What is PhD in Clinical Psychology ?

PhD in Clinical Psychology is a specialized program that focuses on diagnosing, understanding, and treating mental health conditions. It goes beyond basic psychology, offering deep insights into complex psychological issues, their causes, manifestations, and effective treatments.

This program equips students with advanced knowledge and skills for clinical practice, research, and mental health leadership.

Objectives

Developing Clinical Skills:

Building advanced skills for psychological assessments and interventions.

Research Excellence:

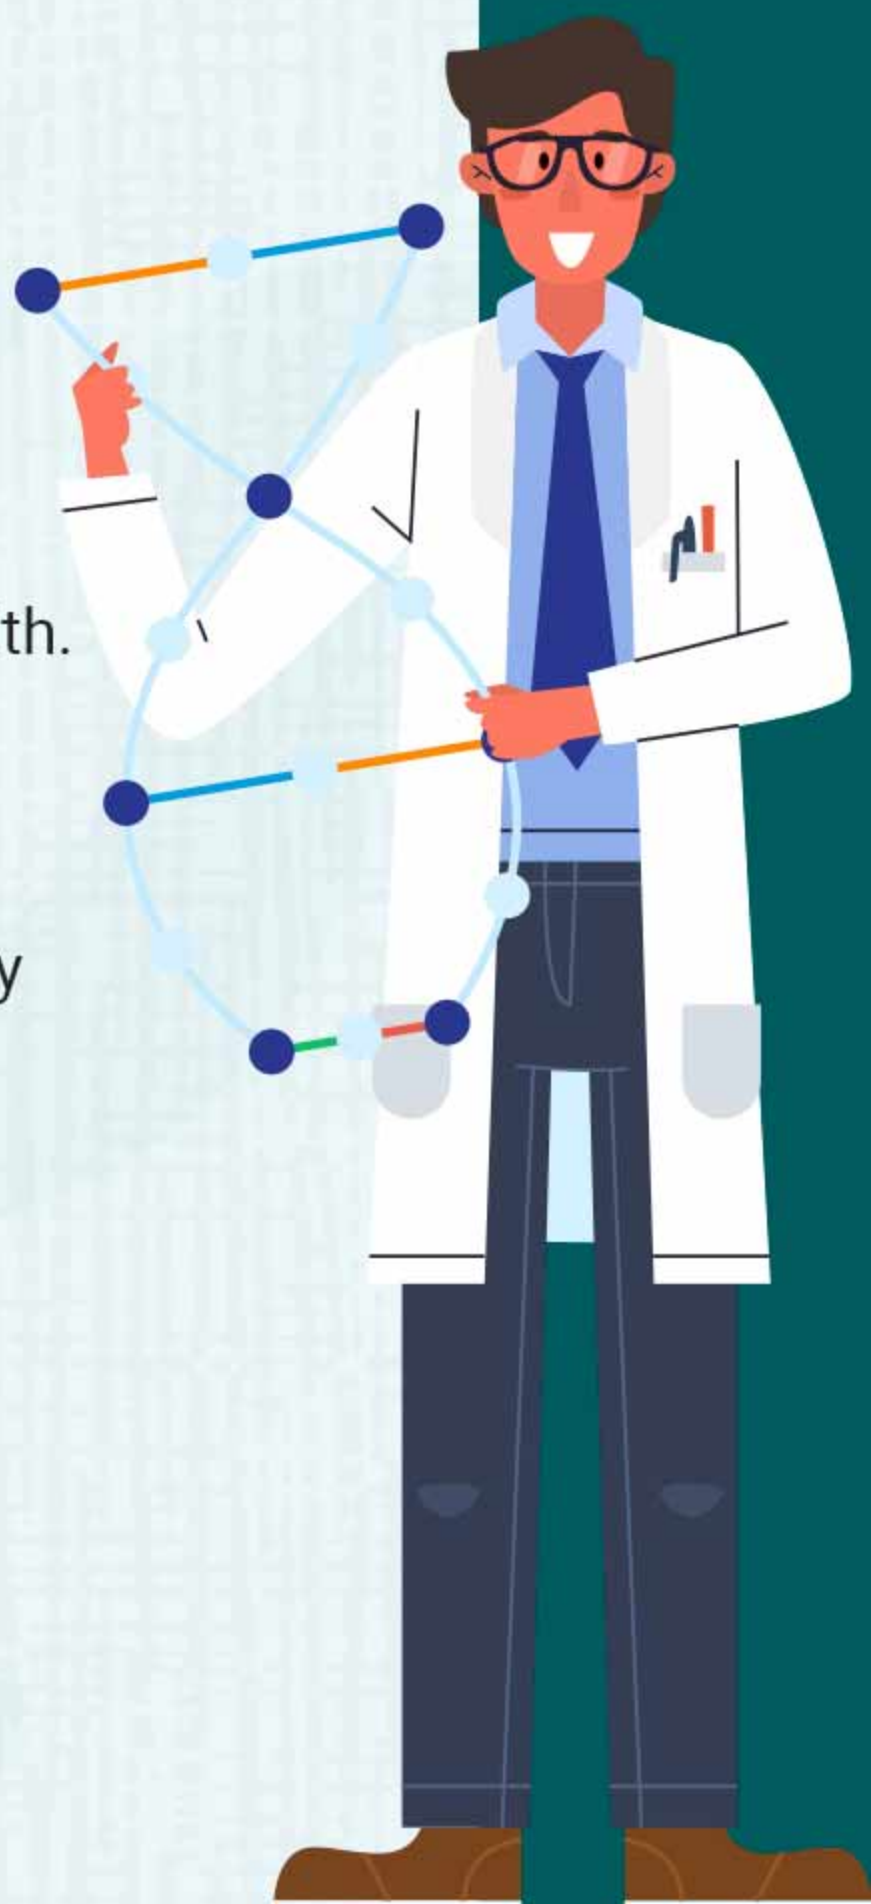

Training to design, conduct, and publish impactful research studies on mental health.

Ethical Practice:

Graduates with an RCI license can ethically practice as clinical psychologists.

Teaching and Leadership:

Preparing students for teaching roles and leadership in clinical settings.

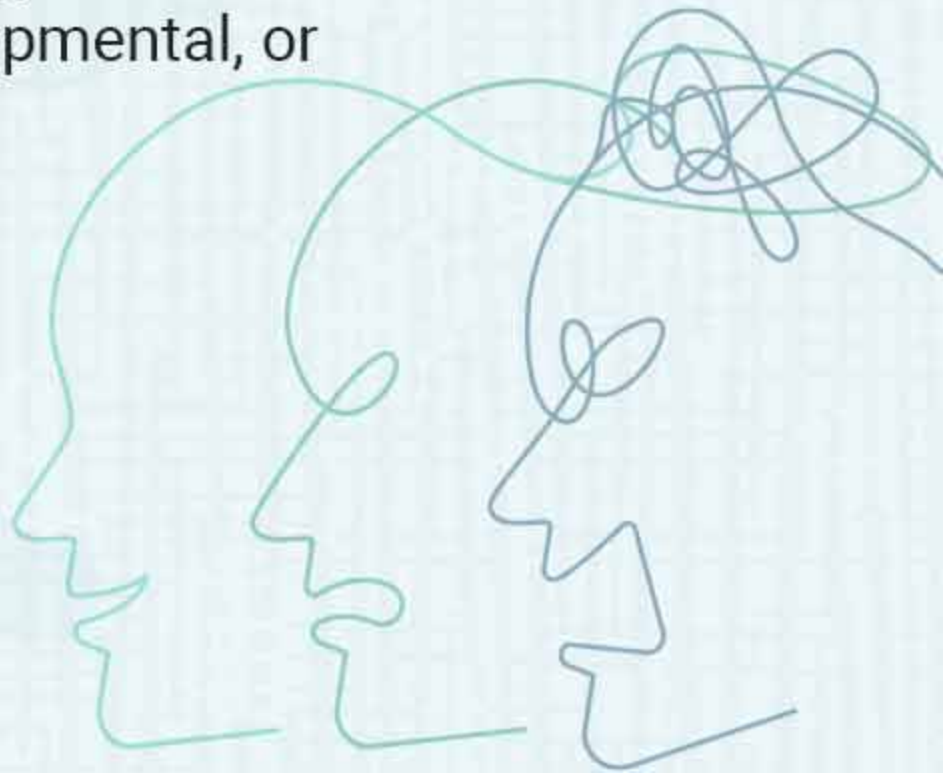

Eligibility

Completion of a Master's or Postgraduate degree in Psychology or a related field from a recognized university. A minimum of **55%** marks for the unreserved category (relaxation may apply for reserved categories).

Some institutions may require an M.Phil in Clinical Psychology from an RCI-recognized institute.

PhD Clinical vs General Psychology

A PhD in **Clinical** Psychology is practice-oriented and focused on mental health and therapeutic practices, whereas a **General** PhD in Psychology covers a wide range of topics like cognitive, developmental, or social psychology.
