Introducing SOT-Uganda international.

The organization started as an independent non-profit indigenous church-based charitable organization, to try and stop the tide of Vulnerable/ orphaning in particular, and the spread of HIV/AIDS in general, these two factors having been the most frequent situations, the church members would turn up for counseling and pray about.

As the intended boundaries were found to be outstripped by demand, as the need for services was growing at a speed so terrific. SOT upgraded to a community based organization **(CBO),** on from a small church based organization.
The Organization aims and objectives were built upon the 4 most essential elements of human prosperity. **1. Feeding, 2. Education, 3. Health care, 4. Shelter.**

Mission

SOT- Uganda is a pro-life giving ministry whose mission and mandate is to uphold the sanctity of human life and endeavoring to meet the physical, spiritual and emotional needs to the HIV/AIDS, orphans, Youths and widows facing welfare problem.

We want to keep you updated with exactly where your generosity has gone.

1. Feeding.

Our goal is to provide a meal for the children each day.

The reality is that your ability to help a child or an orphan/abandoned child creates a future, a destiny and a difference between life and death. By your partnership with the Orphanage center, you are causing a future, hope and a destiny in the lives of the orphans and vulnerable children.

We offer basic necessities like maize flour, beans, salt, soap, paraffin, sugar, Condoms, Mosquito nets and Maama kits.

2. Education.

Without education orphans have no future. SOT-Uganda international realized that it was her duty to plug this gap in helping non-school going children access formal education through the provision of the stringent scholastic requirements necessary. SOT-uganda international does this by pursuing a double-pronged approach: Our dream is to establish our own primary school for Vulnerable/ orphans.

3. Health care.

We recognize that in order to successfully improve health in developing areas, programs must be comprehensive, targeting both the direct and indirect causes of poor health and nutrition.

We therefore integrate Mobile Clinic into our Health Care Outreach program, Where we walk down to the people, deep in the remotest of villages, teach the basics, treat and care for the victims without due discrimination

We encourage voluntary testing for all people to know their status. For those negative to begin living responsible lives to avoid the HIV infection and to encourage positive people to begin ARV medication and live a positive life.

4. Shelter.

God has laid it heavily on our heart to help this situation. SOT-Uganda International has established a children's home. The Children's home is open to the most vulnerable and marginalized children from Villages, slum areas and HIV/AIDS affected villages. Many of our children are orphans that have experienced extreme poverty.
Children are now housed in a rented cramped building which is in precarious situation. Further, this Home lacks all the basic facilities which hinders normal growth of the children. The

Proposed Home will have all basic facilities and all necessary services will be rendered without hassles. **See the photo below of the new Proposed Orphanage Home under construction.**

Lorin Hart, Dave Morrison and Alexia Salviaterra have been a huge part of this effort, to transform the lives of orphans that need a place to sleep, eat, gain access to health care and learn at school! All of these simple things, which every child deserves, can help build the foundations to help them get out of the poverty line and make a life for themselves in the future!

SOT-Uganda international also give care and support to Homeless families.

Problem statement: Deadly storm destroy homes affecting many families here in Uganda. It's made worse when the deadly storm destroy homes for widows, elderly and child headed families. Currently SOT-Uganda is trying to help Six (6) families, that where made homeless by the bad deadly storm.

Every day, more and more vulnerable families like widows, elderly and child headed especially in the rural areas find themselves in a struggle to keep a decent roof over their heads. There are vulnerable communities like child headed homes, the elderly need to be assisted to realize decent living.

This led us to start **Vulnerable Group housing program,** where we provide a home that comes with a ventilated pit latrine, shower stall and a 3,000 liter water harvest tank. So far ONE family have benefited from this program.

Before.

After.

Nabirye (a widow) and her children in their new home in Mayuge district. Nabirye says she want a sewing machine as her income generating project. Please pray.

This shall be the second family to benefit from our Vulnerable Group housing program**.**

Message to our donors and Well-wishers.

Thank you again to everyone has supported us. We still need your continuous donations to complete the Orphanage building. Buy Orphanage supplies, Buy ministry Van, Buy extension land for the Orphanage farm, and also build homes for Five (**5)** families. The Orphanage shall grow her own food to feed the Children, keep Cows and Chickens for the Children to have Eggs and milk on their deity. Some Eggs shall be sold to generate income to the Orphanage project. Our proposed budget is **104,000.00$,** we shall give a detailed budget if needed.
