Transhumanism Transcendence is Narrative Literature that surfaces information that is very real, relevant and recent. There are 17 goals for sustainable development that need to be achieved by all nations by 2030 that will impact every one of our lives. The end of the age is here and the polarity shift is happening. You are either One with nature or apart from it. George Bush Sr. in 1991 said that "We need a New World Order, a world where the rule of law (not the law of the jungle) governs the conduct of Nations in which a credible united nations could keep its peace-keeping role to fulfill the promise and vision of the U.N.'s founders."

This might sound nice to an optimist but Connecting the world through digital citizenship is actually the opposite of connecting with Source and mother nature, aka "The Jungle"!
-Learning Astrology & Anatomy will help you navigate and move throughout life with ease, and allow you to transcend even more.

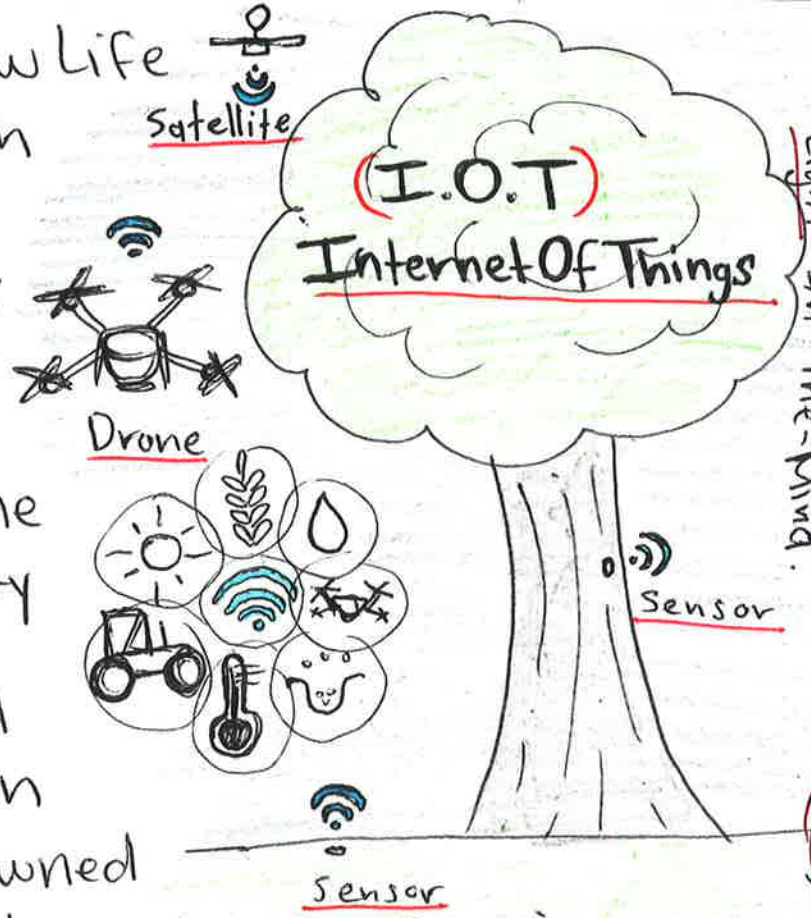

David Lynch - Transcendental Meditation: YouTube
"Meditation" is just surface level thinking.
The Mind Thinks, The Body Does, But the Soul KNOWS!
"Transcendental Meditation" is deep synthesis.
Meditation takes the mind away from the body, But Transcending turns the Soul away from the mind.

✓ Mind over Matter ≤ Soul Beyond Mind ✓✓

BitCoin LIVES - It's a new Life form. It combines with machines and I.O.T. It has senses such as Sensors and uses algorithms with A.I. & blockchain. Suddenly the machine has an Identity and has a wallet and can pay for services and recieve payments. It can Self operate, It is selfowned and self aware to provide useful services in an Ecosystem. Maslows Pyramid of Basic Needs - Self Actualization, Energy, Security, and repair services; It Can do transactions. SPHERITY - Provides Identity for Connected Intelligence, Self owning forests as D.A.O's. Rivers can be people, Legally Speaking, with Legal Personhood. Whanganui River in New Zealand - TerraØ - is a start-up for augmented forests to drive this vision forward. Nature 2.0 = Bio + Machines in symbiosis as an upgrade to civilization. The forest connects to a digital Agent that analyzes satellite images about damages and BioDiversity. The agent performs actions on behalf of the forest. It might Send out a work order to a Fleet of drones to do seed planting to reduce green house emission impacts. The Forest has An Agent, Personhood & can defend Himself.

The FLOOD STORY is a myth. Purge (Purify-Pyrofy) Negativity. First with water to (Cleanse) then with Fire or Light-In-The-Mind.

Mallachi 4:1-3 - Surely the day is coming it will burn like a Furnace.

LUKE 3:16 Indeed I baptize by with water → Fire.

BIBLE ALLEGORY →

SYNTHETIC SCIENTIFIC DOMINATION OF LIFE.

NANO-TECH REVOLUTION

At RICE UNIVERSITY an automated system was built during the Covid Lockdown. DR James Tour - a professor @ RICE bought 3D printers for his students so they can do ElectroChemistry at home; Carbon/Graphene drops in and they Flash it. The System was delivered to the D.O.E; Department of Energy. Graphene is non toxic and can be used in medical applications, It's naturally occuring in the environment and agglomerates are the natural mineral graphite. The flash process requires no water Solvent or purification because all of the non-Carbon elements come subliming out; Carbon doesn't sublime until about 3800 Kelvins (6,380 Degrees Fahrenheit). Flash Graphene from "ANY" Solid Carbon Source. We can turn all of the waste plastic that is a problem for humans into useable graphene, with no pre-washing or sorting required - Recycled plastics get washed 3 times with detergent, - (L.I.G) leaves no left over ash, everything Sublimates. The entire flash process is done at 10 milliseconds, (each flash is under a Second) and the Temperature rises to about 3,300 Kelvins. - It's warm to the touch because all the energy goes into the material. Most of our trash is Carbon based, Any Carbon material between 2 electrodes turns into Graphene. It breaks every Carbon bond and it reconstructs the most thermodynamically stable concoction called Graphene, which is going into all sorts of materials. We can turn Coffee Grinds into Laser-Induced Graphene since it is 40% Carbon "$C_6H_{12}O_6$" - it's a CarboHydrate, 35/40 of its carbon gets turned into Graphene, And there is a Huge demand For this Material. 30-35 $ Per Metric Ton in Electrical Energy Costs of Coal to Graphene Conversion

30 Billion Tons of CO^2 - Emitted every Year, If we chop OFF those 2 oxygens we can get 8 Billion Tons of Solid Carbon, which then becomes Useable graphene. [FAKE SOLUTION] Current price of Graphene is 60K → 200K Per Ton.

Electronic Waste (E-WASTE) - is 50 million tons per year and its an 8.8% increase every Year, So if we just FLASH it we can pull out all the precious metals like rhodium Silver and Gold; Why Keep mining? Why not just grab whatever elements are here? - James Tour

Recycle Spent Lithium Batteries - By Flash Joule Heating, "URBAN MINING". F.J.H of printed Circuit Boards (PCB) for recovery of METALS.

8M Tons of Plastic dumped into Oceans annually. 290M Tires discarded by U.S. - HDP = 2K Per Ton

Transition to Post Humanism.

Neil Stephenson – The Diamond Age & GLOBALIZED GOVERNANCE 1995 Nano Bots

"I am very abundant in nature. I am hexagonal like Mesh of a chicken wire, I am a crystalline form of carbon, much harder than diamond, proudly stronger than steel, far lighter than alluminum and 1 atom thin. I am used in electronics and other industries like optical, chemical, magnetic and thermal Superconductors. I am good at repelling water & retarding flames yet I am mysteriously transparent. My best trick is that I can transform light into electricity, & in the medical world I can prevent the proliferation of bacteria. I pride in being ecological and remain forever as your humble servant. My applications will keep accumulating in your material world as we begin to work together. One day I will take you down a wormhole and turn your inside outside. Who am I? I AM **GRAPHENE**

(Cannot be seen w/o an Election Microscope)

aka The MESH of GOD." – Jain 108

JAIN108ACADEMY.COM

2 Dimensional Carbon-Based Material used in Nano Electronics; Hexagonal Layered & precise.

Every FORD vehicle has Graphene since FEB 2020 in the Foam cushion seats and the underhood insulation plus alot more Coming in because it light weights the Vehicle. With nano-Tech alot of the problems we have can begin to be dealt with, waste and CO_2 solutions are being funded by the AIRFORCE & The D.O.E – DR James Tour. "Laser Induced Graphene" can be obtained from abundant natural polymers with appropriate lasing conditions and chemical treatments. You can take bread and convert the carbohydrate strands into graphene to write an food to mark every item instead of applying adhesive sticker labels; building sensors into a potato to know what field it came from, is it local or from a far away country? A temperature sensor or a Salmonella/Ecoli Sensor. UNIVERSAL MATTER.COM – (Advanced Materials) Houston, Texas The First product coming out is a device that sits on a table top and it sucks air in while blowing fresh air out the Top as if there was a sheet of graphene between the 2 sides of the table (Air Filtration) with a chinese manufacturer. Graphene is being used for Water Purification, Air Filtration & Soil Systems. Going GREEN?

*Food and Water Doped with Nano Particles, tracking global supply chains in food. managing our micro biomes + layered in Impact markets. NanoTech is CENTRAL!

BBB Nano Molecular Assembly. Billions of Nano Gens to manifest a Building with electrical impulses.
