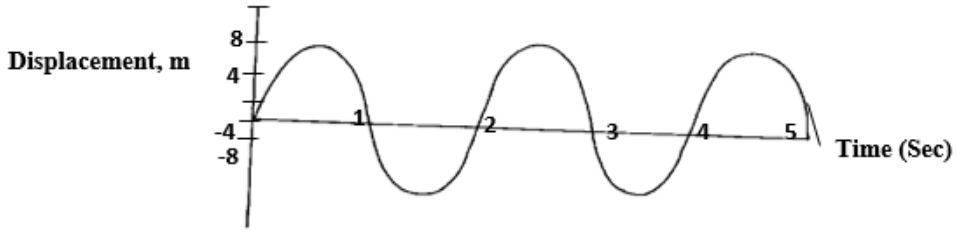

Figure 5

Determine;

(i) Amplitude **(1mk)**

(ii) Period **(1mk)**

(iii) Frequency **(3mks)**

(iv) Wavelength **(2mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(b.) Figure 6 below represents crests of water waves approaching a wide opening.

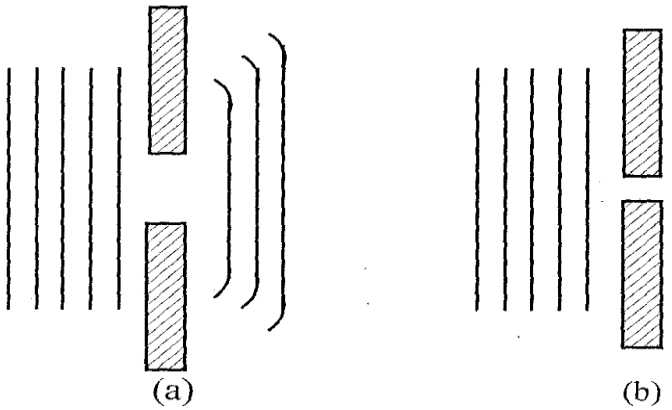

Figure 16

Crests of the same water waves are now approaching a narrow opening. Sketch the crests after passing through the opening. **(2mks)**

(c.) In the figure 7 below, a wave is approaching a reflector. Complete the diagram, indicating at least 3 wave fronts after reflection **(1mk)**

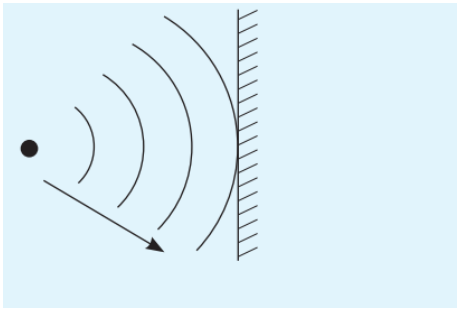

Figure 17

14.A student is provided with two resistors of value 2 Ω and 6 Ω

(a)(i) Draw a circuit diagram showing the resistors in series with each other and with a battery **(1mk)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

(ii) Calculate the total resistance of the circuit (assume negligible internal resistance) **(2mks)**

(b) Given that battery has an e.m.f of 3V and internal resistance 1.2Ω. Calculate the current through.

(i) The 6 Ω resistor **(3mks)**

(ii) The 2 Ω resistor when the two are in parallel. **(3mks)**

(d) The graph below shows the variation of potential difference V with current I for a certain cell.

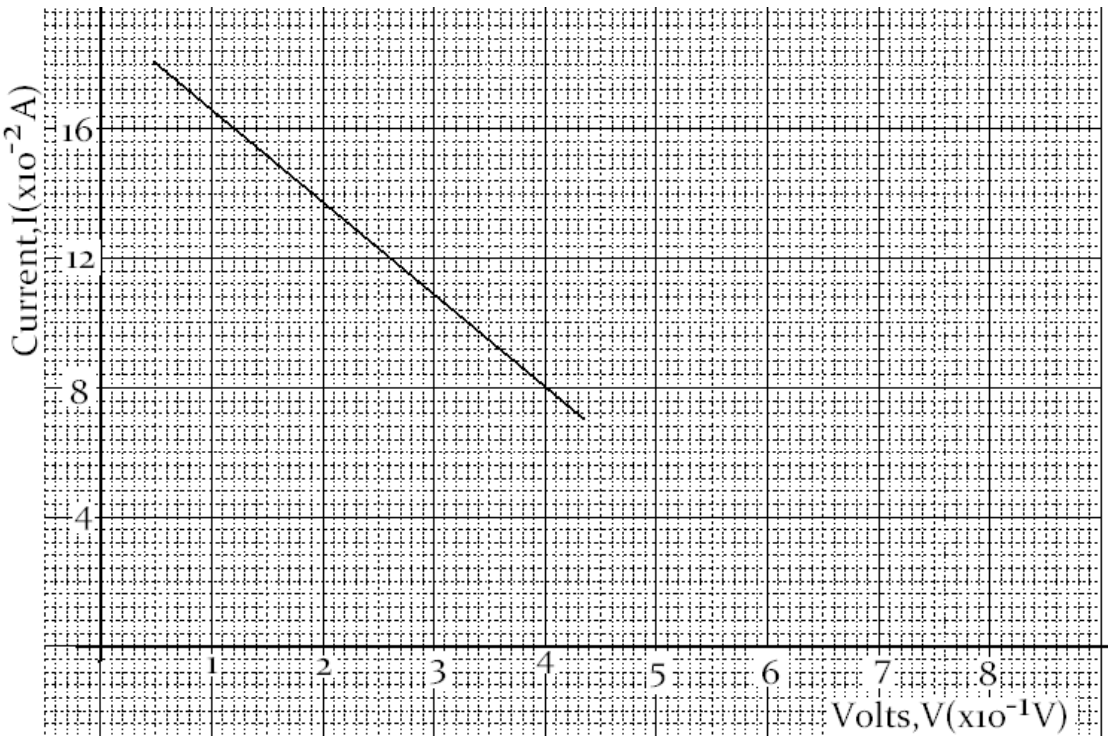

Figure 7

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

From the graph determine

i). The internal resistance of the cell **(3mks)**

ii). The e.m.f of the cell **(1mk)**

15.(a) State Snell's law **(1mk)**

……

……

……

b) A ray of light travelling from water to glass makes an angle of incident of 30^0.
Find the angle of refraction in the glass. Refractive index of water $=^4/_3$. Refractive index of glass $=^3/_2$
(3mks)

c) State the necessary and sufficient conditions for total internal reflection to occur. **(2mks)**

d) You are provided with a glass block, a soft board, white sheet of paper and
three optical pins. With the help of a diagram explain how you would use these apparatus to determine the refractive index of the glass block using real and apparent depth method. **(4mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

16. Figure 9 shows three capacitors connected between two points M and N

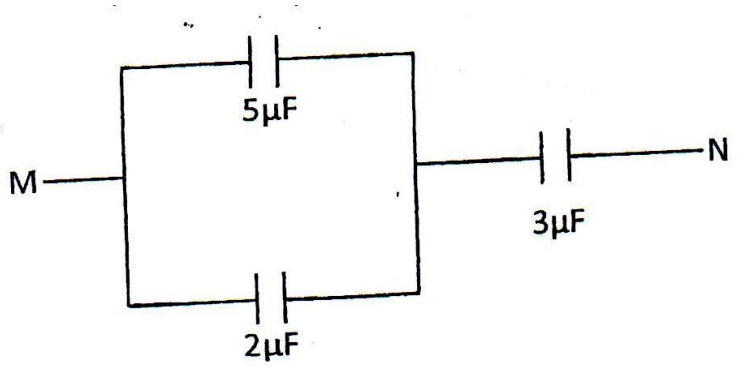

Figure 18

a) Find the effective capacitance between M and N **(3mks)**

b) Determine the charge in the circuit if 3 V is applied across MN **(3mks)**

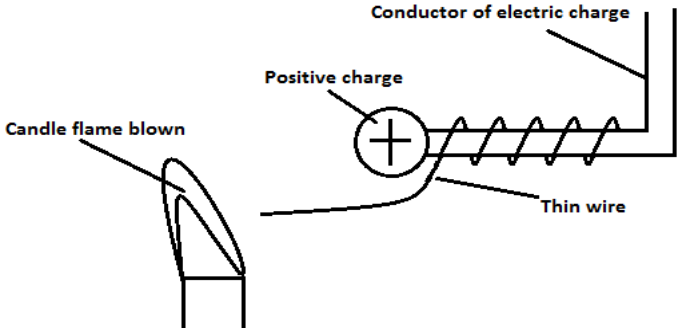

c. One of the factors which affect the capacitance of a parallel plate capacitor is the area of overlap of the plates. Name **two** other factors. **(2mks)**

……

……

……

d. The figure below shows a thin wire connected to a charge generator and placed close to a candle flame.

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

Explain why the candle flame is deflected as shown **(2mks)**

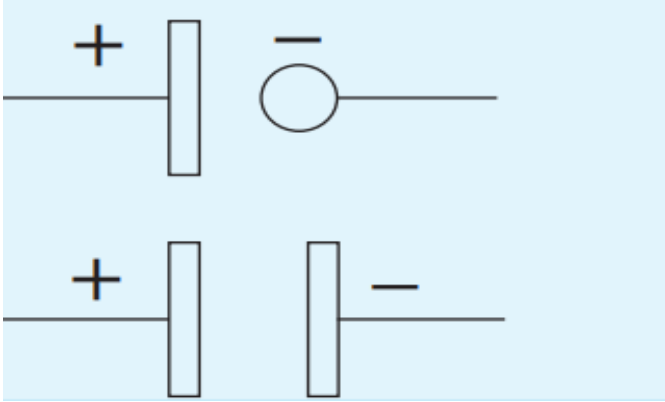

……

……

……

……

e.) Sketch the electric field patterns in the following situations**:** **(2mks)**

……

……

……

……

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

PHYSICS (232/3)

FORM THREE (3)

Time: $2\frac{1}{2}$ *hours*

INSTRUCTIONS:

- Answer all the questions in this paper
- You are supposed to spend the first 15 minutes of the $2\frac{1}{2}$ hours allowed for this paper reading the whole paper carefully before starting your work.
- Marks are given for clear record of the observations made, their suitability and accuracy and the use made of them.
- Candidates are advised to record observations as soon as they are made
- Mathematical table and electronic calculators may be used.
- **The earth's gravitational pull, $g = 10Nkg^{-1}$**

For Examiner's use only:

QUESTION	TOTAL MARKS	CANDIDATE'S SCORE
1	20	
2	20	
GRAND TOTAL	40	

QUESTION 1

You are provided with the following apparatus:

- A cell holder
- A volt-meter (0-3V)
- An ammeter (0-1A)
- A switch
- Amounted resistance wire labelled AB

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

a) Set up the apparatus as shown in the circuit below, figure 1

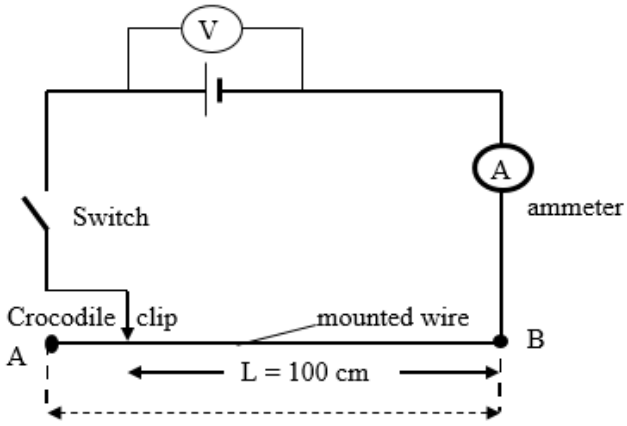

Figure 19

b) While the switch is open, record the voltmeter reading, V_0

$V_0 =$ ..... **(1mk)**

c) Put on the switch. While the crocodile clip is at A (i.e. L = 100 cm) take the volt-meter reading (V) and the ammeter reading (I). Record V and I in the table 1 below.

Table 1

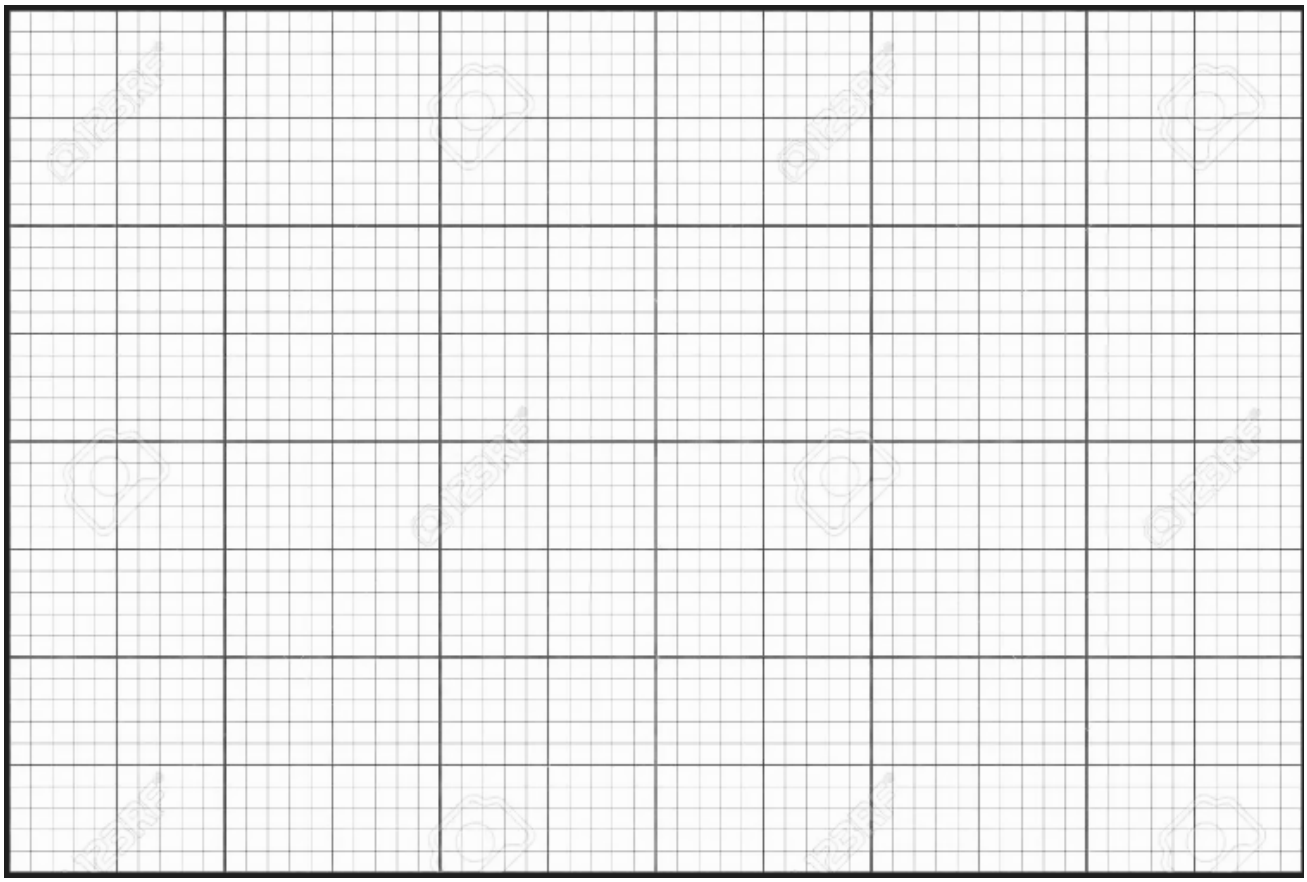

Length, ***L*** (cm)	100	80	60	40	20	0
Voltage (V)						
Current, I (A)						

(8mks)

d) Repeat the procedure in (c) above for the lengths shown and complete the table 1 above.

e)Plot a graph of voltage (Y-axis) against current (X-axis) (5marks)

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

f) Determine the slope of the graph **(3mks)**

g) The voltage and current are related by the equation: $\boldsymbol{V = V_0 - b.I}$. Determine the value of b **(2mks)**

h) What physical quantity does the slope of the graph represent? **(1mk)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

QUESTION TWO

You are provided with the following:

- a metre rule
- 3 optical pins
- 2 small wooden blocks
- a stop watch
- a stand, a boss and clamp
- a piece of sello-tape

Proceed as follows:

a) Using the two wooden blocks, clamp two optical pins about 4 cm apart in the stand so that they project out of the blocks in a horizontal plane.

b) Using a piece of sellotape, attach the third optical pin across the metre rule at a distance x = 10 cm from the 50 cm mark. Now suspend the metre rule on the two clamped pins so that it can swing freely in a vertical plan with the third pin as the axis. (See **figure 2**)

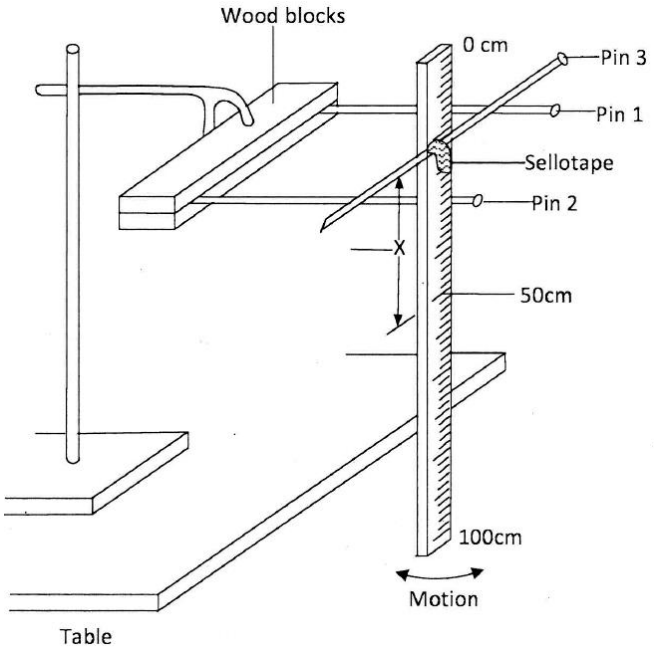

Figure 20

c) Displace the lower end of the metre rule slightly and let it oscillate as shown in the **figure 2**. Measure and record in table 2 the time t (s) for 20 oscillations.

d) Repeat the procedure in (b) and (c) for the values of x shown in table 2.

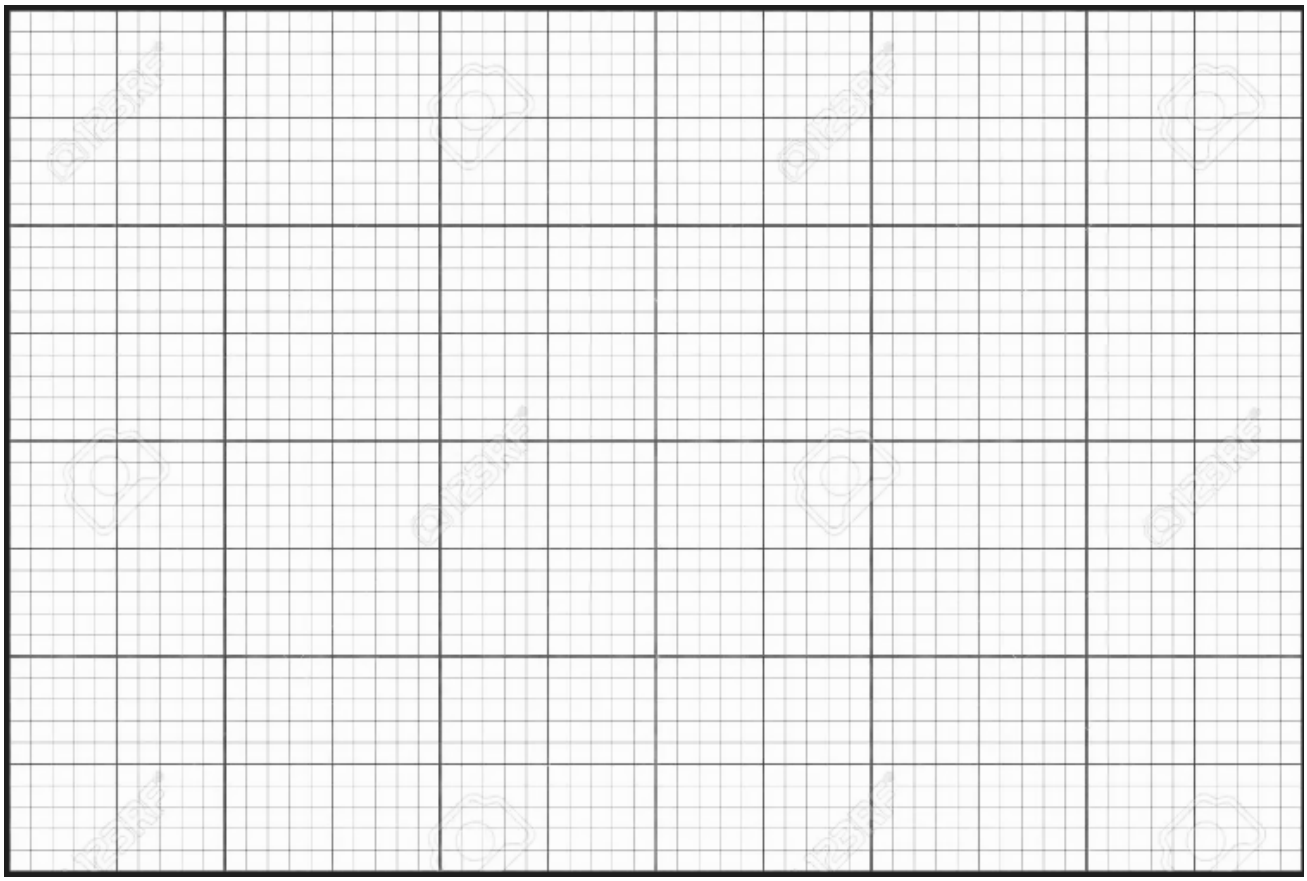

e) For each value of x shown in the table, determine the period T(s), and complete the table. (The period T is the time for one complete oscillation).

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes

Distance X(cm)	10	14	18	22	26	30
Time t (s)						
Period T (s)						
T^2. X (correct to 1 decimal place)						
X^2 (cm^2)						

(9mks)

f) On the grid provided, plot a graph of T^2. X (y-axis) against X^2 **(5mks)**

g) From the graph, determine:

i. The slope S of the graph. **(3mks)**

ii. The value of constant r given that: $rS = 39.5$ **(3mks)**

Prefer Calling Amobi Group of Examiners @ 0743 333 000 or 0706 851 439 for Marking Schemes
