INP's mission

Long-term project

Providing electricity to African countries is only part of the equation. Central to our strategy is playing an active role in driving the long-term prosperity of the local communities in which we operate. In every project we develop and operate, we aim to have a positive impact that lasts for generations.

Product Deployments

In addition to the electricity provided by the product itself and the job opportunities we create, each company member can establish his own team and deploy his own solar mine through online methods.

Team Manager

The company is looking for city partners to help outstanding leaders of some teams become regional managers in some regions in Ethiopia, enjoying a stable monthly salary and commissions for all INP members in the region.
