HTML Shortcuts

Quick reference

Use these keyboard shortcuts to navigate lessons and games, control the board, access tools, and customize the interface.

Category	Key / Icon	Action	Details
Navigation — Moves	←	Previous move	Go back one move.
Navigation — Moves	→	Next move	Advance one move.
Navigation — Moves	↑	Jump to start of game	Return to the first move.
Navigation — Moves	↓	Jump to end of game	Go to the final move.
Navigation — Lessons / Games	Page Up	Previous lesson / game	Open the previous lesson or game.
Navigation — Lessons / Games	Page Down	Next lesson / game	Open the next lesson or game.
Navigation — Lessons / Games	Home	Open first lesson / game	Go to the first available lesson or game.
Navigation — Lessons / Games	End	Open last lesson / game	Go to the last available lesson or game.
Board & Panels	F	Flip board	Reverse the board orientation.
Board & Panels	G	Expand graph / list panel	Expand the graph and list panel.
Board & Panels	C	Collapse graph / list panel	Collapse the graph and list panel.
Board & Panels	Escape	Close or collapse	Close the settings popup or collapse an expanded graph.
Tools	T	Toggle Trainer mode	Turn Trainer mode on or off.
Tools	A	Analysis on Lichess	Open the position in Lichess analysis.
Tools	S	Settings	Open the settings panel.
Tools	M	Create and download GIF	Generate and download an 8-second looping GIF.
Tools	K	Toggle Strategic Constellation	Enable or disable the live/generated Strategic Constellation.
Theme & Appearance	L	Light theme	Switch to the light theme.

Category	Key / Icon	Action	Details
Theme & Appearance	D	Dark theme	Switch to the dark theme.
Theme & Appearance	B	Cycle board themes	Switch between available board themes.
Theme & Appearance	P	Cycle piece sets	Switch between available chess-piece sets.
Theme & Appearance	R	Reset theme defaults	Restore the default theme settings.
Graph Zoom	+ or =	Zoom in	Zoom in on the sphere graph.
Graph Zoom	- or _	Zoom out	Zoom out on the sphere graph.
Graph / List Panel	?	Open help course	Open a mini help course containing 101 chess tips.
Graph / List Panel		Activate Strategic Constellation	Change the list and graph and structure the course around 12 thematic axes.
Graph / List Panel		Create looping GIF	Generate an 8-second looping GIF. Creation may take a while, so please be patient.
Graph / List Panel		Change graph and list views	Alter both views when using Constellation thematic analysis mode.
Mobile view iOS/Android	Node	One touch	Show tooltip
Mobile view iOS/Android	Node	Second touch	Open the game/lesson board

Preface vs Foreword

The book you have just opened is a collection of thoroughly annotated games. Some of them are far from being exemplary, but every one of them, without exception, is rather interesting and instructive. Their prehistory follows. Every day a great number of fascinating games is played all over the world; to examine them all is certainly impossible. If it is not a question of searching for material on an opening variation that is of interest or of getting acquainted with the creative work of future opponents, it makes sense for a coach to limit himself only to games and fragments that have already been analyzed by annotators whom he respects. This approach enables him to save a great amount of time. Giving a cursory glance to comments, he can often determine right away if there is any useful information for him there, be it a convincing illustration of some important ideas, or, on the contrary, an edifying exception from a general rule, or, perhaps, an unusual combination or a fragment that may serve as a successful training exercise. A given example is put to a severe test, as it pays to use high-quality material only. If a game under
