Call for Paper

Horn African Journal of Health and Biomedical Sciences (HAJHBS) is an open access, peer reviewed journal established to facilitate effective scientific communication and create opportunity for local health and biomedical researchers and students to share their research work. This journal considers scientifically and ethically valid studies from all areas of health, biomedical and clinical sciences. In addition, it welcomes studies on zoonotic diseases, health systems, biomedical technologies, medical physics, environmental health, health policy and healthcare services.
