OUR CENTER

You can enter a subtitle here if you need it

INTRODUCTION

Venus has a beautiful name and is the second planet from the Sun. It’s terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It’s the second-brightest natural object in the night sky after the Moon

OUR CENTER

Do you know what helps you make your point clear? Lists like this one:

- **They’re simple**
- **You can organize your ideas clearly**
- **You’ll never forget to buy milk!**

And the most important thing: the audience won’t miss the point of your presentation

BRIEF STORY

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it’s only a bit larger than our Moon. The planet’s name has nothing to do with the liquid metal since it was named after the Roman messenger god, Mercury
