3 Ply Face Mask

Working together

There is only one way we can overcome this pandemic, and that is by working together, as a united nation, with one common goal. Which is why Hamisa is especially focusing resources on the production of certified 3-Ply face masks, working diligently together to ensure every worker, every citizen and every company has the best tools to safeguard themselves against COVID-19.

Made to protect against COVID-19

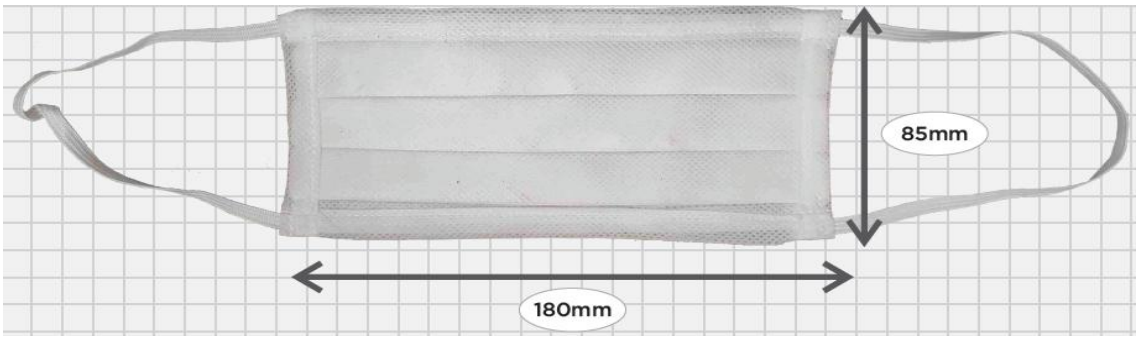

Our 3-Ply face mask is produced to the highest standards, expertly manufactured using tested and certified Polypropylene and Spunbond materials to ensure both comfort and protection.

5 Key Benefits

1. Protection against droplet particles that may be carrying COVID-19
2. Can be worn up to 6 times depending on personal preference and degree of contact.
3. Mask can be disinfected by gently washing in hot water and soap and applying a warm iron.
4. Covers essential facial areas to fully capture cough and sneeze particles
5. Scientifically tested to the ISO 8 standard and offers superior filtration and protection against germ carrying microns.

Good hygiene for better health

While a well-made mask may guard against COVID-19, it should always be used in conjunction with good hygiene principles to ensure maximum protection.

6. Wash hands regularly for at least 20 seconds with soap and water
7. Practice social distancing by always maintaining a 2 metre distance from others
8. Cough or sneeze into a tissue or the corner of your arm
9. If you have any signs of illness, stay at home or arrange for a medical assessment
10.
