Worksheet 1

Subject: **Chemistry**

Page Range: **145 – 153**

I. Write true or false. Neatness counts.

- _____ 1) The rate of chemical reaction measures the decrease in concentration of a reactant.
- _____ 2) The rate of chemical reaction is directly proportional to the time taken by the reaction.
- _____ 3) An increase in temperature decreases the rate of reaction.
- _____ 4) A catalyst is a substance that changes the rate of chemical reaction without itself being consumed in the reaction.
- _____ 5) Lower activation energy for a reaction corresponds to the lower reaction rate.

II. Choose the correct answers. Neatness counts.

- _____ 1) How does activation energy cause a chemical reaction to occur?
- A) Breaking an original bond. C) Minimizing the number of collision.
- B) Hindering the reverse reaction. D) Forming a new bond.
- _____ 2) Which one of the following does not affect the rate of a reaction?
- A) Color change C) Concentration of reactant
- B) Temperature D) Surface area
- _____ 3) Which of the following is **not** correct regarding the rate of chemical reaction?
- A) A catalyst increases the rate of reaction by lowering activation energy.
- B) The rate of reaction between ions in general is fast.
- C) Every chemical reactions proceeds at the same rates or speed.
- D) Rate of reaction depends on the nature of reactant.
- _____ 4) The higher the surface area of the reactants:
- A) the slower is the rate of reaction.
- B) the faster is the rate of reaction.
- C) less collision between each small particle of reactant.
- D) the slower or faster is the rate of reaction.
- _____ 5) Which one of the following is the formula of rate of reaction?
- A) Change in time/change in concentration. C) Change in concentration x change in time.
- B) Change in concentration /change in time. D) 1/change in concentration x change in time.

III. Give short answers for the following questions. Neatness and spelling count.

- 1) Define activation energy.
- 2) Write the reason why rates of many chemical reactions decrease with time.
- 3) Write the factors affecting of rate of reactions
- a) _____ d) _____
- b) _____ e) _____
- c) _____
- 4) Write how catalysts increase the rate of reaction.
- 5) What happens when surface area of solid reactants increases?

The procession turns into the gateway. Again the ADJUTANT lingers behind. He waits. Enter the wounded rider from the doorway. To IRONSHIRTS of the Palace Guard have taken up positions by the gateway. ADJUTANT (to RIDER): The Governor does not wish to receive military news before dinner-especially it's depressing, as I assume. In the afternoon His Excellency will confer with prominent architects. They're coming to dinner too. And here they are! (Enter three gentlemen through the doorway.) Go to the kitchen and eat, my friend. (As the RIDER goes, the ADJUTANT greets the ARCHITECTS) Gentlemen, His Excellency expects you at dinner. He will devote all his time to you and your great new plans. Come!

ONE OF THE ARCHITECTS: We marvel that His Excellency intends to build. There are disquieting rumours that the war in Persia has taken a turn for the worse.

ADJUTANT: All the more reason to build! There's nothing to those rumours anyway. Persia is a long way off, and the garrison here would let itself be hacked to bits for its Governor. (Noise from the palace. The shrill scream of a woman someone is shouting orders, Dumbfounded, the ADJUTANT moves toward the gateway. An IRONSHIRT steps out, points his lance at him) What's this? Put down that lance you dog.

ONE OF THE ARCHITECTS: It's the princes! Don't you know the princes met last night in the capital? And they're against the Grand Duke and his Governors? Gentlemen, we'd better make ourselves scarce. (They rush off. The ADJUTANT remains helplessly behind).

ADJUTANT (furiously to the Palace Guard): Down with those lances! Don't you see the Governors life is threatened?

The IORNSHIRTS of the palace guard refuse to obey. They stare coldly and indifferently at the ADJUTANT and follow the next events without interest.

I. CRITICAL READING:

Read the passage below and answer the questions thereafter. Neatness counts.

Summer Rain

The worst days of any summer are the rainy ones. We spend all year looking forward to nice weather and long, hot days. All of winter, with its dreary gray days and bitter cold, we dream of those endless days at the beach, laying on the sand and soaking in the bright and burning sun. And then, summer comes, and it rains. As a child, I would wake up to rainy summer days and come close to crying. It wasn't fair. We suffered through months of school and miserable weather for those scant ten weeks of freedom and balmy weather. Any day that I could not spend at the beach or playing ball with my friends seemed like a punishment for something I didn't even do. On those rainy summer days, I had nothing fun to do and could only sit inside, staring out at the rain like a Dickensian orphan. I was an only child, so there was no one else to play with. My father worked from home, so I was not truly alone, but he could not actively play with me since he was technically at work. It was those days that I would resign myself to whatever was on television or any books that I could find lying around. I'd crawl through the day and pray each night that the rain would not be there the next day. As an adult, though, my opinion of summer rain has changed. When you have to work every day, summer is not as eagerly anticipated. Mostly, the days run together, bleeding into each other so that they no longer seem like separate entities and instead feel like continuations of the same long day. Everything seems monotonous and dull, and an ennui or listlessness kicks in. Such a mindset makes you cheer for anything new or different. I spend the winter dreaming of summer and the summer dreaming of winter. When summer comes, I complain about how hot it is. And then I look forward to the rain, because the rain brings with it a cold front, which offers a reprieve—admittedly one that is all too short—from the torture of 100° and humid days. Rainy days are still the worst days of the summer, but summer rain today means positively beautiful—and considerably cooler—weather tomorrow.

Questions:

- _____ 1) The passage makes use of language that is _____.
