INFINITY PODCASTS 1287

Good afternoon my name is big can you tell me your full name please good afternoon my name isov uh thank you now in this first part I'd like to ask you some questions about yourself let's talk about your hometown okay can you tell me about your hometown I originally come from the which is surrounded by enormous mountains and it's well known for its Hospital people and there are some historical places where you can visit and enjoy mhm and what do you like most about your hometown the thing I

love about my hometown is
it's uh quite peaceful it's
located in a quiet place and
people there are welcoming
the whole time and it's just
amazing mhm has your
hometown changed over the
years yeah in the last few
decades my hometown
changed tremendously I
would say because of the uh
urbanization I guess because
there are so many cities right
now and I can say you can
find the any facility that you
want yeah would you like to
live in your hometown in the
future uh I have different

feelings about this honestly
because I might leave abroad
because of my work and
studies but I would love to
live in my hometown in my
future why uh the reason is I
grew up there and the feelings
are kind of holding you back I
want to leave with my parents
and Friends I guess that's a
reason mm thank you now
let's move on to talk about
science did you like studying
science when you were at
school yeah when I was at
school I was quite passionate
about learning science
because it includes many

fields and I can learn about
the worlds and I can explore
many Realms that's why I was
into that and I got many uh
certificates because of that
Fields because of the subjects
what do you remember about
your science teachers at
school um as far as I can
remember he was a good
person and he was motivating
us the whole time I was an
introverted guy but he made
me a person who was
communicative and outgoing
because of his classes mhm
how interested are you in
science now um because of

my work I can say I don't
have enough time for that but
when I'm free I I can say I
search some things I like or
read some articles mhm what
do you think has been an
important recent scientific
development um recently I
mean I guess the most
significant thing that I can
notice is I don't know maybe
technology I mean technology
is being more and more
environmentally friendly I
guess that's the combination
of Nature and technology and
kind of um Modern Life mhm
now I'm going to give you a

topic and I'd like you to talk about it for 1 to two minutes you have one minute to think about what you're going to say and you can make some notes if you wish you understand yes thanks all right so here's a paper and pencil mhm and here's your topic I would like you to describe a tourist attraction in your country that you would recommend okay all right remember you have one to two minutes for this so don't worry if I stop you can you start speaking now please okay so there are several

mesmerizing spots in my hometown that I can talk about and they always grab people's attention but there is one ancient place which um which is quite interesting and beautiful and that place is called Asin it's located by the river and the scenery the landscape is just amazing and a couple of weeks ago I went to that place with my friends at first I was confused whether it was worth of visiting but when I went there I saw Beauty and uh I talked to some of the tour guys and uh I asked why it was so like

important and famous and
then he told me that there it
was originally a p uh and then
it became just something like
a heel after a major
earthquake so uh and then we
found out that there were
Treasures hidden behind it
like soils and it was just quite
intriguing and then I was
curious about finding some
Treasures but I couldn't and
the reason I would
recommend I would highly
recommend this place is that
there are so many things that
you can find and when you
look look at the nature it's

also beautiful and I think whenever you visit that place um you can just enjoy the nature be harmony with it and it's just uh a different feeling after visiting a place I realized that it's worth witing visiting and I would tell every tourist who come to my country to be in that place at least for once and by some so many years yeah all right all right we've been talking about a tourist attraction in your country that you would recommend now I'm going to ask one or two general questions about this let's first

of all consider museums and art galleries what are the most popular museums and art galleries in usbekistan so there is one well-known uh Museum in usbekistan which is called tashkin Amore Museum I guess if I'm not mistaken and there are so many remnants and um precious metals and other stuff that you can see and like realize how our ancestors lived and what kind of things they owned while they were like reiding in different places yeah do you believe that all museums and art gallery

should be free I presume there should be a charge because some of the people can afford that because you know uh the employment rate is uh rising and people can afford that but some of the people like students or young children should um enter that place for free mhm okay what kinds of things make a museum or Art Gallery an an interesting place to visit uh the reason why they are compelling is I guess you can um learn something that you have never learned I mean when you go there you just see one

thing and I guess you it
occurs to you that there are so
many things that are more
expensive than your life or I
mean not your life maybe
something that you own
people um so many things
belong to people in the past
and you can see that and you
may might be change your
mind and mindset shift MH
okay uh now let's talk about
Hol holiday industry holiday
industry yeah mhm uh why do
you think do some people
why do you think do some
people book package holidays
rather than traveling

independently mhm so I guess
I have no idea about this I
mean I have never thought
about that but uh it depends
on the situation uh there are
some people who are quite
busy and they have to do it
really quickly and there are
some types who can do it
spontaneously and uh then
care about other things so I
mean I don't know actually
MH would you say that large
numbers of tourists cause
problems for local people uh
uh in my perspective yes
because whenever um tourists
come massively they can

influence the people who are living there let's say the locals because you know people have their own authenticity and whenever people come TOS visit uh the house country they can um impact people because of the way they act or Their Manners or just the way they aware mhm what sort of impact can large holiday Resorts have on the environment uh it can have negative effects maybe harmful it can be harmful you know because there will be so many lit and people may throw away and nobody

would pay attention and in that case nature is going to torture and we may contribute to the let's say um bad situations which may come afterwards like um pile of trash which can like kill animals or poison the plants so I guess that's it mhm all right thank you this is the end of our speaking session thanks.
