

1. Which Gateway can be used to provide internet access to an oracle cloud infrastructure compute instance in a private subnet.?
A) Dynamic Routing Gateway
B) Service gateway
C) Internet Gateway
D) NAT Gateway
2. In What two ways does Oracle Cloud Infrastructure (OCI) offer Industry price performance?
A) OCI leverage Advanced encryption that results in fast performance
B) OCI does not subscribe CPU, but only memory
C) OCI Hypervisor provide industry leading performance.
D) With OCI, pricing is low and predictable across all regions and services.
E) OCI backs performance claims with SLA.
3. Which OCI Identity and access management capability helps you to organize multiple users into teams?
A) Dynamic Group
B) Policies
C) Users
D) Groups.
4. Which two OCI resources can be used to group categorize expense?
A. Groups.
B. Compartments.
C. Users.
D. Policies.
E. Tags.
5. What feature is NOT a component of OCI Identity and Access Management service?
A. User Credentials.
B. Network Security Group
C. Policies
D. Federation
6. Which is the example of Edge Service in OCI?
A. Object- Storage.
B. Virtual Cloud Network

C. Web application firewall

D. Virtual Firewall

7. Which is NOT part of the Oracle Cloud always free eligible resources that you can provision in your tenancy?

A. Fast Connect (1Gbps public peering)

B. Block Volume (up to 100 GB Total storage)

C. Load Balancing (one load balancer)

D. Autonomous Database (up to two databases instance)

8. Which Pricing model is NOT supported in OCI?

A. Bring your own license

B. Universal Credits – Monthly Flex

C. Pay as you go.

D. Reserved Instances.

9. Which cannot be used with My Oracle Support (MOS)

A. Troubleshoot a resource in an OCI free trial account.

B. Add or Change a tenancy administrator.

C. Request a service limit Increase.

D. Reset the password or unlock the account for the tenancy administrator

10. What do you mean OPEX and CaPEX refer to?

A. Opex refers to Operational Expenditure and

B. CaPEX refers to Capital Expenditure.

11. Which is not required to register and log support request in My Oracle support (MOS)?

A. Your Account Password.

B. Your Customer Support Identifies (CSI)

C. Your resource OCID (Oracle Resource Identifier)

D. Your Tenancy OCID

12. Which is Key Benefit of using Oracle cloud Infrastructure Autonomous Data warehouse?

A. No Username and password required.

B. Scale both CPU and Storage without downtime.

C. Apply DB patches as they available.

D. Maintain root level access to the underlying operating system.

13. Which service is the most effective for moving large amounts of data from your on-premises to Oracle cloud infrastructure (OCI)?

- A. Dynamic Routing Gateway.
- B. Data Safe
- C. Internet Gateway
- D. Data Transfer Appliance.

14. A new customer logged in to OCI console as an administrator for the first time. Admin would like to deploy infrastructure into a region other than the home region?

What is the first step they must take in order to accomplish this task?

- A. Use API endpoints to create resource in the desired region
- B. Subscribe to the desired region.
- C. File a service request for access to each additional request.
- D. Navigate to the desired region and begin creating resources.

15. Which OCI service can send you an alert when you might exceed your spending threshold?

- A. Streaming
- B. Budget.
- C. Monitoring
- D. Events

16. you are recently assigned to manage a project to deploy Oracle E-Business Suite on Oracle Cloud Infrastructure (OCI). The Application will have a database, several servers and shared file system.

Which three OCI services are best suited for this project?

- A. Virtual Machine (VM) Bare Metal (BM) Compute Instance.
- B. Object Storage Service
- C. OCI Streaming Service
- D. OCI virtual and Bare Metal DB Systems.
- E. Oracle Container Engine for Kubernetes.
- F. File Storage Service.

17. Which should you use to distribute incoming traffic between a set of web servers?

A. Load Balancer

B. Auto Scaling

C. Internet Gateway

D. DRG

18. Which is NOT available to you whenever OCI creates or resolves the incidents?

A. Webhook Notifications.

B. Email Notifications.

C. Text Message Notification

D. Twitter Notifications.

19. What characteristics are defined by an OCI compute shape?

A. Public or Private visibility of the compute instance.

B. Number of OCPU, amount of RAM, bandwidth

C. Number of vCPU, amount of RAM, bandwidth

D. Availability Domain and Fault Domain Locations.

20. You have a Mission Critical application which always requires to be globally available.

Which deployments strategy should you adopt?

A. Use Multiple Fault Domains in any Availability Domain in multiple Regions.

B. Use Multiple Availability Domain in one Region.

C. Use Multiple Fault Domain in one Region

D. User Multiple Fault Domains in each Availability Domain in one Region

21. OCI is compliant with which three industry standards?

A. SOC 1 Type 2 and SOC 2 Type 2 attestation

B. NERC Critical Infrastructure Protection Standards.

C. Health Care Compliance Association (HCCA)

D. ISO 27001:2003 certification

E. Health Insurance Portability and Accountability (HIPPA)

22. A Customer wants a dedicated connection with minimal network latency from their on-premises data center to OCI?

Which service should they choose?

A. Virtual Cloud Network Remote Peering

B. OCI Fast connect.

C. Public Internet.

D. IPSec virtual private network (VPN)

23. What Service is NOT available as part of oracle cloud Free Tier?

A. OCI Compute

B. OCI Exadata DB systems

C. OCI Autonomous Data warehouse.

D. OCI Monitoring.

24. Which capability can be used to protect against unexpected hardware or power supply failure within an Availability Domain?

A. Fault Domains

B. Top of Rack Switches

C. Power Distribution Units.

D. Compartments.

25. which three components are part of Oracle Cloud Infrastructure Identity and access management service?

A. Compute instance

B. Users

C. Virtual Cloud Network (VCN)

D. Policies

E. Regional Subnets

F. Roles

G. Dynamics Groups

26. Which capability can be used to protect against Unexpected hardware or power supply failures within an Availability Domain?

A. Fault Domains

B. Top of Rack Switches

C. Power Distribution Units

D. Compartments.

27. Which OCI service leverages Terraform to configure infrastructure as a code?

A. Resource Manager

B. Compartment Explorer

C. Oracle Functions

D. Events.

28. OCI budgets can be set on which two options?

- A. Tenancy
- B. Compartments.
- C. Free-Form Tags.
- D. Cost-Tracking Tags
- E. Virtual Cloud Network

29. Which is NOT considered a security resource within OCI?

- A. Security List
- B. Web Application Firewall
- C. Network Security Group
- D. File Storage Service

30. Oracle Cloud Infrastructure service can you use to assess user security of your oracle database?

- A. Oracle Data safe
- B. Audit Value and Database Firewall option for Oracle database enterprise edition
- C. Oracle Data Guard
- D. Audit Service

31. A customer wants to deploy a customized e-commerce web application using multiple virtual machines, block storage, database, load balancers and a web application firewall?

What cloud model can be used to host this application?

- A. Anything as a service (XaaS)
- B. Infrastructure as a Service (IaaS)
- C. Software as a Service (SaaS)
- D. Platform as a Service (PaaS)

32. A banking platform has been re-designed to a microservices based architecture using Docker containers for deployment

Which service can you use to deploy containers on Oracle Cloud Infrastructure (OCI)?

- A. Container Engine for Kubernetes (OKE)
- B. API Gateway
- C. Streaming Service
- D. File Storage Service

33. Which three methods can you use to create or Modify OCI resources?

- A. OCI Console
- B. Secure Shell (SSH)
- C. Command-line Interface
- D. Serial console connection
- E. REST APIs.
- F. OCI desktop client
- G. Remote Desktop Protocol (RDP)

34. A customer wants to use OCI for strong application backups which can be shared for months but retrieved immediately based on business needs.

Which OCI storage service can be used to meet this requirement?

- A. Archive storage
- B. File Storage
- C. Block Volume
- D. Object Storage (Standard)

35. Which Describe a key benefit of using OCI?

- A. OCI offers a consistence performance with a predictable pricing model
- B. Only bare metal workloads are supported on OCI
- C. With OCI, you can run only Cloud-native workloads.
- D. With OCI, you can only run Java based workloads on bare metal.

36. Which two should be considered when designing a fault-tolerant solution in OCI?

- A. Performing data integrity check when using OCI File Storage Service.
- B. using multiple OCI Availability Domain (AD) where available, to deploy your solution.
- C. Writing custom scripts that will monitor your solution.
- D. Ensuring your solution components are distributed across OCI fault domains.
- E. Creating a manual cluster of compute instance.

37. Which two enabled by OCI fault domain?

- A. Build replicated systems for disaster recovery
- B. To meet requirements for legal jurisdictions.
- C. Protect against unexpected hardware or power supply failure.
- D. Protect against planned hardware maintenance.

E. To mitigate the risk of largescale events such as earthquake.

38. What is the key benefit of OCI Virtual Machine DB systems.?

- A. Automated backup to OCI block Volume
- B. Automated disaster recovery
- C. No need to create database indexes
- D. Support for RAC DB Systems.

39. What is the frequency of OCI usage report generation.

- A. weekly
- B. Monthly
- C. Annually
- D. Daily.

40. What does Oracle payment Card Industry Security Standard (PCI DSS) attestation of compliance provide to customer?

- A. Customers can use services for workloads that process or transmit cardholder data but not store it.
- B. Customers can use these services for workloads that store, process, or transmit cardholder data
- C. Customers can use these services for workloads to process applications for credit card approval securely.
- D. Customers can use these services for workloads that provides validation for card holder transaction but only as 3rd partly vendor.

41. What three services integrate with OCI Key Management?

- A. Functions.
- B. IAM
- C. Block Volume
- D. Auto Scaling
- E. Object Storage
- F. File Storage

42. which OCI service allow you to run code without provisioning any underlying infrastructure resources (such as virtual machines)?

- A. Oracle Functions.
- B. Compute Instance
- C. Oracle Container Engine for Kubernetes

D. Storage Gateway

43. which OCI service is best suited for running serverless apps?

- A. Oracle Functions
- B. Audit
- C. Streaming
- D. Virtual Cloud Network

44. Which OCI service used to protect sensitive and regulated data in OCI database service?

- A. Oracle DATA Guard
- B. OCI Audit
- C. Oracle Data safe
- D. OCI OS management

45. Which statement about OCI shared security model is true?

- A. You are not responsible for any aspect of security of OCI
- B. You are responsible for managing security controls within the OCI physical network.
- C. You are responsible for securing all your data that you place in OCI.
- D. You are responsible securing the hypervisor within OCI Compute service.

46. Which SLA is NOT offer by OCI compute service?

- A. Performance
- B. Application Plane
- C. Data Plane.
- D. Control Plane.

47. What does compute instance horizontal means.?

- A. Adding additional compute instance.
- B. Stopping/Starting Instance.
- C. changing compute instance size.
- D. backing up data to object storage.

48. A company has developed an E-commerce web-application in OCI.

What should they do to ensure that the application has the highest level of resilience?

- A. Deploy the application across multiple region and availability domain.
- B. Deploy the application across multiple Virtual Cloud Network.
- C. Deploy the application across multiple Availability Domain and Subnets
- D. Deploy the application across multiple Availability Domains and Fault Domains.

49. Which offers a lowest pricing for storage (per GB)?

- A. OCI File Storage
- B. OCI Archive Storage
- C. OCI Object Storage (Standard)
- D. OCI Block Volume

50. What two statement regarding the VCN are true.

- A. You can only create one VCN per region
- B. VCN is a global resource which span across all the regions
- C. A single VCN can contain both private and public subnets.
- D. The VCN is IPsec based connection with a remote on-premises location
- E. VCN is a regional resource that span across all the availability domain in a Region

51. you are required to host several files in a location that can be publicly accessible from anywhere in the world.

Which OCI service should you use?

- A. OCI object storage
- B. OCI File Storage
- C. Oracle Functions.
- D. OCI Storage Gateway
- E. OCI Block Volume

52. which is NOT a valid business benefit for a customer considering migrating their infrastructure and apps to OCI?

- A. Faster go-to-Market.
- B. Greater Agility
- C. Increased Total Cost of Ownership (TCO)
- D. Capital Expenditure to Operational Expenditure conversion.

53. After signing of new OCI tenancy, what would you subscribe to in order to deploy infrastructure and services in different parts of the world?

- A. Availability Domains
- B. Fault Domains.
- C. Pay as-you-grow pricing
- D. Regions.

54. A Customer is looking to migrate their old database backups from their on-premises data center to Oracle Infrastructure (OCI) . Which OCI Service is the most cost-Effective?

- A. File Storage
- B. Block Storage
- C. Archive Storage
- D. Object Storage

55. Which is not covered by Oracle Cloud Infrastructure

- A. Reliability
- B. Availability
- C. Performance
- D. Manageability

56. Which Statement accurately describe an Oracle Cloud Infrastructure Region?

- A. Each Fault domain has multiple Availability Domains.
- B. Each availability domain has three Fault Domains.
- C. Each region has a single Fault Domain
- D. Each availability domain has a single Fault Domains.

57. You are setting up a proof of concept(POC) and need to quickly establish a secure connection between an on-premises data center and Oracle Cloud Infrastructure(OCI).

Which OCI Service should you Implement?

- A. FastConnect
- B. Internet Gateway
- C. IPSec VPN
- D. VCN Peering

58. Which feature allows you logically group and isolate your Oracle Cloud Infrastructure?

- A. Compartments
- B. Identity and Access management

- C. Availability Domain
- D. Tenancy

59. Which Oracle Cloud Infrastructure OCI database solution will be most economical for a customer looking to have the elasticity of cloud with minimal administration and maintenance effort for their DBA team?

- A. OCI Exadata DB Systems
- B. OCI Bare Metal DB System
- C. OCI Virtual Machine DB System
- D. OCI Autonomous Database
