EDITORIAL

Welcome to digital world, now be on your computer/phone E-Journal of Homoeopathy.
On 10th April 1994 we started Homoeopathy Community Journal with zero finance, even had a long journey of 21 years up to July 2015 with untiring efforts of Dr. Avtar Singh, Dr Neelam Avtar Singh, Dr Bhupinder Singh and me.
The journal was totally devoted to the theory of Our Master Dr. M.L. Sehgal, total articles, explanation of medicines, reporting of cured cases on Dr. M.L. Sehgal Sir's technique to prescribe on PPP.
Then we stopped printing it because then we started from 2015 on WhatsApp daily, we were publishing journal quarterly but on WhatsApp on daily study.
Then when number of Doctors exceeded to 256, we moved to Telegram and now there are more than 900 members, with daily study of one case, at that time we three Dr. A.S. Mann, Dr. Neelam Avtar Singh & Dr. Bhupinder Singh were writing articles, reporting cured cases, now we have about 60 mentors.
Now we are becoming more digital E-Journal from 1st Nov 2021 with sharing responsibility by Dr. Rashi Aggarwal, Dr. Ashok Awadhyia & Dr. Sanjay Mundepi; we are hopeful, high spirited to serve Homoeopathic World with new ideas.

ASRH

Extract of Belladonna from book Homoeopathy and Mind

Belladonna is considered as a short acting medicine or the medicine of first stage for cases of inflammation with heat, burning and redness. Dr. M.L. Sehgal told us that this medicine alone cures 30-35 percent cases. It cures not only acute but even chronic cases. Dr. Sehgal has not said anything wrong or has added nothing on his own. When 'Materia Medica Mind' was formed, we came to know that Belladonna has maximum number of mind rubrics i.e., 681 (which has now crossed the number one thousand). Everything is written in the Mind section of our repertory. We have observed in the last 10 years that a single dose of Belladonna works for months together and can cure diseases like Psoriasis.

Main rubrics:

1. Carried desire to be fast
2. Frivolous
3. Laughing speaking when
4. Smiling involuntarily
5. Hides things
6. Light desire for
7. Calculating inability for
8. Delusion poor he is
9. Feigning sick
10. Now well now sick (Added by Dr. Sehgal)
11. Attention seeking (Added by Dr. Sehgal)
12. Anger less or momentarily (Added by Dr. Sehgal)
13. Naïve
14. Credulous
15. Benevolence
16. Unreliable in promises
17. Delusion wealth of
18. Naked wants to be
19. Superstitious
20. Objective reasonable

Explanation of main rubrics:

1. Carried desires to be fast: This patient wants immediate relief. He says that homoeopathy works very slowly that's why he had never opted for it. He wants some medicine which would give him instant relief.

2. Frivolous: He is not serious about his illness i.e. "Lack of seriousness". In usual conditions, other patients are very much concerned about their illness, but this patient is careless. Even today he has come to you when he is compelled by some member of his family.

3. Superstitious: He has no logic for his thinking. He has no solid reason for coming to you. He says, "My friend has recovered, so I have come to you. If you can cure him, I will also be cured." He might even say, "If his friend's arthritis can be cured, why can't I be cured of chronic coryza." Or he would say, "Somebody told me that you are a good doctor and I thought, I will recover." So he trusts anyone without making any enquiries. Another rubric 'Objective reasonable' is also considered along with superstition.

4. Light desire for: Light does not mean the light of electricity. Here it means the desire to know about the illness. (To throw light on disease). The patient will say, "Dr. Sahib, what I am suffering from? Will I recover? Is there any need to go for some X-ray, ECG, ultrasound etc. which might help in diagnosis. But he never asks many questions and never goes deeper. He just wants to be aware of his illness.

5. Hides things, Hide desire to, Naked wants to be: He is not always secretive. He will try to hide his illness for some time. A patient of Belladonna cannot hide for long, he will soon tell. He will even show the diseased portion. There is a desire to escape from the direct confrontation with the illness.

6. Laughing speaking when, smiling involuntarily: You will observe that a patient of Belladonna laughs and smiles involuntarily while telling his symptoms. He will even answer your questions laughingly. Smile comes on his face automatically because he never takes things seriously. He is frivolous, he wants to hide something that's why he smiles. You will observe this during your case taking. Some of our friends say that this is a common thing. But Dr. Sehgal says that you have to catch the same common thing, you have to understand the ordinary symptoms (particularly in ladies), only then, when combined with other rubrics, this medicine covers 30-35 percent cases.

7. Naive: Trusts everyone without making any enquiries.

8. Credulous: Follows everyone, willing to believe easily.

9. Unreliable in promises: He never keeps his promises. You asked him to take a precaution and not to eat a particular thing, he would come and say that he did not take it, but then admits laughingly that he couldn't control.

10. Feigning sick, attention seeking: He magnifies illness out of proportion just to seek attention. "Whenever I see that my husband is back home, I start moaning. I just want that he should at least enquire about my health." He doesn't want much attention.

11. Objective reasonable: The patient gives a solid reason for coming to the doctor. If he perseveres or he stops taking medicine, he gives reasoning. He says, "I was cured of the same problem earlier, now it will also be cured." For every condition he has reasoning.

12. Benevolence: Kind and helpful.

13. Calculating inability for: The patient is not able to calculate the intensity of his problem. On asking since how long is he suffering from this problem, he replies, "Since 10-15 years or I don't know exactly." On asking about his age, he says, "about 35-40 years, you can write anything." He cannot calculate the duration or intensity of the things, perhaps because he is frivolous.

Few types of Belladonna patient:

1. "Doctor sahib, I have this problem. Somebody told me today or the last evening and I decided immediately to come to you. (Laughs) Give me some medicine which will cure me fast. People say that homeopathy acts very slowly that is why I never go for it. What is my disease? Is there any need to go for blood test, urine test, x-ray, ultrasound etc. My friend told me that you have cured him." (Laughs)

Rubrics from this paragraph:
I) Carried desire to be fast
II) Light desire for
III) Laughing speaking when
IV) Superstitious
V) Credulous

2. "Doctor sahib, this is my problem. Few days ago, my friend told me, but I am careless. (Laughs) He has been cured by you, so I think I will also get well. (Laughs) (Though his friend was suffering from some other illness). Today my wife compelled me to take medicine.

Or

"I was just passing through/I had come to the city, and I thought taking the medicine too. Will I be cured? Is there any need to go for some test for the diagnosis of the illness?"
Rubrics from this paragraph:
I) Frivolous

II) Laughing speaking when
III) Superstitious
IV) Naive
V) Frivolous
VI) Unconscious, interrupted by screaming (Unconscious means unaware, was not aware)
VII) Light desire for

You see that in the above two paragraphs, the patient has not given any mental symptom. They have conversed in the layman's language which we have converted into mind rubrics.

3. This patient seeks attention and starts moaning whenever the husband comes. She wants to magnify illness for just a little attention.

Rubrics:
I) Feigning sick
II) Attention seeking (Dr. Sehgal)
III) Light desire for
IV) Sensitive to light

4. He will try to hide his abnormal spots on the face or limbs. He thinks that he is special and doesn't want to spoil his impression. But he can't hide for long. He laughs and shows the spots.
I) Hides things
II) Delusion poor he is
III) Sensitive to light
IV) Pompous important
V) Naked wants to be
VI) Frivolous
VII) Laughing, speaking when

5. "I am tired of this illness, it’s better to die." And starts weeping.

Rubrics:
I) Death desires anguish from (only Belladonna)
II) Anguish, weeping, with (only Belladonna)
III) Suicidal pains with

Some Rubrics Explained by Dr. Neelam Avtar Singh

1) Carried desires to be, relief, yet it gives no relief

This rubric has two things:
One, carried desired to be
Two, yet it gives no relief.

Carried desires to be means patient has strong wish to carry him or take him from this diseased or distress state to normal state. He wants to be carried yet carrying gives no relief to him. Even carrying doesn't alleviate or remove his pain, distress, anxiety etc. He is taking medicine, but he is not getting relief. Yet he wants to be carried.

Only medicine: Chamomilla

2) Ambition increased, competitive

Ambition is increased means he is much ambitious. An ambitious person is the one who has strong desire and determination to succeed; a person who wishes to rise above his or her present position or condition.
Competitive means the measure of a person's desire to surpass others. A highly competitive person is more likely to see a situation as a competition.
According to this rubric the patient is highly ambitious, his ambition is increased, and he is competitive giving stiff battle to others. It is not necessary that he wins every time, but he gives tough competition to others in achieving his ambition.

Medicines 22

3) Depravity

Depravity is the state of being morally bad, or an action that is morally bad; Depravity is very dishonest or immoral behavior; the quality or state of being corrupt, evil, or perverted.

All these three medicines have depravity, low morals, immoral behavior, do corrupt and evil practices.

Medicines: Anac, Bufo and taren.

4) Impatience, runs about, never sits or sleeps at night

This rubric has 3-4 components:
Impatience is lack of patience, over-eagerness, inability to wait or expect with calmness and without discontent.
Runs about means running about, (bhaage firna)
Never sits means can't sit at all, (baithta nahi jata)
Or sleeps at night means raat ko neend bhi nahi aa rhi.
So, this patient is very impatient, he is so eager that he runs about, he can't sit, even he is not able to sleep.

Supporting rubrics
Anxiety driving from place to place
Restlessness must move constantly

Only medicine: Iodum

5) Delirium, maniacal, from love disappointed

Delirium is an acutely disturbed state of mind characterized by restlessness, illusions, and incoherence, occurring because of many disorders.
Maniacal is exhibiting extremely wild or violent behavior.
According to this rubric the patient is in delirium state. He is maniacal behaving like mad. The reason behind this behavior is disappointment in love. He is upset with his love. He becomes mad due to this situation.

Only medicine: Phosphorus

6) Reproaches others during pain

Reproaches means to express to (someone) one's disapproval of or disappointment in their actions.
According to this rubric this patient reproaches others whenever he is in pain. He blames others during pain. Because he cannot tolerate the pain. He gets much angry and irritable during pain so expresses disappointment in others actions.
We have seen him practically doing these actions.

Only medicine: Nux vomica

Other rubrics of Nux Vom:

Intolerance of ailments
Anxiety pains from
Despair pains with
Irritability pain during
Anger pains about
Lamenting pains from
Moaning pains from
Weeping pains with

7) Manipulative children

Manipulative is defined as any attempt to sway someone's emotions to get them to act or feel a certain way. Manipulators have common tricks they'll use to make you feel irrational and more likely to give in to their requests.
This rubric is specifically for children. Those children who can get anything from their parents or others by employing different manipulative ways. They use clever minds to fulfill their wishes. They can manipulate anyone.
Surprisingly both these medicines are totally opposite; one is extremely mild and yielding and another one is totally destructive. But both can easily blackmail their family members or others by saying that they don't love them.

Two medicines: Puls and Tuberculinum

Blackmail, 'you don't love 💔 me' when refused

8) Kicks

It's the forceful blow with the foot.

Kicks, child is cross, kicks n scolds on waking
The child becomes very aggressive on waking, he kicks with his foot and scolds.
jab bachcha so k uthta hai tb wo taange marta hai or gussa hota hai.

Medicines: Lyco and sanicula

I have seen excellent results with Lyco in many cases of children who starts kicking after getting up.

Another rubric:
Kicks, in worm affections
When patients have worms and has very aggressive behavior and kicks, think of this medicine too.
Only medicine: Carbo veg

9) Delusions, appreciated, that she is not

Delusion is a true belief of the patient, may be contrary to the facts.
Appreciated means to recognize one's full worth.
According to this rubric, patient has the felling that she is not appreciated. She feels that her worth is not being appreciated by others.
Patient ko lgta hai k Kisi ne bhi meri sarahna nahi ki, mere kuchh bhi krne par koi bhi meri taareef nahi krta, thankful bhi nahi hota.
Many times, this rubric has been used in practice and got good results.

Medicines: Arg nit, Aurum, Lap c b, Pall, Plat, Puls and Seq s

Another similar rubric
Lamenting, appreciated, because she is not
Lamenting is to express regret or disappointment about something
According to this rubric, patient laments because no one appreciated her. She shows the signs of grief and disappointment.

In first rubric, it is just the delusion or feeling or belief of the patient that she is not appreciated but in second she expresses her disappointment and shows her grief because she is not appreciated.

Only medicine: Calc Sulph

CASE – 1

By – Dr. Amarjit Singh Mann

A patient Mr. Ranjit Singh aged 35 years came to me for joint pains problem from 5 years, almost in all joints.

He told he had taken Allopathic, Ayurvedic, Homoeopathy already only better when taking medicine, telling with a smile on face.

Me: how you decided to take Homoeopathy from me now?

Patient: said laughingly, my friend told about you, he was cured of his chronic coryza

Me: when he told you?

Pt: he told me yesterday evening, said laughinglyMe:

had you taken Homoeopathy previously?

Pt: Not taken as I am having in mind that Homoeopathy works slowly, now my friend told now in Homoeopathy Also medicines are those cure fast

Pt: Any test if required Dr Saab to know about diseaseMe:

Yes, next time you come with test reports.

Pt: ok

PRESCRIPTION:

12.3.2015

.....30 given 1 dose, pl tds × 7 days.

19.3.15

much better and said laughingly I had not got test done, now what is the need, I am much better

PL tds, 7 days

27.3.15

Better, though fever and coryza for 3 days, only crocin taken one day for fever.

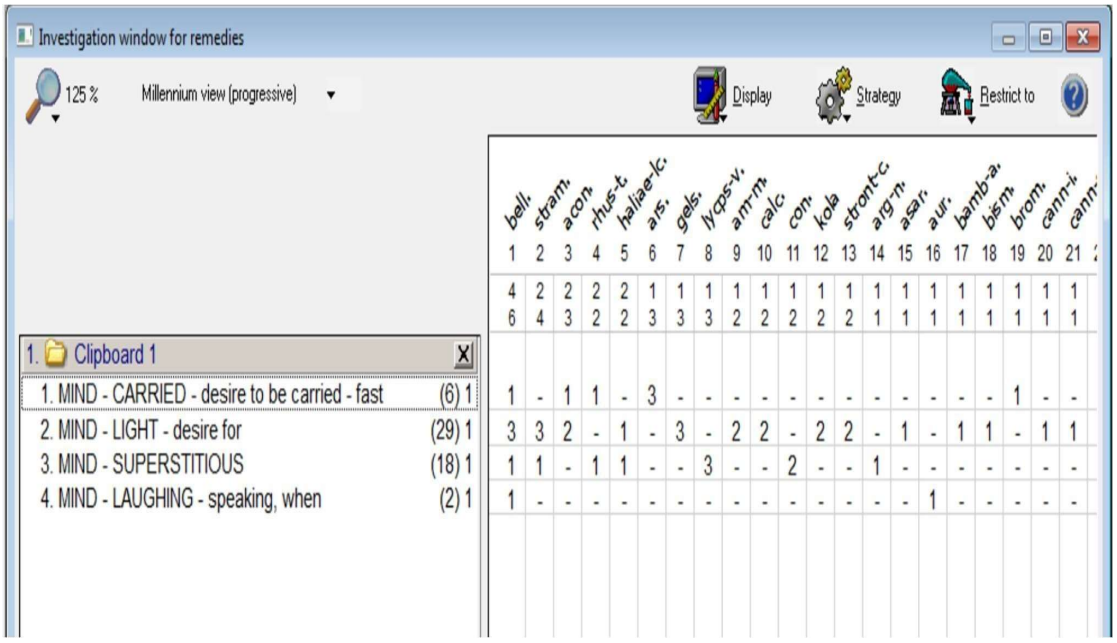

Then contd. on PL for 3 months, no need was of repetition, only kept on pl

Rubrics taken:

1. MIND – CARRIED - desire to be carried- fast
2. MIND - LIGHT - desire for
3. MIND - SUPERSTITIOUS
4. MIND – LAUGHING - speaking when

BELLADONA

CASE – 2

By – Dr. Amarjit Singh Mann

Mr. Gurjit Singh aged 50 years came to consult me for chronic skin disease from 3 years, already Allopathy medicine taken much, only relief when taking medicine.

Me: How you decided to take Homoeopathy today?

Pt: someone told me, said laughingly, he was cured from you, was suffering from some other disease.

Me: When he told you?

Pt: many days back, said laughingly

Me: why did you not came?

Pt: vaise hi, dhyan nahi dita.

Me: Why came today?

Pt: My wife insisted to take, I was saying it will be OK at its own, said laughingly.Pt:

Any test investigation if required?

Me: No, not required

Do you like company, how many friends you have

Pt: I like company, all in village are my friends

Prescription:

11.7.19

.....30/1 dose

CASE – 3

Evidence Based Case Study By – Dr. Bhupinder Singh

A Case of Diabetic Gangrene

When we talk about Dr Sehgal's technique first medicine comes to our mind is Belladonna, few Homoeopaths say Dr Sehgal means Belladonna. But if we give a thought that why doctor Sehgal chosen Belladonna only. Then we will realize that how great he was & what a great idea he has given to homoeopathy and to homoeopaths.

Actually, before Dr. Sehgal's research Belladonna was known as very acute and short acting remedy. Nobody prescribed Belladonna in chronic conditions & no one waited for its action for months. Every authors advised to give in repeated doses. Here I would like to cite two latest cases of my routine practice as an evidence to support my above said lines.

A 70-year-old female was brought to me with diabetic foot gangrene. One toe was already amputated. Her husband and son came in my chamber & anxiously told me that patient is unable to walk & she is sitting outside the hospital in car. I went there to see her.

She was sitting there very comfortably affected foot was bandaged. On observing, I found that no sign of anxiety was on her face. My first question to her was, what happened? She replied, nothing here is little wound on my foot. Dr advised for amputation. On asking, what do you feel? Laughingly she said, (bus theek ho jaai " or kya). Any fear? Again, with smile she told (bus thora mota) not much. I asked her, Mata one toe has been already amputated, Now Dr again telling for surgery do you know what does it mean? Again, her reply was very unexpected she said I don't know (pata nahi). Now three things were very clear in this case. First, she is least concerned. Second, laughing while telling her complaints. Third one, Naiveness. I questioned her very seriously, Laughingly, she replied (pata nahi). This is very childish reply. So, there was no other option other than Belladonna was there. I prescribed the same in 30 potency. After one week result was very encouraging. Pains were very less the wound started drying up. On next week after 15 days she came without bandage there was little pain & discoloration; Belladonna 200 potency was given means after 21 days. Now she is fit and fine. Belladonna 1 m potency was given after one and half months & advised to discontinue the treatment. 4 Rubics were taken into consideration!

1- Frivolous

2- Light Desire (Bus theek ho jaai)

3- Laughing Talking

4- Naive

Now tell me one thing when patient is demanding Belladonna in such chronic and damaging case then how can we deny; if anyone claims nothing is new in this technique then show such a surgical case cured with Belladonna before 1993 by any Homoeopath.

REDMI NOTE 9

REDMI NOTE 8
AI QUAD CAMERA

CASE – 4

By – Dr. Bhupinder Singh

A Case Of Post Herpes Zoster Pain

75 years old male came to my clinic with post herpes zoster pains in right side of chest and axilla. He told that around 6 months ago eruptions appeared & treated allopathically. Within 3 weeks eruption subsided but the severe pains are persisting. Took many medicines from various systems including Homoeopathy but no relief. On observing he was looking cool & calm, no anguishness was there. Now one of my relative advised your name, so I came here. His city is 50 km away from here.

On asking about his surroundings, he told he is living with his son & one grandson. On asking about his wife & daughter in law. He told his wife died 5 years before & daughter in law is living with her parents since many years, due to dispute between husband and wife. I asked then how you manage the house because there is no female in house. He told I manage all the household work & my son gets busy with his business and my grandson is studying. I asked him in this age how do you manage the things. He replied no other option is there, so I have to do it. We have one maid for cleaning the house & utensils. He was looking cool & calm and doing all responsibilities. So Cocculus 30 was given in different Potencies but no response. Then I decided to renew the case. Laughingly I asked him that how long you will manage household works. Very innocently he replied, I don't know (pata nahi). I asked What do you think about your pains? His reply was again in very innocent manner (bus theek ho jaai). I asked him why don't you have a maid for kitchen work. He told (itne paise nahi hain) I cannot afford. Now two medicines were in my mind, Belladonna and Phosphorus. But his innocent smile forced me to prescribe Belladonna. So, it was given in 30 potency. After 15 days he reported 50% relief. Later it was given in 200 potency & he was alright.

Rubrics were taken into consideration

1- Light Desire (Bus theek ho jaai)

2- Naive (Pata nahi)

3- Frivolous

4- Objective Reasonable (Itne paise nahi)

NOTE- If your questions are according to situation then it becomes very easy to reach the similimum.

CASE – 5
Evidence Based Case Study By – Dr. Karampreet Kaur

Case of a girl having node in neck from 15-20 days.

Version: "main puri trah se thik hu, koi dikat nahi bas ek yeh node hai, iss me kabhi kabhi dard hotta hai, drs ne SCAN & FNAC ke liye bola hai, me nahi gaye SCAN ke liye. kyu tension leni hai, jbb dard hotta hai tab thodi der ke liye tension hotti hai, medicine lu, jbb dard thik ho jatta hai fir main bhool hi jatti hu node ke bare mein, iss ki koi tension nahi, jbb koi baat karta hai, dekh leta hai ise tb tension hoti hai; fir bhul jati hu, maine google pe search kiya, us me likha hai TB ke kaaran bhi ho sakti hai"

CASE – 6
By – Dr. Pralhad G. Mahajan.
with difference between bell and hyos.

35 years old female brought to me by her husband. Having 7 years old daughter.C/O Snoring.

D/O Consultation 07.01.2019.

Presenting a small and simple case with very good results.

Doc. : Yes ?

Pt. : There is a snoring problem at night while sleeping (Laughing). Mere pati ne bataya ki ab bahut jyada jorse kharrate marati hai. Unhe nind nahi aati (Laughing).

Doc. : Kab se hai ?

Pt. : From last 2 years.

Doc. : Phir abtak kya kiya ?

Pt. : Kuchh nahi. Kyuki abtak itna jada nahi tha (Laughing).

Doc. : Aur kuchh ?

Pt. : No nothing. Baki kuchh bhi nahi.

Doc. : Menses regular hai ?

Pt. : Ha, regular hai. Lekin menses ke vakt dono pair bahut dukhate hai.

Doc. : Nind aati hai ?

Pt. : Ha, lekin bichme jab nind khulati hai to phir nind nahi aati.

Doc. : Kyu ?

Pt. : Manme vichar chalte rehate hai. (Laughing).

Doc. : Ap ka swabhav kaisa hai ?

Pt. : Mai bahut emotional hu. Chhoti si bat se bhi rona aata hai.

Doc. : Aur kuchh ?

Pt. : Ha, vajan kam karna hai uske liye bhi kuchh dijiye. (Laughing).

This is the case.

07.01.2019

wt. 68 kg.

Medicine given ABC 30 3 doses after every 15 mnts.

F/U:

1st F/U. 21.01.2019.

Fresh feeling. Kharrate thode kam. Vajan kam hona chahiye.

SL continue.

2nd F/U 03.02.2019.

Same vai sahi hai. ABC 200 single does.

3rd F/U 19.03.2019
Thode chakkar aate hai kabhi kabhi. Ab hath aur pair bilkulnahi dukhate. Snoring bahut kam.

4th F/U. 27.04 2019

No problem at all ! No snoring. No pains. Sab kuchh sahi hai.Vajan ab 65 kg.hai, Vajan kam hona chahiye. After that no further medication.

Medicine selected:- Belladonna.

1st prescription Bell. 3o 3 doses. And then repeated once Bell. 200 single dose.

Analysis.....

* She brought to me for snoring problem while sleeping.

RESPIRATION - SNORINNG Inspiration sleep in.

* She has no problem from snoring. She doesn't bother. Her hubby can't sleep properly due to her snoring, and he brought her to clinic.

MIND - CREDULOUS

* Having problem from 2 yrs. not taking any tt. In the state of wealth she is

FRIVOLOUS.

* No nothing, baki kuchh bhi nahi. Short of nothing.....

DELUSIONS wealth of.

* Menses ke vakt dono pair dukhte he.

EXTREMITIES PAIN leg menses

during

* manme vichar rehate hai to nind nahi aati.

SLEEP SLEEPLESSNESS activity of thoughts from.

* Chhoti si bat se bhi rona aata hai.

MIND - WEEPING trifles at.

* Wants enjoy life happily. No botheration, compromising. Vajan kam karna hai. wants to remain light weighted.

LIGHT desire for.

Complete picture of BELLADONNA.

Here already explained, now how to diff hyos n bell. Belladonna pt. is naive n credulous both present isliye wo apne galti se kabhe nhi sikhta hai wo galti karta rahega of dusaro ke jhanse me fasta rahega wo unke upar jadli shak nhi karega, bolega kisi ne kuch kaha to mere bhale ke liye he kaha hoga na ussme uska kya faida hoga or wo jaldi vishwas karta rahega this is belladonna, you cheat belladonna very easily and very frequent. Now Hyos also naive but uske age ek rubric add hua hai naive but intelligent means naive ke sath juda hua rubric hai naive but intelligent buddhu hai magar uske sath hosiyar bhi hai ye samne wale ko warning hai, usse buddhu samajne ke ap ek baar kosish kar sakte ho magar dhayan rakho wo apke pass ek ya do baar ayega 3rd time gayab ho jayega.

why ???

Here comes hyos rubric:

1) Dr ke dawa se mere or watt lag gye (wrong suffered)

2) Unke med se taklif phele se jada hone lage hai (Wrong suffered)

3) Dr paise bahot kharcha karwata hai aise alag alag report bolta hai aise to wo muje lut lega (Delusion sold being)

4) Lagta hai dr ko meri bimari nhi samaj aye hai aise me wo muje kahe dusari bimari ke dawa naa de de or mere lene ke dene pad jaye (Fear betrayed)

now in such condition hyos ek ya 2 baar me dr ko judge karne lagta hai dr sahe haiya galat.

CASE – 7
By – Dr. Ashok Awadhiya

कल मेरे एक दोस्त ने आकर बताया कि उनका पूरा परिवार पिता जी के कारन बहुत परेशान है, हर एक सदस्य बस उन पर केंद्रित हो कर रहा गया है।
मेरे पूछने पर उन्होंने बताया कि उन्हें एक बार सोडियम कम होने पर हॉस्पिटल में एडमिट किया तभी इलाज के दौरान सिर में हल्का सा ब्लड क्लोटिंग हुआ जिसके लिए दवाये दी गई फिर वो अच्छे हो गए फिर एक दिन गिरने के बाद कंधे में फ्रेक्चर हुआ जिसके इलाज के बाद उनके स्वाभाव में परिवर्तन आ गया है, अकेले होने पर परिवार के लोगों को आवाज दे दे कर तब तक बुलाते हैं जब तक कोई आ ना जाये।
लाख कहने पर भी खाना खाने को तैयार ही नहीं होते, साफ साफ़ मना कर देते हैं,
लेकिन
किसी आसपास वाले को बुलाओ, (तो उन्हें चाय नाश्ता देने को कहते ह, उनके जाने के समय बाहर तक छोड़ कर आने को कहते हैं) जब उन लोगों को खाने को बोलो तो उनके कहने पर ये खाने के लिए तैयार होते हैं।
बार बार कोई बात पूछो तो जोर से झिड़क देते हैं।
सारी रात परिवार के लोग इनके चिल्लाने से परेशान रहता है, कई दिनों से सबकी नींद पूरी नहीं हो पा रही है।

कभी नाती का नाम ले ले कर बुलाते हैं,कभी पत्नी,कभी बेटा या बेटी तो कभी मर चुके पुराने दोस्त याओं या रिश्तेदारों का नाम ले लेकर बुलाते हें।
मेरे पूछने पर रोगी ने बताया कि ना जाने ऐसा क्यों होता है।
वैसे मुझसे उन्होंने बहुत अच्छे से बात की, मेरे आग्रह करने पर चाय भी पी।

मेने ..... 200 के 15 pills दिए ।

आज सुबह मेरे दोस्त ने बताया कि रात सुकून से कटी। लेकिन 2 दिन के बाद फिर वही हाल, 15 दिन बाद फिर मेरा दोस्त फिर मेरे पास आया ,भाई पिता जी को बहुत खुजली हो रही है, खुजला खुजला कर के चमड़ी नोच डाली है उन्होंने, दोबारा आवाजें देना और चिल्लाना चालू कर दिया है उन्होंने,अब तो हमारी लाइफ बड़ी मुसीबत बन चुकी है, कुछ करो न आप ,मेने दोबारा केस लिया और .....30 दी अगले ही सुबह दोस्त ने बताया की इस रात खुजली नहीं

हुई, और वो अच्छे से सोये। 2 माह से अब तक सब ठीक चल रहा है।

PILES KI TAKLIF HAI; ABHI KAL SE HI BAD GAYI; ISKE PAHLEBACHAPAN ME HUWA THA; TAB ZAAD PALA KUCH LAGYA.

ABHI 2 - 3 DIN PAHLE TOILET NAHI HUI THI, HO NAHI RAHI THI; TOILET HUWA NAHI USKE BAD HI PROBLEM CHALU HO GAYA.

3 DIN PAHLE MASALE KA KHANAE ME AYA THA; ABHI BHI WAHA TAKLIF HOTHI HAI.

DR OPERATION BOLTE APKO KUCH TENSION.....

NAHI WAISA KUCH NAHI; BASS KUCH PROBEM NAHI; BLEED NAHI...PROLAPSE RAHTA HAI..... 2 MONTH HO GAYE PAR PROLAPSE KE LIYE KUCH NAHI LIYA..... KAI DIN PAHLE BHI TAKLIF HUWIE THI BUT AAJ JYDA HO RAHI IS LIYE AYA; 8 DIN MAINE BHI LOAD NAHI LIYA .....PAR AB TAKLIF H SIR ...

Follow-up:

08/05 2021

.....200×7days od(repeat if pain increase)

27/06/2021

90% relief.

Prolapse cover it;

I am also in shock..Within 19 days cover Piles +prolapse

.....200(sos)

19/06/21

Pain slightly.....After taking meat 1m

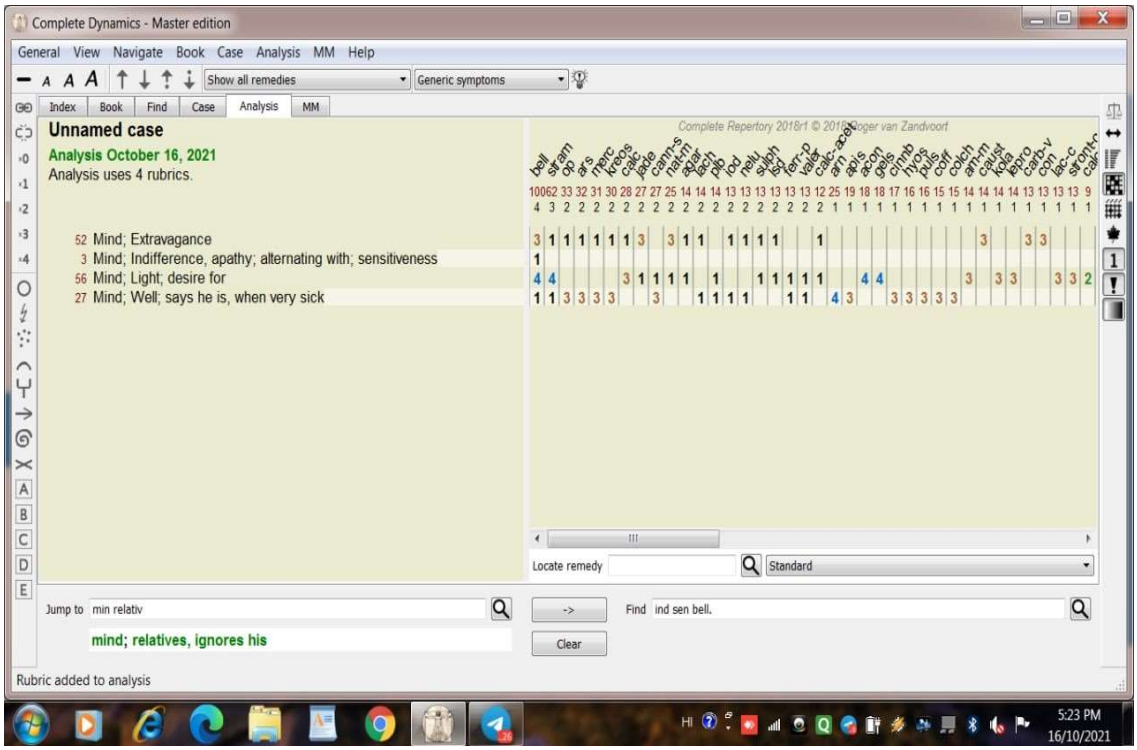

Now on sl....
Entry is frivolous ....

So came in mind opium so confirm by asking again again KAL TAKLIF THI TO KAL HI ANA THA..... SIR DEKHA HO JAYEGA

SENSITIVITY WRONG HERE OPIUM CANCEL
After again thinking- Well says sick.

Belladonna

1. Extravagance
2. Light desire for
3. Well says when very sick
4. Indifference alternating with sensitivity

CASE – 9
By – Dr. Ravi Yadav

This is case of female 36year suffering severe coughing, agg night and breathlessness since 1year, she have done all test, shown to many allopathy dr. in period of 1year, but no relief, one of my pt. told about me then she come with all test report normal dr. said you have allergic bronchitis. Pt. came on sunday in my dad clinic and I keep my clinic closed on sunday to give rest to my dad, that day I see my dad pt. only (dad is allopathy physician) Pt. come she is in very bad condition sweating on face , no glowness, no brightness, very sad face, I think she come to take allopathy medicine I examined her - wheezing is clearly audible and breathless present I said ok I will give to med (allopathy med) kal ake mere dad ko batao ap ..

Pt - Sir muje english med nhi chaheye muje apse med lena hai (homoeopathy med).
I said ohh, ok pls sit on chair and tell about your complaint ??

Pt - Sir muje 1year se khasi arhe hai bahot dr. kiya bade bade hospital me dekhaya sb test kiya par kuch aram nhe araha, raat raat bhar mai khaste rahte hu, so nhi pate, baithe rahte hn, letne pe or khasi badh jate hai .
Dr - ap raat ko sote nhi??

Pt - Nhi dr. shaheb khasi aye to koi kaise so payega nind ate hai, khasi ke wajas sona ho nhi pata muje apke bare mere relative ne bataya apne unka allergy thik kiya tha isliye mai apke pass aye hu.
Dr - Acha or kya hota hai ??

Pt - Sir ye taklif hai 1 saal se mai bahot paresan hogye hn ye khasi jate he nhe hai , report me kuch nhe ata hai isliye maine socha ab allopathy med nhi khayunge ab homeopathy karunge.
Dr - Ek saal se aap paresan ho khasi se to kya sochte iss taklif bare me ???
Pt - Pt start weeping (for 1-2 min) then after few min she sir kya batao apko mai bahot thak gye hn isse khaste khaste raat bhar sote nhe hn subha uth ke kam karna padta hai mere husband bhe bahot paresan rahte hai kabhe kabhe to mai unke liye khana bhe nhe bana pate hn again weeping start .

Dr - Or ??

Pt - Kabhi kabhi to lagta hai isse acha to mai maar jau, jaan choot jaye ye khasi saal se

chaalo hai ...
Dr - I said ap rona band karo ap thik ho jaoge muje ek week me batao (since one month she is taking one homeopathy med combination, I stop that med) given single dose 30 potency

1) Anguish weeping with
2) Death desire anguish pain
3) Delirium sad
4) Delusion persecuted she is

Medicine:- Belladonna 30 given

CASE – 10
By – Dr. Manik Mahadik

presenting case of herpes

FEMALE PT 32 YRS OLD HOUSEWIFE HEAVING ONE SON OF 5 YRS.

10 DAYS BACK HUSBAND CAME FOR HER RX I PRESCRIBED BUT ONLY 50% RELEIF SO I ASKED PT TO VISIT CLINIC

DR: BOLO

PT: THERE IS ITCHING MORE IN AFTERNOON

DR: ANY RELEIF BY MY MED

PT: YES THERE IS RELEIF BUT ONE DAY ITS BETTER OTHER DAY NOT BETTER SOMETIMES FEVERISH ALSO IRRITABILITY IS ALSO THERE.

DR: IT IS COZ OF ANGER, WHAT IS THAT IT MAKES U ANGRY

PT: LAUGHED AND AVOIDED SPEAKING

I EXPLAINED THEM ABOUT PSYCODYNAMICS SO THAT I WILL HELP HER

THEN PT TOLD I HAVE TO RUN AFTER MY SON FOR HIS FEEDING AND ALL.

DR: IS THERE ANY ECONOMICAL OR OTHER STRESS; IN LAWS STRESS AND WHY U DIDNT COME FOR RX BEFORE WITH YOUR HUSBAND

PT: IT WAS PAINFUL

DR: OR U DONT LIKE TO VISIT DR

PT: NO NOT LIKE THAT; IT WAS UNBEARABLE, EVEN TOUCH OF CLOTHES ALSO PAINFUL

DR: TELL ME ABOUT URSELF. I AM TREATING YOU SINCE 10 DAYS BUT I AM NOT SATISFIED ABOUT THE RESULT SO PLEASE TELL ME MORE ABOUT YOU

HUSBAND: SHE WAKES UP EARLY IN THE MORNING 5.30AM; STARTS HER KITCHEN WORK AND MY TIFFIN

DR: YOU ARE 3 PEOPLE, WHY YOU WAKE EARLY. DO YOU WORK SLOWLY.

PT: NOT SLOW BUT IF MY SON WAKES I HAVE TO TAKE CARE OF HIM SO

DR: WHAT DO YOU DO WEN YOU ARE FREE DO YOU SLEEP

PT: NO IF I SLEEP I SUFFERS FROM HEADACHE

DR: THEN WHAT ABOUT NIGHT TIME SLEEP

PT: NO I SUFFERS HEADACHE ONLY IF SLEEPS IN D AFTERNOON

DR: HOW IS THAT

PT: MAY BE DUE TO ACIDITY

DR: WHO IS YOUR HEADACHE THAT WE HV TO FIND.

PT (LAUGHING) IF I SLEEPS FOR 5 TO 10 MIN NO HEADACHE BUT IF MORE THEN I SUFFERS HEADACHE

I ASKED HUSBAND ABOUT HER ANGER

HUSBAND TOLD SHE IS NOW A DAYS IRRITABLE

PT WAS LAUGHING WHILE HUSBAND WAS TELLING.

PT (LAUGHING): SOMETIMES I WEEPS

I ASKED HUSBAND WHENEVER SHE SUFFERS FROM ACUTE SICKNESS HOW SHE BEHAVES

HUSBAND: SHE SAYS WHY AM I SUFFERING AND HOW CAN I SUFFERS FROM THIS? AND SHE WANTS INSTANT RELEIF

DR: MEANS SHE TAKES RX PROPERLY

PT: YES I GOES TO DR

DR OUR QUESTINS ARE SLIGHTLY DIFFERENT

(OBSERVATION WHILE ANSWERING PT WAS LIKE WHY THESE QUESTIONS ARE ASKED)

Previous medicine was given

With the help of phone call and information by husband in which she told that even in pains she is making food for family as her in laws and parents told that in herpes we should avoid outside food.

She wakes early in the morning and finishes her work before her son wakes up.

I prescribed Ars 1m tds for 3 days. Then water dose but no relief more than 60 %

So I asked husband to bring her clinic

Her attitude was like why these questions are asked; Even in such pain she didn't come

Frivolous

Then she takes simple disease that how can I suffer from this

illness, She thinks herself great; How can I suffer and wants fast

result

Carried desire to be; fast

Delusion great

Why I gave ars?

As her husband told about her house work that lead me to fastidiousness

So during this visit I confirmed

Why YOU wake early

She told I want my work done before my son gets up

She does like this because she don't want to repeat her work again

If son will get up he will mess up all the things and she has to do it once again

This is belladonna

Even repetition of work hampers belladonna’s freedom

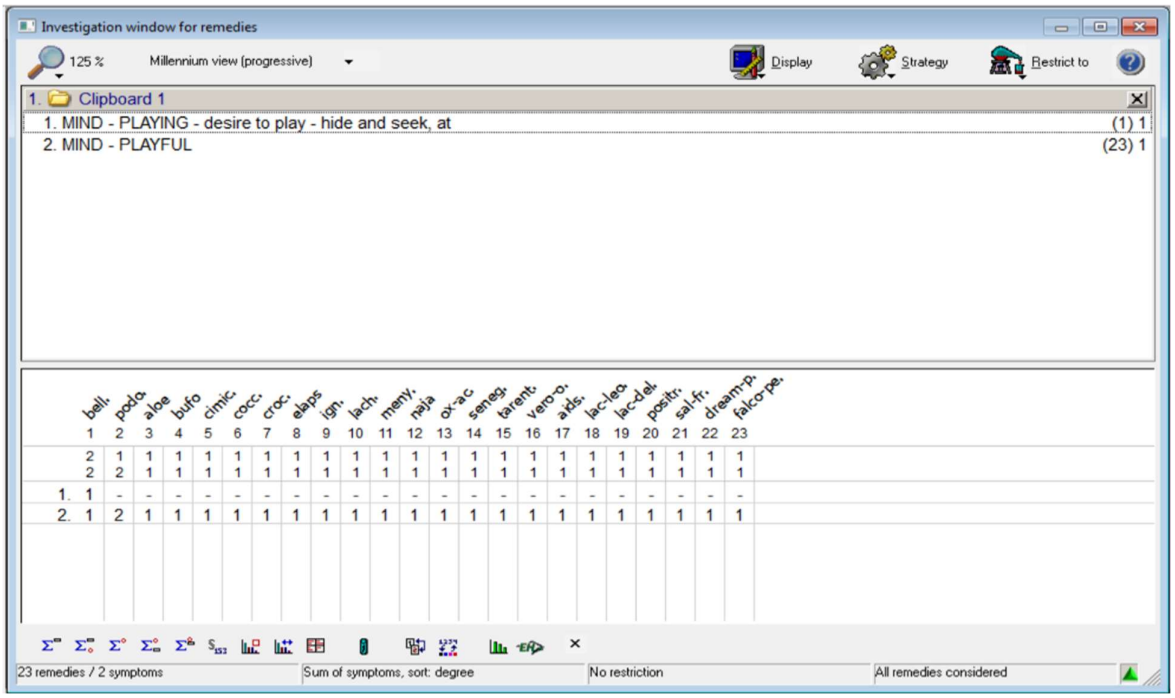

At the end of interview I asked to take dose of 1m and wait for 5 min
After 5 min only her comfort was seen while resting in chair.

CASE – 11
By – Dr. Vinayak V. Rupnawar

A child of 8-9 months was brought to me by his father for the treatment of scrotal hernia. He was constantly looking at my laptop and mobile phone. He started tapping on my table. He was engrossed in this activity and in between kept smiling at me. When I smiled back at him, he hid himself behind the laptop. This game continued. He was enjoying his tapping and playing hide and seek with me. He was attention seeking.

I took the following rubrics:

1. Playing – desire to play – hide and seek, at
2. Playful – amusement desire for

I gave him belladonna 1M.

His swelling gradually reduced and the advised urgent surgery was postponed.
