Good Day Guys ,

Hope You people are doing Good , Once again Thank you purchasing My method

Wire Transfers Method

Now before I start today's Tutorial, let me first post some likely Questions some of you will be asking with respect to this Wire Transfer Tutorial

☒ Does Wire Transfers Charge back ?

Answer: Wire transfers are normally final. Once the recipient's Bank accepts the transfer and receives the funds 💰, that's it. At that point, you likely won't be able to get Transferred money back. Your wire transfer may only be reversible if the bank that initiated the transfer made a mistake.

☒ Which account can this Wire Transfers Tutorial be used to load ?

Answer: This method can only load
Local Banks and Credit Union Banks only.

That's why I'm always recommending local banks!

☒ How long does Wire Transfers take to reflect on account ?

Answer: Wire Transfers take under 24 hours to clear but International Wire Transfers May take 1-5 business days to reflect inside account.

☒ What is the daily limit to load account with Wire Transfers ?

Answer: Many major banks impose a per-day or per-transaction wire transfer limit. For example, Chase Bank sets the limit at \$100,000 for individuals, but offers higher limits to businesses on request. I recommend you stay within the range of \$10,000 since Financial institutions and money transfer providers are obligated to report international transfers that exceed \$10,000

Wire is same day reflection that means it takes under 24 hours to clear . Once the bank gets used to the bank you used for the wire you can send large amounts even over 100k\$ depending on the log balance!

International wire transfers may take 1-5 days. ACH transfers and other types of money transfers take 2-3 days

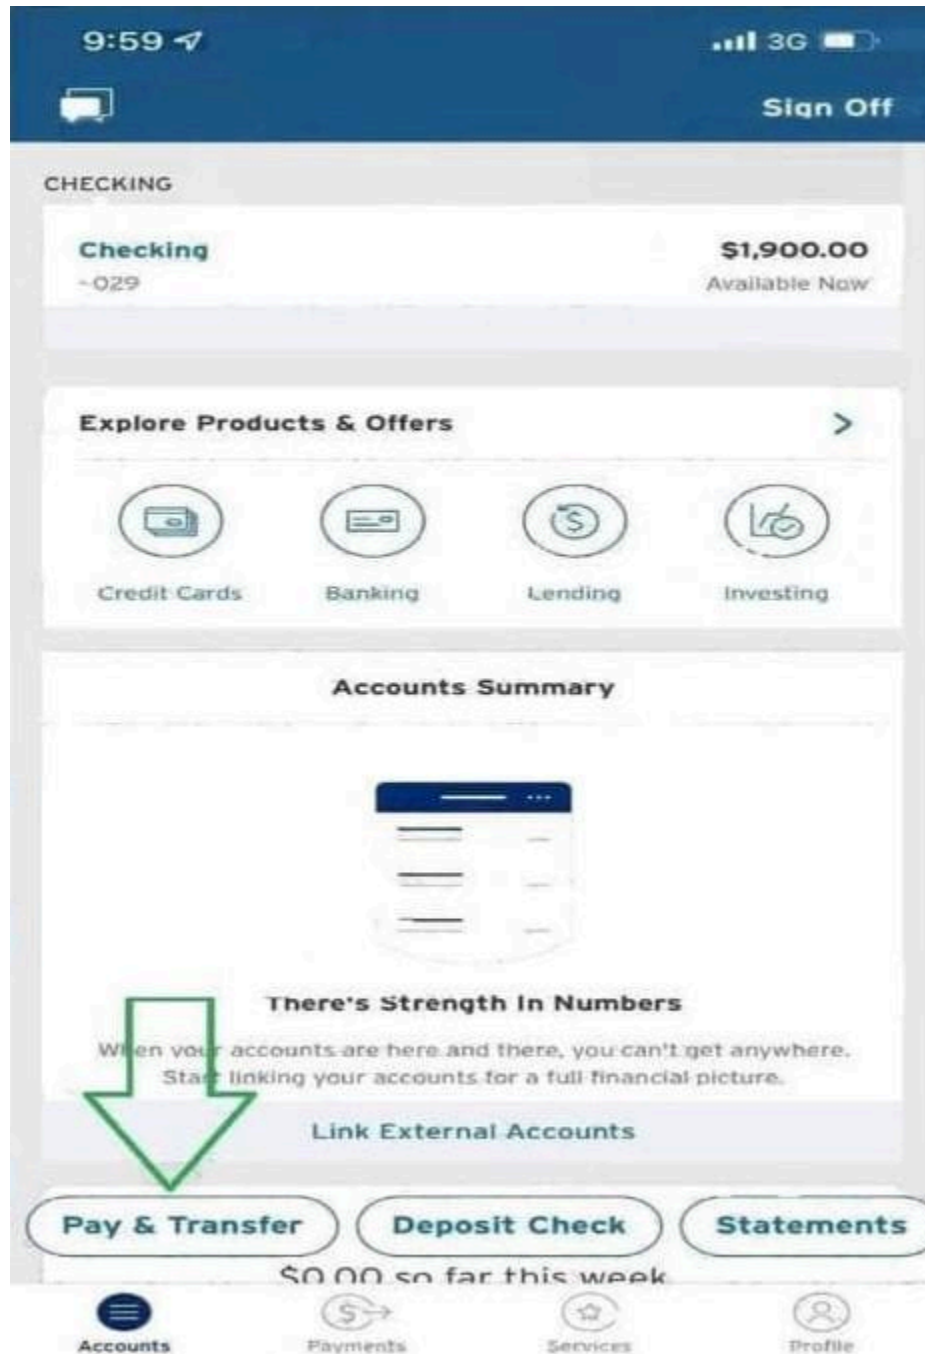

Let's Start the Method

First of all get a Bank log with email access so you can get authentication code sent to email to login to the bank account .

After you logged in the bank , Change the phone number on the spammed log to your personal phone number which must be a USA number obviously

Let's Get Started with Wire Transfers

- Wire transfers are a convenient way to send money from your eligible Citibank account to other accounts in the U.S. and internationally. Citi recommends that you always obtain wire instructions directly from the person or business to whom you plan to send money. To send a wire transfer, you'll need the payee's name, address, account number, and payee bank information. You may also need to provide additional information, depending on country or bank-specific requirements.
- Wires are generally sent the same business day if we receive your transfer request before 6:00 pm ET for international transfers and 6:45 pm ET for domestic transfers.
- Since this may be your first time initiating a wire transfer, please take this time to review the Agreement for Online Funds Transfers on the next screen as it contains useful information about the wire transfer service. For security purposes, we may also prompt you to complete additional verification.
