How not to pay TAX. This is specific to the UK and all Commonwealth Countries but is relevant worldwide. All is fraud. You are born free. No wo/man, Police Officer, Politician, Government, King, Emperor, EU, UN etc. has any authority over you. None.

To believe otherwise is to submit to slavery. Are you a slave? Many are. The word "authority" is overused when mentioning "Government" and "Council". This is mind control. Subliminal programming.

"Authorities" state all the time that there is a "Law" that states you must comply with whatever they are attempting to force on to you. There is no "Law" only Corporate rules. The "Government", "Council", "Police Force", "Force" more programming, are all Corporations.

As with all Corporations the priority is profit. They have no interest in what is best for their "Citizens", the Scamdemic has made that clear to many more. Etymology of Corporate = dead speak, Corpse Orate. You are a living wo/man. You have no place in their dead world.

Government" operates within a Legal system. Legal and the Law are two different things. There is only 1 Law - Do no harm, cause no loss. My rights end where yours began. This is Natural/Common Law. Law resides above Legal always.

Everything Legal is just a Corporate man made rule. "Government" etc. "Lawyers", the media will state all the time that something is "The Law", this is false. Government cannot pass Laws they pass Acts and Statutes given the power of Law through your consent.

That's individual consent not combined consent. Combined consent would be Dictatorship by the majority. They cannot prove your consent with material evidence. They will state that by participating in "Society" you are a "Citizen" and obliged to follow the "Law".

This would imply an agreement, a Contract, there is no Contract signed by both parties. They will state that by not opposing their implied obligations you tacitly agreed to be bound by them and thus a Contract was formed.

Without Full Disclosure that a Contract was even on the table the Contract becomes void. All is Contract, all is Commerce, all is Corporate. There is no such thing as Society or a Citizen. The "Government" is a criminal enterprise. They rob the poor under cover of "Law".

Income Tax: For the Self-Employed simply do not register with the “Government” that you work for yourself. By registering you create a Contract and in turn an obligation and a liability.

There is no Law stating you must register, only Legal Corporate rules relevant to Corporate Employees only. Once registered completing the Self Assessment renews that Contract annually. For the Employed, this will depend on your Employer.

Request that they do not remove the PAYE from your wage, state that you will take care of any tax obligations. Effectively now working for yourself. Council Tax, all “Fines” and any communication from “Government” entities attempting to extort money.

Void them all with this simple process. Write on the envelope Return to Sender. Write on the letter, at the top in capital letters, to ensure it's legible - “Refused for cause and clarification, without prejudice, without dishonour with no recourse”.

Drop it back in the post and you’ll hear nothing more. What this does is request they prove your obligation. They can't, there is none. Note they never sign their letters as a signature would open them up to personal commercial liability.

This alone is evidence that they are criminal. A new Council Tax Statement will come every year, simply repeat the process above and you will very, very likely hear nothing more.

To add to the above the Council Tax statement is not addressed to you, it's addressed to your Corporate Person Legal Fiction the Mr/Mrs/Miss, that is not you, you are a living wo/man.

If you simply ignore the "Council" they will appoint Debt Collectors who will visit a property a maximum of 3 times, they generally knock once and post a letter before scurrying away. It's fun to confront them if you have the nerve and understand your true status.

After 3 visits they inform the "Council" that they got nowhere. The "Council" then appoint another Debt Collector company and the process repeats. Then a third and it repeats. All the time the Council Tax amount you allegedly owe builds.

Using the simple process above eradicates it completely. Court Summons: This is an invite. There is no obligation to appear and it is better not to step in to their corrupt workplace, it’s stacked against the wo/man.

In fact by simply appearing you are in dishonour and lose by default because you are appearing as the false Legal Fiction, the Corporate Person, Mr/Mrs/Ms, that is not you, again you are a living wo/man.

Use the same simple process mentioned above for Council Tax on any “Summons”. Etymology of Person = Mask. By believing you are the Corporate Person you wear a mask over your real self. The system can only deal with Corporations.

Debt Collectors: Third party interlopers can be completely ignored. There is no obligation to deal with them and they have zero rights to be demanding anything and absolutely no right to enter a property. They rely on fear, intimidation and ignorance.

Throw their letters in the bin. In any confrontation “From where do you presume to draw any authority over me?”. Deny their presumed authority. It’s that simple. To be able to stop paying Tax you must realise your true status and feel it to your bones.

Lose the fear of “Authority”, “Courts”, Debt Collectors , Fines etc. Its easier than ever now given the propaganda onslaught over the last 2 years. If the Scamdemic has angered you, use that energy to destroy any fear of “Authority”.

It’s a criminal operation, a belief system supported by media and cultural programming, a bubble of false reality that farms the people for profit. Are you a slave? By paying tax you are supporting a criminal terrorist organisation.

By their own Acts & Statutes they are a criminal enterprise. There in lies yet another defence against paying any form of Tax, you will be breaking the UK Terrorism Act 2000/2006 by supporting a Terrorist Organisation. I'm sure there are similar Acts in other Countries.

Do not be complicit in funding a system that is against you and yours. Stop paying Tax.
