

SKETCHNOTES LESSON

Here is where your presentation begins

CONTENTS OF THIS TEMPLATE

Here's what you'll find in this **Slidesgo** template:

1. A slide structure based on a lesson, which you can easily adapt to your needs. For more info on how to edit the template, please visit **Slidesgo School** or read our **FAQs**.
2. An assortment of illustrations that are suitable for use in the presentation can be found in the **alternative resources slide**.
3. A **thanks slide**, which you must keep so that proper credits for our design are given.
4. A **resources slide**, where you'll find links to all the elements used in the template.
5. Instructions for use.
6. Final slides with:
 - The **fonts and colors used** in the template.
 - A selection of **illustrations**. You can also customize and animate them as you wish with the online editor. Visit **Stories by Freepik** to find more.
 - More **infographic resources**, whose size and color can be edited.
 - **Sets of customizable icons** of the following themes: general, business, avatar, creative process, education, help & support, medical, nature, performing arts, SEO & marketing, and teamwork.

You can delete this slide when you're done editing the presentation.

About the
Topic

INTRODUCTION

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon

“This is a quote. Words full of wisdom that someone important said and can make the reader get inspired.”

WHAT IS THIS TOPIC ABOUT?

Here you could give a brief description of the topic you want to talk about. For example, if you want to talk about Mercury, you could say that it's the closest planet to the Sun and the smallest one in our Solar System. It's only a bit larger than our Moon, and its name has nothing to do with the liquid metal, since it was named after the Roman messenger god, Mercury

A picture is worth
a
thousand words

DEFINITION OF CONCEPTS

MERCURY

It's the closest planet to the Sun and the smallest one in our Solar System

SATURN

It's the ringed one, composed mostly of hydrogen and helium

MARS

Despite being red, Mars is actually a cold place. It's full of iron oxide dust

VENUS

Venus has a beautiful name and is the second planet from the Sun

FEATURES OF THE TOPIC

MARS

Despite being red, Mars is actually a cold place. It's full of iron oxide dust, giving the planet its reddish cast

JUPITER

It's a gas giant and the biggest planet in our Solar System. Jupiter is the fourth-brightest object in the sky

VENUS

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot, even hotter than Mercury

7.2M

Remember that big numbers grab a lot of attention

10K

You can use them to make an impression

In Spain, a comma is used as a decimal separator

33,400

PRACTICAL USES OF THIS SUBJECT

MERCURY

It's the closest
planet to the Sun

SATURN

Yes, this is the
ringed one

MARS

Despite being red,
Mars is cold

VENUS

Venus has a
beautiful name

LESSON DEVELOPMENT

Despite being red, Mars is actually a cold place. It's full of iron oxide dust, which gives the planet its reddish cast

Insert your multimedia content here

DID YOU KNOW...?

MERCURY

Mercury is the closest planet to the Sun

SATURN

Saturn is the ringed planet and a gas giant

MARS

Despite being red, Mars is a cold place

...and did you know this?

Despite being red, Mars is actually a cold place. It's full of iron oxide dust, which gives the planet its reddish cast

If you want to modify this graph, click on it, follow the link, change the data and replace it here

PROBLEM

Mercury is the closest planet to the Sun and the smallest one in the Solar System. It's only a bit larger than our Moon

SOLUTION

Jupiter is a gas giant and the biggest planet in our Solar System. It's also the fourth-brightest object in the sky

OVERVIEW DIAGRAM

EXERCISE

- Mercury is the closest planet to the Sun, but does its name have anything to do with the liquid metal?
- Contrary to popular belief, no. The truth is that this planet was named after the Roman messenger god, Mercury

ASSIGNMENT

Mercury is the closest planet to the Sun, and Neptune is the farthest one.
Calculate the distance between these two planets

OTHER CONCEPTS

MERCURY

It's the smallest planet in our Solar System and the closest to the Sun

SATURN

This is the ringed planet, composed mostly of hydrogen and helium

VENUS

Venus has a beautiful name and is the second planet from the Sun

MARS

Despite being red, Mars is actually a cold place. It's full of iron oxide dust

JUPITER

Jupiter is a gas giant and the biggest planet in our Solar System

NEPTUNE

Neptune is the farthest planet from the Sun and the fourth-largest
