Mother's Day 3D Flower Card

How to make your card

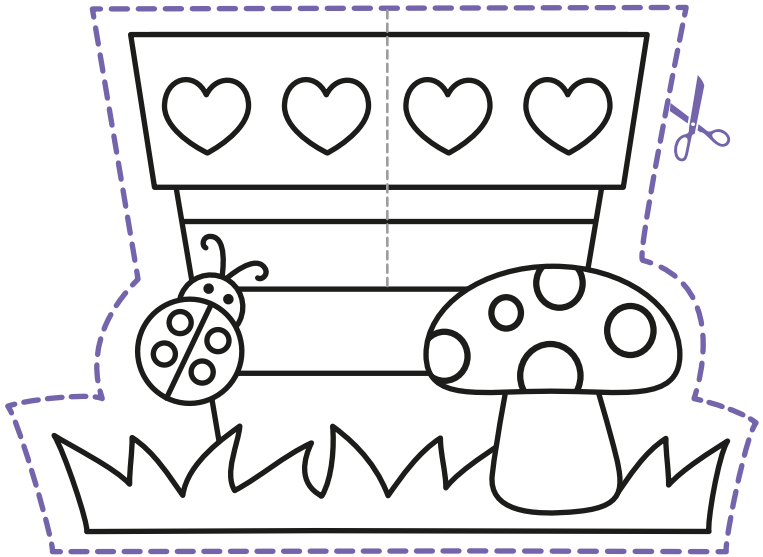

1. Choose which message you'd like from the following 'Flower' pages (you can mix and match but be sure to pick one front and one back).
2. Print this 'Stand' page and your chosen 'Flower' page onto thick paper or card. Cut out the two designs on the 'Flower' page and glue both sides of these back to back. Cut out the two stand sections on this page and glue these back to back.
3. Color the designs and fill in who the card is to/from.
4. Cut along the gray dotted lines and slot the two parts together to make a 3D standing card.
