Bus106 TMA 1 10/10

1.) The word concerns the laying down of policies

Ans => Administration

2.) Is the process of transferring information from a sender to a receiver with the information being understood by the receiver

Ans => communication

3.) The manager must comply with the requirements for establishing and operating his business

Ans => Legal

4.) The essence of lies in checking existing actions againsts some desired results which have been determined

Ans => control

5.) Providing scheme of control is the responsibility of

Ans => Board or Director

6.) Control must be tailored to positions, this is necessary so that the right person will activities in their own field

Ans => monitor

7.) distribution, expenditure patterns, saving capability of consumer all effect demans

Ans => income

8.) Flat shaped structure falls under

Ans => wide span of control

9.) is aimed at calculating or predicting what is likely going to happen

Ans => Forecasting

10.) The very survival of an dictate that a certain minimum profit has to be made

Ans => organization

BIO 101

1. The longest phase in the cell cycle is

Answer: Interphase

2. Which among the following options is not a kind of plant

Answer: Abacus

3. The activity of cambium ring lead to the formation of

Ans: Secondary Tissue

4. If an individual wants to view diakinesis, which of these plant would be better

Answer: Onion roots

5. Which among the plant group can survive both on land and in water?

Answer: Bryophyte

6. To say an organism is alive means

Answer: All the options

7. Which among the following options is a dehiscent plant

Answer: Pea

8. If there is an increase in the condensation of chromatin during the process of cell division there would be

Answer: Both A&B or heterochromatin decreases

9. What comes to your mind upon hearing that water passes through semi membrane

Answer: Osmosis

10. The number of DNA in the chromosome at the G2 stage of the cell cycle is

Answer: 2

1. A basic physical quantity is one of the following except ___

Answer: Acceleration

2. Sorry i Failed to solve question 2

3. Which of the following graph will give a straight line graph that will not pass through the origins

Answer: The answer is “C”

4. Derived quantities are one of these except __

Answer: Temperature

5. If P is plotted against V in Boyle's law equation, the graph is

Answer: non-linear

6. The change in position of an object with respect to time refers that time is _ variable

Answer: Independent

7. Which of the following equations of a simple pendulum gives a linear relationship between T and L

Answer: T^2=(4Ï€^2)l/g

8. Which of the following equations of a graph specifies negative slope

Answer: y = m x + b

9. Given the equation, T = 2Ï€âˆš(M+m)/k reduce the expression to a linear one as y = ax + b . what is b?

Answer: (4Ï€^2m/k)

10. The constant of proportionality on a graph of y against x is given by

Answer: gradient of y and x

PHS801

_____ is preventive rather than curative.

Medicine (WRONG)

_____ has the responsibility of organising tertiary care institutions.

Federal Ministry of health

Public health prevents _____ and spread of disease.

Epidemics

___ arm of public health gives you a clear understanding of equitable distribution of resources in health care settings.

Social justice

Assessment, policy development and _____ are the functions of Public health.

Assurance

Diagnose and investigate health problems and health hazards in the _____ is one of the essential Public Health Services.

Community

A _____ to guide programme design and evaluation is very important for a successful progranmme

Theoretical framework

In the history of Public health in Nigeria, a medical department Headquarter had two arms _____ and _____.

Curative and preventive

Marriage, birth and death records, make up the _____.

Vital statistics

_ is a type of theory that explains health behaviour and health behaviour change by focusing on an individual.

All of the options

PHS803

A risk Ratio is also called

Relative Risk

The studies on relationship between smoking and Lung cancer that contributed to epidemiology was done in the

1950

Â in Analytical Studies Prospective studies is otherwise known as

Cohort studies

Vital statistics are statistics that records

Health status of a population (WRONG)

Epidemiology Based its Ideas as expressed Over 2000 years ago by the fanous greek philosopher

Hippocrates

Descriptive Epidemiology means

Data cleaning and Analysis (wrong)

Epidemiological triad Model of disease considers

Agent, Host and Environment

One of the fundamental assumptions of epidemiology is that disease

Does not occur in a vacuum

Epidemiology was coined from a Geek word meaning

The Science of people

Causal Pie model of Disease was Proposed by

Rothman 1976

PHS805

The scheme for selecting the sampling units from the study population is known as ----

Sampling design

Sampling techniques can be grouped into --- broad categories

TWO

The different measurement categories include the following, except

None of the options

The list of units from which the sample is to be selected is known as ---

Sampling frame

The following are examples of variables except

NONE OF THE ABOVE

The statistical process of selecting a subset of a population of interest for purposes of making observations and statistical inferences about that population is known as ----

Sampling

Another name for independent variable is ----- variable

Explanatory

The population from which we take our sample during research is known as –

Study population

Examples of variables include the following, excep

Weather

The population in which we are interested during research is known as ----

Target population

PHS807

The following are examples of proximate factors except

CLIMATE

The branch of applied science and technology that addresses the issues of energy preservation, protection of assets and control of wastes from human and animal activities is known as -----

Environmental engineering

Environmental ----- is a multidisciplinary field of science concerned with the study of the harmful effects of various chemical biological and physical agents on living organisms.

Toxicology

he study of an organism's contact with chemical, physical, biological agents or other health risks occurring in their environments, and advancing the knowledge of the mechanisms and dynamics of events either causing or preventing adverse health outcomes is known as ----

Exposure science

The ----- is defined as the complex of physical, chemical and biotic factors (as climate, soil, and living things) that act upon an organism or an ecological community and ultimately determine its form and survival.

Environment

Examples of factors that can have a direct impact on leading health events include the following except

Climate

Environmental ------ is concerned with the discovery of the environmental exposures that contribute to or protect against injuries illnesses, developmental conditions, disabilities, and deaths.

Epidemiology

The application of scientific and engineering principles for protection of human populations from the effects of adverse environmental factors is known as ----

Environmental engineering

The network of treaties, statutes, regulations common and customary laws addressing the effects of human activity on the natural environment is known as ----

Environmental laws

The following are the major constituents of air except
Water vapour

PHS809
Which of the following is not correct about the mental dimension of health

ALL OF THE ABOVE

All the following is correct about the concept of disease except
All of the above

Which of the following is not correct about the biomedical concept of health?
All of the above (WRONG)

The concept of health where the body cells, organs and systems are at optimum performance is popular decribed as _____demesion of health?

Physical

All the following was included in WHO definition of health except _____diemnsion

Social (wrong)

The definition of health according to Dubos buttressed the _____concept of health

Ecological
When there is a successful interruption of a disease in the community, the disease can be said to have been

Eliminated

The PCR COVID-19 test is a typical example of
Diagnostic test

According to the medical model of disease causation, infectious agents are decribed as
None of the above (WRONG)

An untreated SARS-CoV-2 will lead to _____number of outcomes
2 (WRONG)

PHS811

The stage in the health planning process when planning can be said to have ended is _____stage?
None of the above

The most appropriate time for situation analysis during the planning cycle ought to be at _____stage?

2nd stage

All the following is true about management except?
All of the above (WRONG)

The tendency to delegate undesirable tasks to team members who seldom refuse could be referred to as?

Dustbin delegation

Which of the following is not correct about planning?

It is a management process (WRONG)

A plan that contain very detailed proposals for the provision of specific health programmes and services can be decribed as ?

Functional plan

_____observed that supervision and feedback can improve self-confidence of the delegatees?

Tappen

SWOT analysis in planning means?

Strenght, weakness, Opportunity and threat

The process of determining what the health sector should be achieving in the future and how it will carry out the actions necessary to bring about those achievements is known as _____

Strategic plan

Which of the following is not correct about delegation?
None of the above (WRONG)

PHS813

The two types of statistics are:

Descriptive and inferential statistics

Biostatisitcs is applied in

ALL OF THE ABOVE

The following are routine sources of data

All of the options

All qualitative variables are measured on -------scale

Norminal

Ad hoc sources of data includes

All of the options

Set of values of one or more variables recorded on one or more observational unit is called

Data

The difference between the largest and smallest scores of ungrouped data is the—

Range

The scientific process of collecting, collating, analyzing, presenting, interpreting and disseminating health and health-related data is called

Statistics (WRONG)

The ages of 5 children for immunization are: 6, 5, 8, 7 and 4 (in years). Find the variance
2.2 (WRONG)

Vital statistics includes the following

All of the options
PHS815

Health financing mechanisms that can improve Universal Health Coverage include all the following except

none of the options

The factors that contribute to the low enrolment in Community-based health insurance include the following, except

clear attractiveness of the benefit of CBHI package

The tax placed on the production or sale of certain goods or services that can be used by governments to change the populationâ€Ÿs consumption behavior by increasing the cost of a particular good or service is known as ----

value added tax (WRONG)

Common examples of indirect taxation include the following except

general sales tax

The following are examples of functional health care financing strategies except

non-charitable donations

Which of the following is a function of health financing?

All of the options

This occurs when employers and/or individuals choose to purchase insurance from private firms so as to mitigate the potential loss of income associated with illness or the costs of health care consumption.

Voluntary insurance

When health financing is contributed by multiple countries, the financial support formed is known as -----

multilateral relationship

The following are sources of healthcare financing in Nigeria except

none of the options

The financing of health care services encompasses the following except

none of the options

PHS817

All the following correct about occupational health and safety except___?

All of the above (WRONG)

Physical damage to body tissues caused by an accident or by exposure to environmental stressors in a work place is best described as

Injury (WRONG)

Wich of the following is not correct about work?

Pesrsonal gratification is determined by economic importance

A thing or situation with the potential to harm a Worker can be described a_____?

Hazard

The United Nations Conference on Environment and Development in 1992 took place in ___?

Brazil

Which of the following is not correct about the objective of healthy and safe work environments

It encourages the use of low-tech equipment

A condition that results from exposure to a physical, chemical or biological agent to the extent that the health of the Worker is impaired could be described as _____?

Occupational illness

All the following constitutes a work place except

ALL OF THE ABOVE

All the fowing is correct about occupational health except

All of the above

Most workers spend atleast _____ hours in their workplace

8

PHS819

The following is a scope of health promotion EXCEPT

none of these

Which of the following is the objective of health education?

Awareness interest adoption (wrong)

Health promotion can refer to any event, process or activity that facilitates the protection or improvement of the

all of these

which of the following is the very effective method of health education to bring about change in health behavior of people?

Group discussion

The introduction of things like electricity, airplane, television to health education etc is

Exploration (wrong)

Which is the best way of changing the behavior?

Internalization

Which of the following is not a key element of communication?

Flash card (wrong)

Distortion of information means

All of the Above

Health promotion is defined as â€˜the process of enabling people to increase control over, and to improve, their health byâ€™.

World health organization

The healt promotion approach that relies heavily upon the provision of information about risks and benefits of certain behaviours.

ACC812

The _____ concept also assumes that costs should be recognized when they occur, and not when money is paid

Accruals

The _____ concept allows the user to have confidence that no profits are included that are not earned and, if not yet received, are reasonably certain to be received.

Prudence

Services paid for in advance that have not been received at the end of an accounting year are treated as a cost of the following accounting year and are referred to as _

Prepayments

The _____ concept assumes that when accounting for transactions the preparer should look at the economic substance of a transaction, not its legal form.

substance over form

The _____ concept, otherwise known as the time interval concept, refers to the practice of dividing the life of an entity into discrete periods for the purpose of preparing financial statements.

time period

The _____ concept assumes that an entity will continue to operate in the foreseeable future.

going concern

The _____ concept refers to the assumption that in the measurement of profit, costs should be set against the revenue that they generate at the time when they arise.

Matching

_____ concept allows the user to look at a reporting entityâ€™s financial statements and to know that these represent the performance and financial position of the business unit and do not include any assets, liabilities, income or expenditure that are not related to the business.

Entity

The going concern assumption states that assets are valued at their _____ not their scrap value

historical cost

A fixed asset is recognized in the statement of financial position at cost price less _____ if the reporting entity is a going concern.

depreciation

CLL804

The year _____ marked the beginning of the legal regulation of issues like company activities in the trritory known as Nigeria today.

1876

The Companies and Allied Matters Act 2020 is divided into ___ parts

Seven

Although Companies and Allied Matters makes provision for limited liability as well as limited partnerships, each state has a law regulating the relationship between partners

Agree

The oldest and commonest unit of business undertaking is

sole trading

Part E of Companies and Allied Matters Act 2020 makes provisions relating to

GENERAL

With respect to companies' proceedings none but one of the following courts has jurisdiction to the exclusion of all others.

Federal High Court

The first companies' statute or legislation in Nigeria was

The Companies Ordinance 1912

Prior to the amalgamation of Northern and Souther Nigeria in 1914, the preoccupation of the _____ communities was principally agriculture, hunting and trading by barter.

Indigenous

Section 14 of the Supreme Court Ordinance provided that the common law, the doctrines of equity, and the statutes of general application which were in force in England on the 24th day of ___ shall be in force within the jurisdiction of the court

1874

The Companies Act 1968 was enacted to accommodate the growing _____ activities.

Business (WRONG)

ECO824

The profit-maximizing level of output for a monopolist is at the intersection of ..

long run marginal cost and marginal revenue

â€¦..... are those costs that cannot be altered, increased or decreased, by varying the rate of output

Sunk cost

If the advertisement-elasticity of sales is greater than one, sales â€¦..... the rate of increase in advertisement expenditure

increase at a higher rate than

When the state of nature has no influence on the outcomes of given alternatives, we say that the decision maker is operating under â€¦.....

Certainty

If income elasticity of demand is greater than 1, an increase in income has more than proportionate increase in sales if the commodity is â€¦..... good

an essential good (WRONG)

The cross-elasticity of demand for a monopolistâ€™s product is either â€¦.....

zero or negative

If demand is perfectly inelastic and price of the commodity increases, total revenue will â€¦.....

Increase

When total cost increases from N37,500 to N43,700, output increases from 550 units to 825 units, calculate the marginal cost

19.5

Economic profit considers â€¦.....

both implicit and explicit costs

Firms in a perfectly competitive market can make economic ptofit if the market price is such that average revenue â€¦..... long-run average cost

greater than

MBA806

In exceptional circumstances, it may not be practicable to raise the _____ with the immediate supervisor or managers.

Grievance

If rules are not written down, people are likely to remember the rules differently and varying approaches to _____ will occur.

Discipline

A suitable _____ for the grievance procedure might be to use similar headings to those used in the design of a disciplinary procedure.

Format

Whenever people are employed in an organisation, it is necessary to establish the terms and conditions of their _____

Employment

Collective bargaining is defined as a process of decision making, and its function has been recognised as a _____ making process [Flanders, 1969].

Rule

Changing personal needs will lead individuals to resign from their jobs to pursue other activities, or to _____.

Retire

Effective communication of organisation's _____ towards the expression of grievance and the procedures to be followed is vital.

Policy

One of the reasons why redundancy is so problematic (to both _____ and theorists) is that it runs counter to many of the new but popular theories of management.

Managers

The third stage of grievance â€" action follows the _____ formulation of the grievance.

Public

A method of handling grievances which is gaining favour and popularity in some _____ is that of peer review.

Organizations

MBA814

_____ management advocated the application of scientific methods to analyse work

Human relations proponent argued that managers should stress primarily employee welfare motivational _____

Communication

Management should coorperate with workers to ensure that jobs match plans and _____

Principles

Fredrick Taylor identified _____ principles of scientific management

4

_____ management emphasized the perspective of senior managers within the organization and argued that management was a profession

Administrative

Management should ensure an appropriate _____ of work and responsibility between managers and workers

Division

management should scientifically select train teach and develop each worker so that the right person has the _____ job

right

To implement his approach _____ used technique such as time and motion study.

Taylor

Fayol five functions of management include all except_____

Recruitment

The _____ management approach attempted to build specific procedures and process into operation to ensure coordination effort

Systematic

MBA816

When one quantity varies as the product of two or more quantities, then it is called _____ variation.

Find the sum of the first 28 terms of an arithmetic progression whose series is give as 3 + 10 + 17 + â€¦ n

2730

Find the value of x from the following; 3x + 2 = 2x + 10

8

_____equation can be solved using graphical method

Quadratic

A _____ equation is a mathematical statement or an expression that has an unknown variable.

Linear

An arithmetic progression is a sequence in which quantities increase or decrease by a common _____

Difference

A simultaneous linear equation is a set of equations with more than one _____ variables

Unknown

The sequence 5, 7, _____, 11 â€¦ n is an arithmetic progression

9

Find which term is 383 from the following series, 5 + 8+ 11 + â€¦ n.

127

A quadratic equation is an equation of _____degree.

Second

MBA820

Which of the following options is an example of operational goals

the choice of structure

Strategy consists of _____ components

Four

The three main components of organizational mission does not include_____

a statement of the major policies and regulations concerning the employees

One of the normal outgrowths of employee relations objectives is _____

employee stock option plans

One of the options is not one of the five distinct but interlocking areas of scope of strategy

Strategy as a mission

By adopting a systems view of organizations, we can distinguish _____main types of organizational goals.

Four

Specific decisions relating to personnel policy may not include_____

unalterable transmission of policies is ensured.

The major influences on the formulation of a corporate mission exclude:

Company Claimants

In order to achieve sustained corporate growth and profitability, strategic planners commonly establishÂ_____

long term objectives

The companyâ€™s internal strengths and weaknesses are evaluated in relation to _____

the competitorsâ€™ position in the industry

MKT826

the study of individuals, groups or organization and the process they use to select product to satisfy needs is -------

consumer behavior

identify the types of model of consumer behavior

all of the above

which of the option identify the third stage of product life cycle

all of the above (WRONG)

markets in which companies and individual pruchase goods for purposes other than personal comsumption is called

organizational markets

which is the type of business product

installation

the habitual buying habit of consumer behaviour is classify as the ------

most common and simplest behavior

importance of marketing research can be identify as

ALL OF THE ABOVE

anything that is offered for acquisition, use and disposal and can satisfies the needs of the target market is called

product

the function which links the consumer, customer and the public to marketer through information is -----

marketing research

market segmentation strategies are base on some factors

all of the above

MBA821

Management refers to some activities with managing people at work

personnel

Human resources _____ has got an important place in the area of industrialization

Planning

_____ defines man power planning as a process of analyzing an organizational human resources needs

Walker

Human resources as a plan is embedded with implementation programmes designed to ensure availability of adequate _____ personnel

qualified

The employer should always be careful in developing the _____ of each individual

personality

_____ resources planning has to be a system approach and is carried in a set procedure

Human

Unemployment does not mean that the labour market is a _____ market

buyer

_____ define man power as a process of forcasting the future human resources needs of an organization

Walker

The changes in production technologies and management techniqes have been _____ rapid

extensive

The changing profile of the work force in terms of age sex etc has implication for _____ planning

manpower

MBA823

Organizational structure deveeloped partly from the ancient_____

Hunters

In a decentralized structure, the decision-making power is_____

Distributed

Standard procedures and routines rest on a company's_____

Organizational structure

How an organizational structure will look like is determined the_____

Organization's objectives

Organizations are sometimes looked at as variants of clustered_____

Entities

Organizational structure determines which individual will participate in the_____

Decision-making process

Modern firms must devise new ways of remaining competitive in the_____

Business environment

In a centralized structure, the top level management makes the_____

Decisions

Organizational Structure of a business determines the assignment of_____

Roles and Responsibilities

In an organization, how activities and tasks are allocated is determined by the_____

Organizational structure

MBA287

Organizational behaviour concerns the behaviour of people

in the organizational setting

According to Rudolph and Kleiner (1989), motivation at work is classified into the following except

Motivational motivator

Influences in behaviour in organizations are disernable by the following parameters except;

the temperament

Characteristics pattern implies that consistency and continuety are uniquely identifying

an individual

In group dinamics, group task role include the following except

The reason decoder

According to Persons (1980), organizations are structured in the following layers except

Family level

The study of interactions and forces within small face to face groups is known as

Group dynamics

Mullins (2000), posited that the bevaviour of people cannot be studied

in isolation

In culture and organizational behaviour, Hofstede (1980) identified certain dimensions and they are

A and B above

Understanding the uniqueness of individuals and the development of self concepts is known as

Idiographic approaches

MBA829

Subordinates accept the behaviour of leaders that help them achieve their individual_____

Goals

In many organizations, supervisors contribute to employees'

Stress

Individuals who use position style are more successful in a climate of_____

Uncertainty

Leaders will be successful only when subordinates see them as_____

Asset

Aggressive leaders are more successful in leading workers in _____

Manual operations

The chances of successful leadership increases when the country is witnessing_____

General desire

People-oriented leaders pay attention to the welfare of_____

Individual workers

A leader who uses position style leads by virtue of the power of that_____

Leadership position

As with many theories of leadership, situational leadership theory has excellent_____

Intuitive appeal

Leaders develop different roles with different subordinates and thus act differently with___

Different subordinates

MBA833

A conflict that occurs within an individual is known as â€¦â€¦â€¦

intra personal conflict

Which theory postulates that workers are primarily bound together for the purpose of improving and maintaning their working condition?

The Webb's Theory

Considering health and safety in the work environment, when the office layout is such that are linked by corridors with the advantage of privacy, peace and security, it is described as â€¦â€¦â€¦.

Small closed offices

What term is used to describe the right, interest, and benefit accruing to one party or some forbearance, detriment, responsibility given or undertaken by the other party?

Consideration

In Industrial Relations, the nature of the relationship between the employer and the employees is â€¦â€¦â€¦â€¦

contractual

The mutual interaction between the representatives of both management and workers for the purpose of exchanging information considering proposals as it effects the organiztion is termed â€¦â€¦â€¦â€¦

Joint Consultation

One of the following is not part of the essence of industrial relations

embarking on strikes

Which type of conflict arises from natural causes, such as the simple fact that people are different?

Spontaneous conflict

Who approves contract of apprenticeship?

industrial officer

In Collective Bargaining, those issues which are absolute prerogative of the management of the organization which fall under the procedural agreements are referred to asâ€¦â€¦â€¦.

Exclusive items

MBA835

Power and _____ differences occur when one party has disputable influence over another.

status

Using a third party to settle a dispute involves _____

mediation

During the performing stage, the major emphasis is on _____ solving and accomplishing the assigned task.

problem

Conflicts also emerge when _____ boundaries and responsibilities are unclear

JOB

Bargaining and negotiation mean that the parties engage one another in an attempt to systematically reach a _____

Solution

_____ can facilitate communication to ensure that conflicting parties hold accurate perceptions.

managers

A personality clash occurs when _____ simply do not get along with one another and do not see eye to eye on any issue.

people

The forming _____ of development is a period of orientation and getting acquainted.

stage

_____ as well as individuals develop specific styles for dealing with conflict, based on the desire to satisfy their own concern versus the other partyâ€™s concern.

teams

A team norm is a standard of conduct that is shared by team members and guides their _____

Behaviour

MBA801

One of the options is not a good example of short range forecast

operating cash budgets

Â Â _____is intended to avoid an employee being trapped in job specialization by trying to improve the variety within a certain sphere of a person's ability and interest.

Job enlargement

___entails matching tasks or work activities to individuals or task groups

Job design

The major players of Scientific Management did not include------

J Roethlisberger

Importance of Forecasting in POM does not include_____

Finance Embedding

Environment scanning is the considering of events and trends that present either threats or _____for the organization.

Opportunities

The mission statement should serve to guide formulation of strategies for the organization, as well as_____ at all levels.

decision making

The transformation process of the operations function excludes one of the options

Clothing

A batch process differs from the job process with respect to

volume, variety and quantity

Â Â _____is the fundamental rethinking and radical redesign of processes to improve performance dramatically in terms of cost, quality, service, and speed.

Re-engineering

MBA881

Policy can simply be defined as a

Blueprint

Which of these is not a characteristic of a good policy?

Neat

A sole proprietorship is owned by

1 person

Which of these is not a concept of business policy?

Programmes WRONG

Benefits of policy do not include

Boost market share

A corporation is

A limited liability business

Business policy originated from

Harvard

Policy is not connected with

Production WRONG TRY MANAGER

In essence, a policy is _____ for organisational action and the implementation of goals and objectives

A guideline

Partnership is owned by

2-10 people WRONG

NSC201

Which of the following activities of a nurse best describes nurses as a care provider?

Determine clientâ€™s need

Which of the following statement is NOT true about the Pre-Nightingale era of development of nursing?

Nurses never worked under priests

_____was the first University to start a degree program in in Nigeria?

University of Ibadan

lorence Nightingale cared soldier at----

Barracks Hospital in Sentari

Which of the following is not a significant reason for a student nurse who is studying the historical development of Nursing?

Ability to remember past methods of care

Many nurses contributed to the development of nursing in the USA and Canada. The nurse that was instrumental to affiliation of nursing education with universities is____

Mary Adelaide Nutting

The initial focus of nursing are all Except

provide last offices

The US has produced theorists whose theories are influencing all aspects of nursing worldwide. Such persons include the following except____

Afaf Melies

Which of the following is example of how values are formed in nursing profession? i Observing ii Modelling iii. Moralizing iv. Reward and punishmenr

i and ii only

One of the standards pioneering nurses in Nigeria who later became the first Nigerian Registrar of the Nursing Council is_____

Adetoun Barley

NSC203

Most abundant blood cells in the human body are

RBCs

Which component of protein contribute to maximum percentage to total plasma protein

Albumin

The average life span of a red blood cell is

120 days

Normal amount of plasma protein ranges from

6.4-8.3 gm/dL

Combination of heamoglobin with oxygen is called

Oxyheamoglobin

Plasma represents _____ percent of total blood volume

55

Largest WBCs in peripheral blood is

Monocyte

The process by which WBCs squeeze through pores in capillary wall is

Diapedesis

Haematocrit value is the ratio of

RBCs to plasma

Which of the following organelle is called â€˜Suicidal Bagâ€

Lysosome

NSC205

The patella protects what?

The knee

The first vaccine was produced by who?

Edward Jenner

Defence protein produced by body cells that are infected by virus is what?

Interferons

The chemical in saliva that kills micro organism is called

Lysozyme

Most bones of the skull of what type of bone?

Flat bone

The upright posture of humans is mainatined by which skeleton?

Axial

One of these drugs is used to prevent the rejection of transplanted organs.

Cyclosporine

An articulating surface which is smaller and concave in all direction is called

Female surface

One of the following is not a type of suture joint?

Dentate suture

The spine protects one of the following systems.

UROGENITAL

NSC207

A nucleotide base not found in RNA is

Thymine

Which of the following is not an example of RNA

mtRNA

Nucleotide base predominately found in RNA is

Uracil

Which of the following is not true about RNA

They have a very long life span

Which of the following nucleotide base is not found in DNA

Uracil

The process of converting DNA to RNA is known as

Transcription

All the following are nucleotide of physilogical important not found in genetic material except

URACIL

Which of the following is incorrect about enzyme activity

catalysis takes place at the active site/ Most enzymes are proteins **wrong**

The addition and/or removal groups to incorporate double bond is charateristic of which of the following class of enzyme

Lyases

The bond between two nucleotide molecule stabilizing them is

HYDROGEN

NSC209

The type of assessment that is typically done on admission to the hospital or onset of care in a primary care setting is _____?

Comprehensive assessment

When a nurses asks a patient during history taking â€œWhat other things do you see or feel when symptom occurs? The nurse is eliciting information on which are

Associated manifestation

Which of the following is not a reason why the nurse performs assessment continuously throughout the nursing process

to establish rapport and interpersonal relationship

_____ is the systematic assessment of the bodily and mental status of a patient

physical examination

Pain assessment is captured under the _____ functional pattern

Cognitive-Perceptual

The following are complementary therapies to achieve relief of pain EXCEPT _____

medication

During an interview and physical examination, the nurse should be sensitive to issues of _____

all of the options

Which of the nurse leader defined pain as â€œwhatever the person experiencing the pain says it is, existing whenever the person says it doesâ€□

Margo McCaffery

The functional health pattern format used in nursing assessment was formulated by __

Gordon

Which of the following questions is the MOST appropriate for the nurse to ask a client who lost the husband with history of 3 days anorexia?

Did the anorexia start before/after the sad incident occurred?

NSC211

An example of organic acid produced by microorganisms

gluconic acid

Bacteria are

prokaryotes

Protozoa are

eukaryotic

The ability of a lens to separate or distinguish between small objects that are close together is

resolution

Viruses can only be seen with the aid of

electron microscope

Bacteria reproduce by

binary fission

Microbiology is the study of

microorganisms

This field of microbiology deals with microorganisms in the natural environment

Microbial ecology

The main braches of Microbiology are

basic and applied

Microorganisms belonging to thedomain archae

are prokaryotic

NSC213

Which hormone, produced by the kidneys, plays a role in the production of red blood cells?

erythropoietin

Which of the following structures is NOT a part of a nephron?

reneal pelvis

Ultrafiltration by the glomerulus is enhanced by

all the options above

Which of the following substances would NOT normally be expected to appear in urine?

glucose

Which of the following substances does NOT normally pass through from glomerular capillaries into the filtrate?

albumin

Each kidney contains about a million nephrons, each of which begins in a filtration apparatus called:

the glomerular capsule

What volume of glomerular filtrate do adults make every day?

180litres

Which part of the human body produces urea?

muscle

Which of the following statements about antidiuretic hormone (ADH) is incorrect?

without ADH, the proximal parts of the nephron are impermeable to water

Which of the following structures is found within the urinary system?

ureter

POL111

Comparative Politics, one of the major branches of Political Science best applies following characteristics of a science except

The impossibility of verification of the data as well as the generalizations

In what nature can political science serve the rich and advanced nations without losing sight of the myriad of socio-economic problems confronting poor countries of the Third world?

Post-behaviouralism

The scientific approach in Political Science refers to

The methods being employed by the practitioners of the discipline WRONG

The scientific approach in Political Science refers to

NSC301

Patient/ doctor relationship are sometimes unequal and requires higher levels of trust.

Vulnerability

__ refers to the way in which symptoms are perceived, evaluated and acted upon by a person who recognizes such pain, discomfort or other signs of organic malfunctioning

Illness behavior

The Health Belief Model

Becker, 1974

__ was developed to explain and predict behaviour in health context

The Health Belief Model

_ is by definition a self-limiting disease which is mostly characterized by the symptoms having a rapid onset.

Acute Illness

For the psychologist, ___ involves the development of interventions to help people practice good health habits and change poor ones

Health Promotion

The condition arises when there is a brief interruption in the normal electrical function of the brain

Neurological Disease

___ enable a person to report self-experiences of health on a dayto-day basis

Symptoms

The sick person should try to get well

Obligations

This asserts that individuals are motivated to maximize gains and minimize losses

Expectancy-Value Model

NSC303

Physical and mental traits of an individual are determined by genes during ___

Conception

__reflects social values, attitudes and activities of an individual

Lifestyle

__ wellbeing is ability to cope with the world in a way that brings you satisfaction

Mental

___defined health as the relative absence of pain and discomfort and a continuous adaptation and adjustment to environment to ensure optimal function... and a better quality of lifennn

Dubos

___ is pertains to the tissues, organs and systems of the body and the harmonious relationship between them

A and B

The ecological concept raises two issues: _____ and _____

Imperfect man and imperfect environment

Determinat of health include all except __

Age

Health is a relative concept; this may be due to _____ condition

Ecological

__ concept see disease or ill health is caused due to disease causing organisms

Biomedical

Every individual and communities have their own concept of ___

Health

NSC305

There are----forms of immunity

2

Reaction of vascularized living tissue to local injury is-

Inflammation

Which of these is the body's response against individual invading organisms?

Acquires immunity

Which lymphocytes is activated in cell mediated immunity?

T-lymphocytes

Another name for natural immunity is-

Innate Immunity

Main cells of the immune system is—

White blood cells

Cell mediated immunity is a type of----

Acquired Immunity

The three distincts duties of immune system are these excep

Phargocytosis

Specific immunity is also called—

Acquired immunity

These are leukocytes except;

Ribocytes

NSC307

Which terminology applies to what the drug does to the body

Pharmacodynamics.

Extrinsic asthma

occurs in individuals exposed to environmental allergies.

Which of these different dosage forms is for rectal route of drug administration?

Suppositories

Treatment of systemic infection/malignancy with specific drugs that have selective toxicity for the infecting organism/malignant cell with little or no effects on the host cells describes

chemotherapy.

The primary drug used in the treatment of Type I diabetes mellitus (DM) is

insulin.

A disadvantage of oral route of drug administration is its

relatively slow onset of action.

An H2-receptor antagonist used in the treatment of peptic ulcer disease is

ranitidine.

What name is given to the specific molecule in the biological system with which a drug usually interacts to elicit a pharmacological response?

Receptor.

Which type of medicines are not well regulated by NAFDAC?

Traditional medicines.

Drugs that majorly satisfy the priority health needs of the population are known as

essential drugs.

NSC309

The normal estimated week of confinement is within _____ week of gestation

38 – 42

At what week of intrauterine life does the gonadal tissue differentiate into ovaries and the para-mesonephric ducts develops into female reproductive organs?

10 weeks

The procedure that involves direct visualization of the peritoneal cavity, ovaries, andnthe outer surfaces of the fallopian tubes and uterus is called ___

laparoscopy

The Nursing and Midwifery Council is a category B parastatal of the Federal Ministry of Health established by what Decree No?

Decree 89, 1979

maternal and child health nursing can be visualized within the following frameworks Except _____

health promotion

The objectives of the Nursing and Midwifery council of Nigeria include the following Except_____

negotiate salary structure for nurses in public and private sector

In recent times, a growing trend toward health care consumerism, or self-care has led to which of the following

all of the options

Which of the following is a legal responsibility of the midwife?

all of the options

The phase of health care in which the focus of the midwife is promptly diagnosing and treating illnes using interventions that will return client to wellness is __

health restoration

Pubarche which is the onset of sexual hair growth is controlled by _____ hormone?

androgen

NSC311

The order of Deaconesses is similar to today's ___

Public heath nurse

Which of the following options represent initial focus of nursing

Provide care

The Benedictine Order comprising men was founded in the

6th century

In the ancient cultures, the set of people that assumed the responsibilities ofhealth and medical acre were

Religious leaders

The act of utilizing the environment of the patient to assist him in his recovery is theorized by

Nightingale

Nursing practice in the twenty-first century is an art and science that is centered on the

CLIENT

Christianity taught that men and women are _____ before God

Equal

Florence Nightingale became the _____ of modern nursing in 1851

FOUNDER

Nursing and _____ has been interdependence throughout history

Medicine

Women's entry into nursing is could be trace to AD _____

300

NSC402

An examination done to access the state of fundus and detect opacities of ocular media

Ophthalmoscopy

The refractive state of the eye is determined by the combination of the following EXCEPT

Posterior chamber depth

Examination of lacrimal apparatus is carry out to cher for the following EXCEPT

Bleeding

_____ detect the presence of trauma or a foreign body

Pen-Touch Examination

Blindness can be defined as inability to count fingers in day-light at a distance of

3meters

_____ is labeled when the disease manifests prior to the childâ€™s third birthday

Infantile glaucoma

Types of visual acuity exculde _____

Closed

The eyeball is too long and distant objects are focused in front of the retina

Myopia

Examples of non-avoidable blindness exculde of of the following

Hypertension

Method of measuring IOP based on the principle of indentation and flattening

Tonometry

NSC412

There are three settings which provide for a healthy mental healthnenvironment namely, _____, _____,_____

home, school and work place

A conducive emotional home environment for the child is one in whichnparents provide the child with the following, EXCEPT

permissiveness

According to Caplan Gerald, _____, reduces or eliminates the incidence of symptoms and signs of mental disorders.

Primary prevention

Heredity is in the category of _____ cause of mental illness

Predisposing

Trauma, infections, and nutritional disturbances are factors in _____ cause of mental illness

Precipitating

_____, of organic mental disorders and mental retardationnhas benefited from epidemiological data

Primary prevention

Morbidity and mortality rates associated with mental disorders by rehabilitation, is reduced by__

Tertiary Prevention

__ reduces the prevalence of mental illness withoutndirectly altering its incidence by early treatment of acute cases.

Secondary Prevention

_____ is also a psychological factor in Suicidal attempt

Personality disorder

The concept of_____ has been expanded to include Health Prevention through activities that improve the quality of life

Primary prevention

NSC416

Nigeria overall health system performance was ranked ------ among the 191 member states

187

Injuries and accidents account for -----of death in Nigeria

0.7

Morbidity and mortality rates of a disease increases when ---- increases

prevalence

â€¦â€¦. of women from Nigeria are over weight

0.21

Only ---- of children fewer than 5 years sleep under nets

0.06

diphtheria, pertussis, tetanus, poliomyelitis are --- vaccines

preventive

The Covid-19 was discovered in ------

China

High prevalence rate of about --- people have died of AIDS

300000

Communicable diseases are responsible for ----- of deaths

0.72

Prevalence of female circumcision is -----

0.19

NSC411

Which of the following is an advantage of observational methods of data collection?

NSC316

_ is defined as one that â€œcontinuously creates and improves both its physical and social environments, helping people to support one another in aspects of daily life and to develop to their fullest potential

healthy community

The follwing are the basic characteristics of a health family in respect to the environment except

understandind of environmental issues / clean and safe WRONG

There is no community that is self-sufficient because the character of today community is very___

Complex

The follwing are basic characteristics of a community except

community boundry

Which of the following is not a relevant type of communities

neibourhood community

There is no community that is self-sufficient because the character of today community is very_____

Complex

According to Cottrell (1976), a competent community do the follwing except

collaborate effectively in evaluation

___ is the infrastructure upon which economical viable of the society is built.

A healthy community

A clinical model of health deals with

relief of symptoms

which of the following is not a factor affecting individual's health

previous expectations

PHS210

One of the following is not a routine source of data.

Port financial records

One of the following does not fall under the uses of biostatistics in health and health related areas

Aeronotics services

Vital statistics a branch of biostatistics measures â€¦.....except

Descriptive

One of the following is not what Biostatistics is

Arithemetic

Qustions used for data collection should have the following qualities except one

Ambiguous

What is an Arithmetic mean

Sum of all the observations divided by the total number of observations

Primary sources of data are â€¦....except

Birth registration

The weighing scale that uses battery isâ€¦....

Digital scale

One of the following is not used to measure height

Calliper

The major advantages of a self administered questionnaire are â€¦.....except

Answered by the researcher

NSC405

An outline-of the topics of a subject to the covered in specific time is called

Syllabus

Curriculum is:

Overall activities of an institution

___connotes implementation of the curriculum plan usually through the teaching-learning process.

Instruction

Syllabus is a part of:

Curriculum

Important factor of curriculum is to help to achieve the:

OBJECTIVES

The mirror of the Society is:

School

___is the simplification of a syllabus into sub-division or units of instruction so that teachers may use weekly, monthly or termly as a guide in teaching the students.

Scheme of Work

Curriculum reflects the culture of:

Society

Curriculum provides guidance for:

Students

Which domain of objectives is not being evaluated through our present system of examination:

Affective

NSC502

epidemiological approach to need assessment

is quick to apply WRONG

Health need assessment help to learn more about

Prioties of local community WRONG

the first step in health need assessment is

get started WRONG

Health need assessment highlight

unmet needs

NSC504

At what stage of a program should monitoring take place?

NSC508

Telemedicine became possible and was recognized as a specialty in the late ___

1990s

_is given rules for determining an action on the basis of these features

Novice

In the ___medical and nursing informatics specialties emerged

1980s

__ and ___have become major resources for organizations, and health care is no exception

Information and information technology

Which of the theory can be applied to the development of nursing informatics skills, competencies, knowledge and expertise in nursing informatics specialists?

Novice to Expert Theory

___ is the science and practice dealing with the effective collection, storage, retrieval, and use of information

Information science

The personal computer was introduced, which allowed for __ in how these clinical systems were used

flexibility

The first certification for nursing informaticswas taken in

1995

__describe and define the scope of nursing informatics

ANA

An individual who grasps all the relevant rules and facts of the field and is, for the first time, able to bring his/her own judgment to each case is called

competent

NSC512

Problems arising from the job can be classified as follows except

Engineering

You may constitute a danger to other people around you, when you are sick at workplace such as the following except.

Asthma

Risk factors at the workplace include the following except

Cancer WRONG

â€¦â€¦â€¦â€¦â€¦â€¦â€¦ should endeavors to minimize or eliminate negative effects while promoting the positive effects

Occupational health nurse

An occupational health Nurse can play the following roles except

Surveyor

Occupational health deals with all aspects of â€¦â€¦â€¦.. and â€¦â€¦â€¦â€¦â€¦. in the workplace and has a strong focus on primary prevention of hazards.'

Health and safety wrong'

The following are the problems brought to the job except

diabetes mellitus WRONG

NSC312

During the â€¦..... Trimester the brain grows rapidly

third trimester

concept 3(three) of the new born care addresses â€¦.....

breastfeeding

The fetus stops growing about â€¦..... Days before birth

5 to 7 days

â€¦..... Stage starts from the end of two weeks after conception

embryonic stage

Newborns spend their time in a narrow range of â€¦.....states

psychological

By the â€¦..... Month of pregnancy , the fetus would have attained sufficient development to be viable

7th

Newborns have a unique appearance with â€¦..... Features

tiny

There are â€¦..... Factors influencing pre-natal development in the cousre manual

4

The pre-natal period consists of â€¦..... Distict stages

3

There are â€¦..... Type of critical concepts highlighted in the study manual

6

NSC501

Seminal fluid is

Alkaline

Menarche appear between

9 ----12 WRONG TRY 9---11

Secondary sexual characteristics appear in male between

NSC503

There is a psychological dependence on alcohol which is needed to relieve physical oremotional discomfort.

Habitual Symptomatic Excessive Drinkers

There is disorientation, associated with paralysis of ocular muscles, nystagmus, ataxia. It is due to acute deficiency of vitamin B1.

Wernickeâ€™s Encephalopathy

Itâ€Ÿs an organic brain damage that is irreversible

Korsakoff Psychosis

When an individual in crisis perceived threat acts as a precipitant that generates increased anxiety

Phase I

The bodily metabolism has become adapted to the presence of alcohol

Alcohol Addiction

_____ implies overzealous or indiscreet administration of drugs by physicians.

Misuse

This is a behavioral pattern of drug use characterized by overwhelming involvement with the use of a drug

Addiction

It is a compulsive drug-seeking behaviour in which the individual uses the drug repetitively for personal satisfaction.

Dependence

_____ is characterized by a pattern of pathologic use lasting for at least anmonth and causing impairment in social and occupational functioning.

Abuse

It is characterized by mental confusion, tremor, sensory hyperactivity, visual hallucinations.

Delirium Tremens

NSC505

During induction of labour, the midwife must watch carefully for:

Maternal exhaustion WRONG TRY Prolapse of the cord

In a full term baby who has physiological jaundice, the level of unconjugated bilirubin never exceeds

NSC511

The client sustains a contusion of the eyeball following a traumatic injury with a blunt object. Which intervention should be initiated immediately?

Notify the physician WRONG TRY ACCOMPANY TO THE EMERGENCY ROOM

The client is being discharged from the ambulatory care unit following cataract removal. The nurse provides instructions regarding home care. Which of the following, if stated by the client, indicates an understanding of the instructions?

I will sleep on the side that I was operated on WRONG

NSC202

One of these is a local hormone.

Prostagladin

The posterior pituitary secretes how many hormones?

2

What is the weight of the pituitary gland?

2.0 - 2.5 g

Hormones bind to protein or glycoproteins called

Receptors

The pituitary gland is divided into how many lobes?

2

The removal of CSF from subarachnoid space is called

Spinal tap

Grey mater of the spinal cord is divided into what?

Horns

White mater of the spinal cord is a collection what fibers?

Myelinated fibers

How many pairs of spinal nerves arise from the spinal cord?

31

A drug that binds to a hormone receptor and inhibit its action is called

Antagonist

NSC208

Utilitarianism is an approach to ethics that means:

Whatever does the most good and the least harm for the greater number of people.

The wrongful act that gives rise to a civil suit is called

a tort.

Akin, an RN on the nursing unit, states to the student nurse, "I see you are working with Audu today; make sure you watch your patient carefully because I think Audu is one of our worst nurses." The student knows that this statement could be considered:

LIBEL

Patient autonomy is MOST accurately defined as the:

patient's right to direct his or her own care and to decide how end-of-life care should be provided.

A nurse's actions are considered to be grossly negligent if he or she:

wilfully or wantonly deviates from the standard of care.

If a nurse receives an order from a physician that he or she feels is detrimental to the patient's best interests, the nurse should:

discuss with the physician why the nurse feels that way

Ethics is MOST accurately defined as:

a behavior that is consistent with the law

The concept of consent refers to all of the following, EXCEPT the:

severity of the patient's injury

A primary care provider's orders indicated that a surgical consent form needs to be signed. Since the nurse was not present when the primary care provider discussed the surgical procedure, which statement "best" illustrates the nurse fulfilling the client advocate role?

What were you told about the procedure you are going to have?

One of the major differences between laws and ethics is that laws:

have sanctions for violation that are enforceable

NSC210

The inventions of agrarian society are all except

River diversion

Who was the person that conceived the word- sociology?

Auguste Comte

Who worked on protestant ethic?

Max Weber

Pre-insustrial societies include all except

Poultry society

Social Integration was proposed by—

EMILE DURKHEIM

All these are characteristics of society, except---

is limited to a specific purpose

Windmill as a source of power was developed during---

Agrarian society

Discipline of sociology has develop knowledge on----

Relationship

Revolutionary change is linked to---

Industial society

Which year was sociology first conceived?

1838

PHS202

Genomics and proteomics have provided extensive information regarding the

genotype

Identify the factor that does not affects food choices

skin colour

Select the option that is is among the high-throughput â€œomicâ€☐ technologies which their application helps to investigate the effects of nutrition on health

all of the options

the end product of fats include the following except

glycogen

Palm oil contains a lot of palmitic acid which is made up of

saturated fat

Experts have discovered that one of the major causes of childhood malnutrition in the developing countries is

religion/culture

_____ genomic is a rapidly emerging science still in its beginning stages

Nutritional

__ studies dynamic protein products and their interactions

Proteomics

__ provides an overview of the complete set of genetic instructions provided by the DNA

Genomics

___ looks into gene expression patterns

Transcriptomics

NSC306

The last stage of inflammation is _____

tissue repair.

Lewis has been kicked in the head. When it becomes inflamed,

more blood flows to that region.

Which of the following nursing assessments is a late symptom of polycythemia vera?

Pruritus

When a client is diagnosed with aplastic anemia, the nurse monitors for changes in which of the following physiological functions?

Bleeding tendencies

A client with anemia may be tired due to a tissue deficiency of which of the following substances?

Oxygen

__ involves tissues becoming red, swollen, and painful.

Inflammation

Which of the following disorders results from a deficiency of factor VIII?

HemophiliaÂ A

The nurse understands that the client with pernicious anemia will have which distinguishing laboratory findings?

Intrinsic factor, absent.

Which of the following blood components is decreased in anemia?

Erythrocytes

The nurse explains to the parents of a 1-year-old child admitted to the hospital in a sickle cell crisis that the local tissue damage the child has on admission is caused by which of the following?

Obstruction to circulation

NSC314

What is a defence mechanism?:

A mechanism designed to reduce stress and conflict caused by specific experiences.

When the patient believes that some body trying to do harm to him, this is called;

elusion pf persecution

The commonest psychiatric illness in world is:

Anxiety neurosis

The commonest mental illness in children is:

Infantile autism WRONG TRY NEUROSIS

Which of the following examples best illustrates a delusion of reference?

The news announcer on TV is talking about me

The commonest psychiatric disorder among elderly is:

Dementia

Which of the following is not an axis I disorder?

Schizotypical personality disorder.

Mental disorders are:

Defensive WRONG

False sensory perception in the absence of real external stimuli is called

Hallucination

The commonest psychotic illness in is

Schizophrenia

EHS204

Physical environment is also known as

Abiotic environment

Which of these is not a tool in environmental health practice

Automated pots

Examples of environmental health services including the following excep

Marital management

Living components of the environment carry out different functions based on their role and they are classified into three main groups which are the following except

Processers

The management of human faeces and the household level is known as

Basic sanitation

The following are components of environment health except

Food and nutrition

What is the part of the environment that focuses on humans?

Social environment

The hygienic means of promoting health through prevention of human contact with the hazards of wastes is called

Sanitation

Self-feeders are also known as

Autotrophs

Which of the options is not a subdivision of physical environment

Nitrosphere

Acc 102

1. The type of accounting that deals with gathering of cost information, cost attachment, budgeting and standard lost.

A.strategic management

B. Financial accounting

C. Cost management

D. Cost accounting ✅

2. Accounting equation that shows the net worth of a business is...

Answer- capital equal asset minus liabilities

3. Payment of liability will result in ..

A. Increase in asset and decrease in liability ✅

B.Decrease in asset and increase liabilities

C. Decrease in both assets and liabilities

D. Increase in both assets and liabilities

4. An item, process or activity for which a separate measurement of cost...

A. Cost object ✅

B. Cost unit

C. Costing

D. Cost center

5. Which type of error is committed when machinery bought for use in the business is mistakenly debited to purchase account.....

A. Error of commission

B. Error of omission

C. Error of original entry

D. Error of principle ✅

6. Aderoju and sons made a net loss of #19,267,000 after accumulated expenses of 52,329,000.

What is the gross profit....

A. 71,586,000

B.33,062,000

C.19,267,000

D. 52,329,000

7. The opening and closing balance of trade payables for year 2018 was #6,756,000 and #7,840,000 respectively,if the total payment to creditors from bank equal #24,310,000 what is the credit purchase

A. 25,394,000

B.6,756,000

C. 7,840,000

D. 24,310,000

8. Which of the following is both a ledger and a subsidiary book.

A. Sales day book

B. Journal

C. Cash book ✅

D. Receivable account

9. Compute sales turnover if the gross profit is #33,062,000 and cost sales is #56,539,000

A. 32,062,000

B. 89,601,000

C. 56,539,000

D. 22,477,000

City - ecent research has found that some characteristics once advanced as attributes of rural society may also be found in the â€¦â€¦.?

Decade - n the past â€¦â€¦. increased attention has been given to considering the minimum and essential criteria of rural society

Japan - In â€¦â€¦... any cluster of fewer than 30.000 people is considered rura

BUS322 (10/10)

Organizational behaviour - is directly concerned with the conceptual and human side of management

Staffing - is the managerial function of matching the right people with the right job

Art - Management is referred to as an ------ because it deals with the practical application of both knowledge and skill to achieve an objective.

Individual - Organizations are made up of their -------- members

Directing - assures the performance of the assign work by individual employees.

Three - Management is generally considered to have ------- major dimensions

Organizing - The preparation required for managerial plans into action

Drucker - (1973) sees management as the specific organ of the business enterprise.

Planning - is a decision making process that pertains to the future of an organization

Systematic - Manegment as a process is a ------- way of doing things

MKT401 (10/10)

High level of taxation - The importance of marketing to any economy includes

True - Relationship marketing aims to provide the best customer service and build customer loyalty

Mechanical plan - The four basic segmentation strategies are

Market - The marketing mix model can be used to help you decide how to take a new offer to

Customer - A good marketing plan must be dynamic, anticipating likely changes and providing guidelines for how to react with _____ relationships in mind.

High technology - Which of the following is not a feature of developing economie

B2C - The model whose producer is the commercial entity and the user makes the purchasing decision is called

True - Marketing has both inbound and outbound activities

Market Segmentation - The process of sub-dividing a large homogenous market into an identifiable segments is called

True - Inbound activities discovers the needs and wants of potential customers

JLS813 (8/10)

Magazine and newspapeer are both print media - Which is true about the following statement

Print media - Which of the following media news can easily be kept as reference work?

all of the options - Which of the following method is use by the mass media to create awareness? (wrong)

Form - the electronic media is always in the oral form,while the print is in the _____ form

1800-1949 = The coloniaL era of the Nigeria press can be more appreciated through the following eras except

None of the options - Theories are meant to manage (wrong)

Specialized Magazines - Nigeria medical journal and pharmacitial journals are two good examples of

surveillance function - If the mass media keeps close watch over someone or something it is called

Sight - While radio appeals to the sense of sound, television appeals to both sense of sound and that of _

Mass media - Which of this is a 20th century media?

BUS720 (9/10)

employee - handbooks of several companies contain certain items that are reserved exclusively for collective bargaining and others that are for consultation.

Cycle - Organisational exit is the last phase of the functional human resource management Redundancy - ne of the reasons why _____ is so problematic is that it runs counter to many of the new but popular theories of management.

Organization - Exit does not happen only because of the changed needs of the (wrong)

Labour - One of the traditional, functional tasks of personnel specialists has been to collect information on ____ turnover rate, in order to plan ahead for timely replacement.

Structure - Regardless of the _____ of the bargaining process, labour and management do not always reach agreement on the issues.

Agreement - Bargaing units refers to the specific group or category of workers that are covered by a particular collective _____.

Labour - It is usual practice for ____ and management to spend some time studying the situation and preparing for negotiation.

Exit - Traditionally, many organisations use ___ interviews to glean further information on people's reason for leaving or resigning.

Negotiation - According to Ubeku (1975), there is a general practice in industry that not all demands brought by workers are subject to _____

BUS722 (10/10)

Measure of skewness - Pearsonâ€™s first coefficient of skewness and Pearsonâ€™s second coefficient of skewness is called

Peakedness - The moment coefficient of kurlosis is used to calculate the _ of a distribution

3.796 -Consider the arrayed data, X = 2,5,8,9,12,13,18. Find mean deviation

Decision - analysis is the modern approach to decision making both in economics and in business

mean and the median of the distribution - Pearsonâ€™s No. 2 coefficient of skewness uses the difference between the

Kurtosis - measures the degree of peakedness of a distribution. It is usually taken relative to a normal distribution

Zero - A complete absence of skewness would have a coefficient of skewness equal to

Variation - can be said to measure the degree of uniformity of observations in a given set of data

Normal - leptokurtic, platykurtic and mesokurtic is otherwise known as _____distribution curve

Coefficient of Variation - is useful in the comparison of two or more sets of data which are measured in the same units but differ to such an extent that a direct comparison of the respective standard deviations is not very helpful

BUS726 (10/10)

Heckscher-Ohlin model - predicts that countries will export those goods that make intensive use of locally abundant factors and will import goods that make intensive use of factors that are locally scarce.

DIrect exporting - form of international trade involves soliciting orders from foreign countries for goods and services that are made in a country and then shipped abroad

Economics - deals with the proper allocation and efficient use of scarce resources

Carbaugh (1998) - states that global competitiveness is a bit like golf, you get better by playing against people who are better than you

International Trade - is the exchange of capital, goods, and services across international borders or territories

Douthwaite (1996)- believes that globalization can

and should be reversed.

Jeffry Sachs (2000) - argues that technology is now what divides the world.

free trade - Under apolicy, prices emerge from the equilibration of supply and demand, and are the sole determinant of resource al ocation.

New Trade Theory - tries to explain empirical elements of trade that comparative advantage-based models above have difficulty with.

Foreign Licensing - It involves a

country soliciting another country to produce and sel her product to them in a fee and after due procedural arrangement

PAD756 (9/10)

To know the actual cost of a project - Why does an investor need project cost analysis (wrong) - estimate

CHecklist - What guide would a project analyst use in the preparation of a project cost analysis

When a firm is provided services by other firms - Revenues in a firm may arise from all these except: To keep it as a proof that the proposed project can repay any loan granted with the inter - One of the following is not the reason financial institutions need to study the projected income statement of a project when approachd for financial assistance for a project by a firm:

3 years - What is the average number of years that revenue projections for project evaluation purposes can cover:

Project management - For the execution of a projects, the projected income statement is handed down as a guide to

o James Mooney

5. One of these is not a broad division of administrative approaches to the study of organizations

o Classical management √√

o Administrative management

o Bureaucratic management

o Human relations management

6. Who were the scholars that gave the discipline of public administration, the acronym POSDCORB:

o Gulick and Urwick√√

o Woodrow Wilson

o Henry Fayol

o Mooney and Reilay

7. One of these is not a function performed by Public Administration:

o Informing the public about government programmes

o Generating goodwill for the government from the minority of the population√√

o Manitaining the ruling class in control of state power

o Advising the government on how best to implement programmes

8. Who in Public Administration is regarded as the father of Public Administration:

o Woodrow Wilson√√

o Luther Gulick

o Henry Fayol

o Frederick Taylor

9. This definition explaining that employees are given authority and responsibility that are commensurate with their offices describes:

o Chain of command

o Span of control√√

o Hierarchy

o Unity of command

10. One of these does not describe how organizations function:

o Human activity

o Interest group pressure

o Goals

o Geographical influence√√

Nsc 504(Monitoring and Evaluation)

. Component of M&E

All of the above

. Through out the life of the program

. Managers at the planning level

. Created during the design phase of the program.

.Provide benchmarks for demonstrating the achievements of a program

. Attributing changes in health outcome to intervention

.M&E plans should include

All of the above

. Process Evaluation

. All of the above
