Water And The Blood

Water, the substance of life, without water there's no life, without water there is no blood, it is water that forms the fluid " blood plasma " which carries blood components to all parts of the body for their specific function.

Just as we need water and blood to keep us functioning there also is a life and a blood that we need to function in the spiritual. Man fuels his flesh with food to keep it alive so his spirt man can walk the dimensions of the physical, and once that fuel is gone, the flesh cease to exist, bringing the spirit man's journey to an end. As we fuel our flesh, so also there is a being, a spirit entity, the real man that's need to be fueled by through the word of God.

The soul of many are dead, and the soul of many are weak, because they have little or no life in them, blood is life, and if a man does not drink of the water of life which is God's word to generate blood in his spirit man which giveth life, he cannot walk in line with Jesus. Anything outside Jesus is death, Jesus is the only life, and for us to have life and have it in abundance, we must drink of His water to be filled with His blood that giveth life.

It is the blood of Jesus that gives us the spirit to walk like He does, it is the blood of Jesus in a man born again that carries the gene of God, enabling him live a righteous and holy life. Men live in sin, because they carry a blood that brings death, a contaminated blood. Unless this infected blood is been flushed out and replaced with a new one carrying the gene and trait of God, he'll continue to live in death.

It is the water that gets you to the blood of Christ. The water is the water of life, the word of God which is Jesus in personality, He is the bread of life and unless you drink of His water you cannot have His blood which is the holy spirit, it is the holy spirit that transforms and causes men to like Jesus, it is the Jesus in a man brought by the holy spirit which is the blood.

The water is first is first given on repentance, by grace you stumble into it, no! It was designed.

It is the water that washes and it is the blood that sanctifies, it is the blood that takes us firstly to the Father as heirs worthy of His kingdom and also as heirs worthy to be entrusted with His kingdom mandate on earth, to be assigned a blueprint to carry out God's project on earth.

Only those whose blood has been transformed, energized and saturated with life are called to be sons, kings and priests, these are they with a blood of sacrifice. Being filled with the holy spirit, He sanctified them and put them on a new course, a new path, to carry out God's project in for man. You can not be ordained by God to do His will without being compactable with His spirit. If your flesh has not been neutralized, If you've not been broken, if you're not yet dead to the flesh, you can not wield the capacity of the new spirit that God wants to deposit in you.

This spirit is given only to men of sacrifice, to be ordained by God into various offices, mostly the Apostolic office for this last age, these are men who'll go forth and take over territories of darkness, banished darkness from the land bringing life unto any dead soul. You're not a fulfilled man if you're not yet called by God to manifest His power, you don't just stumble into it you walk your way in.

It is the water that washes the feet, it washes our sins away, it is the water that quench our thirst that we shall never again thirst of sinful desire, it is the water that hydrates and gives strength to overcome this spiritual warfare of the kingdom.

The death of Jesus on the cross is a reflection of what he was about to do and what he is doing now. When he was crucified, he was pierced with a spear at his side, and out came water and blood. Jesus has left the earth and the only way for us to receive and walk with Him is to drink of His water to inherit His blood. That is; He left His word with us which is the water of life that whosoever recieves and drink of it, and continue to fill himself with His water, he shall be given the blood, the holy spirit to become more like God.

This is the only way for us, when Jesus was physically with men on earth, his had to live under the ambience of Jesus on earth, it was an anointing, but a new design need to take place for men to live no longer under the anointing of his ambience, but for Jesus to dwell in the hearts of men, to live in the presence of God. It is the blood coursing through a child of God that ushers him into the presence of God.

We should be soaked with God's life in other to manifest the fullness of God,.

A man whom does not have excess blood cannot transfuse enough blood to give life when it is needed.
