Answer

Globalisation

Question

Tourism development depends on recruitment of Unskiled and Skilled _____ personnel

---

Answer

Skilled

Question

Destination environment, regulatory framework and tourism decisions are components of _____

Answer

Development first approach

Question

FTO is _____

Answer

Federation of tour operators

Question

Outsourcing of core operations systems by international travel organisation is called _____

Answer

Global distribution system

Question

Market penetration, product development and market development are stages of _____

Answer

Expansion strategies

Question

One of the several methods of reducing distribution cost is termed _____ is

Answer

Commission capping

Question

Tour Diversification strategies is segmented into _____ Stages

Answer

Four

Question

Full meaning of AITO is _____

Answer

Association of independent tour operators

Question

Method of analysing the process of value craetion in an industry is _____ chain

---

Answer

Porter,s (1980) value

Question

Focus of developing nations should be on human _____ rather on Gross Domestic Product.

Answer

Development

Question

Sustainable _____ complementing present generation needs with that of future generations.

Answer

Development

Question

Incorporating aesthetic labour into workforce requires recruitment and _____ process.

Answer

Selection

Question

ATM is _____

Answer

Automated Teller Machine

Question

The Supply of workers embodied capacities and attributes at point of entry into employment is termed _____

Answer

Aesthetic Labour

Question

Globalisation and increased integration of global economy results in positive _____

Answer

Labour Mobility

Question

_____ and well informed tourist are products of globalisation .

Answer

High skilled

Question

Contact between customer and employer in determining customers satisfaction encounters is termed _____

Answer

Moments of truth

Question

Increased Homogenisation of tourism products is achieved through _____

Answer

Globalisation

Question

Skilled workers are more of _____ when compared with unskilled that are national or local employee

---

Answer

International

Question

Technological, political and economic developmeny are examples of _____

Answer

Globalisation

Question

Tourism development depends on recruitment of Unskiled and Skilled _____ personnel

---

Answer

Skilled

Question

Destination environment, regulatory framework and tourism decisions are components of _____

Answer

Development first approach

Question

FTO is _____

Answer

Federation of tour operators

Question

Outsourcing of core operations systems by international travel organisation is called _____

Answer

Answer

Porter,s (1980) value

Question

Focus of developing nations should be on human _____ rather on Gross Domestic Product.

Answer

Development

Question

Sustainable _____ complementing present generation needs with that of future generations.

Answer

Development

HCM234

Question

Which one of these is not an element of the refrigirating cycle ----------

---

Answer

Evaporation

Question

Hazards caused by fire include all but one ----------

Answer

Liquid gas

Question

One of these is not a liquid fuel ----------

Answer

Coal

Question

Solid fuel used in the kitchen does not include one of these ----------

---

Answer

Kero

Question

Which one of these is not a factor to be considered in selecting the size of rainwater guttering --------

---

Answer

The height of the roof surface drained by the gutter

Question

One of these is not a source of water pollution ----------

Answer

Heavy rain

Question

Which of these is not a factor that affects quality of water within the reservoirs ---------

---

Answer

Climate change

Question

Natural sources of water does not include one of the following ---------

Answer

Tap water

Question

The function of flashes is to provide ----------

Answer

Watertights junctions

Question

Typical causes of roof problems include the foolowing but one. Which one ?

Answer

Use of aluminum long span sheets

Question

Categories of Maintenance management include all of the following except ----------

Answer

Local

Question

Obstacles to hotel maintenance include ----------

Answer

All of the above

Question

Some of the factors that influence maintenance strategy adopted include ----------

Answer

All of the above

Question

an effective maintenance stystem includes the following elements but one

Answer

Staff performance record

Question

The term Maintenance means to ----------

Answer

Keep equipment in operting condition

Question

The maintenance actions may include ----------

Answer

All of the following

Question

Which one of these is not amongst maintenance management category ----------

---

Answer

Decorative maintenance

Question

The maintenance actions may include ----------

Answer

All of the following

Question

Maintenance procedures can be performed by one of the following ----------

---

Answer

Staffers

Question

Hotel maintenance is carried out to ----------

Answer

Beautify the hotel

Question

Which one of these is not an element of the refrigirating cycle ----------

---

Answer

Evaporation

Question

Hazards caused by fire include all but one ----------

Answer

Liquid gas

Question

One of these is not a liquid fuel ----------

Beautify the hotel

BFN209

Question

_____allows for dividend payment to be deferred if a firm does not make adequate profit to pay such dividend.

Answer

Cumulative preference shares

Question

The following are the motives for holding cash except_____

Answer

Budgetary motive

Question

Cash management is concerned with the management of the following except_____

Answer

None of the above

Question

The following are some of the various types of preference shares except_____

Answer

Non convertible preference shares

Question

The _____is the market that serves as an intermediary between fund-raisers and suppliers of capital

Answer

NSE

Question

The short-term liabilities of a firm includes all of the following except_____

Answer

Lendings

Question

The following are the main components of working capital management except_____

Answer

Fixed income

Question

One of the following is not contained in the memorandum of association of a company

Answer

address of the company and the reason why it is in existence

Question

The finance function to staff and departments will be dependent upon the size and _____of the business organisation.

Answer

magnitude

Question

A person responsible for performing finance functions In a modern firm is known as _____

Answer

Financial Manager

Question

_____is when a company distributes all its earnings to shareholders and acquires new capital from same source by issuing new shares

---

Answer

Rights issue

Question

Shareholders that receive dividend at a fixed rate and enjoy priority over ordinary shareholders are known as _____

Answer

Preference shareholders

Question

The following are the elements that must be held in balance to enable optimum utilization of resources of the enterprise except _____

Answer

Investment

Question

_____ is the provision of money at the time it is required

Answer

Finance

Question

A market that promises future benefits in the form of cash payments is known as _____

Answer

Retail market

Question

_____ is called borrowed fund and is also referred to as a debt

---

Answer

External Finance

Question

The amount a business can spend in a period and be as “well off” at the end of the period than as at the beginning is known as _____

Answer

Profit

Question

_____ are risks that arise from the fact that the producer’s skill or that of the subordinates may not be up to the expected level for the plan, hence it may fall short of achieving the intention.

Answer

Technical risks

Question

The following are three ways of avoiding or reducing risk except____

Answer

Investing in a risky investment

Question

The simplest form of finance is where the whole of finance required by a particular enterprise is provided by _____

Answer

Entrepreneur

Question

_____allows for dividend payment to be deferred if a firm does not make adequate profit to pay such dividend.

Answer

Cumulative preference shares

Question

The following are the motives for holding cash except_____

Answer

Budgetary motive

Question

Cash management is concerned with the management of the following except_____

Answer

None of the above

Question

The following are some of the various types of preference shares except_____

CRD204

Question

Human skill applied to the natural environment or surroundings and constitute of the sphere of cultural ----------

Answer

landscape

Question

The cultural environment comprises man, made features and human----------

Answer

talents

Question

UFOLOGISTS do not believed in biblical and evolutionists explanations of ---------- origin.

Answer

man

Question

Man can not function properly without his ----------

Answer

environment

Question

What is refers to the outer space or a part of universe other than the earth?

Answer

cosmic

Question

Genes is a branch of ---------- that affect the process of mutation.

Answer

DNA

Question

Human beigns can be categorized with the group of apes and monkeys as member

---

Answer

True'

Question

What is refers to the outer space or a part of universe other than the earth?

Answer

cosmic

Question

Under modern interpretations, a scientific---------- must be falsifiable

---

Answer

hypothesis

Question

The role of science and technology in development should be directed toward reduction of --------- between advanced and the developing countries and between various sections of population within a country

---

Answer

inequality

Question

Environment can conceptually refers to all the sound up which ------- live and work and those supportive inhibitive to his immediate existence

---

Answer

man

Question

The second idea of man's origin is that man owes his existence to -----

---

Answer

unidentified flying objects

Question

Advancement in ……. frontiers and technological growth and development have led to increasing attention on man and the environment he lives in

---

Answer

scientific

Question

The physical and behavioral traits about human beings shared by all humans originated from -------- ancestors

---

Answer

ape

Question

The ---------- of man can be explained under three basic ideas.

Answer

origin

Question

Man has a good sense of generalization, ability to coin out abstract ideas and possess intellectual ----------

Answer

truths

Question

what accelerate economic growth, the reduction of inequality, the eradication of absolute poverty?

Answer

development

Question

which type of resources cannot be renewed once they are completely consumed?

Answer

non-renewable

Question

The application of science and technology is a fundamental factor which influences the pace of ---------- development

Answer

economic

Question

Naturally Human beings are ----------

Answer

inquisitive

Question

Human skill applied to the natural environment or surroundings and constitute of the sphere of cultural ----------

Answer

landscape

Question

The cultural environment comprises man, made features and human----------

Answer

talents

Question

UFOLOGISTS do not believed in biblical and evolutionists explanations of ---------- origin.

Question

..... is not an advantage of self employment

Answer

Self centeredness

Question

..... is the abiity to excel at one or more output goals

Answer

Effectiveness

Question

Building a company from the idea stage takes the folowing EXCEPT .....

Answer

Accomplishment

Question

Economic incentives include the following EXCEPT .....

Answer

Mechanical policy

Question

Transformational leadership is comprised of the following components EXCEPT .....

Answer

Inspirational business

Question

Offering somethiing new to serve the market is known as .....

Answer

Service innovation

Question

The term strong ego facet is a must for the entrepreneur means, that the entrepreneur must be .....

Answer

Confident

Question

Offering somethiing new to serve the market is known as .....

Answer

Service innovation

Question

An organisation is said to be a ..... system if information flows smoothly and if employee loyalty, commitment, job satisfaction and trust prevail

Answer

Healthy

Question

Successful entrepreneurs have the following Qualities EXCEPT .....

Answer

Incompetence

Question

The following are factors of production EXCEPT .....

Answer

Property

Question

Entrepreneurship was descried as a force of "Creative Destruction" whereby established ways of doing things are destroyed by the creation of new and better ways to get things done by ……..

Answer

Joseph Schumpeter

Question

In the ……. century, entrepreneurs were the 'Captains of Industry'

Answer

19th

Question

Many companies that are starteed by entrepreneurs go out of business few years after their establishment because of the following reasons EXCEPT ……

Answer

Accurate business acumen

Question

A person's belief in his or her capability to perform a task is known as ……

Answer

Self efficacy

Question

.....A French economist was credited with giving the concept of enftrepreneurship a central role in economics

---

Answer

Richard Cantillon

Question

..... Is not a type of work team?

Answer

Product team

Question

..... Advice to entrepreneur to stay in the area that you do best and find qualified people to handle the other tasks

---

Answer

Mary Kay Ash

Question

..... Suggested a methodology for analyzing change which he called 'Field force analysis'

Answer

Lewin

Question

..... Approach tries to explain the social factors that influence the decisions of entrepreneurs to become entrepreneurs

---

Answer

Sociology

Question

..... is not an advantage of self employment

ECO256

Question

The concept of Derivative is about ___

Answer

Rate of change

Question

\[When an identity matrix is multiply by itself severally, and the result remain the same, such a matrix is known as ___ matrix\]

Answer

Idempotent

Question

\[\int x^{n}dx =\frac{1}{n+1}x^{n+1} + C\] in the rules integration is called

Answer

power function rule

Question

If \[y=\left (-12x^{2} \right)\], differentiate it using one of the rules of Differentiation.

Answer

\[-24x\]

Question

Identify the generalized power function rule in differentiation if \[y=Mx^{n}\]

Answer

\[n(M)x^{n-1}\]

Question

If \[\frac{1}{7}x^{7}\] is \[x^{6}\] using differntiantion, \[\frac{1}{7}x^{7}\] is known as

---

Answer

primitive function

Question

What is the \[f\left (x \right)\] of \[100+\frac{1}{4}x\]

Answer

\[\frac{1}{4}\]

Question

\[In matrix operation, a matrix of 3by2 dimension is intterpreted as ___\]

Answer

3 rows, 2 columns

Question

Compute the integral function \[\int_{3}^{8}6x\]

Answer

165

Question

\[In order of matrix, where 'm' is equal to 'n', the matrix is considered ___ matrix\]

Answer

Inverse

Question

If the dependent variable is Y and the independent variable is x, find the derivative of the equation \[p=7q^{4}-3q^{3}\]

Answer

\[28q^{3}-9q^{2}\]

Question

Solve the derivative function \[x^{6}\], using the rule of integration

---

Answer

\[\frac{1}{7}x^{7} + C\]

Question

\[Crama's Rule in matrix operation, is used to solve n linear equation in n unknown\]

Answer

True

Question

Solve the function \[y=\frac{1}{^{x4}}\] using the rule of differentiation

---

Answer

\[\frac{-4}{^{x5}}\]

Question

Solve equation \[y=x^{4}-6x^{3}+4x^{2}-13\] when\[x=4\], and describe the state of the funtion.

Answer

Stationary

Question

Use constant rule of integration, evaluate\[\int1000dx\]

Answer

\[1000x + C\]

Question

Find the derivative of the equation $$y=\left (-12x^{2} \right)$$

Answer

$$-24x$$

Question

Determine the under the curve of the function$$\int_{0}^{20}\frac{1}{2}xdx$$

Answer

100

Question

Differentiate the $$Dx^{y}$$ of $$x^{\frac{2}{4}}$$

Answer

$$\frac{1}{2}x^{-\frac{1}{2}}$$

Question

$$\int x^{n}dx =\frac{1}{n+1}x^{n+1} + C$$ in the rules integration is called

---

Answer

power function rule

Question

The concept of Derivative is about ___

Answer

Rate of change

Question

\[When an identity matrix is multiply by itself severally, and the result remain the same, such a matrix is known as ___ matrix\]

Answer

Idempotent

Question

\[\int x^{n}dx =\frac{1}{n+1}x^{n+1} + C\] in the rules integration is called

---

Answer

power function rule

Question

If \[y=\left (-12x^{2} \right)\], differentiate it using one of the rules of Differentiation.

Answer

$-24x$

Question

Identify the generalized power function rule in differentiation if $y=Mx^{n}$

Answer

$n(M)x^{n-1}$

Question

If $\frac{1}{7}x^{7}$ is x^{6} using differntiantion, $\frac{1}{7}x^{7}$ is known as

Answer

primitive function

Question

What is the $f\left (x \right)$ of $100+\frac{1}{4}x$

Answer

$\frac{1}{4}$

Question

$In matrix operation, a matrix of 3by2 dimension is intterpreted as ___$

Answer

3 rows, 2 columns

Question

Compute the integral function \[\int_{3}^{8}6x\]

Answer

165

Question

\[In order of matrix, where 'm' is equal to 'n', the matrix is considered ___ matrix\]

Answer

Inverse

Question

If the dependent variable is Y and the independent variable is x, find the derivative of the equation \[p=7q^{4}-3q^{3}\]

Answer

\[28q^{3}-9q^{2}\]

Question

Solve the derivative function \[x^{6}\], using the rule of integration

---

Answer

\[\frac{1}{7}x^{7} + C\]

Question

\[Crama's Rule in matrix operation, is used to solve n linear equation in n unknown\]

Answer

True

Question

Solve the function \[y=\frac{1}{^{x4}}\] using the rule of differentiation

---

Answer

\[\frac{-4}{^{x5}}\]

Question

Solve equation \[y=x^{4}-6x^{3}+4x^{2}-13\] when\[x=4\], and describe the state of the funtion.

Answer

Stationary

Question

Use constant rule of integration, evaluate\[\int1000dx\]

Answer

\[1000x + C\]

Question

Find the derivative of the equation \[y=\left (-12x^{2} \right)\]

Answer

\[-24x\]

Question

Determine the under the curve of the function\[\int_{0}^{20}\frac{1}{2}xdx\]

Answer

100

Question

Differentiate the \[Dx^{y}\] of \[x^{\frac{2}{4}}\]

Answer

\[\frac{1}{2}x^{-\frac{1}{2}}\]

Question

\[\int x^{n}dx =\frac{1}{n+1}x^{n+1} + C\] in the rules integration is called

---

Answer

power function rule

Question

The concept of Derivative is about ___

Answer

Rate of change

Question

\[When an identity matrix is multiply by itself severally, and the result remain the same, such a matrix is known as ___ matrix\]

Answer

Idempotent

Question

\[\int x^{n}dx =\frac{1}{n+1}x^{n+1} + C\] in the rules integration is called

---

Answer

power function rule

Question

If $y=\left (-12x^{2} \right)$, differentiate it using one of the rules of Differentiation.

Answer

$-24x$

Question

Identify the generalized power function rule in differentiation if $y=Mx^{n}$

Answer

$n(M)x^{n-1}$

Question

If $\frac{1}{7}x^{7}$ is x^{6} using differntiantion, $\frac{1}{7}x^{7}$ is known as

---

Answer

primitive function

Question

What is the $f\left (x \right)$ of $100+\frac{1}{4}x$

Answer

\[\frac{1}{4}\]

Question

\[In matrix operation, a matrix of 3by2 dimension is intterpreted as ___\]

Answer

3 rows, 2 columns

Question

Compute the integral function \[\int_{3}^{8}6x\]

Answer

165

Question

\[In order of matrix, where 'm' is equal to 'n', the matrix is considered ___ matrix\]

Answer

Inverse

Question

If the dependent variable is Y and the independent variable is x, find the derivative of the equation \[p=7q^{4}-3q^{3}\]

Answer

\[28q^{3}-9q^{2}\]

Question

Solve the derivative function \[x^{6}\], using the rule of integration

Answer

\[\frac{1}{7}x^{7} + C\]

Question

\[Crama's Rule in matrix operation, is used to solve n linear equation in n unknown\]

Answer

True

Question

Solve the function \[y=\frac{1}{^{x4}}\] using the rule of differentiation

Answer

\[\frac{-4}{^{x5}}\]

Question

Solve equation $y=x^{4}-6x^{3}+4x^{2}-13$ when$x=4$, and describe the state of the funtion.

Answer

Stationary

Question

Use constant rule of integration, evaluate$\int1000dx$

Answer

$$1000x + C$$

Question

Find the derivative of the equation $y=\left (-12x^{2} \right)$

Answer

$$-24x$$

Question

Determine the under the curve of the function$\int_{0}^{20}\frac{1}{2}xdx$

Answer

100

Question

Differentiate the Dx^{y} of $x^{\frac{2}{4}}$

Answer

$\frac{1}{2}x^{-\frac{1}{2}}$

Question

$\int x^{n}dx =\frac{1}{n+1}x^{n+1} + C$ in the rules integration is called

---

Answer

power function rule

ECO254

Question

There are two types of errors in hypothesis testing, it is called ___ and type 2 errors.

Answer

type 1

Question

The hypothesis may be directional or _____

Answer

non-directional

Question

One of the uses of Statistics is to make a decisive _____

Answer

decision

Question

The ____ is a two-parameter family of continuous probability distributions

---

Answer

gamma distribution

Question

_____ is a continuous probability distribution

Answer

Cauchy

Question

The Cauchy distribution is named after _____

Answer

Augustin Cauchy

Question

____ is a type of probability distribution in which all outcomes are equally likely

---

Answer

uniform distribution

Question

A company short-lists 12 applicants for an interview out of which 4 are men. If there are only five vacant posts to be filled, find the probability that the list of successful applicant contains all women

---

Answer

None of the above

Question

A company short-lists 12 applicants for an interview out of which 4 are men. If there are only five vacant posts to be filled, find the probability that the list of successful applicant contains only 1 man

---

Answer

None of the above

Question

A company short-lists 12 applicants for an interview out of which 4 are men. If there are only five vacant posts to be filled, find the probability that the list of successful applicant contains at least 2 men

---

Answer

None of the above

Question

A company short-lists 12 applicants for an interview out of which 4 are men. If there are only five vacant posts to be filled, find the probability that the list of successful applicant contains 3 men

---

Answer

None of the above

Question

Three out of the 9 finalists in an African American beauty competition are Nigerians. If two winners are to be selected, find the probability that only one of them would be a Nigerian.

Answer

None of the above

Question

Three out of the 9 finalists in an African American beauty competition are Nigerians. If three winners are to be selected, find the probability that at least one of them would be a Nigerian.

Answer

None of the above

Question

A non-discrete random variable m is said to be absolutely continuous, and it can also be called ____ continuous

---

Answer

simply

Question

A continuous random variable is a random variable where the data can take infinitely ___ values

---

Answer

many

Question

The variance of a probability distribution can also be considered in a similar manner and provides a measure of the dispersion of the values of a random _____

Answer

variable

Question

Probabilities associated with individual values of x cannot be negative or greater than 1 since this has no ____

Answer

meaning

Question

A _____ probability distribution is a probability distribution that has a probability density function

---

Answer

continuous

Question

A ____ probability distribution shall be understood as a probability distribution characterized by a probability mass function

---

Answer

discrete

Question

In probability and statistics, a probability distribution assigns a probability to each measurable subset of the possible outcomes of a random experiment, survey, or procedure of statistical _____

Answer

inference

Question

There are two types of errors in hypothesis testing, it is called ___ and type 2 errors.

Answer

type 1

Question

The hypothesis may be directional or _____

Answer

non-directional

Question

One of the uses of Statistics is to make a decisive _____

Answer

decision

Question

The ____ is a two-parameter family of continuous probability distributions

---

Answer

gamma distribution

Question

_____ is a continuous probability distribution

Answer

Cauchy

Question

The Cauchy distribution is named after _____

Answer

Augustin Cauchy

Question

____ is a type of probability distribution in which all outcomes are equally likely

---

Answer

uniform distribution

Question

A company short-lists 12 applicants for an interview out of which 4 are men. If there are only five vacant posts to be filled, find the probability that the list of successful applicant contains all women

---

Answer

None of the above

Question

A company short-lists 12 applicants for an interview out of which 4 are men. If there are only five vacant posts to be filled, find the probability that the list of successful applicant contains only 1 man

---

Answer

None of the above

Question

A company short-lists 12 applicants for an interview out of which 4 are men. If there are only five vacant posts to be filled, find the probability that the list of successful applicant contains at least 2 men

---

Answer

None of the above

Question

A company short-lists 12 applicants for an interview out of which 4 are men. If there are only five vacant posts to be filled, find the probability that the list of successful applicant contains 3 men

---

Answer

None of the above

Question

Three out of the 9 finalists in an African American beauty competition are Nigerians. If two winners are to be selected, find the probability that only one of them would be a Nigerian.

Answer

None of the above

Question

Three out of the 9 finalists in an African American beauty competition are Nigerians. If three winners are to be selected, find the probability that at least one of them would be a Nigerian.

Answer

None of the above

Question

A non-discrete random variable m is said to be absolutely continuous, and it can also be called ____ continuous

---

Answer

simply

Question

A continuous random variable is a random variable where the data can take infinitely ___ values

---

Answer

many

Question

The variance of a probability distribution can also be considered in a similar manner and provides a measure of the dispersion of the values of a random _____

Answer

variable

Question

Probabilities associated with individual values of x cannot be negative or greater than 1 since this has no ____

Answer

meaning

Question

A _____ probability distribution is a probability distribution that has a probability density function

---

Answer

continuous

Question

A ____ probability distribution shall be understood as a probability distribution characterized by a probability mass function

Answer

discrete

Question

In probability and statistics, a probability distribution assigns a probability to each measurable subset of the possible outcomes of a random experiment, survey, or procedure of statistical _____

Answer

inference

Question

There are two types of errors in hypothesis testing, it is called ___ and type 2 errors.

Answer

type 1

Question

The hypothesis may be directional or _____

Answer

non-directional

Question

One of the uses of Statistics is to make a decisive _____

Answer

decision

Question

The ____ is a two-parameter family of continuous probability distributions

Answer

gamma distribution

Question

_____ is a continuous probability distribution

Answer

Cauchy

Question

The Cauchy distribution is named after _____

Answer

Augustin Cauchy

Question

____ is a type of probability distribution in which all outcomes are equally likely

---

Answer

uniform distribution

Question

A company short-lists 12 applicants for an interview out of which 4 are men. If there are only five vacant posts to be filled, find the probability that the list of successful applicant contains all women

---

Answer

None of the above

Question

A company short-lists 12 applicants for an interview out of which 4 are men. If there are only five vacant posts to be filled, find the probability that the list of successful applicant contains only 1 man

---

Answer

None of the above

Question

A company short-lists 12 applicants for an interview out of which 4 are men. If there are only five vacant posts to be filled, find the probability that the list of successful applicant contains at least 2 men

---

Answer

None of the above

Question

A company short-lists 12 applicants for an interview out of which 4 are men. If there are only five vacant posts to be filled, find the probability that the list of successful applicant contains 3 men

---

Answer

None of the above

Question

Three out of the 9 finalists in an African American beauty competition are Nigerians. If two winners are to be selected, find the probability that only one of them would be a Nigerian.

Answer

None of the above

Question

Three out of the 9 finalists in an African American beauty competition are Nigerians. If three winners are to be selected, find the probability that at least one of them would be a Nigerian.

Answer

None of the above

Question

A non-discrete random variable m is said to be absolutely continuous, and it can also be called ____ continuous

---

Answer

simply

Question

A continuous random variable is a random variable where the data can take infinitely ___ values

---

Answer

many

Question

The variance of a probability distribution can also be considered in a similar manner and provides a measure of the dispersion of the values of a random _____

Answer

variable

Question

Probabilities associated with individual values of x cannot be negative or greater than 1 since this has no ____

Answer

meaning

Question

A _____ probability distribution is a probability distribution that has a probability density function

---

Answer

continuous

Question

A ____ probability distribution shall be understood as a probability distribution characterized by a probability mass function

---

Answer

discrete

Question

In probability and statistics, a probability distribution assigns a probability to each measurable subset of the possible outcomes of a random experiment, survey, or procedure of statistical _____

Answer

inference

ECO232

Question

___ shows the levels of entire output corresponding to different amounts employed of a given short-run variable input

---

Answer

Total Product Curve

Question

Average Fixed Cost is ___

Answer

Fixed cost per unit of output produced in the short run

Question

If X and Y are complementary, Cross Elasticity is ___

Answer

Negative

Question

A frontier showing all possible combinations of utility for two consumers when the economy is efficient in both production and consumption is known as ___

Answer

Grand Utility Possibilities Frontier

Question

The partial derivative of output with respect to the quality of labour is referred to as ___

Answer

Marginal Product of Labour

Question

Q = f (K, L) is a example of ___ production function

Answer

Linear

Question

When elasticity is greater tha one, marginal revenue is ___

Answer

Positive

Question

Production functions involves the following concepts except ___

Answer

The marginal rate of technology

Question

Marginal Product is ___ when Total Product is maximum

Answer

Zero

Question

A statement relating how inputs can be combined to achieve various possible levels of output

---

Answer

Production Function

Question

When output are increased by increasing either capital or labour, ___ will slope downward to the right

---

Answer

Isoquants

Question

The path of tangencies between isoquants and isocosts is termed ___

Answer

Expansion Path

Question

___ is not held as a constant when a producer’s supply curve is determined

Answer

Price of the output

Question

At equilibrium, ___ do not change

Answer

Price

Question

The amount of a product a firm is willing and able to offer for sale at a particular price is referred to as ___

Answer

Quantity Supplied

Question

___ is not an example of a production function

Answer

Marginal Rate of Substitution

Question

The rate at which one input can be substituted for another, while output remains constant

---

Answer

Marginal Rate of Technical Substitution

Question

The combination and organization of inputs that transforms them into a different but useful output is termed ___

Answer

Production

Question

A drop in price will lead to a rise in total revenue when demand is ___

Answer

Elastic

Question

When quantity demanded is greater than quantity supplied at current price, we have ___

Answer

Excess Demand

Question

___ shows the levels of entire output corresponding to different amounts employed of a given short-run variable input

Answer

Total Product Curve

Question

Average Fixed Cost is ___

Answer

Fixed cost per unit of output produced in the short run

Question

If X and Y are complementary, Cross Elasticity is ___

Answer

Negative

Question

A frontier showing all possible combinations of utility for two consumers when the economy is efficient in both production and consumption is known as ___

Answer

Grand Utility Possibilities Frontier

Question

The partial derivative of output with respect to the quality of labour is referred to as ___

Answer

Marginal Product of Labour

Question

Q = f (K, L) is a example of ___ production function

Answer

Linear

Question

When elasticity is greater tha one, marginal revenue is ___

Answer

Positive

Question

Production functions involves the following concepts except ___

Answer

The marginal rate of technology

Question

Marginal Product is ___ when Total Product is maximum

Answer

Zero

Question

A statement relating how inputs can be combined to achieve various possible levels of output

---

Answer

Production Function

Question

When output are increased by increasing either capital or labour, ___ will slope downward to the right

---

Answer

Isoquants

Question

The path of tangencies between isoquants and isocosts is termed ___

Answer

Expansion Path

Question

___ is not held as a constant when a producer’s supply curve is determined

Answer

Price of the output

Question

At equilibrium, ___ do not change

Answer

Price

Question

The amount of a product a firm is willing and able to offer for sale at a particular price is referred to as ___

Answer

Quantity Supplied

Question

___ is not an example of a production function

Answer

Marginal Rate of Substitution

Question

The rate at which one input can be substituted for another, while output remains constant

---

Answer

Marginal Rate of Technical Substitution

Question

The combination and organization of inputs that transforms them into a different but useful output is termed ___

Answer

Production

Question

A drop in price will lead to a rise in total revenue when demand is ___

Answer

Elastic

Question

When quantity demanded is greater than quantity supplied at current price, we have ___

Answer

Excess Demand

Question

___ shows the levels of entire output corresponding to different amounts employed of a given short-run variable input

---

Answer

Total Product Curve

Question

Average Fixed Cost is ___

Answer

Fixed cost per unit of output produced in the short run

Question

If X and Y are complementary, Cross Elasticity is ___

Answer

Negative

Question

A frontier showing all possible combinations of utility for two consumers when the economy is efficient in both production and consumption is known as ___

Answer

Grand Utility Possibilities Frontier

Question

The partial derivative of output with respect to the quality of labour is referred to as ___

Answer

Marginal Product of Labour

Question

Q = f (K, L) is a example of ___ production function

Answer

Linear

Question

When elasticity is greater tha one, marginal revenue is ___

Answer

Positive

Question

Production functions involves the following concepts except ___

Answer

The marginal rate of technology

Question

Marginal Product is ___ when Total Product is maximum

Answer

Zero

Question

A statement relating how inputs can be combined to achieve various possible levels of output

Answer

Production Function

Question

When output are increased by increasing either capital or labour, ___ will slope downward to the right

---

Answer

Isoquants

Question

The path of tangencies between isoquants and isocosts is termed ___

Answer

Expansion Path

Question

___ is not held as a constant when a producer’s supply curve is determined

---

Answer

Price of the output

Question

At equilibrium, ___ do not change

Answer

Price

Question

The amount of a product a firm is willing and able to offer for sale at a particular price is referred to as ___

Answer

Quantity Supplied

Question

___ is not an example of a production function

Answer

Marginal Rate of Substitution

Question

The rate at which one input can be substituted for another, while output remains constant

---

Answer

Marginal Rate of Technical Substitution

Question

The combination and organization of inputs that transforms them into a different but useful output is termed ___

Answer

Production

Question

A drop in price will lead to a rise in total revenue when demand is ___

Answer

Elastic

Question

When quantity demanded is greater than quantity supplied at current price, we have ___

Answer

Excess Demand

ECO247

Question

One of the problems identified to be responsible for the erratic and non-satisfactory power supply to consumers is ___

Answer

Low level of water at hydro power stations

Question

The management structure of the New Partnership for Africa's Development (NEPAD) Agency revolves around ___key interlinked functions

Answer

Five

Question

Infrastructure comprises of ___ and economic dimensions

Answer

Social

Question

The Nigeria Dam Authority (NDA) was saddled with the responsibility of developing the hydroelectric potential of the River ___

Answer

Niger

Question

The Nigerian financial system consists of the ___ as the apex regulatory authority

Answer

Central Bank of Nigeria (CBN)

Question

The financial sector reform began with the establishment of a Second-tier Foreign Exchange Market (SFEM) in September ___

Answer

1986

Question

In the ___ National Development Plan, a massive allocation of N107.5 million was allocated to the development of the communication sector

Answer

Third

Question

The founding member countries of NEPAD includes South Africa, Nigeria, ___ Egypt and Senegal

Answer

Algeria

Question

The___ subsector of the economy consists of the means of sending and receiving messages, orders etc

Answer

Communication

Question

The___ are partly saddled with the responsibility for the provision of such infrastructural facilities as dams, wells and boreholes

---

Answer

River Basin and Rural Development Authority (RBDA)

Question

The history of road transportation in Nigeria dates back to ___ when Lord Lugard attempted the construction of a mule road in the Northern states of Nigeria

---

Answer

1904

Question

The New Partnership for Africa's Development (NEPAD) is the result of three parallel initiatives, the first being the___

Answer

Millennium Africa Recovery Plan (MAP)

Question

The road linking __ constructed in 1906 is recorded to be the first motorable road ever constructed in Nigeria

Answer

Ibadan and Oyo

Question

The acronym WAMU stands for ___

Answer

West African Monetary Union

Question

At the broadest level of abstraction, the service sector comprises the ___

Answer

Tertiary sector

Question

West African economies are deeply penetrated by those of USA, Japan, ___ Britain, and other ex-colonial powers, whose transactional corporations are moving in to exploit and extract in these economies

Answer

France

Question

From 1986 air fares were deregulated with the argument that fare increase was necessary because of the depreciation of the Naira following the introduction of the ___

Answer

Second-tier Foreign Exchange Market (SFEM)

Question

The committee of Governors of Central Bank of ECOWAS set up the ___ under the auspices of ECOWAS Secretariat

---

Answer

Study Group

Question

The primary education is the first level of the previously adopted of ___ system of education

---

Answer

6-3-3-4

Question

The decision for ECOWAS monetary integration was taken in 1983 during the ___ meeting of the Heads of State and Government

---

Answer

Conakry

Question

One of the problems identified to be responsible for the erratic and non-satisfactory power supply to consumers is ___

Answer

Low level of water at hydro power stations

Question

The management structure of the New Partnership for Africa's Development (NEPAD) Agency revolves around ___key interlinked functions

---

Answer

Five

Question

Infrastructure comprises of ___ and economic dimensions

Answer

Social

Question

The Nigeria Dam Authority (NDA) was saddled with the responsibility of developing the hydroelectric potential of the River ___

Answer

Niger

Question

The Nigerian financial system consists of the ___ as the apex regulatory authority

---

Answer

Central Bank of Nigeria (CBN)

Question

The financial sector reform began with the establishment of a Second-tier Foreign Exchange Market (SFEM) in September ___

Answer

1986

Question

In the ___ National Development Plan, a massive allocation of N107.5 million was allocated to the development of the communication sector

---

Answer

Third

Question

The founding member countries of NEPAD includes South Africa, Nigeria, ___ Egypt and Senegal

Answer

Algeria

Question

The___ subsector of the economy consists of the means of sending and receiving messages, orders etc

Answer

Communication

Question

The___ are partly saddled with the responsibility for the provision of such infrastructural facilities as dams, wells and boreholes

Answer

River Basin and Rural Development Authority (RBDA)

Question

The history of road transportation in Nigeria dates back to ___ when Lord Lugard attempted the construction of a mule road in the Northern states of Nigeria

Answer

1904

Question

The New Partnership for Africa's Development (NEPAD) is the result of three parallel initiatives, the first being the___

Answer

Millennium Africa Recovery Plan (MAP)

Question

The road linking __ constructed in 1906 is recorded to be the first motorable road ever constructed in Nigeria

---

Answer

Ibadan and Oyo

Question

The acronym WAMU stands for ___

Answer

West African Monetary Union

Question

At the broadest level of abstraction, the service sector comprises the ___

Answer

Tertiary sector

Question

West African economies are deeply penetrated by those of USA, Japan, ___ Britain, and other ex-colonial powers, whose transactional corporations are moving in to exploit and extract in these economies

---

Answer

France

Question

From 1986 air fares were deregulated with the argument that fare increase was necessary because of the depreciation of the Naira following the introduction of the ___

Answer

Second-tier Foreign Exchange Market (SFEM)

Question

The committee of Governors of Central Bank of ECOWAS set up the ___ under the auspices of ECOWAS Secretariat

---

Answer

Study Group

Question

The primary education is the first level of the previously adopted of ___ system of education

Answer

6-3-3-4

Question

The decision for ECOWAS monetary integration was taken in 1983 during the ___ meeting of the Heads of State and Government

Answer

Conakry

ECO255

Question

The natural log is a base _____ log

Answer

10

Question

If X = {3,9,14}, and Y = {1,2,3}, then X \ Y =

Answer

{9,14}

Question

A derivative of a function represents an infinitesimal change in the function with respect to _____ of its variable(s)

Answer

1

Question

The value of log25 = ___. Given that the log is in base 5

Answer

2

Question

In Linear programming, an objective function has two parts , these are the

---

Answer

primal and dual

Question

According to the cardinal theory, utility can be quantified in terms of the money a consumer is willing to pay for it, thus ___

Answer

MUx=Px

Question

In Linear programming, the level of production of a commodity can either be positive or _____

Answer

zero

Question

A point where quantity demanded is equals to quantity supplied is called ___

Answer

equilibrium point

Question

The difference between the chain rule and the product rule is that the chain rule deals with a function of a function, while the product rule deals with___

Answer

Two separate functions multiplied together

Question

The value of 27 with an exponent of 2/3 is _____

Answer

9

Question

Find the solution set of x - 10 > 12 from the replacement set {10, 15, 20, 25, 30}.

Answer

{ 25, 30}

Question

The members of a set in braces are also called

Answer

Elements of the set

Question

The notation x ≠ y means that x is

Answer

not equal to y

Question

If y > 0, then -y is ___

Answer

Greater than 0

Question

One of the following is not a rule of integration

Answer

Additive rule

Question

The two main types of calculus are

Answer

differential calculus and integral calculus

Question

The decimal number system makes use of digits from

Answer

zero to nine

Question

The solution to this problem ∫6dx is

Answer

6x + c

Question

Given a demand function P = 2Q+ 10 and a supply function P = 55- Q, what is the market equilibrium quantity ?

Answer

15

Question

The respective value of x and y in this problem: y- 3x =0 ; x+ y = 8 are

---

Answer

2 and 6 respectively

Question

The natural log is a base _____ log

Answer

10

Question

If X = {3,9,14}, and Y = {1,2,3}, then X \ Y =

Answer

{9,14}

Question

A derivative of a function represents an infinitesimal change in the function with respect to _____ of its variable(s)

Answer

1

Question

The value of log25 = ___. Given that the log is in base 5

Answer

2

Question

In Linear programming, an objective function has two parts , these are the

---

Answer

primal and dual

Question

According to the cardinal theory, utility can be quantified in terms of the money a consumer is willing to pay for it, thus ___

Answer

MUx=Px

Question

In Linear programming, the level of production of a commodity can either be positive or _____

Answer

zero

Question

A point where quantity demanded is equals to quantity supplied is called ___

Answer

equilibrium point

Question

The difference between the chain rule and the product rule is that the chain rule deals with a function of a function, while the product rule deals with___

Answer

Two separate functions multiplied together

Question

The value of 27 with an exponent of 2/3 is _____

Answer

9

Question

Find the solution set of x - 10 > 12 from the replacement set {10, 15, 20, 25, 30}.

Answer

{ 25, 30}

Question

The members of a set in braces are also called

Answer

Elements of the set

Question

The notation x ≠ y means that x is

Answer

not equal to y

Question

If y > 0, then -y is ___

Answer

Greater than 0

Question

One of the following is not a rule of integration

Answer

Additive rule

Question

The two main types of calculus are

Answer

differential calculus and integral calculus

Question

The decimal number system makes use of digits from

Answer

zero to nine

Question

The solution to this problem $\int 6dx$ is

Answer

6x + c

Question

Given a demand function P = 2Q+ 10 and a supply function P = 55- Q, what is the market equilibrium quantity ?

Answer

15

Question

The respective value of x and y in this problem: y- 3x =0 ; x+ y = 8 are

Answer

2 and 6 respectively

Question

The natural log is a base _____ log

Answer

10

Question

If X = {3,9,14}, and Y = {1,2,3}, then X \ Y =

Answer

{9,14}

Question

A derivative of a function represents an infinitesimal change in the function with respect to _____ of its variable(s)

Answer

1

Question

The value of log25 = ___. Given that the log is in base 5

Answer

2

Question

In Linear programming, an objective function has two parts , these are the

Answer

primal and dual

Question

According to the cardinal theory, utility can be quantified in terms of the money a consumer is willing to pay for it, thus ___

Answer

MUx=Px

Question

In Linear programming, the level of production of a commodity can either be positive or _____

Answer

zero

Question

A point where quantity demanded is equals to quantity supplied is called ___

Answer

equilibrium point

Question

The difference between the chain rule and the product rule is that the chain rule deals with a function of a function, while the product rule deals with___

Answer

Two separate functions multiplied together

Question

The value of 27 with an exponent of 2/3 is _____

Answer

9

Question

Find the solution set of x - 10 > 12 from the replacement set {10, 15, 20, 25, 30}.

Answer

{ 25, 30}

Question

The members of a set in braces are also called

Answer

Elements of the set

Question

The notation x ≠ y means that x is

Answer

not equal to y

Question

If y > 0, then -y is ___

Answer

Greater than 0

Question

One of the following is not a rule of integration

Answer

Additive rule

Question

The two main types of calculus are

Answer

differential calculus and integral calculus

Question

The decimal number system makes use of digits from

Answer

zero to nine

Question

The solution to this problem ∫6dx is

Answer

6x + c

Question

Given a demand function P = 2Q+ 10 and a supply function P = 55- Q, what is the market equilibrium quantity ?

Answer

15

Question

The respective value of x and y in this problem: y- 3x =0 ; x+ y = 8 are

---

Answer

2 and 6 respectively

ECO253

Question

If Total Sum of Squares (TSS) is 151.8096 and Between Sample Sum of Squares (BSSS) is 4.1048, calculate Within Sample (Error) Sum of Square (WSSS)

Answer

147.7044

Question

The square of a standard normal variable is called a Chi-square variate with _____ degree of freedom

Answer

1

Question

F-test is also known as _____

Answer

variance ratio test

Question

The sampling distribution of F-statistics does not involve any population parameters and depends only on the degrees of freedom _____.

Answer

n1 and n2

Question

F-statistic is the ratio of _____ chi-square variates divided by their respective degrees of freedom

---

Answer

two independent

Question

Prices of shares of a company on the different days in a month were found to be: 66, 65, 69,70, 69, 71, 70, 63, 64 and 68. What is the mean price of the price of the shares in the month?

Answer

67.5

Question

Ten cartons are taken at random from an automatic filling machine. The mean net weight of the 10 cartons is 11.8kg and standard deviation is 0.15kg. Does the sample mean differ significantly from the intended weight of 12kg, $\alpha=0.05$

Answer

yes

Question

The assumptions for Student’s test do not include _____

Answer

The population standard deviation ζ is known

Question

If the absolute value of the calculated t is greater than tabulated t, we say it is significant and the null hypothesis is _____

Answer

rejected

Question

Another name for f-test is _____

Answer

ANOVA

Question

Given a normal distribution with mean of 230 and standard deviation of 20, what is the probability that an observation from this population is Less than 220?

Answer

0.3085

Question

The probability of success (happening of an event) in any trial is _____ and is constant for each trial.

Answer

p

Question

The outcome of the random experiment (trial) results in the _____ classification of events.

Answer

dichotomous

Question

Find the probability of getting 5 in a single throw of a dice.

Answer

one -sixth

Question

In an experiment of a single toss of a coin, the coin might come up heads with probability P and tails with probability 1-P. The experiment is called fair if, _____

Answer

P=0.5

Question

The probability of any specific, infinitely long sequence of coin flips is exactly _____

Answer

zero

Question

The two possible values of each Xi are often called "success" and "failure"

Answer

"success and "failure"

Question

The component Bernoulli variables Xi are identical and _____

Answer

independent

Question

A Bernoulli process is also a _____ stochastic process

Answer

discrete- time

Question

A Bernoulli process is a finite or infinite sequence of _____ random variable

---

Answer

binary

Question

If Total Sum of Squares (TSS) is 151.8096 and Between Sample Sum of Squares (BSSS) is 4.1048, calculate Within Sample (Error) Sum of Square (WSSS)

Answer

147.7044

Question

The square of a standard normal variable is called a Chi-square variate with _____ degree of freedom

---

Answer

1

Question

F-test is also known as _____

Answer

variance ratio test

Question

The sampling distribution of F-statistics does not involve any population parameters and depends only on the degrees of freedom _____.

Answer

n1 and n2

Question

F-statistic is the ratio of _____ chi-square variates divided by their respective degrees of freedom

---

Answer

two independent

Question

Prices of shares of a company on the different days in a month were found to be: 66, 65, 69,70, 69, 71, 70, 63, 64 and 68. What is the mean price of the price of the shares in the month?

Answer

67.5

Question

Ten cartons are taken at random from an automatic filling machine. The mean net weight of the 10 cartons is 11.8kg and standard deviation is

0.15kg. Does the sample mean differ significantly from the intended weight of 12kg, α=0.05

Answer

yes

Question

The assumptions for Student’s test do not include _____

Answer

The population standard deviation ζ is known

Question

If the absolute value of the calculated t is greater than tabulated t, we say it is significant and the null hypothesis is _____

Answer

rejected

Question

Another name for f-test is _____

Answer

ANOVA

Question

Given a normal distribution with mean of 230 and standard deviation of 20, what is the probability that an observation from this population is Less than 220?

Answer

0.3085

Question

The probability of success (happening of an event) in any trial is _____ and is constant for each trial.

Answer

p

Question

The outcome of the random experiment (trial) results in the _____ classification of events.

Answer

dichotomous

Question

Find the probability of getting 5 in a single throw of a dice.

Answer

one -sixth

Question

In an experiment of a single toss of a coin, the coin might come up heads with probability P and tails with probability 1-P. The experiment is called fair if, _____

Answer

P=0.5

Question

The probability of any specific, infinitely long sequence of coin flips is exactly _____

Answer

zero

Question

The two possible values of each Xi are often called "success" and "failure"

Answer

"success and "failure"

Question

The component Bernoulli variables Xi are identical and _____

Answer

independent

Question

A Bernoulli process is also a _____ stochastic process

Answer

discrete- time

Question

A Bernoulli process is a finite or infinite sequence of _____ random variable

---

Answer

binary

ECO231

Question

Profit is maximised when -------

Answer

MR = MC

Question

The amount the firm receives for a typical unit is known as the -------

Answer

average revenue

Question

There are ----- basic types of market structures by traditional economic analysis

Answer

4

Question

The revealed preference theory makes ----- assumptions

Answer

2

Question

The slope of the budget line shows the ------- price of good X in terms of good Y

Answer

relative

Question

The budget line plays ----- important roles

Answer

2

Question

The budget constraint says that ---------- is equal to the sum of consumer expenditure

Answer

income

Question

When Adam Smith was referring to "value in use," he was actually referring to the concept of --------

Answer

total utility

Question

The --------- theory is used to explain the distinction between substitution and income effects of a price change.

Answer

indifference

Question

The slope of indifference curve is also known as --------

Answer

MRS

Question

Any two points on an indifference curve generate ------ level of utility

---

Answer

same

Question

Consumer behaviour can also be demonstrated using --------

Answer

indifference curves

Question

the difference between total utility derived from one level of consumption and total utility derived from another level of consumption is

---

Answer

marginal utility

Question

The total satisfaction obtained from all units of a particular commodity consumed over a period of time is ----------

---

Answer

total utility

Question

A consumer ------- utility if the utility received is greater than or equal to the naira spent

---

Answer

maximizes

Question

Convexity says that ---------- declines as consumption increases

---

Answer

marginal utility

Question

The consumer must be -------- in preference and rankings.

Answer

consistent

Question

The essential foundation of demand, therefore, is a pattern of how ------ behave in the market

---

Answer

consumers

Question

The consumer is considered to be a ------- person, who tries to spend his or her money to derive the maximum amount of satisfaction

---

Answer

rational

Question

A basic assumption of microeconomics is that because a consumer does not have an budget

---

Answer

unlimited

Question

Profit is maximised when -------

Answer

MR = MC

Question

The amount the firm receives for a typical unit is known as the -------

Answer

average revenue

Question

There are ----- basic types of market structures by traditional economic analysis

Answer

4

Question

The revealed preference theory makes ----- assumptions

Answer

2

Question

The slope of the budget line shows the ------- price of good X in terms of good Y

Answer

relative

Question

The budget line plays ----- important roles

Answer

2

Question

The budget constraint says that ---------- is equal to the sum of consumer expenditure

Answer

income

Question

When Adam Smith was referring to "value in use," he was actually referring to the concept of --------

Answer

total utility

Question

The --------- theory is used to explain the distinction between substitution and income effects of a price change.

Answer

indifference

Question

The slope of indifference curve is also known as --------

Answer

MRS

Question

Any two points on an indifference curve generate ------ level of utility

---

Answer

same

Question

Consumer behaviour can also be demonstrated using --------

Answer

indifference curves

Question

the difference between total utility derived from one level of consumption and total utility derived from another level of consumption is

---

Answer

marginal utility

Question

The total satisfaction obtained from all units of a particular commodity consumed over a period of time is ----------

---

Answer

total utility

Question

A consumer ------- utility if the utility received is greater than or equal to the naira spent

unlimited

CRS202

Question

Which of these religions started in Chinese as a combination of psychology and philosophy but evolved into a religious faith when it was adopted as a state religion ?

Answer

Taoism

Question

The religion of Taoism was founded in _____

Answer

604-531 BCE

Question

____ is the Religion that centered on the application of science to data provided by the religions of the world

---

Answer

Comparative of religion

Question

The Hindus call their religion__

Answer

Sanatana-Narna

Question

Which of these concepts of Hindu religion teaches the escape, liberation or emancipation ?

Answer

Morksha

Question

The founder of Buddhism is__

Answer

Mohammed

Question

Which of these is not a revealed religion?

Answer

Hinduism

Question

The religion that teaches that the Soul is eternal and shares the essence of all living things is __

Answer

Hinduism

Question

____ religion differ from Christianity on fundamental beliefs on heaven, hell and reincarnation

---

Answer

Hinduism

Question

Which of these schools of Taoism have a tradition of approaching the religion through scriptural study?

Answer

Shang qing

Question

Which of these religions started in Chinese as a combination of psychology and philosophy but evolved into a religious faith when it was adopted as a state religion ?

Answer

Taoism

Question

The religion of Taoism was founded in _____

Answer

604-531 BCE

Question

PCR276

Question

The most successful conflict management strategy is _____

Answer

Collaborating Style

Question

PCIA stands for _____

Answer

Peace and Conflict Impact Assessment

Question

Forcibly transferring children of the group to another group is a feautre of _____

Answer

genocide

Question

_____ is premised on the fact that social behaviours are driven by extraneous events.

Answer

reinforcement theory

Question

_____ is a set of interrelated propositions that organises and explains a set of observed phenomena.

Answer

A theory

Question

The challenges some persons experience in choosing a spouse is an example of_____

Answer

intra-personal group conflict

Question

_____ is not an external factor that affects perception.

Answer

personality

Question

A general conclusion from the analysis of a single personality trait is called _____

Answer

halo effect

Question

One of the factors that influence perception is _____ familiarity with the object of perception

---

Answer

familiarity with the object of perception

Question

Constructing an understanding of the social world from the data we get through our senses is known as _____

Answer

social perception

Question

A stereotyped positive imagery and favourable attitudes regarding the in-group is known as ____

Answer

ethnocentrism

Question

Conflict termination generally results in _____

Answer

zero-sum

Question

_____ claims that mental processes of people are prime determinants of social actions.

Answer

cognitive

Question

_____ is seen as the “architecture of conflict.

Answer

power

Question

_____ is not a barrier to social perception.

Answer

Error analysis

Question

Conflict between Hausa and Yoruba communities in Ijebu-Ode is called___

Answer

intergroup conflict

Question

One of the external factors that affect perception is _____

Answer

contrast

Question

Creation of meaning out of the perceived world is called _____

Answer

perceptual interpretation

Question

is an important factor that affects the way we perceive others.

Answer

mood

Question

_____ refers to the process by which impressions about other people’s traits and personalities are formed.

Answer

Perception

Question

The most successful conflict management strategy is _____

Answer

Collaborating Style

Question

PCIA stands for _____

Answer

Peace and Conflict Impact Assessment

Question

Forcibly transferring children of the group to another group is a feautre of _____

PCR271

Question

A legal means by which a nation may show its approval by way of retaliation for courteous act of another state is referred to as _____

Answer

Retorsion

Question

____ is the use and assistance of a neutral third party in conflict

Answer

Arbitration

Question

The atomic bombs were dropped in Hiroshima and _____ during the second world war

Answer

Nagasaki

Question

The assistance rendered by a neutral third party in helping the disputants to reach negotiated settlement is ___

Answer

Mediation

Question

_____ group as a community of people who have the conviction that they have a coomon identity and fate

Answer

Ethnic

Question

The sum total of human existence is _____

Answer

Culture

Question

_____ conflict is a natural, common experience present in all relationship and human activities

Answer

Social

Question

_____ is defined as that set of activities associated with any given position in an organisation

Answer

Role

Question

_____ needs are basic needs of an individual such as water, food , oxygen and sleep

Answer

Psychological

Question

The basic socio-psychological human needs include identity, security, participation and _____

Answer

Autonomy

Question

_____ is the proponent of Needs Theory

Answer

Maslow

Question

_____ conflict is one that is generated within the organisation

---

Answer

Endogenous

Question

_____ theory states that conflict is necessary for achieving an end in the society

---

Answer

Dahrendorf

Question

____ conflict exists between two or more individuals over an issue

Answer

Interpersonal

Question

____ as incompatible behaviour between parties

Answer

Conflict

Question

Conflict is derived from _____ word called confligere

Answer

Latin

Question

The causes of conflict are psychological needs, values and ____

Answer

Resources

Question

Inequality is _____ factor of conflict

Answer

structural

Question

The pluralist school emerged as a criticism to the political doctrine of _____

Answer

Soverignty

Question

_____ states that any change in the structure of the organisation causes a conflict and it destabilises the organisation

Answer

Structural Functional Theory

Question

A legal means by which a nation may show its approval by way of retaliation for courteous act of another state is referred to as _____

Answer

Retorsion

Question

____ is the use and assistance of a neutral third party in conflict

Answer

Arbitration

Question

The atomic bombs were dropped in Hiroshima and _____ during the second world war

Answer

Nagasaki

Question

The assistance rendered by a neutral third party in helping the disputants to reach negotiated settlement is ___

Answer

Mediation

Question

_____ group as a community of people who have the conviction that they have a coomon identity and fate

---

Answer

Ethnic

Question

The sum total of human existence is _____

Answer

Culture

Question

_____ conflict is a natural, common experience present in all relationship and human activities

---

Answer

Social

Question

_____ is defined as that set of activities associated with any given position in an organisation

---

Answer

Role

Question

_____ needs are basic needs of an individual such as water, food , oxygen and sleep

---

Answer

Psychological

Question

The basic socio-psychological human needs include identity, security, participation and _____

Answer

Autonomy

Question

_____ is the proponent of Needs Theory

Answer

Maslow

Question

_____ conflict is one that is generated within the organisation

---

Answer

Endogenous

Question

_____ theory states that conflict is necessary for achieving an end in the society

---

Answer

Dahrendorf

Question

____ conflict exists between two or more individuals over an issue

---

Answer

Interpersonal

Question

____ as incompatible behaviour between parties

Answer

Conflict

Question

Conflict is derived from _____ word called confligere

Answer

Latin

Question

The causes of conflict are psychological needs, values and ____

Answer

Resources

Question

Inequality is _____ factor of conflict

Answer

structural

Question

The pluralist school emerged as a criticism to the political doctrine of _____

Answer

Soverignty

Question

_____ states that any change in the structure of the organisation causes a conflict and it destabilises the organisation

Answer

Structural Functional Theory

Question

A legal means by which a nation may show its approval by way of retaliation for courteous act of another state is referred to as _____

Answer

Retorsion

Question

____ is the use and assistance of a neutral third party in conflict

---

Answer

Arbitration

Question

The atomic bombs were dropped in Hiroshima and _____ during the second world war

Question

_____ is the proponent of Needs Theory

Answer

Maslow

Question

_____ conflict is one that is generated within the organisation

---

Answer

Endogenous

Question

_____ theory states that conflict is necessary for achieving an end in the society

---

Answer

Dahrendorf

Question

____ conflict exists between two or more individuals over an issue

---

Answer

Interpersonal

Question

____ as incompatible behaviour between parties

Answer

Conflict

Question

Conflict is derived from _____ word called confligere

Answer

Latin

Question

The causes of conflict are psychological needs, values and ____

Answer

Resources

Question

Inequality is _____ factor of conflict

Answer

structural

Question

The pluralist school emerged as a criticism to the political doctrine of _____

Answer

Soverignty

Question

_____ states that any change in the structure of the organisation causes a conflict and it destabilises the organisation

---

Answer

Structural Functional Theory

PCR211

Question

Internal conflicts may be transformed to international conflicts, as was the case between India and Pakistan on the continuing controversy over the fate of _____

Answer

Kashmir

Question

The word ‘peace’ is derived from the Latin word _____

Answer

pax

Question

the United Nations (UN) was established in _____

Answer

1945

Question

_____ involves exclusive opposition to war or violence as a means of settling disputes or gaining political, social or cultural advantage

Answer

pacifism

Question

In the _____ century BC, Isocrates, a Greek orator developed a method of education that was designed to prepare students to be competent orators who could serve as government officials.

Answer

4th

Question

_____ argued that in an ideal educational system, each class should receive the specific kind of instruction that will prepare them for their various roles in society.

Answer

Plato

Question

Historians look to ancient _____ as the birthplace of Western formal education

---

Answer

Greece

Question

The earliest education in _____ stressed philosophy, poetry, and religion in accordance with the teachings of Confucius and other philosophers.

Answer

Asia

Question

In _____, priests taught the principles of the Veda, the sacred texts of Hinduism, as well as science, grammar, and philosophy

---

Answer

India

Question

In ancient _____, priests in temple schools taught not only religion but also the principles of writing, the sciences, mathematics, and architecture

---

Answer

Egypt

Question

_____ is a term that is commonly used to describe a society with many policies aimed toward achieving equality of opportunity and outcome.

Answer

Social justice

Question

For durable peace to exist there must be the internal harmony of _____

Answer

individual

Question

The key components of durable peace are security, justice, and _____.

Answer

freedom

Question

_____ peace is secured when States renounce the use of force as the only or most predominant strategy used in the pursuit of their divergent goals

---

Answer

Global

Question

Under chapter ____ of the UN charter, the Security Council may authorize member countries to take military action in response to international breaches of the peace.

Answer

7

Question

Unlike peacekeeping, peace _____ operations seek to repel international aggression, using military force if necessary.

Answer

enforcement

Question

_____ describes the process of decision-making and the process by which decisions are implemented (or not implemented)

Answer

Governance

Question

_____ is caused by certain barriers that prevent social justice such as prejudice, discrimination, classism, and sexism

---

Answer

Social injustice

Question

_____ is described in much of John Rawls' writing as a concept mostly used to describe the movement towards a socially just world

---

Answer

Social justice

Question

_____peace is necessary in order that people will enjoy their lives without molestation or obstruction.

Answer

Negative

Question

Internal conflicts may be transformed to international conflicts, as was the case between India and Pakistan on the continuing controversy over the fate of _____

Answer

Kashmir

Question

The word ‘peace’ is derived from the Latin word _____

Answer

pax

Question

the United Nations (UN) was established in _____

Answer

1945

Question

_____ involves exclusive opposition to war or violence as a means of settling disputes or gaining political, social or cultural advantage

Answer

Answer

Social justice

Question

_____peace is necessary in order that people will enjoy their lives without molestation or obstruction.

Answer

Negative

POL228

Question

Gabriel Almond developed a list of functional requisites and divided them into__ inputs and ___ output functions.

Answer

4 and 3

Question

Comparative politics uses ____to explain political facts.

Answer

Theory

Question

In comparative politics, which theory is generally used as method of modeling political interactions_____

Answer

Game theory

Question

Which of these scholars conceived a concept as 'a label that applies to a category of phenomena'_____

Answer

Sodaro

Question

An 'adventure of the human spirit' is linked to_____

Answer

Science

Question

Basically, there are__ broad paths on the road of political inquiry.

Answer

2

Question

The revolution in Russia, England and Japan was compared by_____

Answer

Barrington Mauvre

Question

The second Phase in the Development of Comparative Politics is ____-

Answer

Renaissance period

Question

The traditional approach in comparative politics most often appears as _____

Answer

monograph

Question

Which of these philosophers opnied that, "politics was the search for the good life"?____

Answer

Aristotle

Question

Which of these scholars conceived that "politics is a plausible response to the problem of governance"?_____

Answer

Aristotle

Question

Political Science is a social science discipline centred on____

Answer

human beings

Question

In the study of politics,_____occurs when a hypothesis is accepted .

Answer

a grand theory of politics is developed

Question

The ___constitute part of the exponents of legal sovereignty.

Answer

John Austin

Question

The force theory is a constituent of _____of components.

Answer

2

Question

The assertion that ‘power corrupts and absolute power corrupts absolutely' is linked to_____

Answer

Lord Action

Question

The method of rule of a tyrant and oligarch is __?

Answer

Coercion

Question

The common theme in all forms of government is _____

Answer

Power

Question

The solution proferred by Aristotle to the problem of order is_____

Answer

politics

Question

_____ of power is one of the features of local government

Answer

Decentralisation

Question

_____ is one of the internal sources of local government revenue

Answer

taxes

Question

local government remains the ____ tier of government

Answer

third

POL214

Question

The assertion that "the greatest happiness is one that involves a great number of people is the crux of ____proposition.

Answer

Jeremy Bentham

Question

The first institution dedicated to the study of politics, the Free School of Political Science, was founded in the year __?

Answer

1871

Question

To Eckstein (1972), formal legal inquiry involves _____phases.

Answer

2

Question

Aristotle’s ideal form of government is broadly equated with ____.

Answer

middle-class rule

Question

According to David Easton, inputs are generated from the ____.

Answer

Environment

Question

A ____ is a tentative statement that discusses the connection between two variables?

Answer

Hypothesis

Question

The subject matter of the normative approach principally is centred on____

Answer

State

Question

Which scholar noted six interrelated factors, which influenced the rise of the behavioural movement?

Answer

Robert Dahl

Question

One of the following was a key player in the addumbrating factors that necessitated the change in the character of world politics.____

Answer

David Easton

Question

Theory of Justice', a key work of political philosophy is associated to__?

Answer

John Rawls

Question

A key element of the empirical approach to the study of political institutions and processes is the _____

Answer

Comparative method

Question

The quality of empirical analysis depends on its _____and predictive force.

Answer

explanatory

Question

In the study of Politics, inferring generalisations from past occurrences is____

Answer

Induction

Question

Logical positivism is also known for _____ in the study of Political Science?

Answer

Extremism

Question

A Knowledge is said to be ____ when it is organied into an intelligible pattern?

Answer

systematic

Question

In public policy analysis, how many distinct stages exist_____?

Answer

5

Question

The empirical analysis of politics is divided into __ parts ?

Answer

2

Question

The crux of Maxism is____

Answer

class struggle

Question

Marx posits that every society is divided into _____

Answer

classes

Question

The class analysis approach in a political process presupposes ____

Answer

Marxism

Question

The assertion that "the greatest happiness is one that involves a great number of people is the crux of ____proposition.

Question

The class analysis approach in a political process presupposes ____

Answer

Marxism

POL212

Question

The measures of central tendencies that are frequently used in the distribution of arrays of scores are ____

Answer

Mean, Mode, and Median

Question

The Mode of: 3, 2, 2, 5, 1, 4, 3, 2, 1, 5 and 2 is ____

Answer

2

Question

In a grouped frequency distribution, the class with the highest frequency is called the ____

Answer

Modal Class

Question

Median coincides with ____ percentile

Answer

50th Percentiles

Question

The Median of: 3, 2, 2, 5, 1, 4, 3, 2, 1, 5 and 2 is ____

Answer

2

Question

The mean of this dataset; 4, 5, 5, 5, and 6 is _____

Answer

5

Question

In statistics, a cumulative frequency curve is also called _____ graph

Answer

Ogive

Question

Frequency Polygons are very useful if we want to ___ two distributions

Answer

Compare

Question

___ can be derived by adding lower and upper class limit and dividing by two (2)

Answer

Class mid-point

Question

____ is a set of classes that are used to define the raw data or size of the group chosen.

Answer

Class interval

Question

Before a pie chart is drown, each frequency is first converted to ___

Answer

Degrees

Question

The symbol U or E is often used to denote a _____

Answer

universal set

Question

Any set, which has only one element, is called a ____

Answer

Singleton

Question

In set, if every member of B is a also a member of A, then we could say B is a ____ of A

Answer

Subset

Question

A set whose numbers are countable is called___

Answer

Finite Set

Question

The two sources of data in a research are ___

Answer

Primary and Secondary Sources

Question

All the following are political-economic problems statistics helps us to solve except___

Answer

Constituency elimination

Question

___ said that statistics is the straw only which every other economist has to make the bricks.

Answer

Alfred Marshal

Question

A statistical hypothesis is a proposition about the relationship between___

Answer

A dependent and independent variables

Question

All the following are functions of statistics except ____

Answer

Elimination

Question

The measures of central tendencies that are frequently used in the distribution of arrays of scores are ____

Answer

Mean, Mode, and Median

Question

The Mode of: 3, 2, 2, 5, 1, 4, 3, 2, 1, 5 and 2 is ____

Answer

2

Question

In a grouped frequency distribution, the class with the highest frequency is called the ____

Answer

Modal Class

Question

Median coincides with ____ percentile

Answer

50th Percentiles

Question

The Median of: 3, 2, 2, 5, 1, 4, 3, 2, 1, 5 and 2 is ____

Answer

2

Question

The mean of this dataset; 4, 5, 5, 5, and 6 is _____

Answer

5

Question

In statistics, a cumulative frequency curve is also called _____ graph

---

Answer

Ogive

Question

Frequency Polygons are very useful if we want to ___ two distributions

---

Answer

Compare

Question

___ can be derived by adding lower and upper class limit and dividing by two (2)

Answer

Class mid-point

Question

____ is a set of classes that are used to define the raw data or size of the group chosen.

Answer

Class interval

Question

Before a pie chart is drown, each frequency is first converted to ___

Answer

Question

___ said that statistics is the straw only which every other economist has to make the bricks.

Answer

Alfred Marshal

Question

A statistical hypothesis is a proposition about the relationship between___

Answer

A dependent and independent variables

Question

All the following are functions of statistics except ____

Answer

Elimination

POL231

Question

_____is a method of analysis and a method of selecting the best course of action.

Answer

Game theory

Question

The System level of analysis looks at the international system as _____

Answer

Holistic

Question

In international relations, individual level of analysis focuses on the following except

---

Answer

Problem

Question

_____ is a set of rules, norms, and procedures around which the expectations of actors converge in a certain issue area

---

Answer

International regime

Question

_____remains the only normal means of conducting international relations and the opposite of war.

Answer

Diplomacy

Question

_____ is one of the major source of international law.

Answer

Custom

Question

_____ is about embracing the totality of the relations amongs peoples and groups in the world society.

Answer

International relation

Question

The following are prominent classical realists theorists except

---

Answer

Widrow Wilson

Question

_____ is a leading proponent of the scientific approach.

Answer

Morton Kaplan

Question

The scientific approach applies_____ and ignores the boundariesof orthodox disciplines.

Answer

Scientific methds

Question

There two dominant International political thought such as

Answer

Realism and Idealism

Question

According to_____ the traditional approach is the approach to theorising that derives from philosophy, history and law.

Answer

Hedley Bull

Question

The _____ approach is also known as traditional approach

Answer
