Deploy and Update Operating Systems part 01

QUESTION 1

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study
To display the first question in this case study, click the **Next** button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the **Question** button to return to the question.

General Overview

Litware, Inc. is an international manufacturing company that has 3,000 employees. The company has sales, marketing, research, human resources (HR), development, and IT departments.

Litware has two main offices in New York and Los Angeles. Litware has five branch offices in Asia.

Existing Environment

Current Business Model
The Los Angeles office has 500 developers. The developers work flexible hours ranging from 11 AM to 10 PM.

Litware has a Microsoft Endpoint Configuration Manager deployment.

During discovery, the company discovers a process where users are emailing bank account information of its customers to internal and external recipients.

Current Environment
The network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The functional level of the forest and the domain is Windows Server 2012 R2. All domain controllers run Windows Server 2012 R2.

Litware has the computers shown in the following table.

Department	Windows version	Management platform	Domain-joined
Marketing	8.1	Endpoint Configuration Manager	Hybrid Azure-AD joined
Research	10	Endpoint Configuration Manager	Hybrid Azure-AD joined
HR	8.1	Endpoint Configuration Manager	Hybrid Azure-AD joined
Developers	10	Microsoft Intune	Azure AD-joined
Sales	10	Microsoft Intune	Azure AD-joined

The development department uses projects in Azure DevOps to build applications.

Most of the employees in the sales department are contractors. Each contractor is assigned a computer that runs Windows 10. At the end of each contract, the computer is assigned to a different contractor. Currently, the computers are re-provisioned manually by the IT department.

Problem Statements
Litware identifies the following issues on the network:

- Employees in the Los Angeles office report slow Internet performance when updates are downloading. The employees also report that the updates frequently consume considerable resources when they are installed. The Update settings are configured as shown in the Updates exhibit. (Click the Updates button.)
- Management suspects that the source code for the proprietary applications in Azure DevOps in being shared externally.
- Re-provisioning the sales department computers is too time consuming.

Requirements

CEplus.com

Business Goals
Litware plans to transition to co-management for all the company-owned Windows 10 computers.

Whenever possible, Litware wants to minimize hardware and software costs.

Device Management Requirements
Litware identifies the following device management requirements:

- Prevent the sales department employees from forwarding email that contains bank account information.
- Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in.
- Prevent employees in the research department from copying patented information from trusted applications to untrusted applications.

Technical Requirements
Litware identifies the following technical requirements for the planned deployment:

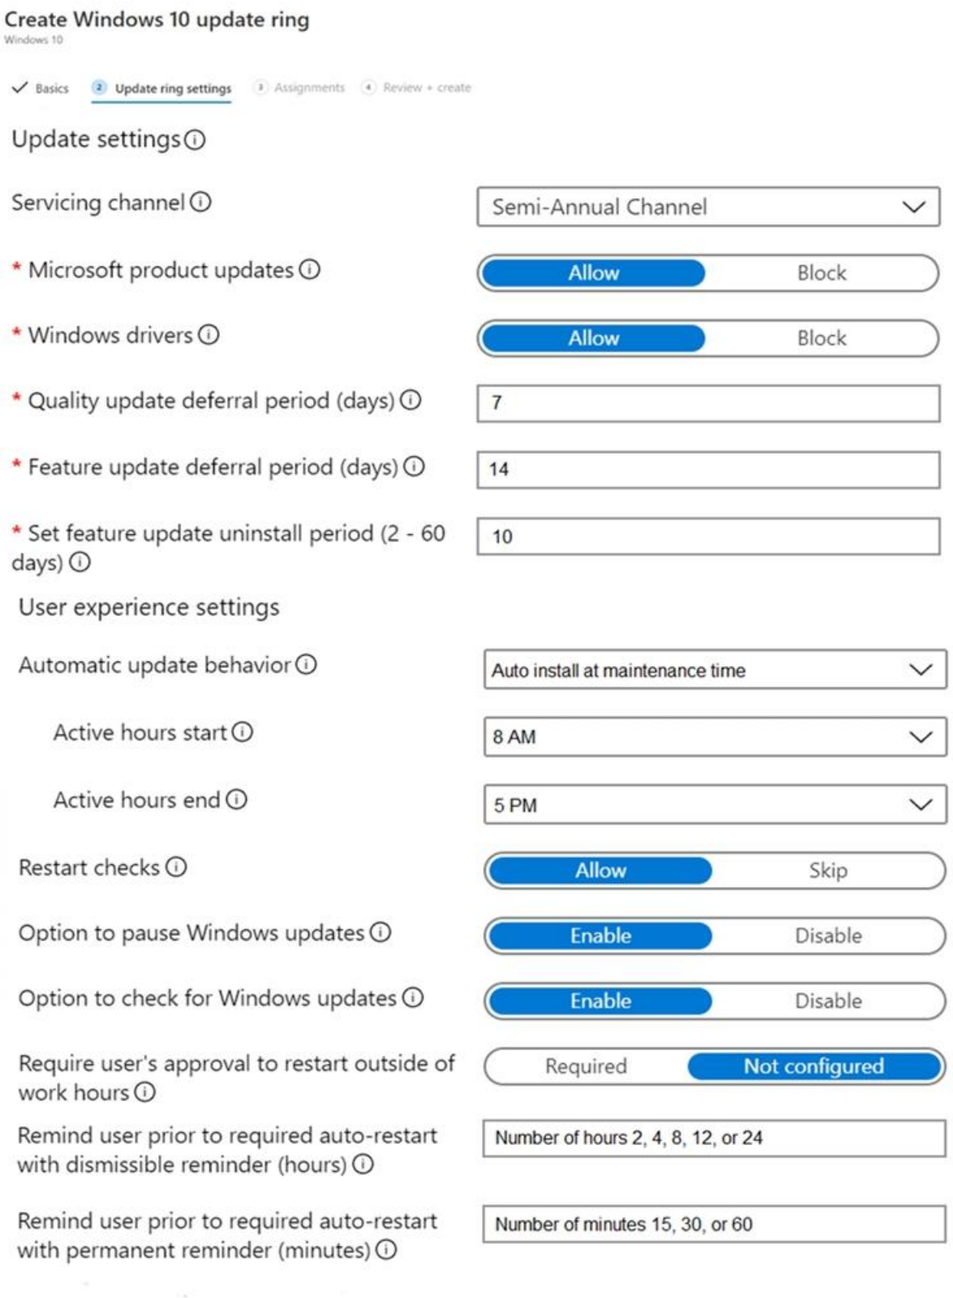

- Re-provision the sales department computers by using Windows AutoPilot.
- Ensure that the projects in Azure DevOps can be accessed from the corporate network only.
- Ensure that users can sign in to the Azure AD-joined computers by using a PIN. The PIN must expire every 30 days.
- Ensure that the company name and logo appears during the Out of Box Experience (OOBE) when using Windows AutoPilot.

Overview
Contoso, Ltd, is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

Contoso has the users and computers shown in the following table.

Location	Users	Laptops	Desktop computers	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

The company has IT, human resources (HR), legal (LEG), marketing (MKG) and finance (FIN) departments.

Contoso uses Microsoft Store for Business and recently purchased a Microsoft 365 subscription.

The company is opening a new branch office in Phoenix. Most of the users in the Phoenix office will work from home.

Existing Environment
The network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

All member servers run Windows Server 2016. All laptops and desktop computers run Windows 10 Enterprise.

The computers are managed by using Microsoft Endpoint Configuration Manager. The mobile devices are managed by using Microsoft Intune.

The naming convention for the computers is the department acronym, followed by a hyphen, and then four numbers, for example, FIN-6785. All the computers are joined to the on-premises Active Directory domain.

Each department has an organizational unit (OU) that contains a child OU named Computers. Each computer account is in the Computers OU of its respective department.

Intune Configuration

CEplus.com

The domain has the users shown in the following table.

Name	Role	Member of
User1	Intune administrator	GroupA
User2	*None*	GroupB

User2 is a device enrollment manager (DEM) in Intune.
The devices enrolled in Intune are shown in the following table.

Name	Platform	Encryption	Member of
Device1	Android	Disabled	Group1
Device2	iOS	Not applicable	Group2, Group3
Device3	Android	Disabled	Group2, Group3
Device4	iOS	Not applicable	Group2

The device compliance policies in Intune are configured as shown in the following table.

Name	Platform	Require encryption	Assigned
Policy1	Android	Not configured	Yes
Policy2	iOS	Not applicable	Yes
Policy3	Android	Require	Yes

The device compliance policies have the assignments shown in the following table:

Name	Include	Exclude
Policy1	Group3	*None*
Policy2	Group2	Group3
Policy3	Group1	*None*

The device limit restrictions in Intune are configured as shown in the following table.

Priority	Name	Device limit	Assigned to
1	Restriction1	15	GroupB
2	Restriction2	10	GroupA
Default	All users	5	All users

Requirements

Planned Changes
Contoso plans to implement the following changes:

- Provide new computers to the Phoenix office users. The new computers have Windows 10 Pro preinstalled and were purchased already.
- Start using a free Microsoft Store for Business app named App1.
- Implement co-management for the computers.

Technical Requirements:
Contoso must meet the following technical requirements:

- Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.
- Deploy Windows 10 Enterprise to the computers of the Phoenix office users by using Windows Autopilot.
- Monitor the computers in the LEG department by using Windows Analytics.
- Create a provisioning package for new computers in the HR department.
- Block iOS devices from sending diagnostic and usage telemetry data.
- Use the principle of least privilege whenever possible.
- Enable the users in the MKG department to use App1.
- Pilot co-management for the IT department.

A.

CEplus.com

Correct Answer:
Section: (none)
Explanation

Explanation/Reference:

QUESTION 2
You need to prepare for the deployment of the Phoenix office computers.
What should you do first?

A. Extract the hardware ID information of each computer to a CSV file and upload the file from the Devices settings in Microsoft Store for Business.
B. Extract the serial number information of each computer to a XML file and upload the file from the Microsoft Intune blade in the Azure portal.
C. Extract the serial number information of each computer to a CSV file and upload the file from the Microsoft Intune blade in the Azure portal.
D. Extract the hardware ID information of each computer to an XLSX file and upload the file from the Devices settings in Microsoft Store for Business.

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Explanation:
To manage devices through Microsoft Store for Business and Education, you'll need a .csv file that contains specific information about the devices. You should be able to get this from your Microsoft account contact, or the store where you purchased the devices. Upload the .csv file to Microsoft Store to add the devices.

QUESTION 2
Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question-in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company uses Windows AutoPilot to configure the computer settings of computers issued to users.
A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company.
You plan to transfer the computer to a user named User2.
You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.
Solution: You perform a remote Windows AutoPilot Reset.
Does this meet the goal?

A. Yes
B. No

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference: https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset-remote

QUESTION 3
Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question-in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company uses Windows AutoPilot to configure the computer settings of computers issued to users.
A user named User1 has a computer named Computer1 that runs Windows 10. User1 leaves the company.
You plan to transfer the computer to a user named User2.
You need to ensure that when User2 first starts the computer, User2 is prompted to select the language setting and to agree to the license agreement.
Solution: You create a new Windows AutoPilot user-driven deployment profile.
Does this meet the goal?

A. Yes
B. No

Correct Answer: A
Section: (none)
Explanation

QUESTION 8
Your company purchases new computers that run Windows 10. The computers have cameras that support Windows Hello for Business.
You configure the Windows Hello for Business Group Policy settings as shown in the following exhibit.

Setting	State	Comment
Phone Sign-in		
Allow enumeration of emulated smart card for all users	Not configured	No
Turn off smart card emulation	Not configured	No
Use PIN Recovery	Not configured	No
Use a hardware security device	Not configured	No
Use biometrics	Enabled	No
Configure device unlock factors	Not configured	No
Configure dynamic lock factors	Enabled	No
Use Windows Hello for Business	Enabled	No
Use certificate on-premises authentication	Not configured	No

What are two valid methods a user can use to sign in? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Facial recognition
B. A smartwatch that is Bluetooth-enabled
C. A PIN
D. A USB key

Correct Answer: AC
Section: (none)
Explanation

Explanation/Reference:
Reference:

QUESTION 9
You have 10 computers that run Windows 8.1 and have the following configurations:
A single MBR disk
A disabled TPM chip
Disabled hardware virtualization
UEFI firmware running in BIOS mode
Enabled Data Execution Prevention (DEP)
You plan to upgrade the computers to Windows 10.
You need to ensure that the computers can use Secure Boot.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

CEplus.com

A. Convert the MBR disk to a GPT disk
B. Enable the TPM chip.
C. Disable DEP
D. Enable hardware virtualization
E. Convert the firmware from BIOS to UEFI.

Correct Answer: AE
Section: (none)
Explanation

QUESTION 11
Your network contains an Active Directory domain named contoso.com.

You create a provisioning package named Package1 as shown in the following exhibit.

What is the maximum number of devices on which you can run Package1 successfully?

A. 1
B. 10
C. 25
D. unlimited

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:

QUESTION 12
You have the 64-bit computers shown in the following table.

CEplus.com

Name	Operating system	Memory	BitLocker Drive Encryption (BitLocker)
Computer1	32-bit version of Windows 7 Service Pack 1 (SP1)	1 GB	Enabled
Computer2	64-bit version of Windows 7 Service Pack 1 (SP1)	4 GB	Enabled
Computer3	32- bit version of Windows 8.1	2 GB	Enabled
Computer4	64-bit version of Windows 8.1	4 GB	Disabled

You plan to perform an in-place upgrade to the 64-bit version of Windows 10.
Which computers can you upgrade to the 64-bit version of Windows 10 in their current state?

A. Computer2 and Computer4 only
B. Computer4 only
C. Computer3 and Computer4 only
D. Computer1, Computer2, Computer3 and Computer4
E. Computer2, Computer3, and Computer4 only

QUESTION 13
You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (AD) and enrolled in Microsoft Intune.
You need to enable self-service password reset on the sign-in screen. Which settings should you configure from the Microsoft Intune blade?

A. Device configuration
B. Device compliance
C. Device enrollment
D. Conditional access

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
References: https://docs.microsoft.com/en-us/azure/active-directory/authentication/tutorial-sspr-windows

QUESTION 14
Note: This question-is part of a series of questions that present the same scenario. Each question-in the series contains a unique solution that might meet the stated goals. Some question-sets might have more than one correct solution, while others might not have a correct solution.
After you answer a question-in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company uses Windows Update for Business.
The research department has several computers that have specialized hardware and software installed.

CEplus.com

You need to prevent the video drivers from being updated automatically by using Windows Update.
Solution: From the Device Installation and Restrictions settings in a Group Policy object (GPO), you enable Prevent installation of devices using drivers that match these device setup classes, and then you enter the device GUID.
Does this meet the goal?

A. Yes
B. No

Correct Answer: B
Section: (none)
Explanation

After you answer a question-in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.
Your company uses Windows Update for Business.
The research department has several computers that have specialized hardware and software installed.
You need to prevent the video drivers from being updated automatically by using Windows Update.
Solution: From the Device Installation settings in a Group Policy object (GPO), you enable Specify search order for device driver source locations, and then you select Do not search Windows Update.
Does this meet the goal?

A. Yes
B. No

Correct Answer: A
Section: (none)
Explanation

QUESTION 22
Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The domain contains 500 laptops that run Windows 8.1 Professional. The users of the laptops work from home.
Your company uses Microsoft Intune, the Microsoft Deployment Toolkit (MDT), and Windows Configuration Designer to manage client computers.
The company purchases 500 licenses for Windows 10 Enterprise.
You verify that the hardware and applications on the laptops are compatible with Windows 10.
The users will bring their laptop to the office, where the IT department will deploy Windows 10 to the laptops while the users wait.
You need to recommend a deployment method for the laptops that will retain their installed applications. The solution must minimize how long it takes to perform the deployment.
What should you include in the recommendation?

A. an in-place upgrade
B. a clean installation by using a Windows Configuration Designer provisioning package
C. Windows AutoPilot
D. a clean installation and the User State Migration Tool (USMT)

Correct Answer: A

QUESTION 24
HOTSPOT

Your company has an infrastructure that has the following:

- A Microsoft 365 tenant
- An Active Directory forest
- Microsoft Store for Business
- A Key Management Service (KMS) server
- A Windows Deployment Services (WDS) server
- A Microsoft Azure Active Directory (Azure AD) Premium tenant

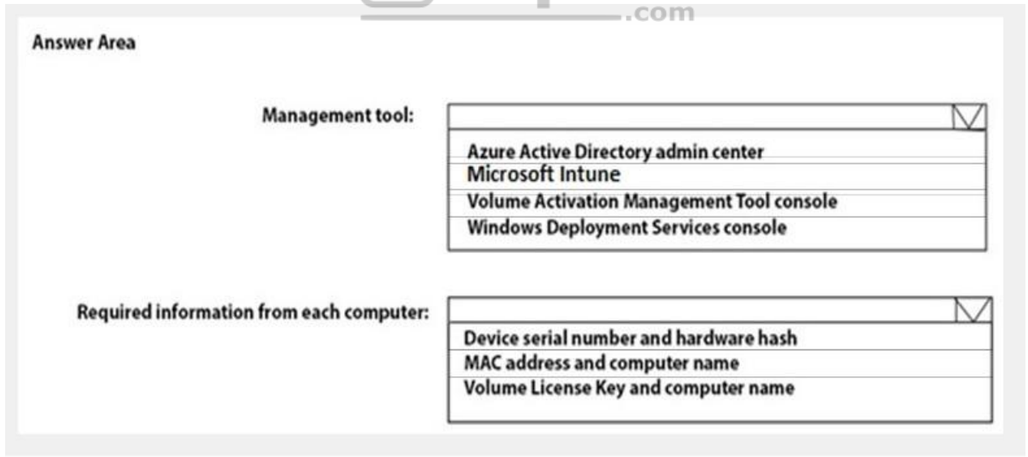

The company purchases 100 new computers that run Windows 10.

You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot.

What should you use? To answer, select the appropriate options in the answer area.

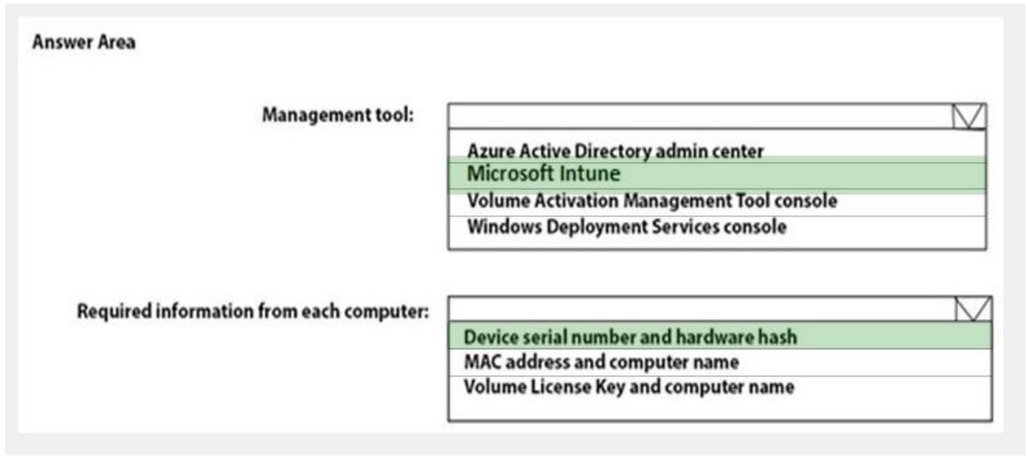

NOTE: Each correct selection is worth one point.

QUESTION 25
HOTSPOT

Your network contains an Active Directory domain. The domain contains computers that run Windows 10 and are enrolled in Microsoft Intune. Updates are deployed by using Windows Update for Business.

Users in a group named Group1 must meet the following requirements:

- Update installations must occur any day only between 00:00 and 05:00.
- Updates must be downloaded from Microsoft and from other company computers that already downloaded the updates.

You need to configure the Windows 10 Update Rings settings in Intune to meet the requirements.

Which two settings should you modify? To answer, select the appropriate settings in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Update settings

Servicing channel	Semi-Annual Channel (Targeted)	
*Microsoft product updates	Allow	Block
*Windows drivers	Allow	Block
*Quality update deferral period (days)	0	
*Feature update deferral period (days)	0	
*Set feature update uninstall period (2-60 days)	10	

User experience settings

Automatic update behavior	Notify download	
Restart checks	Allow	Skip
Delivery optimization download mode	Not configured

QUESTION 26
HOTSPOT

You have computers that run Windows 10 and are configured by using Windows AutoPilot.

A user performs the following tasks on a computer named Computer1:

- Creates a VPN connection to the corporate network
- Installs a Microsoft Store app named App1
- Connects to a Wi-Fi network

You perform a Windows AutoPilot Reset on Computer1.

What will be the state of the computer when the user signs in? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

The Wi-Fi connection will be:
- Removed
- Retained and the passphrase will be retained
- Retained but the passphrase will be reset

App1 will be:
- Reinstalled at sign-in
- Removed
- Retained

The VPN connection will be:
- Removed
- Retained and the credentials will be cached
- Retained but the credentials will be reset

Correct Answer:

Answer Area

The Wi-Fi connection will be:
- Removed
- **Retained and the passphrase will be retained**
- Retained but the passphrase will be reset

App1 will be:
- Reinstalled at sign-in
- **Removed**
- Retained

The VPN connection will be:
- **Removed**
- Retained and the credentials will be cached
- Retained but the credentials will be reset

QUESTION 27
HOTSPOT

Your network contains an Active Directory domain named constoso.com that is synced to Microsoft Azure Active Directory (Azure AD). All computers are enrolled in Microsoft Intune.

The domain contains the computers shown in the following table.

Name	Operating system
Computer1	Windows 8.1 Enterprise
Computer2	Windows 10 Enterprise without the latest feature update
Computer3	Windows 10 Enterprise without the latest feature update

You are evaluating which Intune actions you can use to reset the computers to run Windows 10 Enterprise with the latest update.

Which computers can you reset by using each action? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

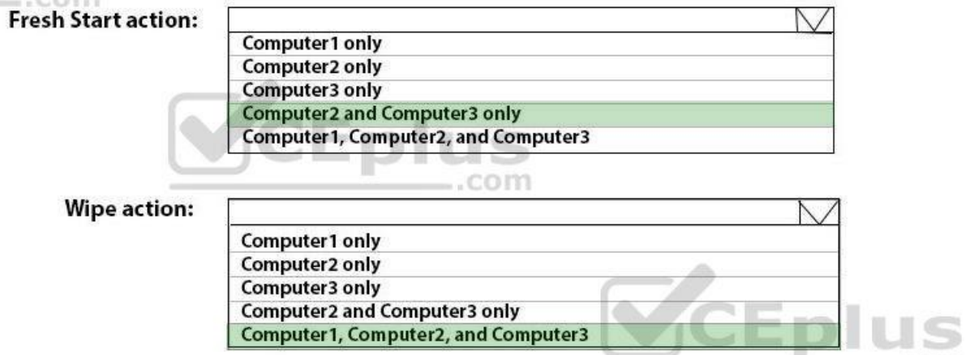

Answer Area

Fresh Start action:
- Computer1 only
- Computer2 only
- Computer3 only
- Computer2 and Computer3 only
- Computer1, Computer2, and Computer3

Wipe action:
- Computer1 only
- Computer2 only
- Computer3 only
- Computer2 and Computer3 only
- Computer1, Computer2, and Computer3

Correct Answer:

Answer Area

QUESTION 28
HOTSPOT

You use Microsoft Intune to manage Windows updates.

You have computers that run Windows 10. The computers are in a workgroup and are enrolled in Intune. The computers are configured as shown in the following table.

Name	Tag	Member of
Computer1	None	Group1
Computer2	Tag2	Group2
Computer3	Tag3	Group3

On each computer, the Select when Quality Updates are received Group Policy setting is configured as shown in the following table.

Name	State	Configuration
Computer1	Not configured	*Not applicable*
Computer2	Enabled	Deferral period of 5 days
Computer3	Disabled	*Not applicable*

You have Windows 10 update rings in Intune as shown in the following table.

Name	Quality update deferral period (days)	Scope (Tags)	Assignment
Ring1	2	Tag1	Group1
Ring2	7	Tag2	Group2
Ring3	14	Tag2	Group3

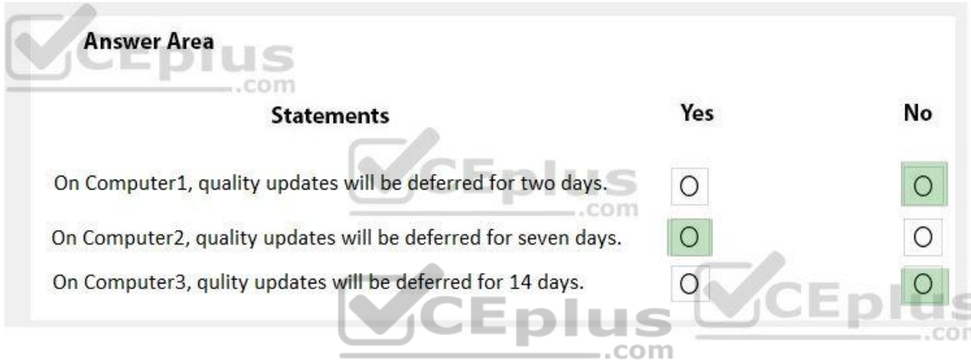

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/windows-autopilot-reset

QUESTION 30
Your network contains an Active Directory forest. The forest contains a single domain and three sites named Site1, Site2, and Site3. Each site is associated to two subnets. Site1 contains two subnets named SubnetA and SubnetB.
All the client computers in the forest run Windows 10. Delivery Optimization is enabled.
You have a computer named Computer1 that is in SubnetA.
From which hosts will Computer1 download updates?

A. the computers in Site1 only
B. any computer in the domain
C. the computers in SubnetA only
D. any computer on the network

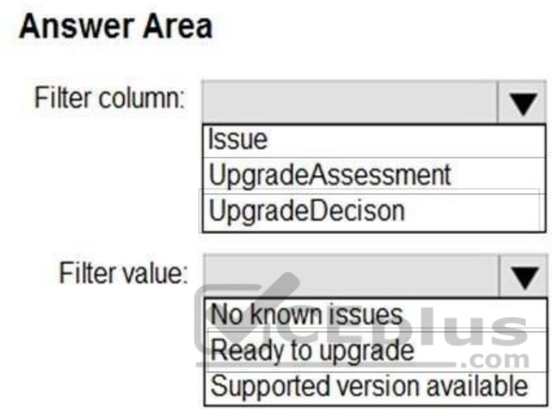

CEplus.com

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Delivery Optimization allows updates from other clients that connect to the Internet using the same public IP as the target client (NAT).
References: https://docs.microsoft.com/en-us/windows/deployment/update/waas-delivery-optimization

QUESTION 31
HOTSPOT
Your network contains an Active Directory domain. The domain contains 1,200 computers that run Windows 8.1.
You deploy an Upgrade Readiness solution in Microsoft Azure and configure the computers to report to Upgrade Readiness.
From Upgrade Readiness, you open a table view of the applications.
You need to filter the view to show only applications that can run successfully on Windows 10.
How should you configure the filter in Upgrade Readiness? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

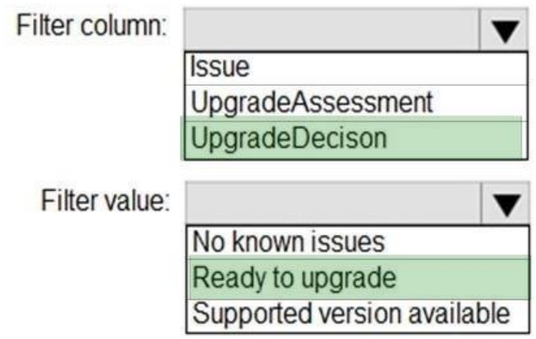

Hot Area:

Correct Answer:

CEplus.com

Answer Area

Section: (none)
Explanation

Explanation/Reference:

QUESTION 32
HOTSPOT
You have two computers that run Windows 10. The computers are enrolled in Microsoft Intune as shown in the following table.

Name	Member of
Computer1	Group1
Computer2	Group1, Group2

Windows 10 update rings are defined in Intune as shown in the following table.

Name	Quality deferral (days)	Assigned
Ring1	3	Yes
Ring2	10	Yes

You assign the update rings as shown in the following table.

Name	Include	Exclude
Ring1	Group1	Group2
Ring2	Group2	Group1

What is the effect of the configurations on Computer1 and Computer2? To answer, select the appropriate options in the answer area.
NOTE: Each correct selection is worth one point.

Hot Area:

CEplus.com

Answer Area

Quality deferral on Computer1:
- 3 days
- 7 days
- 10 days
- 13 days
- No effect

Quality deferral on Computer2:
- 3 days
- 7 days
- 10 days
- 13 days
- No effect

Correct Answer:

Answer Area

Quality deferral on Computer1:
- 3 days
- 7 days
- 10 days
- 13 days
- No effect

Quality deferral on Computer2:
- 3 days
- 7 days
- 10 days
- 13 days
- No effect

Section: (none)
Explanation

Explanation/Reference:
Computer1 and Computer2 are members of Group1. Ring1 is applied to Group1.
Note: The term "Exclude" is misleading. It means that the ring is not applied to that group, rather than that group being blocked.
References: https://docs.microsoft.com/en-us/windows/deployment/update/waas-wufb-intune
https://allthingscloud.blog/configure-windows-update-business-using-microsoft-intune/

QUESTION 33
Your company standardizes on Windows 10 Enterprise for all users.
Some users purchase their own computer from a retail store. The computers run Windows 10 Pro.

CEplus.com

You need to recommend a solution to upgrade the computers to Windows 10 Enterprise, join the computers to Microsoft Azure Active Directory (Azure AD), and install several Microsoft Store apps. The solution must meet the following requirements:
Ensure that any applications installed by the users are retained. Minimize user intervention.
What is the best recommendation to achieve the goal? More than one answer choice may achieve the goal. Select the **BEST** answer.

A. Microsoft Deployment ToolKit (MDT)
B. Windows Deployment Services (WDS)
C. a Windows Configuration Designer provisioning package
D. Windows AutoPilot

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Explanation:
You use Windows Configuration Designer to create a provisioning package (.ppkg) that contains customization settings. You can apply the provisioning package to a device running Windows 10.
Incorrect Answers:
A: Microsoft Deployment Toolkit (MDT) allows you to automate the deployment of Windows operating systems in your organization. It is not used to upgrade to Windows 10 Enterprise.
B: Windows Deployment Services (WDS) is the revised version of Remote Installation Services (RIS). WDS enables the deployment of Windows operating systems. You can use it to set up new computers using network-based installations. It is not used to upgrade to Windows 10 Enterprise.
D: Windows Autopilot is a user-driven mode designed to minimize intervention of the IT administrator.
References: https://docs.microsoft.com/en-us/windows/deployment/upgrade/windows-10-edition-upgrades https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-create-package

QUESTION 34
You install a feature update on a computer that runs Windows 10.
How many days do you have to roll back the update?

A. 5
B. 10
C. 14
D. 30

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Explanation:
Microsoft has changed the time period associated with operating system rollbacks with Windows 10 version 1607, decreasing it to 10 days. Previously, Windows 10 had a 30-day rollback period.

CEplus.com

QUESTION 40
You have a Microsoft 365 subscription.

A remote user purchases a laptop from a retail store. The laptop is intended for company use and has Windows 10 Pro edition installed.

You need to configure the laptop to meet the following requirements:

- Modify the layout of the Start menu
- Upgrade Windows 10 to Windows 10 Enterprise
- Join the laptop to a Microsoft Azure Active Directory (Azure AD) domain named contoso.com

The solution must minimize how long it takes for the user to apply the configurations.
What should you do?

A. Create a custom Windows image (.wim) file that contains an image of Windows 10 Enterprise and upload the file to a Microsoft
B. Create a provisioning package (.ppkg) file and email the file to the user
C. Create a Windows To Go workspace and ship the workspace to the user
D. Create a Sysprep Unattend (.xml) file and email the file to the user

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference:
https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-packages

QUESTION 41
You have a Microsoft 365 subscription. All devices run Windows 10.

CEplus.com

You need to prevent users from enrolling the devices in the Windows Insider Program.

What should you configure from Microsoft 365 Device Management? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. a Windows 10 security baseline
B. an app configuration policy
C. a custom device configuration profile
D. a Windows 10 update ring
E. a device restrictions device configuration profile

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 42
Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).

Existing on-premises computers are managed by using Microsoft Endpoint Configuration Manager. You configure contoso.com for co-management.

You deploy 100 new devices that run Windows 10. The devices are joined to Azure AD and enrolled in Microsoft Intune.

You need to ensure that the devices are co-managed.

What should you create in Intune first?

CEplus.com

A. a conditional access policy
B. a device compliance policy
C. an app for the Endpoint Configuration Manager client
D. a device configuration profile
E. an app configuration policy

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Explanation:
For new internet-based devices, you need to create an app in Intune. Deploy this app to Windows 10 devices that aren't already Configuration Manager clients. This scenario is when you have new Windows 10 devices that join Azure AD and automatically enroll to Intune. You install the Configuration Manager client to reach a co-management state.

References:
https://docs.microsoft.com/en-us/configmgr/comanage/how-to-prepare-win10

QUESTION 43
Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).

The Active Directory domain contains 200 computers that run Windows 10. The computers are managed by using Microsoft System Center Configuration Manager (Current Branch).

You need to pilot co-management for only five of the computers.

What should you create first?

A. a domain local distribution group in Active Directory
B. an Intune Connector for Active Directory
C. a device collection in Configuration Manager

D. a dynamic device group in Azure AD

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Explanation:
The Pilot Intune setting switches the associated workload only for the devices in the pilot collection.

Note: When you enable co-management, you'll assign a collection as a Pilot group. This is a group that contains a small number of clients to test your co-management configurations. We recommend you create a suitable collection before you start the procedure. Then you can select that collection without exiting the procedure to do so.

QUESTION 46
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1.

You need to apply Package1 to Computer1.

CEplus.com

Solution: From the Settings app, you select **Access work or school**, and then you select **Add or remove a provisioning package**.

Does this meet the goal?

A. Yes
B. No

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Explanation:
To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:
https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package

QUESTION 47
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1.

You need to apply Package1 to Computer1.

Solution: From File Explorer, you go to C:\Folder1, and then you double-click the **Package1.ppkg** file.

Does this meet the goal?

A. Yes
B. No

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Explanation:
To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

Reference:
https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-apply-package

QUESTION 48
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have a computer named Computer1 that runs Windows 10.

You save a provisioning package named Package1 to a folder named C:\Folder1.

You need to apply Package1 to Computer1.

Solution: At a command prompt, you change the current folder to **C:\Folder1**, and then you run the `RegSvr32.exe Package1.ppkg` command.

CEplus.com

Does this meet the goal?

A. Yes
B. No

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Explanation:
To install a provisioning package, navigate to Settings > Accounts > Access work or school > Add or remove a provisioning package > Add a package, and select the package to install.

QUESTION 49
You have an Azure Active Directory (Azure AD) tenant named contoso.com.

You plan to use Windows Autopilot to configure the Windows 10 devices shown in the following table.

Name	Memory	TPM
Device1	16 GB	*None*
Device2	8 GB	Version 1.2
Device3	4 GB	Version 2.0

Which devices can be configured by using Windows Autopilot self-deploying mode?

A. Device2 and Device3 only
B. Device3 only
C. Device2 only
D. Device1, Device2, and Device3

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference:
https://docs.microsoft.com/en-us/windows/deployment/windows-autopilot/self-deploying

QUESTION 50
HOTSPOT

Your network contains an on-premises Active Directory forest named contoso.com that syncs to Azure Active Directory (Azure AD). Azure AD contains the users shown in the following table.

Name	Source	Member of
User1	Azure AD	Group1
User2	Windows Active Directory	Group2

You assign Windows 10 Enterprise E5 licenses to Group1 and User2.

You add computers to the network as shown in the following table.

Name	Operating system	Joined to
Computer1	Windows 10 Pro	Azure AD
Computer2	Windows 10 Pro	Active Directory
Computer3	Windows 8.1	Active Directory

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
If User1 signs in to Computer1, Computer1 will be upgraded to Windows 10 Enterprise E5 automatically.	○	○
If User2 signs in to Computer2, Computer2 will be upgraded to Windows 10 Enterprise E5 automatically.	○	○
If User2 signs in to Computer3, Computer3 will be upgraded to Windows 10 Enterprise E5 automatically.	○	○

Correct Answer:

Answer Area

Statements	Yes	No
If User1 signs in to Computer1, Computer1 will be upgraded to Windows 10 Enterprise E5 automatically.	○	○
If User2 signs in to Computer2, Computer2 will be upgraded to Windows 10 Enterprise E5 automatically.	○	○
If User2 signs in to Computer3, Computer3 will be upgraded to Windows 10 Enterprise E5 automatically.	○	○

QUESTION 51
HOTSPOT

You have a Microsoft Intune subscription.

You are creating a Windows Autopilot deployment profile named Profile1 as shown in the following exhibit.

CEplus.com

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Users who deploy a device by using Profile1 **[answer choice]**.

- are prevented from modifying any desktop settings
- can create additional local users on the device
- can modify the desktop settings for all device users
- can modify the desktop settings only for themselves

Users can configure the **[answer choice]** during the deployment.

- computer name
- Cortana settings
- keyboard layout

Correct Answer:

CEplus.com

Answer Area

Users who deploy a device by using Profile1 **[answer choice]**.

- are prevented from modifying any desktop settings
- can create additional local users on the device
- can modify the desktop settings for all device users
- can modify the desktop settings only for themselves

Users can configure the **[answer choice]** during the deployment.

- computer name
- Cortana settings
- keyboard layout

QUESTION 52
HOTSPOT

You have an Azure Active Directory (Azure AD) tenant named adatum.com that contains the users shown in the following table.

Name	Role
User1	*None*
User2	Global administrator
User3	Cloud device administrator
User4	Intune administrator

You configure the following device settings for the tenant:

- Users may join devices to Azure AD: User1
- Additional local administrators on Azure AD joined devices: None

You install Windows 10 on a computer named Computer1.

You need to identify which users can join Computer1 to adatum.com, and which users will be added to the Administrators group after joining adatum.com.

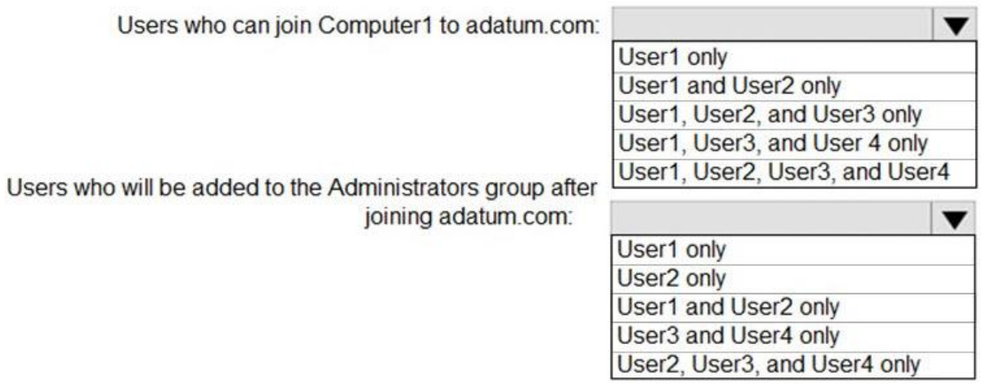

Which users should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

QUESTION 53
You use Microsoft Intune to manage client computers. The computers run one of the following operating systems:

- Windows 8.1
- Windows 10 Pro
- Windows 10 Enterprise
- Windows 10 Enterprise LTSC

You plan to manage Windows updates on the computers by using update rings.

Which operating systems support update rings?

A. Windows 10 Pro, Windows 10 Enterprise, and Windows 10 Enterprise LTSC only
B. Windows 8.1, Windows 10 Pro, Windows 10 Enterprise, and Windows 10 Enterprise LTSC
C. Windows 10 Enterprise and Windows 10 Enterprise LTSC only

CEplus.com

D. Windows 10 Pro and Windows 10 Enterprise only

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference:
https://docs.microsoft.com/en-us/mem/intune/protect/windows-update-for-business-configure

QUESTION 54
You have a computer named Computer1 that runs Windows 8.1.

You plan to perform an in-place upgrade of Computer1 to Windows 10 by using an answer file.

You need to identify which tool to use to create the answer file.

What should you identify?

A. System Configuration (Msconfig.exe)
B. Windows Configuration Designer
C. Windows System Image Manager (Windows SIM)
D. Windows Deployment Services (WDS)

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Reference:
https://thesleepyadmins.com/2019/05/31/create-windows-10-answer-file/

QUESTION 55
Your network contains an Active Directory domain. The domain contains 10 computers that run Windows 8.1 and use local user profiles.

You deploy 10 new computers that run Windows 10 and join the computers to the domain.

You need to migrate the user profiles from the Windows 8.1 computers to the Windows 10 computers.

What should you do?

A. From the Windows 8.1 computer of each user, run `imagex.exe/capture`, and then from the Windows 10 computer of each user, run `imagex.exe/apply`.
B. Configure roaming user profiles for the users. Instruct the users to first sign in to and out of their Windows 8.1 computer and then to sign in to their Windows 10 computer.
C. From the Windows 8.1 computer of each user, run `scanstate.exe`, and then from the Windows 10 computer of each user, run `loadstate.exe`.
D. Configure Folder Redirection for the users. Instruct the users to first sign in to and out of their Windows 8.1 computer, and then to sign in to their Windows 10 computer.

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Explanation:
The ScanState command is used with the User State Migration Tool (USMT) 10.0 to scan the source computer, collect the files and settings, and create a store.

Reference:
https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-scanstate-syntax

https://docs.microsoft.com/en-us/windows/deployment/usmt/usmt-loadstate-syntax

QUESTION 56
You have computers that run Windows 8.1 or Windows 10. All the computers are enrolled in Microsoft Intune, Endpoint Configuration Manager, and Desktop Analytics. Co-management is enabled for your environment.

CEplus.com

You plan to upgrade the Windows 8.1 computers to Windows 10.

You need to identify which Windows 8.1 computers do **NOT** have supported Windows 10 drivers.

What should you use?

A. the General Hardware Inventory report in Configuration Manager
B. the List of devices in a specific device category report in Configuration Manager
C. Deployment plans in Desktop Analytics
D. the Device compliance report in Intune

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

Policies and Profiles part 01

QUESTION 1

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study
To display the first question in this case study, click the **Next** button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the **Question** button to return to the question.

General Overview

Litware, Inc. is an international manufacturing company that has 3,000 employees. The company has sales, marketing, research, human resources (HR), development, and IT departments.

Litware has two main offices in New York and Los Angeles. Litware has five branch offices in Asia.

Existing Environment

Current Business Model
The Los Angeles office has 500 developers. The developers work flexible hours ranging from 11 AM to 10 PM.

Litware has a Microsoft Endpoint Configuration Manager deployment.

During discovery, the company discovers a process where users are emailing bank account information of its customers to internal and external recipients.

Current Environment
The network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The functional level of the forest and the domain is Windows Server 2012 R2. All domain controllers run Windows Server 2012 R2.

Litware has the computers shown in the following table.

Department	Windows version	Management platform	Domain-joined
Marketing	8.1	Endpoint Configuration Manager	Hybrid Azure-AD joined
Research	10	Endpoint Configuration Manager	Hybrid Azure-AD joined
HR	8.1	Endpoint Configuration Manager	Hybrid Azure-AD joined
Developers	10	Microsoft Intune	Azure AD-joined
Sales	10	Microsoft Intune	Azure AD-joined

The development department uses projects in Azure DevOps to build applications.

Most of the employees in the sales department are contractors. Each contractor is assigned a computer that runs Windows 10. At the end of each contract, the computer is assigned to a different contractor. Currently, the computers are re-provisioned manually by the IT department.

Problem Statements
Litware identifies the following issues on the network:

- Employees in the Los Angeles office report slow Internet performance when updates are downloading. The employees also report that the updates frequently consume considerable resources when they are installed. The Update settings are configured as shown in the Updates exhibit. (Click the Updates button.)
- Management suspects that the source code for the proprietary applications in Azure DevOps in being shared externally.
- Re-provisioning the sales department computers is too time consuming.

Requirements

CEplus.com

Business Goals
Litware plans to transition to co-management for all the company-owned Windows 10 computers. Whenever possible, Litware wants to minimize hardware and software costs.

Device Management Requirements
Litware identifies the following device management requirements:

- Prevent the sales department employees from forwarding email that contains bank account information.
- Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in.
- Prevent employees in the research department from copying patented information from trusted applications to untrusted applications.

Technical Requirements
Litware identifies the following technical requirements for the planned deployment:

- Re-provision the sales department computers by using Windows AutoPilot.
- Ensure that the projects in Azure DevOps can be accessed from the corporate network only.
- Ensure that users can sign in to the Azure AD-joined computers by using a PIN. The PIN must expire every 30 days.
- Ensure that the company name and logo appears during the Out of Box Experience (OOBE) when using Windows AutoPilot.

QUESTION 4
You need to meet the device management requirements for the developers.

What should you implement?

A. Enterprise State Roaming
B. folder redirection
C. home folders
D. known folder redirection in Microsoft OneDrive

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Explanation:
Litware identifies the following device management requirements:
- Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in.

Enterprise State Roaming allows for the synchronization of Microsoft Edge browser setting, including favorites and reading list, across devices.

Overview
Contoso, Ltd, is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

Contoso has the users and computers shown in the following table.

Location	Users	Laptops	Desktop computers	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

The company has IT, human resources (HR), legal (LEG), marketing (MKG) and finance (FIN) departments.

Contoso uses Microsoft Store for Business and recently purchased a Microsoft 365 subscription.

The company is opening a new branch office in Phoenix. Most of the users in the Phoenix office will work from home.

Existing Environment
The network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

All member servers run Windows Server 2016. All laptops and desktop computers run Windows 10 Enterprise.

The computers are managed by using Microsoft Endpoint Configuration Manager. The mobile devices are managed by using Microsoft Intune.

The naming convention for the computers is the department acronym, followed by a hyphen, and then four numbers, for example, FIN-6785. All the computers are joined to the on-premises Active Directory domain.

Each department has an organizational unit (OU) that contains a child OU named Computers. Each computer account is in the Computers OU of its respective department.

Intune Configuration

The domain has the users shown in the following table.

Name	Role	Member of
User1	Intune administrator	GroupA
User2	*None*	GroupB

User2 is a device enrollment manager (DEM) in Intune.

The devices enrolled in Intune are shown in the following table.

Name	Platform	Encryption	Member of
Device1	Android	Disabled	Group1
Device2	iOS	*Not applicable*	Group2, Group3
Device3	Android	Disabled	Group2, Group3
Device4	iOS	*Not applicable*	Group2

The device compliance policies in Intune are configured as shown in the following table.

Name	Platform	Require encryption	Assigned
Policy1	Android	Not configured	Yes
Policy2	iOS	*Not applicable*	Yes
Policy3	Android	Require	Yes

The device compliance policies have the assignments shown in the following table.

Name	Include	Exclude
Policy1	Group3	*None*
Policy2	Group2	Group3
Policy3	Group1	*None*

The device limit restrictions in Intune are configured as shown in the following table.

Priority	Name	Device limit	Assigned to
1	Restriction1	15	GroupB
2	Restriction2	10	GroupA
Default	All users	5	All users

Requirements

Planned Changes
Contoso plans to implement the following changes:

- Provide new computers to the Phoenix office users. The new computers have Windows 10 Pro preinstalled and were purchased already.
- Start using a free Microsoft Store for Business app named App1.
- Implement co-management for the computers.

Technical Requirements
Contoso must meet the following technical requirements:

- Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.
- Deploy Windows 10 Enterprise to the computers of the Phoenix office users by using Windows Autopilot.
- Monitor the computers in the LEG department by using Windows Analytics.
- Create a provisioning package for new computers in the HR department.
- Block iOS devices from sending diagnostic and usage telemetry data.
- Use the principle of least privilege whenever possible.
- Enable the users in the MKG department to use App1.
- Pilot co-management for the IT department.

A.

Correct Answer:

CEplus.com

Section: (none)
Explanation

Explanation/Reference:

QUESTION 2
You need to meet the technical requirements for the iOS devices.
Which object should you create in Intune?

A. A compliance policy
B. An app protection policy
C. A deployment profile
D. A device configuration profile

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Scenario: Technical requirements include: Block iOS devices from sending diagnostic and usage telemetry data.Intune includes device restriction policies that help administrators control Android, iOS, macOS, and Windows devices. These restrictions let you control a wide range of settings and features to protect your organization's resources. For example, administrators can:
Allow or block the device camera Control access to Google Play, app stores, viewing documents, and gaming
Block built-in apps, or create a list of apps that allowed or prohibited
Allow or prevent backing up files to cloud and storage accounts
Set a minimum password length, and block simple passwords
References:https://docs.microsoft.com/en-us/intune/device-restrictions-configure

QUESTION 3
You need to meet the technical requirements for the IT department.
What should you do first?

CEplus.com

A. From the Azure Active Directory blade in the Azure portal, enable Seamless single sign-on.
B. From the Configuration Manager console, add an Intune subscription.
C. From the Azure Active Directory blade in the Azure portal, configure the Mobility (MDM and MAM) settings.
D. From the Microsoft Intune blade in the Azure portal, configure the Windows enrollment settings.

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Reference: https://docs.microsoft.com/en-us/sccm/comanage/tutorial-co-manage-clients

QUESTION 4
HOTSPOT

To which devices do Policy1 and Policy2 apply? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

CEplus .com

Policy1:

- Device1 only
- Device2 only
- Device3 only
- Device4 only
- Device2 and Device3 only
- Device1 and Device3 only
- Device1, Device2, and Device 3

Policy2:

- Device1 only
- Device2 only
- Device3 only
- Device4 only
- Device2 and Device3 only
- Device1 and Device3 only
- Device1, Device2, and Device 3

Correct Answer:

Policy1:

- Device1 only
- Device2 only
- **Device3 only**
- Device4 only
- Device2 and Device3 only
- Device1 and Device3 only
- Device1, Device2, and Device 3

Policy2:

- Device1 only
- **Device2 only**
- Device3 only
- Device4 only
- Device2 and Device3 only
- Device1 and Device3 only
- Device1, Device2, and Device 3

QUESTION 5
HOTSPOT

What is the maximum number of devices that User1 and User2 can enroll in Intune? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

CEplus.com

Answer Area

User1 can enroll a maximum of:
- 5 devices
- 10 devices
- 15 devices
- 1,000 devices
- An unlimited number of devices

User2 can enroll a maximum of:
- 5 devices
- 10 devices
- 15 devices
- 1,000 devices
- An unlimited number of devices

Correct Answer:

Answer Area

User1 can enroll a maximum of:
- 5 devices
- **10 devices**
- 15 devices
- 1,000 devices
- An unlimited number of devices

User2 can enroll a maximum of:
- 5 devices
- 10 devices
- **15 devices**
- 1,000 devices
- An unlimited number of devices

CEplus.com

Explanation/Reference:
The policy needs to be applied to Group4 so we need to configure Users and Groups.
The Access controls are set to Block access

We therefore need to exclude compliant devices.
From the scenario:
Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.
Note: When a device enrolls in Intune, the device information is updated in Azure AD to include the device compliance status. This compliance status is used by conditional access policies to block or allow access to e-mail and other organization resources.

Policies and Profiles part 03

QUESTION 1
Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD).
You have a Microsoft 365 subscription.
You create a conditional access policy for Microsoft Exchange Online.
You need to configure the policy to prevent access to Exchange Online unless is connecting from a device that is hybrid Azure AD-joined.
Which settings should you configure?

A. Locations
B. Device platforms
C. Sign-in risk
D. Device state

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference: https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/conditions#device-state

QUESTION 2
You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.
You redirect Windows known folders to Microsoft OneDrive for Business.
Which folder will be included in the redirection?

A. Saved Games
B. Documents
C. Music
D. Downloads
E. Favorites
F. AppData
G. Videos

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference: https://docs.microsoft.com/en-us/onedrive/redirect-known-folders

QUESTION 3
Your company uses Microsoft Intune.
More than 500 Android and iOS devices are enrolled in the Intune tenant.
You plan to deploy new Intune policies. Different policies will apply depending on the version of Android or iOS installed on the device.
You need to ensure that the policies can target the devices based on their version of Android or iOS.
What should you configure first?

A. Corporate device identifiers in Intune
B. Device settings in Microsoft Azure Active Directory (Azure AD)
C. Device categories in Intune
D. Groups that have dynamic membership rules in Microsoft Azure Active Directory (Azure AD)

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference:

https://docs.microsoft.com/en-us/intune/compliance-policy-create-android https://docs.microsoft.com/en-us/intune/compliance-policy-create-ios

QUESTION 4
You have computers that run Windows 10 Pro. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.
You need to upgrade the computers to Windows 10 Enterprise.
What should you configure in Intune?

A. A device enrollment policy
B. A device cleanup rule
C. A device compliance policy
D. A device configuration profile

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference: https://blogs.technet.microsoft.com/skypehybridguy/2018/09/21/intune-upgrade-windows-from-pro-to-enterprise-automatically/

QUESTION 5
You are creating a device configuration profile in Microsoft Intune.
You need to implement an ADMX-backed policy.
Which profile type should you use?

A. Identity protection
B. Custom
C. Device restrictions
D. Device restrictions (Windows 10 Team)

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference: https://blogs.technet.microsoft.com/senthilkumar/2018/05/21/intune-deploying-admx-backed-policies-using-microsoft-intune/

QUESTION 6
Your network contains an Active Directory named contoso.com. The domain contains two computers named Computer1 and Computer2 that run Windows 10.
Folder Redirection is configured for a domain user named User1. The AppData\Roaming folder and the Desktop folder are redirected to a network share.
User1 signs in to Computer1 and performs the following tasks:
Configures screen saver to start after five minutes of inactivity
Modifies the default save location for Microsoft Word
Creates a file named File1.docx on the desktop Modifies the desktop background
What will be retained when User1 signs in to Computer2?

A. File1.docx and the desktop background only
B. File1.docx, the screen saver settings, the desktop background, and the default save location for Word
C. File1.docx only
D. File1.docx, the desktop background, and the default save location for Word only

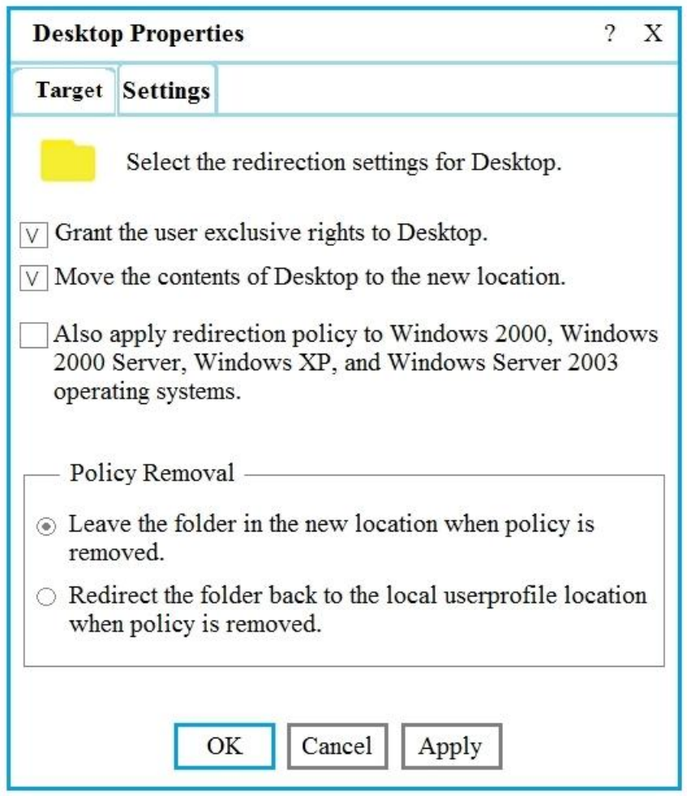

Correct Answer: B

QUESTION 7
Your network contains an Active Directory domain named contoso.com. The domain contains 200 computers that run Windows 10.
Folder Redirection for the Desktop folder is configured as shown in the following exhibit.

CEplus.com

The target is set to Server1.
You plan to use known folder redirection in Microsoft OneDrive for Business.
You need to ensure that the desktop content of users remains on their desktop when you implement known folder redirection.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: Each correct selection is worth one point.

A. Clear the Grant the user exclusive rights to Desktop check box.
B. Change the Policy Removal setting.
C. Disable Folder Redirection.
D. Clear the Move the contents of Desktop to the new location check box.

Correct Answer: AB

QUESTION 8
Your company plans to deploy tablets to 50 meeting rooms.
The tablets run Windows 10 and are managed by using Microsoft Intune. The tablets have an application named App1.
You need to configure the tablets so that any user can use App1 without having to sign in. Users must be prevented from using other applications on the tablets.

Which device configuration profile type should you use?

A. Kiosk
B. Endpoint protection
C. Identity protection
D. Device restrictions

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Reference: https://docs.microsoft.com/en-us/windows/configuration/kiosk-single-app

QUESTION 9
Your company has a Microsoft 365 subscription.
The company uses Microsoft Intune to manage all devices.
The company uses conditional access to restrict access to Microsoft 365 services for devices that do not comply with the company's security policies.
You need to identify which devices will be prevented from accessing Microsoft 365 services.
What should you use?

A. The Device Health solution in Windows Analytics.
B. Microsoft Defender Security Center.
C. The Device compliance blade in the Intune admin center.
D. The Conditional access blade in the Azure Active Directory admin center.

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 10
You need to assign the same deployment profile to all the computers that are configured by using Windows Autopilot.
Which two actions should you perform? Each correct answer presents part of the solution.
NOTE: each correct selection is worth one point.

A. Join the computers to Microsoft Azure Active Directory (Azure AD)
B. Assign a Windows AutoPilot deployment profile to a group
C. Join the computers to an on-premises Active Directory domain
D. Create a Microsoft Azure Active Directory (Azure AD) group that has dynamic membership rules and uses the operatingSystem tag
E. Create a Group Policy object (GPO) that is linked to a domain
F. Create a Microsoft Azure Active Directory (Azure AD) group that has dynamic membership rules and uses the ZTDID tag

Correct Answer: BF
Section: (none)
Explanation

Explanation/Reference:

QUESTION 13
HOTSPOT

You have computers that run Windows 10 as shown in the following table.

Name	Configuration
Computer1	Active Directory domain-joined
Computer2	Microsoft Azure Active Directory (Azure AD) –joined
Computer3	Hybrid Microsoft Azure Active Directory (Azure AD)-joined

Computer2 and Computer3 are enrolled in Microsoft Intune.

In a Group Policy object (GPO) linked to the domain, you enable the Computer Configuration/Administrative Templates/Windows Components/Search/Allow Cortana setting.

www.vceplus.com - Free Questions & Answers - Online Courses - Convert VCE to PDF - VCEplus.com

In an Intune device configuration profile, you configure the following:

- Device/Vendor/MSFT/Policy/Config/ControlPolicyConflict/MDMWinsOverGP to a value of 1
- Experience/AllowCortana to a value of 0.

Each of the following statement, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Statements	Yes	No
Computer1 can use Cortana for each.	○	○
Computer2 can use Cortana for search.	○	○
Computer3 can use Cortana for search.	○	○

Correct Answer:

QUESTION 15
HOTSPOT

You have a computer named Computer1 that runs Windows 10.

Computer1 has the users shown in the following table.

Name	Member of
User1	Administrators
User2	Replicator
User3	Guests

User1 signs in to Computer1, creates the following files, and then signs out:

- docx in C:\Users\User1\Desktop
- docx in C:\Users\Public\Public Desktop
- docx in C:\Users\Default\ Desktop

User3 signs in to Computer1 and creates a file named File4.docx in C:\Users\User3\Desktop.
User2 has never signed in to Computer1.

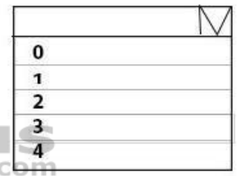

How many DOCX files will appear on the desktop of each user the nest time each user signs in? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

QUESTION 19
DRAG DROP

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). All computers are joined to the domain and registered to Azure AD.

The network contains a Microsoft System Center Configuration Manager (Current Batch) deployment that is configured for co-management with Microsoft Intune.

All the computers in the finance department are managed by using Configuration Manager. All the computers in the marketing department are managed by using Intune.

You install new computers for the users in the marketing department by using the Microsoft Deployment Toolkit (MDT).

You purchase an application named App1 that uses an MSI package.

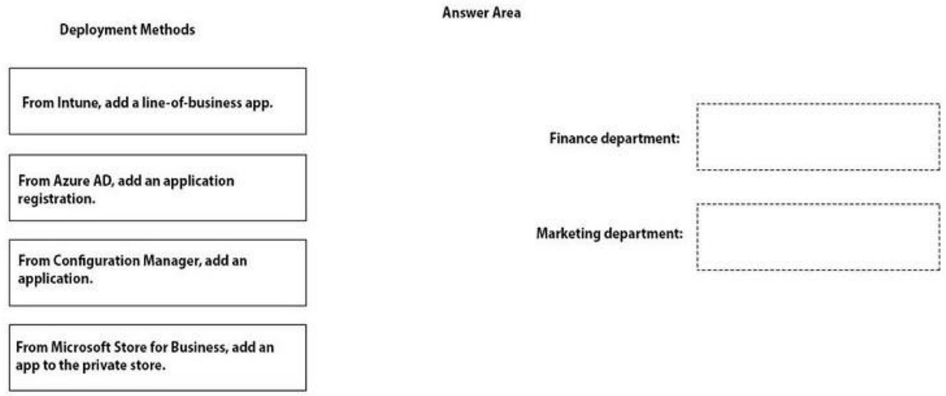

You need to install App1 on the finance department computers and the marketing department computers.

How should you deploy App1 to each department? To answer, drag the appropriate deployment methods to the correct departments. Each deployment method may be used once, more than once, or not at all. You may need to drag the split bat between panes or scroll to view content.

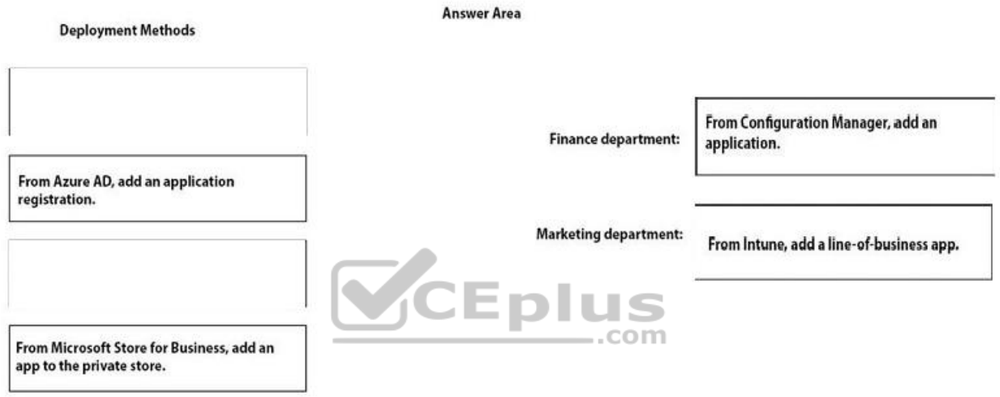

NOTE: Each correct selection is worth one point.

QUESTION 23
You have 500 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You plan to distribute certificates to the computers by using Simple Certificate Enrollment Protocol (SCEP).

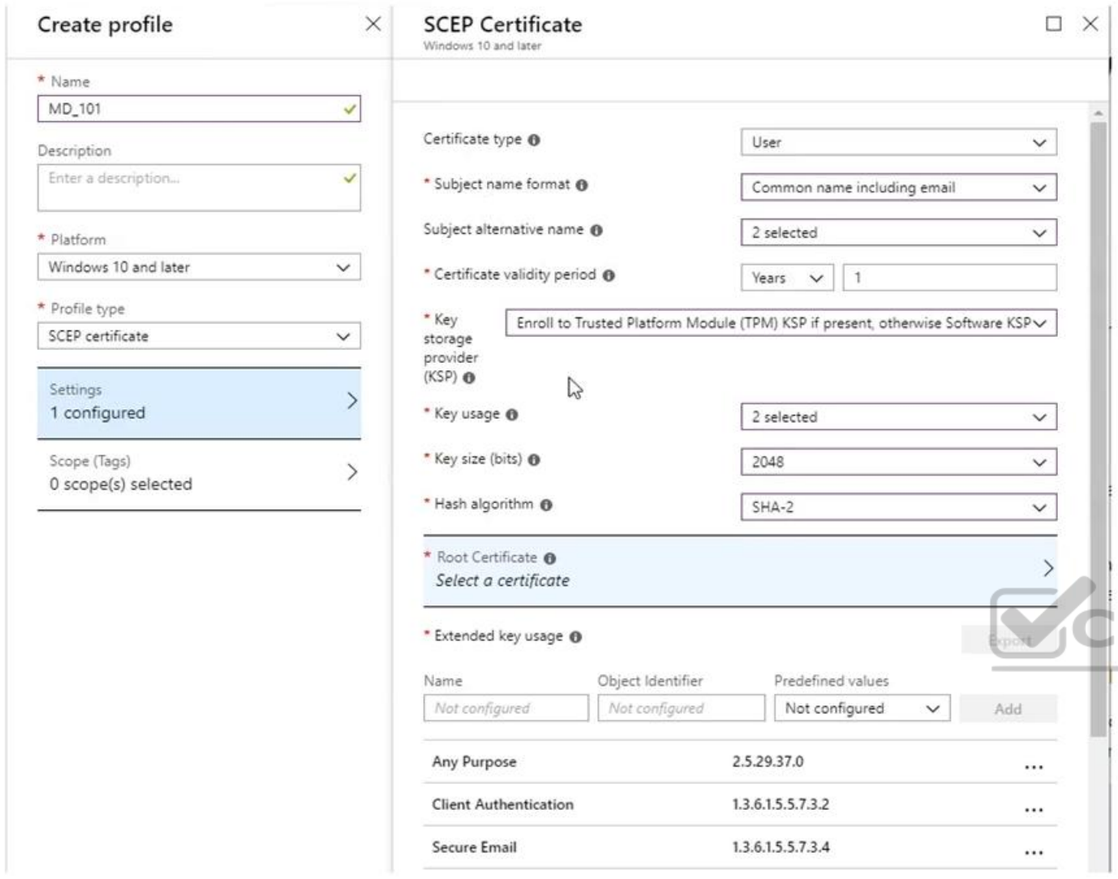

You have the servers shown in the following table.

Name	Configuration
Server1	Domain controller
Server2	Root certification authority (CA)
Server3	Subordinate certification authority (CA)
Server4	Network Device Enrollment Service (NDES)

NDES issues certificates from the subordinate CA.

You are configuring a device profile as shown in the exhibit. (Click the **Exhibit** tab.)

You need to complete the SCEP profile.

A. Server1
B. Server2
C. Server3
D. Server4

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:

QUESTION 24
You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.

You redirect Windows known folders to Microsoft OneDrive for Business.

Which folder will be included in the redirection?

https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/terms-of-use

QUESTION 26
HOTSPOT

You have unrooted devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	IP address
Device1	Windows	192.168.10.35
Device2	Android	10.10.10.40
Device3	Android	192.168.10.10

The devices are members of a group named Group1.

In Intune, you create a device compliance location that has the following configurations:

- Name: Network1
- IPv4 range: 192.168.0.0/16

In Intune, you create a device compliance policy for the Android platform. The policy has following configurations:

- Name: Policy1
- Device health: Rooted devices: Block
- Locations: Location: Network1
- Mark device noncompliant: Immediately
- Assigned: Group1

In Intune device compliance policy has the following configurations:

- Mark devices with no compliance policy assigned as: Compliant
- Enhanced jailbreak detection: Enabled
- Compliance status validity period (days): 20

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

QUESTION 28
Your company plans to deploy Windows 10 to devices that will be configured for English use and other devices that will be configured for Korean use.

You need to create a single multivariant provisioning package for the planned devices.

You create the provisioning package.

What should you do next to add the language settings to the package?

A. Modify the Customizations.xml file.
B. Create a file named Languages.xml that contains a header for Korean.
C. Modify the .ppkg file.
D. Create a file named Languages.xml that contains a header for English.

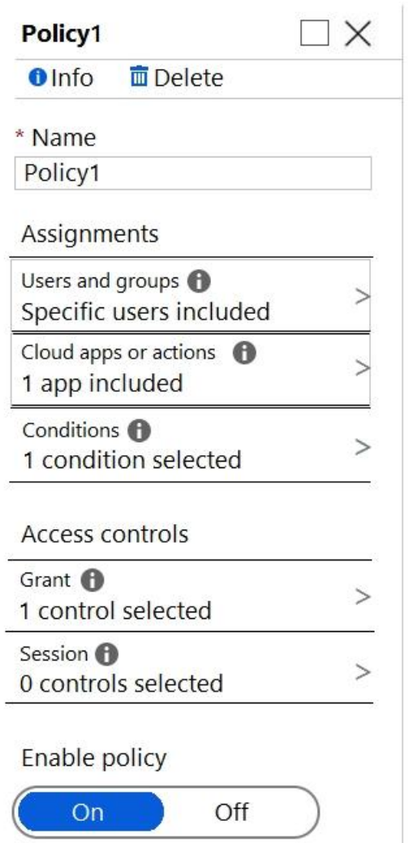

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Explanation:
Follow these steps to create a provisioning package with multivariant capabilities.
1. Build a provisioning package and configure the customizations you want to apply during certain conditions.
2. After you've configured the settings, save the project.
3. Open the project folder and copy the customizations.xml file to any local location.
4. Use an XML or text editor to open the customizations.xml file.
5. Edit the customizations.xml file to create a Targets section to describe the conditions that will handle your multivariant settings.
6. In the customizations.xml file, create a Variant section for the settings you need to customize.
7. Save the updated customizations.xml file and note the path to this updated file. You will need the path as one of the values for the next step.
8. Use the Windows Configuration Designer command-line interface to create a provisioning package using the updated customizations.xml.

References:
https://docs.microsoft.com/en-us/windows/configuration/provisioning-packages/provisioning-multivariant

QUESTION 29
You have a Microsoft 365 subscription.

You have a conditional access policy that requires multi-factor authentication (MFA) for users in a group name Sales when the users sign in from a trusted location. The policy is configured as shown in the exhibit. (Click the **Exhibit** tab.)

You create a compliance policy.

You need to ensure that the users are authenticated only if they are using a compliant device.

What should you configure in the conditional access policy?

A. a condition
B. a session control
C. a cloud app
D. a grant control

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Explanation:
The device state condition can be used to exclude devices that are hybrid Azure AD joined and/or devices marked as compliant with a Microsoft Intune compliance policy from an organization's Conditional Access policies.

Device state is located on the Condition tab.

Reference:
https://docs.microsoft.com/en-us/azure/active-directory/conditional-access/concept-conditional-access-conditions#device-state

QUESTION 30

You have an Azure Active Directory (Azure AD) tenant that contains a user named User1. User1 has the device shown in the following table.

Name	Operating system	Version	Join type	Mobile device management (MDM)
Device1	Windows	10.0.18362.0	Azure AD registered	*None*
Device2	Windows	10.0.18362.30	Azure AD registered	Microsoft Intune
Device3	Windows	10.0.18362.0	Azure AD joined	*None*
Device4	Windows	10.0.18362.30	Azure AD joined	Microsoft Intune

Enterprise State Roaming is configured for User1.

User1 signs in to Device4 and changes the desktop.

You need to identify on which devices User1 will have a changed desktop.

Which devices should you identify?

A. Device1, Device2, Device3, and Device4
B. Device4 only
C. Device2, Device3, and Device4 only
D. Device2 and Device4 only
E. Device3 and Device4 only

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Explanation:
The requirements of Enterprise State Roaming are:
- Windows 10, with the latest updates, and a minimum Version 1511 (OS Build 10586 or later) is installed on the device.
- The device is Azure AD joined or hybrid Azure AD joined.
- Ensure that Enterprise State Roaming is enabled for the tenant in Azure AD.
- The user is assigned an Azure Active Directory Premium license.
- The device must be restarted and the user must sign in again to access Enterprise State Roaming features.

Reference:
https://docs.microsoft.com/en-us/azure/active-directory/devices/enterprise-state-roaming-troubleshooting

QUESTION 31
HOTSPOT

You have a workgroup computer named Computer1 that runs Windows 10 and has the users shown in the following table.

Name	Member of
User1	Group1
User2	Group2
User3	Group3

Group1 is a member of Group3.

You are creating a file named Kiosk.xml that specifies a lockdown profile for a multi-app kiosk.

Kiosk.xml contains the following section.

CEplus.com

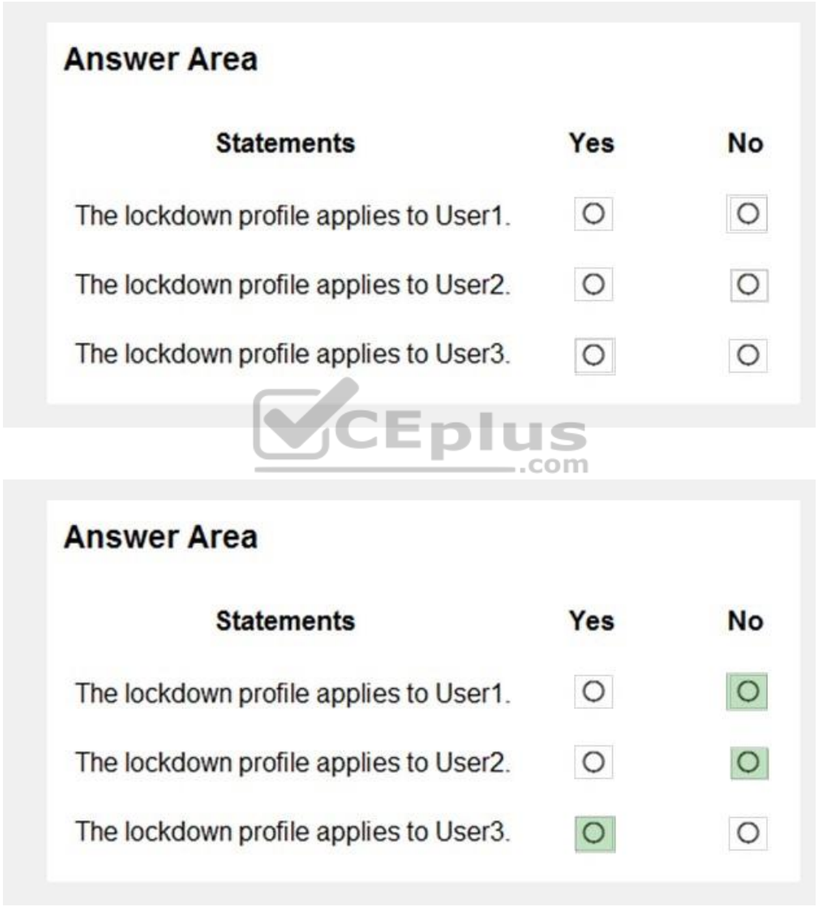

```
<Configs>
  <Config>
    <UserGroup Type="LocalGroup" Name="Group3" />
    <DefaultProfile Id="{9A2A490F-10F6-4764-974A-43B19E722C23}"/>
  </Config>
</Configs>
```

You apply Kiosk.xml to Computer1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

HOTSPOT

CEplus.com

Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD). The domain contains the users shown in the following table.

Name	Source	User profile path
User1	Windows Active Directory	\\Server1.contoso.com\users\User1
User2	Azure Active Directory	*Not applicable*

Enterprise State Roaming is enabled for User2.

You have the computers shown in the following table.

Name	Operating system	Joined to
Computer1	Windows 10	Azure AD tenant
Computer2	Windows 8.1	On-premises Active Directory domain
Computer3	Windows 10	Azure AD tenant

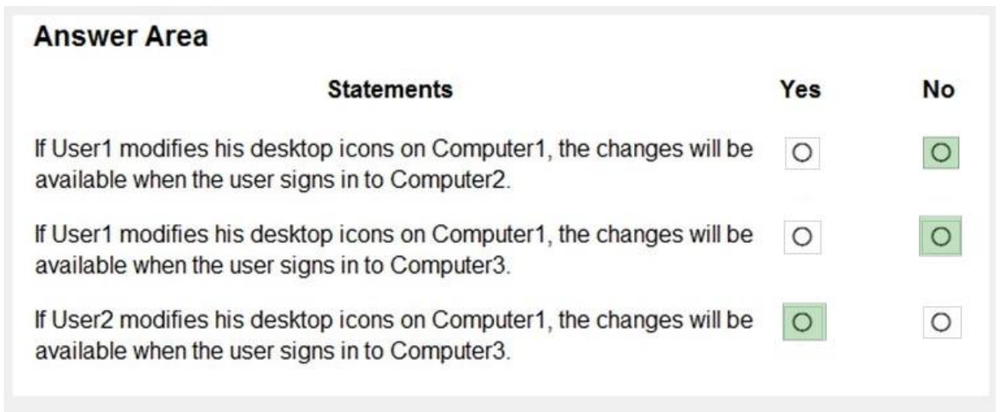

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

Correct Answer:

Section: (none)
Explanation

www.vceplus.com - Free Questions & Answers - Online Courses - Convert VCE to PDF - VCEplus.com

CEplus.com

Explanation/Reference:
Explanation:

The requirements of Enterprise State Roaming are:
- Windows 10, with the latest updates, and a minimum Version 1511 (OS Build 10586 or later) is installed on the device.
- The device is Azure AD joined or hybrid Azure AD joined.
- Ensure that Enterprise State Roaming is enabled for the tenant in Azure AD.
- The user is assigned an Azure Active Directory Premium license.
- The device must be restarted and the user must sign in again to access Enterprise State Roaming features.

Box 1: No
Computer2 runs Windows 8.1.
Enterprise State Roaming requires Windows 10, with the latest updates, and a minimum Version 1511 (OS Build 10586).
Also, Enterprise State Roaming is enabled for User2, not for User1.

Box 2: No
The device must be Azure AD joined or hybrid Azure AD joined.
Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD), in other words, a hybrid Azure AD.
Also, Enterprise State Roaming is enabled for User2, not for User1.

Box 3: Yes

QUESTION 33
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

You have an Azure Directory group named Group1 that contains Windows 10 Enterprise devices and Windows 10 Pro devices.

From Microsoft Intune, you create a device configuration profile named Profile1.

You need to ensure that Profile1 applies to only the Windows 10 Enterprise devices in Group1.

Solution: You create an Azure Active Directory group that contains only the Windows 10 Enterprise devices. You assign Profile1 to the new group.

Does this meet the goal?

A. Yes
B. No

Correct Answer: B
Section: (none)
Explanation

QUESTION 43
Your network contains an on-premises Active Directory domain and an Azure Active Directory (Azure AD) tenant.

The Default Domain Policy Group Policy Object (GPO) contains the settings shown in the following table.

Name	GPO value
LockoutBadCount	0
MaximumPasswordAge	42
MinimumPasswordAge	1
MinimumPasswordLength	7
PasswordComplexity	True
PasswordHistorySize	24

You need to migrate the existing Default Domain Policy GPO settings to a device configuration profile.

Which type of device configuration profile should you create?

A. Custom
B. Endpoint protection
C. Administrative Templates
D. Device restrictions

Correct Answer: A
Section: (none)
Explanation

QUESTION 44
HOTSPOT

Your network contains an Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD). The domain contains computers that run Windows 10. The computers are configured as shown in the following table.

Name	Member of
Computer1	Group1
Computer2	Group2

All the computers are enrolled in Microsoft Intune.

You configure the following Maintenance Scheduler settings in the Default Domain Policy:

- Turn off auto-restart for updates during active hours: Enabled
- Active hours start: 08:00
- Active hours end: 22:00

In Intune, you create a device configuration profile named Profile1 that has the following OMA-URI settings:

- ./Device/Vendor/MSFT/Policy/Config/ControlPolicyConflict/MDMWinsOverGP set to value 1
- ./Device/Vendor/MSFT/Policy/Config/Update/ActiveHoursStart set to value 9
- ./Device/Vendor/MSFT/Policy/Config/Update/ActiveHoursEnd set to value 21

You assign Profile to Group1.

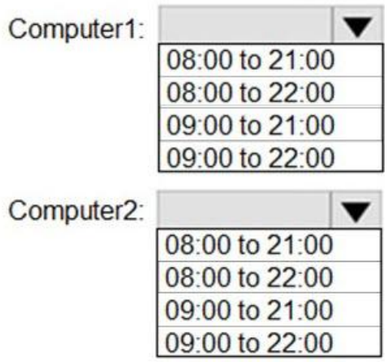

How are the active hours configured on Computer1 and Computer2? To answer, select the appropriate options in the answer area.

QUESTION 50

Your company has a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. All users have computers that run Windows 10. The computers are joined to Azure AD and managed by using Microsoft Intune.

You need to ensure that you can centrally monitor the computers by using the Update Compliance solution.

What should you create in Intune?

A. a device configuration profile
B. a conditional access policy
C. a device compliance policy
D. an update policy

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Reference:
https://www.jeffgilb.com/update-compliance-with-intune/

QUESTION 51
HOTSPOT

You have a Microsoft Intune subscription that has the following device compliance policy settings:

- Mark devices with no compliance policy assigned as: Compliant
- Compliance status validity period (days): 14

On January 1, you enroll Windows 10 devices in Intune as shown in the following table.

Name	BitLocker Drive Encryption (BitLocker)	Firewall	Scope (Tags)	Member of
Device1	Enabled	Off	Tag1	Group1
Device2	Disabled	On	Tag2	Group2

On January 4, you create the following two device compliance policies:

- Name: Policy1
- Platform: Windows 10 and later
- Require BitLocker: Require
- Mark device noncompliant: 5 days after noncompliance
- Scope (Tags): Tag1

- Name: Policy2
- Platform: Windows 10 and later
- Firewall: Require
- Mark device noncompliant: Immediately
- Scope (Tags): Tag2

On January 5, you assign Policy1 and Policy2 to Group1.

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

Hot Area:

CEplus.com

Answer Area

Statements	Yes	No
On January 7, Device1 is marked as compliant.	O	O
On January 8, Device1 is marked as compliant.	O	O
On January 8, Device2 is marked as compliant.	O	O

Correct Answer:

Answer Area

Statements	Yes	No
On January 7, Device1 is marked as compliant.	O	O
On January 8, Device1 is marked as compliant.	O	O
On January 8, Device2 is marked as compliant.	O	O

CEplus.com

Section: (none)
Explanation

Explanation/Reference:
Explanation:

Box 1: No.
Policy1 and Policy2 apply to Group1 which Device1 is a member of. Device1 does not meet the firewall requirement in Policy2 so the device will immediately be marked as non-compliant.

Box 2: No
For the same reason as Box1.

Box 3: Yes
Policy1 and Policy2 apply to Group1. Device2 is not a member of Group1 so the policies don't apply.
The Scope (tags) have nothing to do with whether the policy is applied or not. The tags are used in RBAC.

QUESTION 52
HOTSPOT

You have 100 Windows 10 devices that are managed by using Microsoft Endpoint Manager.

You plan to sideload an app to the devices.

You need to configure Microsoft Endpoint Manager to enable sideloading.

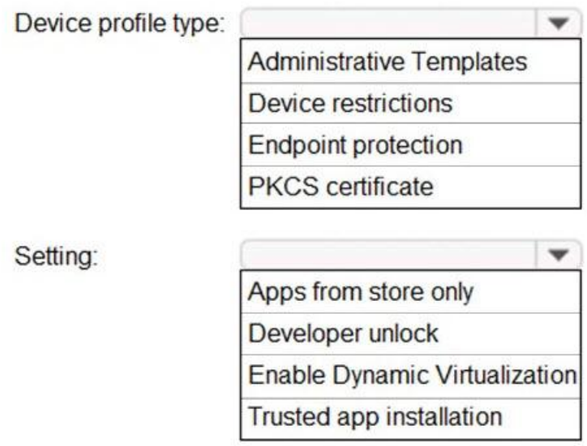

Which device profile type and setting should you configure? To answer, select the appropriate options in the answer area.

Manage and Protect Devices part 01

QUESTION 1

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study
To display the first question in this case study, click the **Next** button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the **Question** button to return to the question.

Overview
Contoso, Ltd, is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

Contoso has the users and computers shown in the following table.

Location	Users	Laptops	Desktop computers	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

The company has IT, human resources (HR), legal (LEG), marketing (MKG) and finance (FIN) departments.

Contoso uses Microsoft Store for Business and recently purchased a Microsoft 365 subscription.

The company is opening a new branch office in Phoenix. Most of the users in the Phoenix office will work from home.

Existing Environment
The network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

All member servers run Windows Server 2016. All laptops and desktop computers run Windows 10 Enterprise.

The computers are managed by using Microsoft Endpoint Configuration Manager. The mobile devices are managed by using Microsoft Intune.

The naming convention for the computers is the department acronym, followed by a hyphen, and then four numbers, for example, FIN-6785. All the computers are joined to the on-premises Active Directory domain.

Each department has an organization unit (OU) that contains a child OU named Computers. Each computer account is in the Computers OU of its respective department.

Intune Configuration

CEplus.com

The domain has the users shown in the following table.

Name	Role	Member of
User1	Intune administrator	GroupA
User2	*None*	GroupB

User2 is a device enrollment manager (DEM) in Intune.
The devices enrolled in Intune are shown in the following table.

Name	Platform	Encryption	Member of
Device1	Android	Disabled	Group1
Device2	iOS	Not applicable	Group2, Group3
Device3	Android	Disabled	Group2, Group3
Device4	iOS	Not applicable	Group2

The device compliance policies in Intune are configured as shown in the following table.

Name	Platform	Require encryption	Assigned
Policy1	Android	Not configured	Yes
Policy2	iOS	Not applicable	Yes
Policy3	Android	Require	Yes

The device compliance policies have the assignments shown in the following table:

Name	Include	Exclude
Policy1	Group3	*None*
Policy2	Group2	Group3
Policy3	Group1	*None*

The device limit restrictions in Intune are configured as shown in the following table.

Priority	Name	Device limit	Assigned to
1	Restriction1	15	GroupB
2	Restriction2	10	GroupA
Default	All users	5	All users

Requirements

Planned Changes
Contoso plans to implement the following changes:

- Provide new computers to the Phoenix office users. The new computers have Windows 10 Pro preinstalled and were purchased already.
- Start using a free Microsoft Store for Business app named App1.
- Implement co-management for the computers.

Technical Requirements:
Contoso must meet the following technical requirements:

- Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.
- Deploy Windows 10 Enterprise to the computers of the Phoenix office users by using Windows Autopilot.
- Monitor the computers in the LEG department by using Windows Analytics.
- Create a provisioning package for new computers in the HR department.
- Block iOS devices from sending diagnostic and usage telemetry data.
- Use the principle of least privilege whenever possible.
- Enable the users in the MKG department to use App1.
- Pilot co-management for the IT department.

A.

Manage and Protect Devices part 02

QUESTION 1
Your company uses Microsoft Intune to manage devices. You need to ensure that only Android devices that use Android work profiles can enroll in Intune.
Which two configurations should you perform in the device enrollment restrictions? Each correct answer presents part of the solution.
NOTE: each correct selection is worth one point.

A. From Select platforms, set Android work profile to Allow.
B. From Configure platforms, set Android Personally Owned to Block.
C. From Configure platforms, set Android Personally Owned to Allow.
D. From Select platforms, set Android to Block.

Correct Answer: AD
Section: (none)
Explanation

Explanation/Reference:
Reference: https://docs.microsoft.com/en-us/InTune/enrollment-restrictions-set

QUESTION 2
You have a Microsoft Azure Log Analytics workplace that collects all the event logs from the computers at your company.
You have a computer named Computer1 than runs Windows 10. You need to view the events collected from Computer1.
Which query should you run in Log Analytics?

A. Event
| where Computer = = "Computer1"
B. ETWEvent
| where SourceSystem = = "Computer1"
C. ETWEvent
| where Computer = = "Computer1"
D. Event
| where SourceSystem = = "Computer1"

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Reference: https://docs.microsoft.com/en-us/azure/azure-monitor/platform/data-sources-windows-events

QUESTION 3
You have 200 computers that run Windows 10. The computers are joined to Microsoft Azure Active Directory (Azure AD) and enrolled in Microsoft Intune.
You need to ensure that only applications that you explicitly allow can run on the computers.
What should you use?

A. Microsoft Defender Credential Guard
B. Microsoft Defender Exploit Guard
C. Microsoft Defender Application Guard
D. Microsoft Defender Antivirus.

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Reference: https://docs.microsoft.com/en-us/windows/security/threat-protection/device-guard/introduction-to-device-guard-virtualization-based-security-and-windows-defender-application-control

QUESTION 4
Your company has a Microsoft Azure Active Directory (Azure AD) tenant. All users in the company are licensed for Microsoft Intune.
You need to ensure that the users enroll their iOS device in Intune.

What should you configure first?

A. A Device Enrollment Program (DEP) token.
B. An Intune device configuration profile.
C. A Device enrollment manager (DEM) account.
D. An Apple MDM Push certificate.

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 5
You have a shared computer that runs Windows 10.
The computer is infected with a virus.
You discover that a malicious TTF font was used to compromise the computer.
You need to prevent this type of threat from affecting the computer in the future.
What should you use?

A. Microsoft Defender Exploit Guard
B. Microsoft Defender Application Guard
C. Microsoft Defender Credential Guard
D. Microsoft Defender System Guard
E. Microsoft Defender SmartScreen

Correct Answer: A
Section: (none)
Explanation

QUESTION 6
Your company implements Microsoft Azure Active Directory (Azure AD), Microsoft 365, Microsoft Intune, and Azure Information Protection.
The company's security policy states the following:
Personal devices do not need to be enrolled in Intune.
Users must authenticate by using a PIN before they can access corporate email data.
Users can use their personal iOS and Android devices to access corporate cloud services.
Users must be prevented from copying corporate email data to a cloud storage service other than Microsoft OneDrive for Business.
You need to configure a solution to enforce the security policy.
What should you create?

A. a data loss prevention (DLP) policy from the Security & Compliance admin center
B. a supervision policy from the Security & Compliance admin center
C. an app protection policy from the Intune admin center
D. a device configuration profile from the Intune admin center

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:

QUESTION 8
HOTSPOT

Your company has an infrastructure that has the following:

- A Microsoft 365 tenant
- An Active Directory forest
- Microsoft Store for Business
- A Key Management Service (KMS) server
- A Windows Deployment Services (WDS) server
- A Microsoft Azure Active Directory (Azure AD) Premium tenant

The company purchases 100 new computers that run Windows 10.

You need to ensure that the new computers are joined automatically to Azure AD by using Windows AutoPilot.

What should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Answer Area

Management tool:

- Azure Active Directory admin center
- Microsoft Store for Business
- Volume Activation Management Tool console
- Windows Deployment Services console

Required information from each computer:

- Device serial number and hardware hash
- MAC address and computer name
- Volume License Key and computer name

Correct Answer:

QUESTION 16
HOTSPOT

Your company has a Microsoft Azure Active Directory (Azure AD) tenant and computers that run Windows 10.

The company uses Microsoft Intune to manage the computers.

The Azure AD tenant has the users shown in the following table.

Name	Member of
User1	Group1
User2	Group1, Group2
User3	*None*

The device type restrictions in Intune are configured as shown in the following table:

CEplus.com

Priority	Name	Allowed platform	Assigned to
1	Policy1	Android, iOS, Windows (MDM)	*None*
2	Policy2	Windows (MDM)	Group2
3	Policy3	Android, iOS	Group1
Default	All users	Android, Windows (MDM)	All users

User3 is a device enrollment manager (DEM) in Intune.

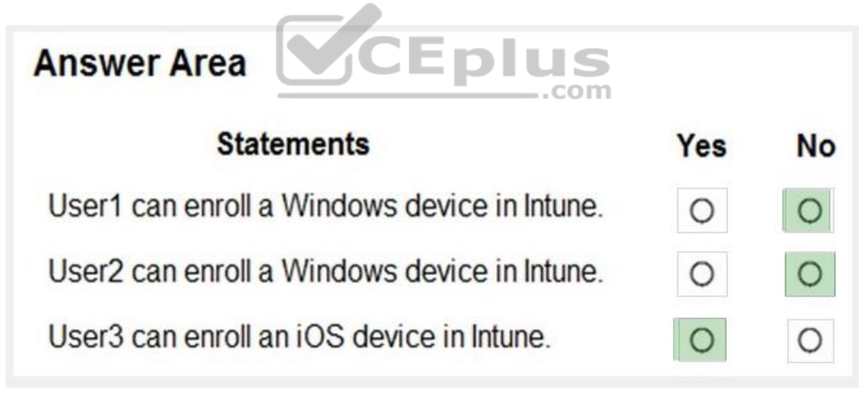

For each of the following statements, select Yes if the statement is true. Otherwise, select No.

NOTE: Each correct selection is worth one point.

https://docs.microsoft.com/en-us/windows/deployment/update/windows-analytics-get-started

QUESTION 18
You need to enable Microsoft Defender Credential Guard on computers that run Windows 10.

What should you install on the computers?

A. Hyper-V
B. Microsoft Defender Application Guard
C. a guarded host
D. containers

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

QUESTION 19
HOTSPOT

Your network contains an Active Directory domain. Active Directory is synced with Microsoft Azure Active Directory (Azure AD).

There are 500 Active Directory domain-joined computers that run Windows 10 and are enrolled in Microsoft Intune.

You plan to implement Microsoft Defender Exploit Guard.

You need to create a custom Microsoft Defender Exploit Guard policy, and then distribute the policy to all the computers.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

CEplus.com

Answer Area

Tool to use to configure the settings:

- Security & Compliance in Microsoft 365
- Windows Configuration Designer
- Windows Defender Security Center

Distribution method:

- An Azure policy
- A Group Policy object (GPO)
- An Intune device compliance policy

Correct Answer:

Answer Area

Tool to use to configure the settings:

- Security & Compliance in Microsoft 365
- Windows Configuration Designer
- Windows Defender Security Center

Distribution method:

QUESTION 20
Your company has a Microsoft 365 subscription.

A new user named Admin1 is responsible for deploying Windows 10 to computers and joining the computers to Microsoft Azure Active Directory (Azure AD).

Admin1 successfully joins computers to Azure AD.

Several days later, Admin1 receives the following error message: “This user is not authorized to enroll. You can try to do this again or contact your system administrator with the error code (0x801c0003).”

You need to ensure that Admin1 can join computers to Azure AD and follow the principle of least privilege.
What should you do?

A. Assign the Global administrator role to Admin1.
B. Modify the Device settings in Azure AD.
C. Assign the Cloud device administrator role to Admin1.
D. Modify the User settings in Azure AD.

Correct Answer: B

QUESTION 25

CEplus.com

Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has an Azure Active Directory (Azure AD) tenant named contoso.com that contains several Windows 10 devices.

When you join new Windows 10 devices to contoso.com, users are prompted to set up a four-digit pin.

You need to ensure that the users are prompted to set up a six-digit pin when they join the Windows 10 devices to contoso.com.

Solution: From the Azure Active Directory admin center, you configure automatic mobile device management (MDM) enrollment. From the Device Management admin center, you configure the Windows Hello for Business enrollment options.

Does this meet the goal?

A. Yes
B. No

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Explanation:
Hello for Business is an alternative sign-in method that uses Active Directory or an Azure Active Directory account to replace a password, smart card, or a virtual smart card. It lets you use a user gesture to sign in, instead of a password. A user gesture might be a PIN, biometric authentication such as Windows Hello, or an external device such as a fingerprint reader.

Intune integrates with Hello for Business in two ways:
- An Intune policy can be created under Device enrollment. This policy targets the entire organization (tenant-wide). It supports the Windows AutoPilot out-of-box-experience (OOBE) and is applied when a device enrolls.
- An identity protection profile can be created under Device configuration. This profile targets assigned users and devices, and is applied during check-in.

QUESTION 33
You have a hybrid Microsoft Azure Active Directory (Azure AD) tenant, a Microsoft System Center Configuration Manager (Current Branch) environment, and a Microsoft 365 subscription.

You have computers that run Windows 10 as shown in the following table.

Name	Managed by Configuration Manager	Domain membership
Computer1	Yes	Active Directory-joined
Computer2	Yes	Hybrid Azure AD-joined
Computer3	Yes	Azure AD-joined

CEplus.com

You plan to use Microsoft 365 Device Management.

Which computers support co-management by Configuration Manager and Device Management?

A. Computer3 only
B. Computer1 and Computer2 only
C. Computer2 only
D. Computer1, Computer2, and Computer3

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference:
https://docs.microsoft.com/en-us/mem/configmgr/comanage/overview

QUESTION 34
You have a computer named Computer1 that runs Windows 10.

Computer1 is used by a user named User1.

You need to ensure that when User1 opens websites from untrusted locations by using Microsoft Edge, Microsoft Edge runs in an isolated container.

What should you do first?

A. From Windows Features, turn on Microsoft Defender Application Guard.
B. From Windows Features, turn on Hyper-V Platform.

C. From Windows Security, configure the Virus & threat protection settings.
D. From Windows Security, configure the Device security settings.

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:

https://docs.microsoft.com/en-us/windows/security/threat-protection/windows-defender-application-guard/install-wd-app-guard

QUESTION 35
You have computers that run Windows 10 and are managed by using Microsoft Intune.

Users store their files in a folder named D:\Folder1.

You need to ensure that only a trusted list of applications is granted write access to D:\Folder1.

What should you configure in the device configuration profile?

A. Microsoft Defender SmartScreen
B. Microsoft Defender Exploit Guard
C. Microsoft Defender Application Guard
D. Microsoft Defender Application Control

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Reference:
https://www.microsoft.com/security/blog/2017/10/23/windows-defender-exploit-guard-reduce-the-attack-surface-against-next-generation-malware/

QUESTION 36
HOTSPOT

Your company uses Microsoft Endpoint Configuration Manager and purchases a Microsoft 365 subscription.You need to set up Desktop Analytics.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

CEplus.com

Answer Area

Set up the Desktop Analytics cloud service by using:

- The Configuration Manager console
- The Microsoft 365 admin center
- The Microsoft Endpoint Manager admin center

From the Configuration Manager console, select:

- Add Microsoft Intune Subscription
- Configure Azure Services
- Configure co-management
- Create Cloud Management Gateway

Correct Answer:

Answer Area

Set up the Desktop Analytics cloud service by using:

- The Configuration Manager console
- The Microsoft 365 admin center
- The Microsoft Endpoint Manager admin center

From the Configuration Manager console, select:

- Add Microsoft Intune Subscription
- Configure Azure Services
- Configure co-management
- Create Cloud Management Gateway

Section: (none)
Explanation

Explanation/Reference:
Reference:
https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/connect-configmgr
https://en.wikipedia.org/wiki/Microsoft System Center Configuration Manager

QUESTION 37
Your network contains an Active Directory domain named contoso.com. The domain contains computers that run Windows 10 and are joined to the domain.

The domain is synced to Microsoft Azure Active Directory (Azure AD).

You create an Azure Log Analytics workspace and deploy the Update Compliance solution.

You need to enroll the computers in the Update Compliance solution.

Which Group Policy setting should you configure?

A. Specify intranet Microsoft update service location
B. Allow Telemetry

CEplus.com

C. Configure the Commercial ID
D. Connected User Experiences and Telemetry

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Explanation:
Microsoft uses a unique commercial ID to map information from user computers to your Azure workspace. Copy your commercial ID key from any of the Windows Analytics solutions you have added to your Windows Portal, and then deploy it to user computers.

Reference:
https://docs.microsoft.com/en-us/windows/deployment/update/update-compliance-get-started

QUESTION 38
You have an Azure Active Directory (Azure AD) tenant and 100 Windows 10 devices that are Azure AD joined and managed by using Microsoft Intune.

You need to configure Microsoft Defender Firewall and Microsoft Defender Antivirus on the devices. The solution must minimize administrative effort.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. To configure Microsoft Defender Antivirus, create a device configuration profile and configure the **Endpoint protection** settings.
B. To configure Microsoft Defender Firewall, crate a device configuration profile and configure the **Device restrictions** settings.
C. To configure Microsoft Defender Firewall, create a Group Policy Object (GPO) and configure **Microsoft Defender Firewall with Advanced Security**.
D. To configure Microsoft Defender Antivirus, create a Group Policy Object (GPO) and configure **Microsoft Defender Antivirus** settings.
E. To configure Microsoft Defender Antivirus, create a device configuration profile and configure the **Device restrictions** settings.
F. To configure Microsoft Defender Firewall, create a device configuration profile and configure the **Endpoint protection** settings.

Correct Answer: AF
Section: (none)
Explanation

Explanation/Reference:
Explanation:
F: With Intune, you can use device configuration profiles to manage common endpoint protection security features on devices, including:
- Firewall
- BitLocker
- Allowing and blocking apps
- Microsoft Defender and encryption

Reference:
https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-protection-configure

https://docs.microsoft.com/en-us/mem/intune/protect/endpoint-security-policy#create-an-endpoint-security-policy

QUESTION 39
Note: This question is part of a series of questions that present the same scenario. Each question in the series contains a unique solution that might meet the stated goals. Some question sets might have more than one correct solution, while others might not have a correct solution.

After you answer a question in this section, you will NOT be able to return to it. As a result, these questions will not appear in the review screen.

Your company has several Windows 10 devices that are enrolled in Microsoft Intune.

You deploy a new computer named Computer1 that runs Windows 10 and is in a workgroup.

You need to enroll Computer1 in Intune.

Solution: From Computer1, you sign in to https://portal.azure.com and use the Windows enrollment blade.

CEplus.com

Does this meet the goal?

A. Yes
B. No

Correct Answer: B
Section: (none)
Explanation

Explanation/Reference:
Explanation:
Use MDM enrolment.
MDM only enrollment lets users enroll an existing Workgroup, Active Directory, or Azure Active directory joined PC into Intune. Users enroll from Settings on the existing Windows PC.

Reference:
https://docs.microsoft.com/en-us/mem/intune/enrollment/windows-enrollment-methods

QUESTION 40
HOTSPOT

A company named A.Datum Corporation uses Microsoft Endpoint Configuration Manager, Microsoft Intune, and Desktop Analytics.

A.Datum purchases a company named Contoso, Ltd. Contoso has devices that run the following operating systems:

- Windows 8.1
- Windows 10
- Android
- iOS

A.Datum plans to use Desktop Analytics to monitor the Contoso devices.

You need to identify which devices can be monitored by using Desktop Analytics and how to add the devices to Desktop Analytics.

What should you identify? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

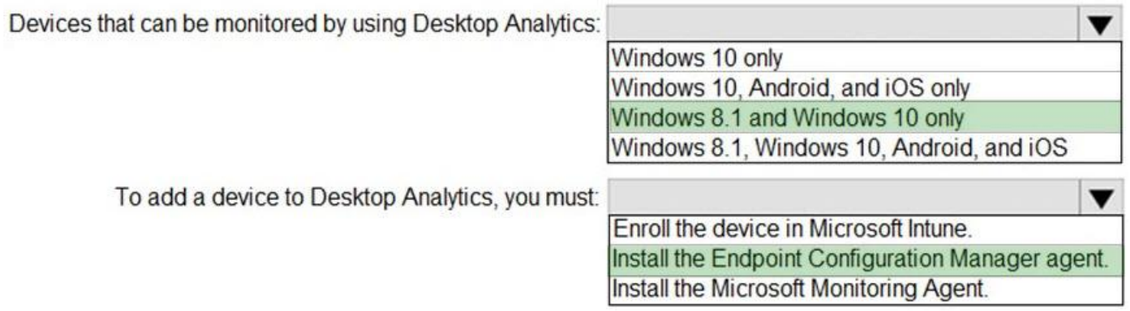

Hot Area:

Correct Answer:

CEplus.com

Answer Area

Explanation

Explanation/Reference:
Reference:
https://docs.microsoft.com/en-us/mem/configmgr/desktop-analytics/overview

QUESTION 41
HOTSPOT

You have a Microsoft 365 subscription.

You plan to enroll devices in Microsoft Endpoint Manager that have the platforms and versions shown in the following table.

Platform	Version
Android	8, 9
iOS	11, 12

You need to configure device enrollment to meet the following requirements:

- Ensure that only devices that have approved platforms and versions can enroll in Endpoint Manager.
- Ensure that devices are added to Microsoft Azure Active Directory (Azure AD) groups based on a selection made by users during the enrollment.

Which device enrollment setting should you configure for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

CEplus.com

Answer Area

Ensure that only devices that have approved platforms and versions can enroll in Endpoint Manager:

- Android enrollment
- Apple enrollment
- Corporate device identifiers
- Device categories
- Enrollment restrictions
- Windows enrollment

Ensure that devices are added to Azure AD groups based on a selection made by users during enrollment:

- Android enrollment
- Apple enrollment
- Corporate device identifiers
- Device categories
- Enrollment restrictions
- Windows enrollment

Correct Answer:

Answer Area

Ensure that only devices that have approved platforms and versions can enroll in Endpoint Manager:

- Android enrollment
- Apple enrollment
- Corporate device identifiers
- Device categories
- Enrollment restrictions
- Windows enrollment

Ensure that devices are added to Azure AD groups based on a selection made by users during enrollment:

- Android enrollment
- Apple enrollment
- Corporate device identifiers
- Device categories
- Enrollment restrictions
- Windows enrollment

Section: (none)
Explanation

Explanation/Reference:

QUESTION 42
HOTSPOT

Your company has 1,000 Windows 10 devices that are enrolled in Windows Analytics.

You need to view the following information:

- The number of devices that are vulnerable to Spectre and Meltdown vulnerabilities

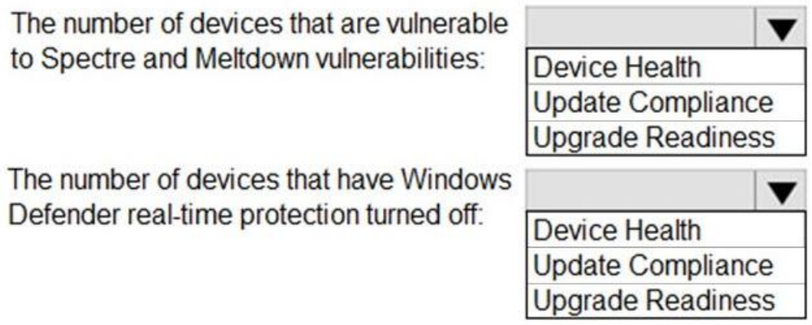

CEplus.com

- The number of devices that have Windows Defender real-time protection turned off

Which Windows Analytics solutions should you use? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Correct Answer:

Section: (none)
Explanation

Explanation/Reference:
Explanation:

Note: Windows Analytics is now known as Desktop Analytics and Windows Defender is now known as Microsoft Defender Antivirus

QUESTION 43
Your network contains an on-premises Active Directory domain named contoso.com that syncs to Azure Active Directory (Azure AD).

You have the Windows 10 devices shown in the following table.

CEplus.com

Name	Active Directory	Endpoint Configuration Manager agent	Microsoft Intune	Azure AD
Device1	Joined	Not installed	Enrolled	Registered
Device2	Not joined	Installed	Enrolled	Registered
Device3	Not joined	Not installed	Enrolled	Joined
Device4	Joined	Installed	Not enrolled	Registered
Device5	Not joined	Installed	Not enrolled	Joined
Device6	Joined	Installed	Enrolled	Joined

You need to ensure that you can use co-management to manage all the Windows 10 devices.

Which two actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Join Device 1, Device2, and Device4 to Azure AD.
B. Unjoin Device3, Device5, and Device6 from Azure AD, and then register the devices in Azure AD.
C. Enroll Device4 and Device5 in Intune.
D. Join Device2, Device3, and Device5 to the domain.
E. Install the Endpoint Configuration Manager agent on Device1 and Device3.

Correct Answer: CE
Section: (none)
Explanation

Explanation/Reference:
Explanation:
Co-management enables you to concurrently manage Windows 10 devices by using both Configuration Manager and Microsoft Intune.
Co-management requires Configuration Manager version 1710 or later and enrollment in Microsoft Intune.
Windows 10 devices must be hybrid Azure AD joined.

Reference:
https://docs.microsoft.com/en-us/mem/configmgr/comanage/overview

QUESTION 44
HOTSPOT

Your network contains an Active Directory domain. Active Directory is synced with Microsoft Azure Active Directory (Azure AD).

There are 500 Active Directory domain-joined computers that run Windows 10 and are enrolled in Microsoft Intune.

You plan to implement Microsoft Defender Exploit Guard.

You need to create a custom Microsoft Defender Exploit Guard policy, and then distribute the policy to all the computers.

What should you do? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

CEplus.com

Answer Area

Tool to use to configure the settings:
- Security & Compliance in Microsoft 365
- Windows Security app
- Microsoft Endpoint Manager admin center

Distribution method:
- An Azure policy
- An Endpoint Protection configuration profile
- An Intune device compliance policy
- A device restrictions configuration profile

Correct Answer:

Answer Area

Tool to use to configure the settings:
- Security & Compliance in Microsoft 365
- Windows Security app
- Microsoft Endpoint Manager admin center

Distribution method:
- An Azure policy
- An Endpoint Protection configuration profile
- An Intune device compliance policy
- A device restrictions configuration profile

Manage Apps and Data part 01

QUESTION 1

This is a case study. Case studies are not timed separately. You can use as much exam time as you would like to complete each case. However, there may be additional case studies and sections on this exam. You must manage your time to ensure that you are able to complete all questions included on this exam in the time provided.

To answer the questions included in a case study, you will need to reference information that is provided in the case study. Case studies might contain exhibits and other resources that provide more information about the scenario that is described in the case study. Each question is independent of the other questions in this case study.

At the end of this case study, a review screen will appear. This screen allows you to review your answers and to make changes before you move to the next section of the exam. After you begin a new section, you cannot return to this section.

To start the case study
To display the first question in this case study, click the **Next** button. Use the buttons in the left pane to explore the content of the case study before you answer the questions. Clicking these buttons displays information such as business requirements, existing environment, and problem statements. When you are ready to answer a question, click the **Question** button to return to the question.

General Overview

Litware, Inc. is an international manufacturing company that has 3,000 employees. The company has sales, marketing, research, human resources (HR), development, and IT departments.

Litware has two main offices in New York and Los Angeles. Litware has five branch offices in Asia.

Existing Environment

Current Business Model
The Los Angeles office has 500 developers. The developers work flexible hours ranging from 11 AM to 10 PM.

Litware has a Microsoft Endpoint Configuration Manager deployment.

During discovery, the company discovers a process where users are emailing bank account information of its customers to internal and external recipients.

Current Environment
The network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD). The functional level of the forest and the domain is Windows Server 2012 R2. All domain controllers run Windows Server 2012 R2.

Litware has the computers shown in the following table.

Department	Windows version	Management platform	Domain-joined
Marketing	8.1	Endpoint Configuration Manager	Hybrid Azure-AD joined
Research	10	Endpoint Configuration Manager	Hybrid Azure-AD joined
HR	8.1	Endpoint Configuration Manager	Hybrid Azure-AD joined
Developers	10	Microsoft Intune	Azure AD-joined
Sales	10	Microsoft Intune	Azure AD-joined

The development department uses projects in Azure DevOps to build applications.

Most of the employees in the sales department are contractors. Each contractor is assigned a computer that runs Windows 10. At the end of each contract, the computer is assigned to a different contractor. Currently, the computers are re-provisioned manually by the IT department.

Problem Statements
Litware identifies the following issues on the network:

- Employees in sales department computers is too time the Los Angeles office report slow Internet performance when updates are downloading. The employees also report that the updates frequently consume considerable resources when they are installed. The Update settings are configured as shown in the Updates exhibit. (Click the Updates button.)
- Management suspects that the source code for the proprietary applications in Azure DevOps in being shared externally.
- Re-provisioning theconsuming.

Requirements

CEplus.com

Business Goals
Litware plans to transition to co-management for all the company-owned Windows 10 computers. Whenever possible, Litware wants to minimize hardware and software costs.

Device Management Requirements
Litware identifies the following device management requirements:

- Prevent the sales department employees from forwarding email that contains bank account information.
- Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in.
- Prevent employees in the research department from copying patented information from trusted applications to untrusted applications.

Technical Requirements
Litware identifies the following technical requirements for the planned deployment:

- Re-provision the sales department computers by using Windows AutoPilot.
- Ensure that the projects in Azure DevOps can be accessed from the corporate network only.
- Ensure that users can sign in to the Azure AD-joined computers by using a PIN. The PIN must expire every 30 days.
- Ensure that the company name and logo appears during the Out of Box Experience (OOBE) when using Windows AutoPilot.

QUESTION 2
HOTSPOT

You need to recommend a solution to meet the device management requirements.

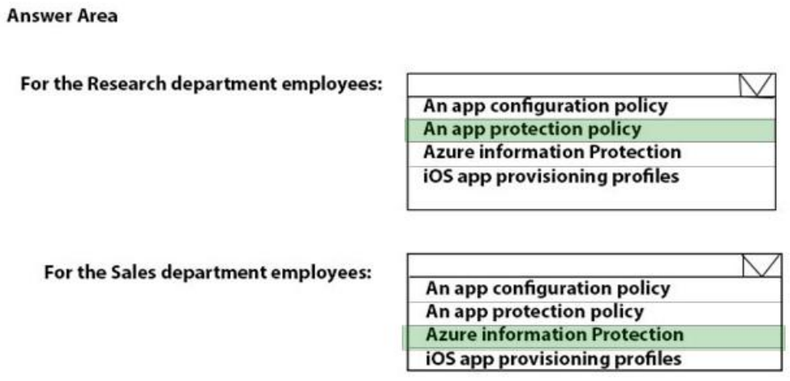

What should you include in the recommendation? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

Hot Area:

Correct Answer:

Section: (none)
Explanation

Explanation/Reference:
Explanation:

From the scenario:

CEplus.com

Litware identifies the following device management requirements:

- Prevent the sales department employees from forwarding email that contains bank account information.
- Ensure that Microsoft Edge Favorites are accessible from all computers to which the developers sign in.
- Prevent employees in the research department from copying patented information from trusted applications to untrusted applications.

Box 1:
Employees in the research department must be prevented from copying patented information from trusted applications to untrusted applications. This requires an App protection policy.

App protection policies make sure that the app-layer protections are in place. For example, you can:
- Require a PIN to open an app in a work context
- Control the sharing of data between apps
- Prevent the saving of company app data to a personal storage location

Box 2:
Employees in the sales department must be prevented from forwarding email that contains bank account information.

Azure Information Protection is a cloud-based solution that helps an organization to classify and optionally, protect its documents and emails by applying labels. Labels can be applied automatically by administrators who define rules and conditions, manually by users, or a combination where users are given recommendations.

Overview
Contoso, Ltd., is a consulting company that has a main office in Montreal and two branch offices in Seattle and New York.

Contoso has the users and computers shown in the following table.

Location	Users	Laptops	Desktop computers	Mobile devices
Montreal	2,500	2,800	300	3,100
Seattle	1,000	1,100	200	1,500
New York	300	320	30	400

The company has IT, human resources (HR), legal (LEG), marketing (MKG) and finance (FIN) departments.

Contoso uses Microsoft Store for Business and recently purchased a Microsoft 365 subscription.

The company is opening a new branch office in Phoenix. Most of the users in the Phoenix office will work from home.

Existing Environment
The network contains an Active Directory domain named contoso.com that is synced to Microsoft Azure Active Directory (Azure AD).

All member servers run Windows Server 2016. All laptops and desktop computers run Windows 10 Enterprise.

The computers are managed by using Microsoft System Center Configuration Manager. The mobile devices are managed by using Microsoft Intune.

The naming convention for the computers is the department acronym, followed by a hyphen, and then four numbers, for example, FIN-6785. All the computers are joined to the on-premises Active Directory domain.

Each department has an organization unit (OU) that contains a child OU named Computers. Each computer account is in the Computers OU of its respective department.

Intune Configuration

CEplus.com

The domain has the users shown in the following table.

Name	Role	Member of
User1	Intune administrator	GroupA
User2	*None*	GroupB

User2 is a device enrollment manager (DEM) in Intune.
The devices enrolled in Intune are shown in the following table.

Name	Platform	Encryption	Member of
Device1	Android	Disabled	Group1
Device2	iOS	Not applicable	Group2, Group3
Device3	Android	Disabled	Group2, Group3
Device4	iOS	Not applicable	Group2

The device compliance policies in Intune are configured as shown in the following table.

Name	Platform	Require encryption	Assigned
Policy1	Android	Not configured	Yes
Policy2	iOS	Not applicable	Yes
Policy3	Android	Require	Yes

The device compliance policies have the assignments shown in the following table:

Name	Include	Exclude
Policy1	Group3	*None*
Policy2	Group2	Group3
Policy3	Group1	*None*

The device limit restrictions in Intune are configured as shown in the following table.

Priority	Name	Device limit	Assigned to
1	Restriction1	15	GroupB
2	Restriction2	10	GroupA
Default	All users	5	All users

Requirements

Planned Changes
Contoso plans to implement the following changes:

- Provide new computers to the Phoenix office users. The new computers have Windows 10 Pro preinstalled and were purchased already.
- Start using a free Microsoft Store for Business app named App1.
- Implement co-management for the computers.

Technical Requirements:
Contoso must meet the following technical requirements:

- Ensure that the users in a group named Group4 can only access Microsoft Exchange Online from devices that are enrolled in Intune.
- Deploy Windows 10 Enterprise to the computers of the Phoenix office users by using Windows Autopilot.
- Monitor the computers in the LEG department by using Windows Analytics.
- Create a provisioning package for new computers in the HR department.
- Block iOS devices from sending diagnostic and usage telemetry data.
- Use the principle of least privilege whenever possible.
- Enable the users in the MKG department to use App1.
- Pilot co-management for the IT department.

Manage Apps and Data part 03

QUESTION 1
Your company has a main office and six branch offices. The branch offices connect to the main office by using a WAN link. All offices have a local Internet connection and a Hyper-V host cluster.
The company has a Microsoft Endpoint Configuration Manager deployment. The main office is the primary site. Each branch has a distribution point. All computers that run Windows 10 are managed by using both Configuration Manager and Microsoft Intune.
You plan to deploy the latest build of Microsoft Office 365 ProPlus to all the computers.
You need to minimize the amount of network traffic on the company's Internet links for the planned deployment.
What should you include in the deployment plan?

A. From Intune, configure app assignments for the Office 365 ProPlus suite.
In each office, copy the Office 365 distribution files to a Microsoft Deployment Toolkit (MDT) deployment share.
B. From Intune, configure app assignments for the Office 365 ProPlus suite.
In each office, copy the Office 365 distribution files to a Configuration Manager distribution point.
C. From Endpoint Configuration Manager, create an application deployment.
Copy the Office 365 distribution files to a Configuration Manager cloud distribution point.
D. From Endpoint Configuration Manager, create an application deployment.
In each office, copy the Office 365 distribution files to a Configuration Manager distribution point.

Correct Answer: D
Section: (none)
Explanation

Explanation/Reference:
Reference: https://docs.microsoft.com/en-us/deployoffice/deploy-office-365-proplus-with-system-center-configuration-manager-2012r2#distribute-the-office-365-proplus-application-to-distribution-points-in-configuration-manager

QUESTION 2
Your company has a Microsoft 365 subscription.
All the users in the finance department own personal devices that run iOS or Android. All the devices are enrolled in Microsoft Intune.
The finance department adds new users each month.
The company develops a mobile application named App1 for the finance department users.
You need to ensure that only the finance department users can download App1.
What should you do first?

A. Add App1 to Intune.
B. Add App1 to a Microsoft Deployment Toolkit (MDT) deployment share.
C. Add App1 to Microsoft Store for Business.
D. Add App1 to the vendor stores for iOS and Android applications.

QUESTION 5
HOTSPOT

You have a Microsoft Azure Active Directory (Azure AD) tenant named contoso.com. All Windows 10 devices have apps named App1, App2 and App3 installed and are enrolled in Microsoft Intune.

You configure the following settings in Windows Information Protection (WIP):

- Protected apps: App1
- Exempt apps: App2
- Windows Information Protection mode: Silent

App1, App2, and App3 use the same file format.

You create a file named File1 in App1.

You need to identify which apps can open File1.

What apps should you identify? To answer, select the appropriate options in the answer area,

NOTE: Each correct selection is worth one point.

Hot Area:

CEplus.com

Answer Area

You can open File1 from:

- App1 only
- App1, and App2 only
- App1 and App3 only
- App1, App2, and App3

An action will be logged when you attempt to open File1 from:

- App1 only
- App3 only
- App1, and App2 only
- App2 and App3 only
- App1, App2, and App3

Correct Answer:

Answer Area

You can open File1 from:

- App1 only
- App1, and App2 only
- App1 and App3 only
- App1, App2, and App3

An action will be logged when you attempt to open File1 from:

- App1 only
- App3 only
- App1, and App2 only
- App2 and App3 only
- App1, App2, and App3

Section: (none)
Explanation

https://docs.microsoft.com/en-us/windows/security/information-protection/windows-information-protection/create-wip-policy-using-intune#exempt-apps-from-wip-restrictions

QUESTION 6
You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform	Member of
Device1	Windows 10	Group1, Group3
Device2	Android	Group2, Group3
Device3	Windows 10	Group3
Device4	Windows 10	Group2
Device5	Windows 10	Group1

You create an app protection policy named Policy1 that has the following settings:

- Platform: Windows 10

- Protected apps: App1
- Exempt apps: App2
- Network boundary: Cloud resources, IPv4 ranges

You assign Policy1 to Group1 and Group2. You exclude Group3 from Policy1.

Which devices will apply Policy1?

A. Device1, Device2, Device4, and Device5
B. Device1, Device4, and Device5 only
C. Device4 and Device5 only
D. Device1, Device3, Device4 and Device5

Correct Answer: A
Section: (none)
Explanation

Explanation/Reference:
Explanation:
Policy1 is applied to all devices in Group1 and Group2. It is not applied to any devices in Group3, unless those devices are also members of Group1 or Group2.

Note: The phrase "You exclude Group3 from Policy1" is misleading. It means that Policy1 is not applied to Group3, rather than Group3 being blocked.

Incorrect answers:
B: Policy1 applies to Device2 as Policy1 is assigned to Group2.
C: Policy1 applies to Device1 as Policy1 is assigned to Group1. Policy1 also applies to Device2 as Policy1 is assigned to Group2.
D: Device3 is a member of Group3 only. Policy1 is not assigned to Group3.

QUESTION 7
HOTSPOT

Your network contains an Active Directory domain that is synced to Microsoft Azure Active Directory (Azure AD).

You have a Microsoft Office 365 subscription. All computers are joined to the domain and have the latest Microsoft OneDrive sync client (OneDrive.exe) installed.

On all the computers, you configure the OneDrive settings as shown in the following exhibit.

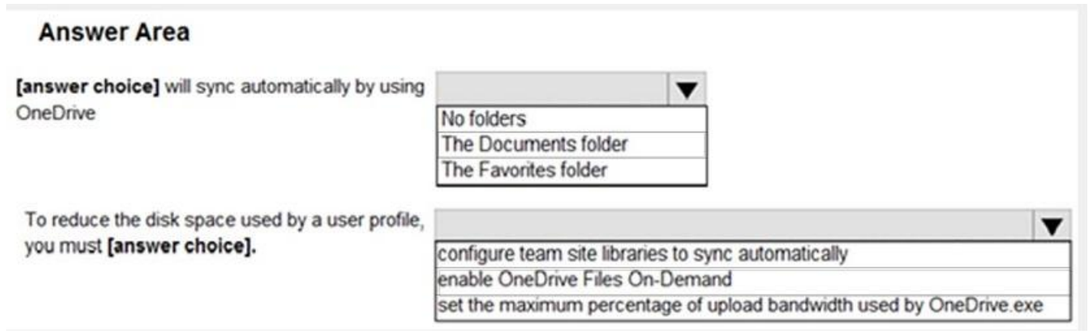

Setting	State
Allow syncing OneDrive accounts for only specific organizations	Enabled
Configure team site libraries to sync automatically	Not configured
Set the maximum percentage of upload bandwidth that OneDrive.exe uses	Not configured
Prevent users from moving their Windows known folders to OneDrive	Not configured
Block synscing OneDrive accounts for specific organizations	Not configured
Migrate Pre-existing TeamSites with OneDrive Files On-Demand	Not configured
The maximum size of a user's OneDrive for Business before they will be prompted to ch...	Not configured
Enable OneDrive Files On-Demand	Not configured
Prevent users from redirecting their Windows known folders to their PC	Disabled
Silently move Windows known folders to OneDrive	Enabled
Prompt users to move Windows known folders to OneDrive	Not configured
Prevent OneDrive from generating network traffic until the user signs in to OneDrive	Not configured
Prevent users from using the remote file fetch feature to access files on the computer	Enabled
SharePoint on-premises server URL and tenant folder name	Not configured
SharePoint prioritization setting for hybrid customers that use SharePoint Online (SPO)...	Not configured
Silently configure OneDrive using the primary Windows account	Enabled

Use the drop-down menus to select the answer choice that completes each statement based on the information presented in the graphic.

NOTE: Each correct selection is worth one point.

Hot Area:

Correct Answer:

Section: (none)
Explanation

Explanation/Reference:
Explanation:

Box 1:
Silently move known folders to OneDrive is enabled. Known folder include:
Desktop, Documents, Pictures, Screenshots, and Camera Roll

Box 2:
OneDrive Files On-Demand enables users to view, search for, and interact with files stored in OneDrive from within File Explorer without downloading them and taking up space on the local hard drive.

QUESTION 8
HOTSPOT

You have a Microsoft 365 subscription.

Users have iOS devices that are not enrolled in Microsoft 365 Device Management.

You create an app protection policy for the Microsoft Outlook app as shown in the exhibit. (Click the **Exhibit** tab.)

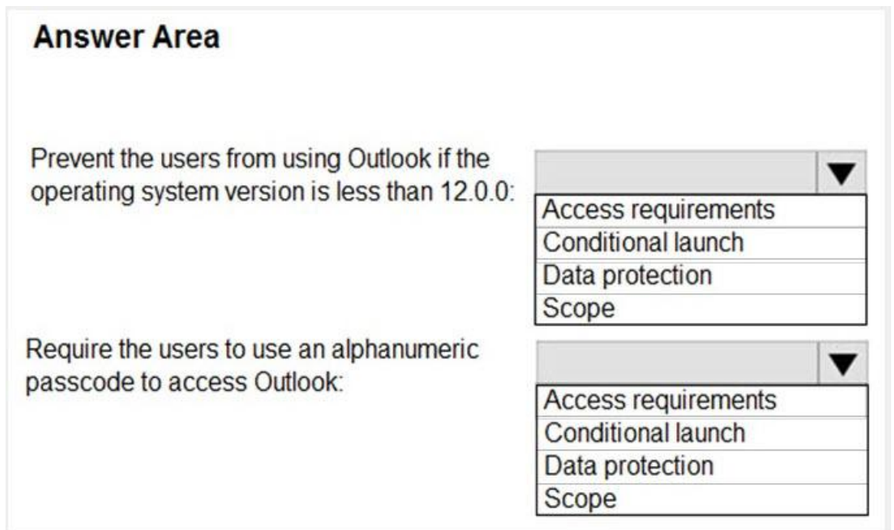

You need to configure the policy to meet the following requirements:

- Prevent the users from using the Outlook app if the operating system version is less than 12.0.0.
- Require the users to use an alphanumeric passcode to access the Outlook app.

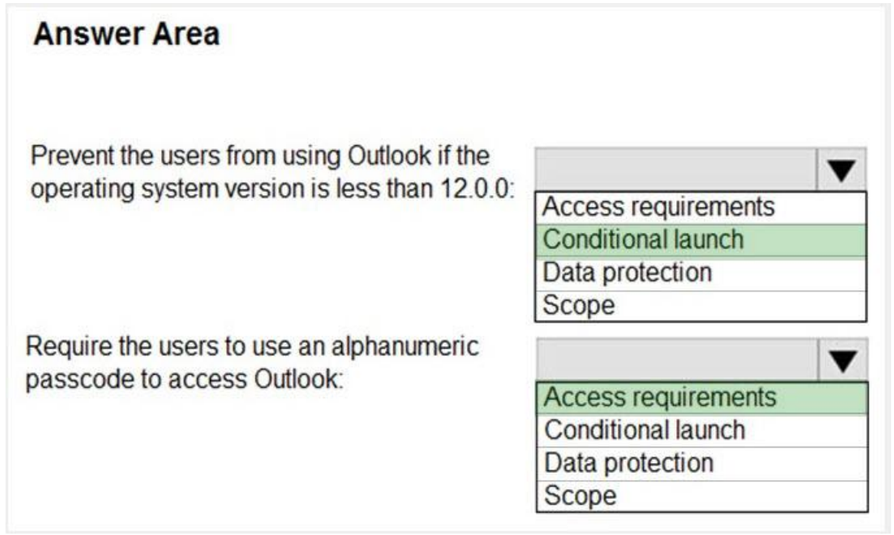

What should you configure in an app protection policy for each requirement? To answer, select the appropriate options in the answer area.

NOTE: Each correct selection is worth one point.

QUESTION 9
You manage a Microsoft 365 environment that has co-management enabled.

All computers run Windows 10 and are deployed by using the Microsoft Deployment Toolkit (MDT).

You need to recommend a solution to deploy Microsoft Office 365 ProPlus to new computers. The latest version must always be installed. The solution must minimize administrative effort.

What is the best tool to use for the deployment? More than one answer choice may achieve the goal. Select the **BEST** answer.

A. Microsoft Intune
B. Microsoft Deployment Toolkit
C. Office Deployment Toolkit (ODT)
D. a Group Policy object (GPO)
E. Microsoft System Center Configuration Manager

Correct Answer: C

QUESTION 10
You have a Microsoft 365 subscription.

You have 10 computers that run Windows 10 and are enrolled in mobile device management (MDM).

You need to deploy the Microsoft 365 Apps for enterprise suite to all the computers.

CEplus.com

What should you do?

A. From the Endpoint Management admin center, add an app.
B. From Microsoft Azure Active Directory (Azure AD), add an app registration.
C. From Microsoft Azure Active Directory (Azure AD), add an enterprise application.
D. From the Endpoint Management admin center, create a Windows 10 device profile.

Correct Answer: C

QUESTION 11
You have a Microsoft 365 subscription.

You need to deploy Microsoft Office 365 ProPlus applications to Windows 10 devices.

What should you do first?

A. From Microsoft Azure Active Directory (Azure AD), create an app registration.
B. From the Endpoint Management admin center, create an app.
C. From the Endpoint Management admin center, create an app configuration policy.
D. From the Endpoint Management admin center, enable Microsoft Store for Business synchronization.

Correct Answer: B

QUESTION 12
You have Windows 10 devices that are managed by using Microsoft Intune. Intune and the Microsoft Store for Business are integrated.

You need to deploy the Remote Desktop modern app as an automatic install to the Windows 10 devices without user interaction.

Which three actions should you perform? Each correct answer presents part of the solution.

NOTE: Each correct selection is worth one point.

A. Create an Azure Active Directory group that contains all users.
B. From the Intune portal, create a Microsoft Store app for the Remote Desktop modern app.
C. From the Intune portal assign the app to the Azure Active Directory group.
D. Create an Azure Active Directory group that contains the Windows 10 devices.
E. From the Microsoft Store for Business portal, assign a license for the app to all the users in the Azure Active Directory group.
F. For your organization, make the app available in the Microsoft Store for Business.

Correct Answer: BCD

QUESTION 13
You have devices enrolled in Microsoft Intune as shown in the following table.

Name	Platform
Device1	Windows 8.1
Device2	Windows 10
Device3	Android
Device4	iOS

On which devices can you apply app configuration policies?

A. Device1, Device2, Device3, and Device4
B. Device2 only
C. Device3 and Device4 only
D. Device1 and Device2 only
E. Device2, Device3, and Device4 only

Correct Answer: C
Section: (none)
Explanation

Explanation/Reference:
Explanation:
App configuration policies are only required for iOS/iPadOS or Android apps

QUESTION 14
You have a Microsoft Intune subscription.

You have devices enrolled in Intune as shown in the following table.

Name	Operating system
Device1	Android 8.1.0
Device2	Android 9
Device3	iOS 11.4.1
Device4	iOS 12.3.1
Device5	iOS 12.3.2

An app named App1 is installed on each device.

What is the minimum number of app configuration policies required to manage App1?

A. 1
B. 2
C. 3
D. 4
E. 5

Correct Answer: B
