

IETP4115: Integrated Engineering Team Project

e-Portfolio

Semester 1, 2022/23

Learning Outcome

At the end of this lesson, the students will be able to:

- Create ePortfolio

Portfolio

- A portfolio is a compilation of academic work and other forms of educational evidence assembled for the purpose of
 - evaluating coursework quality, learning progress, and academic achievement;
 - determining whether students have met learning standards or other academic requirements for courses, grade-level promotion, and graduation;
 - helping students reflect on their academic goals and progress as learners; and
 - creating a lasting archive of academic work products, accomplishments, and other documentation.

ePortfolio

- An ePortfolio is a digital space that holds evidence of educational and/or professional achievements, as well as reflective writing about your experiences.
- A well-designed ePortfolio is useful to showcase your learning in a course or work placement, and it can also be used as employment documentation during job searches or promotion procedures.
- Portfolios may be presented—publicly or privately—to teachers and community members as part of a demonstration of learning, exhibition, or capstone project.

ePortfolio Preparation using google sites

- Google Sites Cheat Sheet
 - [Google Sites Cheat Sheet](#)
 - Description:
 - Diagrams and quick how-to's regarding creating a new Site, customizing your Site and homepage, adding new pages and navigation, adding content to pages, and sharing, previewing, or publishing your Site.
