LECTURE # 148

06th April, 2014

HOMOEOPATHIC PHILOSOPHY, MATERIA MEDICA & THERAPEUTICS

DR. ALI MUHAMMAD

HAHNEMANN'S ORGANON

APHORISM NO.73

As regards acute diseases, they are either of such a kind as attack human beings individually, the exciting cause being injurious influences to which they were particularly exposed. Excesses in food, or an insufficient supply of it, severe physical impression, chills, over heatings, dissipation, strains, etc., or physical irritations, mental emotions, and the like, are exciting causes of such acute febrile affections; in reality, however, they are generally only a transient explosion of latent psora, which spontaneously returns to its dormant state if the acute diseases were not of too violent a character and were

APHORISM NO.73

soon quelled. Or they are of such a kind as attack several persons at the same time, here and there (sporadically), by means of meteoric or telluric influences and injurious agents, the susceptibility for being morbidly affected by which is possessed by only a few persons at one time. Allied to these are those diseases in which many persons are attacked with very similar sufferings from the same cause (epidemically); these diseases generally become infectious (contagious) when they prevail among thickly congregated masses of human beings. Thence arise fevers, in each instance of a peculiar nature, and,

APHORISM NO.73

because the cases of disease have an identical origin, they set up in all those they affect an identical morbid process, which when left to itself terminates in a moderate period of time in death or recovery. The calamities of war, inundations and famine are not infrequently their exciting causes and producers - sometimes they are peculiar acute miasms which recur in the same manner (hence known by some traditional name), which either attack persons but once in a lifetime, as the smallpox, measles, whooping-cough, the ancient, smooth, bright red scarlet fever of Sydenham,

APHORISM NO.73

the mumps, etc., or such as recur frequently in pretty much the same manner, the plague of the Levant, the yellow fever of the sea-coast, the Asiatic cholera, etc.

افورزم ۷۳

جہاں تک حاد امراض کا تعلق ہے، ان کی نوعیت یا تو ایسی ہوتی ہے کہ ایک بیماری انسان پر اکیلے ہی اثر انداز ہوتی ہے جس کی وجہ جسم کا حادثاتی طور پر متاثر ہونا ہوتا ہے۔ کھانے میں زیادتی، خوراک کی کمی، شدید جسمانی چوٹ، سردی، شدید گرمی، جنسی حرکات میں زیادتی، اعصابی تناؤ، جسمانی تکالیف، ذہنی احساسات، وغیرہ حاد امراض کی وجہ بنتی ہیں۔ درحقیقت یہ سوئے ہوئے سورا کا عارضی طور پر جاگنا ہوتا ہے۔ اگر بیماری زیادہ شدید نہ ہو تو یہ (سورا) دوبارہ اپنی سوئی ہوئی حالت میں واپس چلا جاتا ہے۔

یا وہ ایسی ہوتی ہیں کہ ایک ہی دفعہ بہت سے لوگوں پر حملہ آور ہوتی ہیں، یہاں وہاں، (بے ترتیب طریقے سے)، بڑی تیزی سے اور زمینی یا فضائی اثرات اور نقصان دہ عناصر کے ساتھ۔ حساسیت بری طرح متاثر ہوتی ہے جو کہ ایک وقت میں بہت کم لوگوں میں پائی جاتی ہے۔

انہی کی طرح وہ بیماریاں بھی ہیں جن میں بہت سے لوگ ایک ساتھ بیماری سے حملہ آور ہوتے ہیں جن کی تکالیف اور بیماری کے اسباب ایک جیسے ہوتے ہیں (وبائی امراض)۔ یہ بیماریاں جب انسانوں کی گنجان آبادی میں جنم لیتی ہیں تو عام طور پر متعدی امراض (چھوت) کی شکل اختیار کر لیتی ہیں۔ پھر بخار پھیلتے ہیں، اور یہ ہر موقع پر ایک خاص نوعیت کے ہوتے ہیں کیونکہ انکی بنیاد ایک جیسی ہی ہوتی ہے۔ جن لوگوں کو یہ متاثر کرتی ہیں ان میں ایک یہ جیسی بیماریاں پیدا کرتی ہیں۔ اگر انہیں یوں ہی چھوڑ دیا جائے تو یہ ایک خاص وقت میں موت یا صحتیابی پر اختتام پذیر ہوتی ہیں۔

افورزم ۷۳

جنگی آفات، سیلاب اور قحط بہت کم ایسی بیماریوں کا سبب بنتے ہیں۔ کبھی کبھار یہ خاص حاد میازم ہوتے ہیں جو ایک ہی طریقے سے بار بار وقوع پذیر ہوتے ہیں (اسی لیئے انہیں کچھ روائیتی ناموں سے پکارا جاتا ہے) جو یا تو انسان پر زندگی میں ایک دفعہ اثر انداز ہوتے ہیں، جیسا کہ چیچک، خسرہ، کالی کھانسی، پرانا، چکنا، چمکتا ہوا سڈنہیم (Sydenham) کا سرخ بخار، کن پیڑے وغیرہ۔ یا وہ (بیماریاں) جو بار بار کم وبیش ایک ہی انداز میں رونما ہوتی ہیں، مثلاً لیوانت کا طاعون (plague of the Levant)، ساحلی پیلا بخار، ایشیائی ہیضہ، وغیرہ۔

X-Ray

LECTURE 148 – X-Ray

History

- German physicist Wilhelm Rontgen discovered X-Ray in 1895.
- He is also the one who gave them the name X-Ray.
- X-Ray is also called Rontgen's Rays.

LECTURE 148 – X-Ray

History

- He took first X-Ray of his wife's hand on December 22, 1895.

LECTURE 148 – X-Ray

Uses

- It is used for diagnostic purposes of imaging the bone structures and soft tissues.

LECTURE 148 – X-Ray

Adverse effects

- Children are more sensitive to radiation as it could badly affect their genitals. Parents with their children during X-Ray check-ups should wear X-Ray prevention clothes as a precaution.
- Pregnant mothers should avoid exposure to X-Ray as it causes 40% chances of developing tumors and leukemia.
- Thyroid glands are primary victims of X-Ray as its exposure also leads to cancer.

LECTURE 148 – X-Ray

Adverse effects

- Reports say when exposed to X-Rays, especially the lower abdomen region, a person is at risk of developing genetic damage that should turn hereditary.
- Multiple X-Rays cause bone tumors.

LECTURE 148 – X-Ray

Homoeopathic

- In March 1896, Dr. Walter M. James said why should not the homeopathists seek to procure a proving of the effects of the X-Ray upon the animals, economy of the human beings and inviting field is open upto the experimenters of our school.
- The proving on X-Ray was conducted by Fincke in 1897.

LECTURE 148 – X-Ray

Homoeopathic

- Allen writes that if Constantine Hering had never given the homeopathic profession anything but his admirable pathogenesis of Lachesis he would have been remembered in gratitude for all time by the homeopathic world.
- If Bernhardt Fincke had never given the homeopathic profession anything but his proving of the X-Ray, his name, too, would be held in grateful remembrance by posterity, for its possibilities in the cure of many of the most obstinate of chronic diseases appear almost limitless.

LECTURE 148 – X-Ray

Causation

- Low vitality both mental and physical.
- Miasms such as Psora, Syphilis, Sycosis, Tuberculosis.
- Anemia.
- Radiation.

LECTURE 148 – X-Ray

Constitution

- Psoric.
- Syphilitic.
- Sycotic.
- Tuberculosis.

LECTURE 148 – X-Ray

Mind

- Mental irritability.
- Mental process not clear.
- Writes wrong words in letters.
- Mental condition upset during profuse menstruation.
- Would like to kill somebody.
- Clearing up of mental function after sharp stabbing pain in left temple staggering him, the heart feeling the impulse immediately.

LECTURE 148 – X-Ray

Graphic Picture

- When well-selected psoric, sycotic, syphilitic and tuberculosis medicines Sulfur, Calcarea, Sepia, Tuberculinum, Medorrhoinum, Psorinum, Syphilinum fail to relieve or to rouse the overpowered vitality to a sufficient degree to throw off or bring to the surface the predominant toxine, the X-Ray bids fair to be curative remedy.

LECTURE 148 – X-Ray

Graphic Picture

- Skin cancer.

LECTURE 148 – X-Ray

Graphic Picture

- Bone cancer.

LECTURE 148 – X-Ray

Graphic Picture

- Many other cancers.

LECTURE 148 – X-Ray

Graphic Picture

- Sexual glands are particularly affected.

LECTURE 148 – X-Ray

Graphic Picture

- Undescended testes.

LECTURE 148 – X-Ray

Graphic Picture

- Atrophy of ovaries.

LECTURE 148 – X-Ray

Graphic Picture

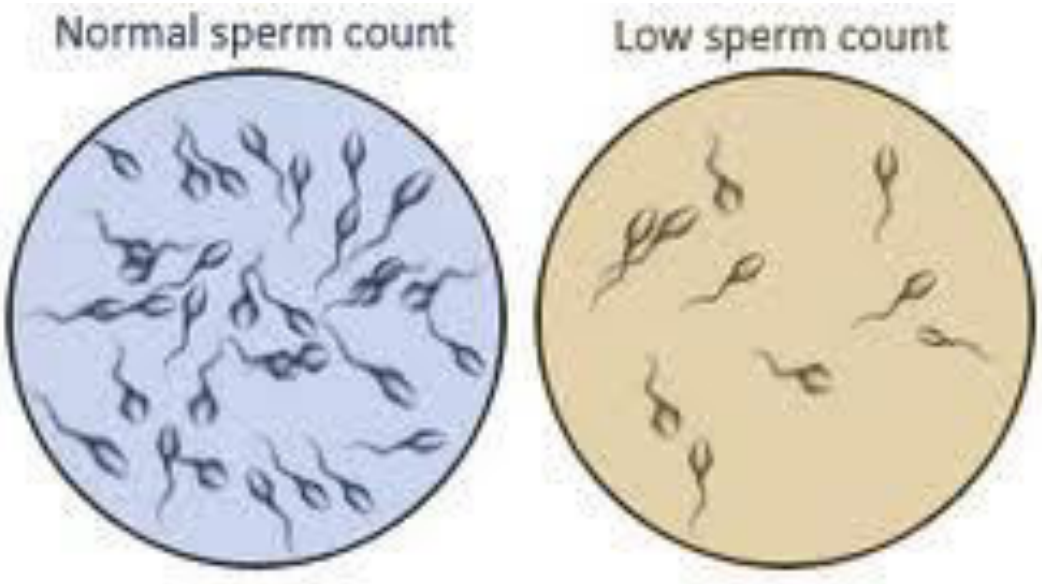

- Atrophy of testes.

LECTURE 148 – X-Ray

Graphic Picture

- Oligospermia.

LECTURE 148 – X-Ray

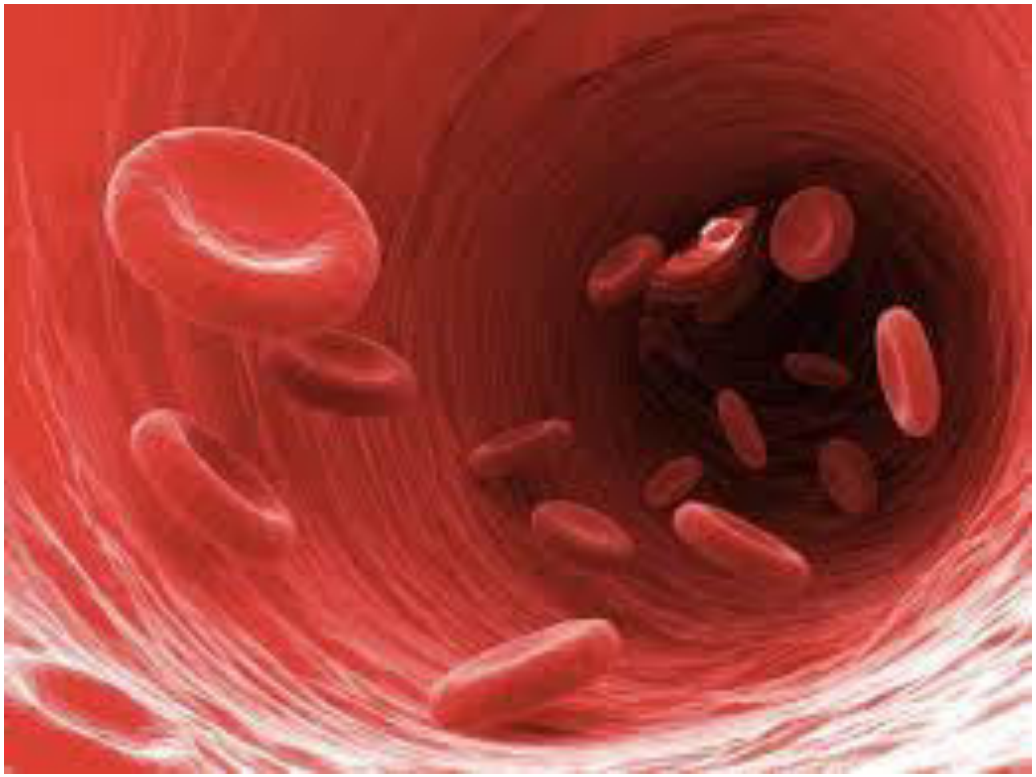

Graphic Picture

- Azoospermia

LECTURE 148 – X-Ray

Graphic Picture

- Changes take place in the blood.

LECTURE 148 – X-Ray

Graphic Picture

- Lymphocytes and bone marrow.

LECTURE 148 – X-Ray

Graphic Picture

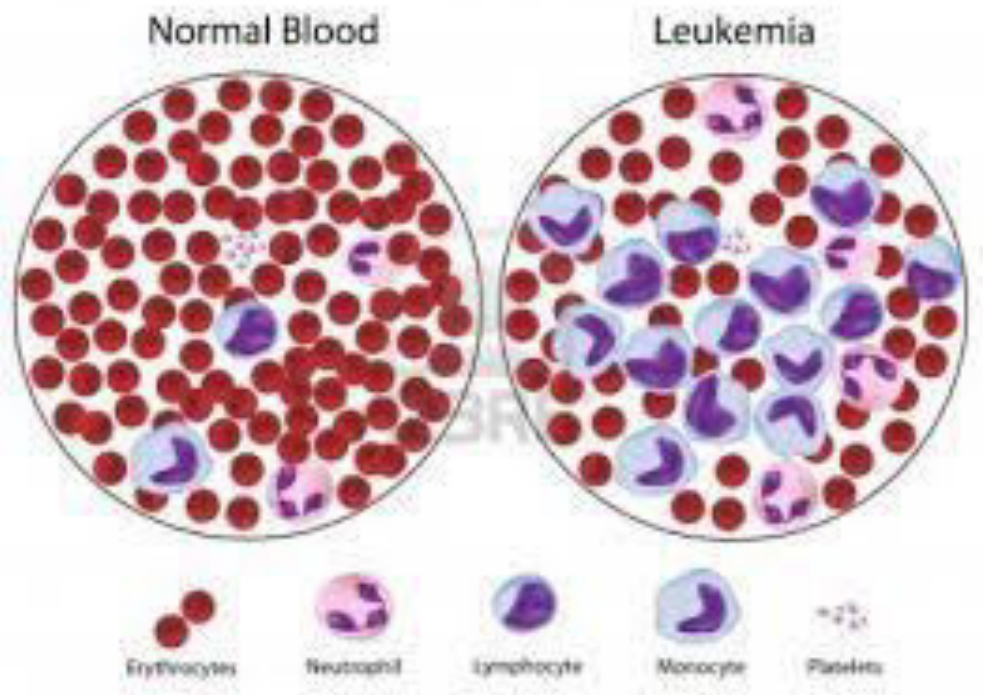

- Anemia.

LECTURE 148 – X-Ray

Graphic Picture

- Leukemia.

LECTURE 148 – X-Ray

Graphic Picture

- Burns refuse to heal.

LECTURE 148 – X-Ray

Graphic Picture

- Suppressed gonorrhea.

LECTURE 148 – X-Ray

Graphic Picture

- Psoriasis.

LECTURE 148 – X-Ray

Graphic Picture

- Its homeopathic action is, thus, centrifugal towards the periphery.

LECTURE 148 – X-Ray

Graphic Picture

- Impotency.

LECTURE 148 – X-Ray

Graphic Picture

- Sexual desire lost.

LECTURE 148 – X-Ray

Graphic Picture

- Chronic fatigue. Sick feeling.

LECTURE 148 – X-Ray

Graphic Picture

- Radiation.

LECTURE 148 – X-Ray

Graphic Picture

- Chemotherapy.

LECTURE 148 – X-Ray

Graphic Picture

- X-Ray is a deep acting remedy at cellular and genes level.

LECTURE 148 – X-Ray

Graphic Picture

- Warty growths.

LECTURE 148 – X-Ray

Graphic Picture

- Old suppressed eruptions.

LECTURE 148 – X-Ray

Graphic Picture

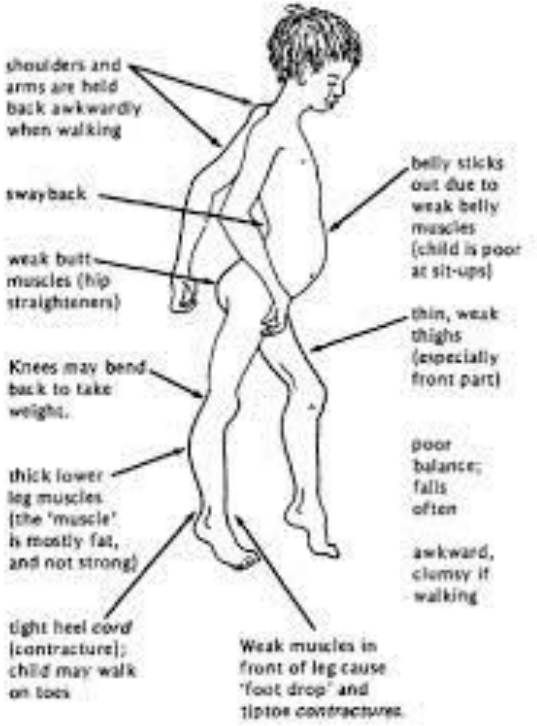

- Suppressed menses.

LECTURE 148 – X-Ray

Graphic Picture

- Congenital disorders of children like
  - muscular dystrophy.

LECTURE 148 – X-Ray

Graphic Picture

- Congenital disorders of children like
  - Down's syndrome

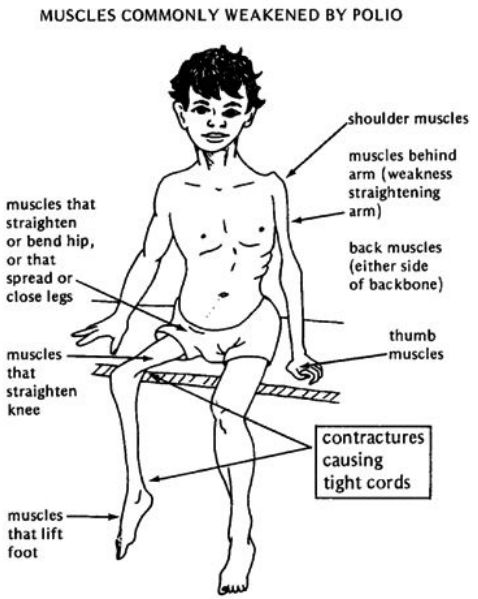

LECTURE 148 – X-Ray

Graphic Picture

- Congenital disorders of children like
  - Polio

LECTURE 148 – X-Ray

Graphic Picture

- Congenital disorders of children like
  - Rickets

LECTURE 148 – X-Ray

Graphic Picture

- Congenital disorders of children like
  - Dwarfishness

LECTURE 148 – X-Ray

Graphic Picture

- Congenital disorders of children like
  - Mental retardation.

LECTURE 148 – X-Ray

Modalities

- **Worse**
  - In bed, afternoon, evening and nights; open air.

LECTURE 148 – X-Ray

Relationship

- Cadmium sulf.
- Carcinosin
- Electricitas
- Magnetis poli ambo
- Magnetis polus arcticus
- Magnetis polus australis
- Merc-sol.
- Phosphorus
- Modorrhoinum
- Sol
- Syphilinum
- Radium

LECTURE 148 – X-Ray

Antidote

- Nux vomica
- Sulfur

“INSHALLAH”

Next Lecture on 4th May 2014
