Introduction

We've all seen the tarts in the papers who sleep with someone famous and make a good living for years afterwards presenting third rate television programmes and judging pie competitions at village fêtes. We all want a slice of that pie, too, but how far do we have to go to fast track our success?

The traditional route is to study hard, work hard, stay late at the office, and collect qualifications until there are more letters after

your name than there are in it. A Bachelor of Arts degree will take three or four years of studying, costing the equivalent of ten years' earnings (the actual cost of the course, accommodation, food, beer and drugs plus the amount of money you could have been earning during that time).

You then emerge with a crippling debt, a hangover like you've been hit on the head by a stalactite of frozen piss that's fallen from an aeroplane, and a vague idea of what your academic subject is all

about. You have a nagging feeling that your degree is actually irrelevant to any job you might be considering, but hope that you will join a company a couple of rungs up the ladder.

The alternative is to pole vault (or whatever other sexual position you prefer) over your competitors for the job of your dreams.

Arse-licking or hard work? It's your choice...
