FORMULA FOR DIVISION

1. THE RELIGION STRATEGY- Use religion to gain their confidence, they are religiously immature, as historically, whenever we endorse their Gods it opens up an opportunity for exploitation, they tend not to think clearly under the influence of religion and have a natural inclination to care about other people more than themselves.
2. THE WHITEMAN INFORMATION STRATEGY-Overwhelm the blacks with insignificant and useless information. They are particularly attracted to conspiracy theories, be sure to mix accurate and inaccurate information together to keep their faith, don't be concerned about the threat this poses, as we are the ones in control, and thusly we can alter our tactics as necessary, the fact that they know our strategy means nothing because they have no idea of our tactics, which can be changed at any second notice.
3. CONFUSION STRATEGY- Be sure to provide assistance to the blacks while destroying the blacks. Every act of aggression on our part must be followed up by an act of compassion, this will confuse the victims, and will lead them to believe that there are actually different kinds of white people because they are suckers for humanitarian acts of grace, you can keep their faith and kill them at the same time.
4. THE INFILTRATION STRATEGY- You must always find a black person amongst their ranks that you can trust for critical information. You need not always entice them with money, sometimes petty jealousies and the opportunity for revenge is enough ammunition to secure a snitch. This tactic is very useful especially when your research reveals former lovers of their leading men who still harbor animosity towards their former lover. Many of their women will be willing to destroy these men without a need of payment. Your best ally may be the person he/she sleeps with.
5. MISTRUST STRATEGY- never underestimate the need for blacks to fight one another as a mean of discharging their anger. Black leaders often have the same rage and impatience as the blacks in the streets. We must use the same strategy we used to induce mass homicide to bring about the destruction of black militancy. J.E. Hoover used this strategy effectively for 50 years to keep a lid on black insurrection. Use their natural distrust for each other by instigating and highlighting differences, have your black agents start rumors, then sit back and watch them self-destruct. Not knowing who to trust the movement will be effectively stagnated.
6. THE GOD STRATEGY- Black people are hopeless, and like any hopeless people they have a tendency to rely on divine intervention to solve their problems. Thusly, we should encourage this weakness in them. In fact we can use this to our advantage by creating natural disasters which they will assume were created by GOD. This strategy was very effective with AIDS and hurricane Katrina. Furthermore, we should encourage the

proliferation of religious centers in their communities to spread the belief that God will solve their problems, religion will effectively keep masses away from the revolutionaries, because it gives them another avenue of hope instead of organization.

7. THE REVOLUTIONARY STRIKE STRATEGY-You must do well to find out what the blacks are planning then highjack their efforts as this will arouse the temperament of the masses, whom we need to remain sleeping. Simply jumpstart the revolution before they can get it started, and with the people not knowing that you are controlling the movement, they will think that it is the "people". with no identifiable leader you can manipulate the entire effort from your office. This worked very effectively with "wall street" and in Egypt and Libya.
8. MIS-LEADERSHIP STRATEGY- You must create leaders to replace those that threaten our agenda. You must be wise in your choice of replacements and should therefore ensure they embody 7 characteristics, 1. They must be charismatic. 2. They must be chiefly concerned with themselves and not their people. 3. They must have religious a backdrop which will keep their people spell bound and not interested in political progress. 4. They must be terrified of our power. 5. They must be easily controlled. 6. They must be greedy for money and attention, which mean they will be egotistical. And 7. They should have some type of relationship with their previous leader whom the people trusted to ensure followership, authenticity and trust on grassroots level since they respect money and college education, you can oftentimes use celebrities and scholars to advance your cause. As members of these groups they have too much to lose so you will never have to worry about betrayal.
9. SUCCESS STRATEGY- Whenever people are making progress they tend to relax in their struggle and settle for the illusion of progress, thusly, to prevent a unified front on the part of the oppressed we should give them meaningless victories, which will cause division in their ranks, as some will be content with the petty gains while others want to press onward but will not have the man power to do so. These petty political victories should be attributed to our handpicked leaders to keep confidence in them.
10. INVISIBLE POWER STATEGY- you must keep the true source of your power invisible. Constantly develop and use a host of middle men who serve to buffer you from the criticizing black masses, as long as they can't identify the "general of the army", it will be difficult to defeat it. If necessary, pay your functionaries to assume blame for faults of the system, staying invisible ensures that you will stay alive.
11. THE FINANCE STRATEGY- It has been our observation that capitalism has taken over the so called "black struggle". It appears that the fight for pan- African freedom has become another brand or commodity to be sold and exploited for our own ends. We have found that financing their leaders and community based organizations has been a most efficient means of controlling their entire community.
12. IDENTITY STRATEGY- All efforts should be made to give the "negro" the appearance of belonging to our empire. By constantly referring to them as citizens, and allowing them

to take part in the meaningless patriotic activities you can affectively use identity as a weapon. Every ten years we confuse their sense of identity by adding artificial identities into their communities. Including Hispanic, bi-racial and multiracial. Identity has been a most effective unity prevention weapon.

13. THE INTIMIDATION STRATEGY- The modern day black revolutionaries are not like of yesterday, they have much more to lose. Although is it our general practice not to overly show our strength and aggressions, at times, this can be to our benefit when you determine that through sheer military or political might you can "knock the heart out" of the leader or movement. Most black revolutionaries are materialistic. Threats of incarceration or unemployment are sufficient to bring an end to their revolutionary antics.
14. THE LEGAL STRATEGY- never allow yourself to get caught trying to justify your behavior. Always deflect your attention away from your actions and towards the policies on paper. Our strength lies in being able to conceal the contradictions between what we do and what we say we do. Keep language vague as this will always give you the opportunity to use the law to defend whatever you do. Most importantly it confuses the "Negros", and a confused negro is a ineffective negro.
15. THE DOUBLE ENEMY STRATEGY- It is important that we entice altercations between black organizations. By creating a war within the movement itself we stagnate progress, as the leaders have to fight on both fronts simultaneously. This is advantageous because it allows us to destroy both groups while remaining invisible. It also fatigues the leader and causes his/her followers to abandon the mission as most blacks are afraid of organized confrontation.
16. THE TRIBAL STRATEGY- A united black front is our greatest threat. Therefore, we must highlight the differences that exist amongst the differing groups to ensure that they never unify around a common agenda. Preexisting petty differences must be intensified whenever an effective coalition appears to be in the making. They do a good job of this themselves, but we must make sure that it stays this way.
17. THE CONTROL STRATEGY- Never give them a street victory that we don't control, they will do more of anything to perceive to be successful, we must dictate their options by refusing expression to those options which are most threatening to our aims, non-violent protesters that do not disrupt the economic order are most favorable to our purposes, as the negro economic power is very strong, we must never allow economics to become a centerpiece of their movement.
18. THE PAN AFRICAN STRATEGY- Operational unity of Africans on a global scale spells ruin for our grand design. We must fabricate divisions and disrupt operations on both sides of the Atlantic, we must create mistrust and cultural conflicts between natural allies to prevent the taking back of Africa. Whoever rules Africa rules the world.
