

innobiz-K Ethiopia

innobiz-k is an ICT-based business creation and SME support center that creates quality jobs in Ethiopia, it is being carried out by the Ministry of Innovation and Technology (MinT) and the Korean International Cooperation Agency(KOICA). The major goal of this project is to enhance the ICT-based startup and SME ecosystem by establishing a related platform and establishing and operating the innobiz-K Ethiopia.

In Tracon Tower, KOICA PMC has run an incubator program as part of the pilot program. Under this program, 34 ICT-based businesses were admitted in four batches and received a grant of 20,000 USD overall, seven weeks of training following admission, and six months of mentorship, coaching, unlimited internet access, and working space. The innobiz-k Ethiopia program has worked hard and has been successful in providing well-educated and experienced mentors and trainers to make sure entrepreneurs get the help they need where they need it.
