CORONA PANDEMIC SCANDAL

THE BIGGEST SCAM IN THE HISTORY OF MANKIND

Dr. Tarun Kothari

Corona Pandemic Scandal

:

The Biggest Scam in the History of Mankind

INTRODUC-TION

1. About the Book

This book is written in absolutely new style. This is a unique style, where there is no chapter in the book. It is written in discussion style. This is some sort of hypothetical discussion between a son and father. I have tried to explains in detail taking the form of a question answer sessions between a father and his over inquisitive son, wherein the son is asking multifarious questions one by one and time to time and again & again from all the related and concerned areas regarding the pandemic, real cause behind the pandemic and finally about the men or institutions involved in the very same. Reader can assume this discussion in between Dr. Tarun Kothari and his son Divyam Kothari.

In this book author Dr. Tarun Kothari tried to explain in detail about the actual facts, the bare reality and the core truth about the pandemic called corona or COVID 19. As it has been told that corona disease has spread worldwide and there have been a huge number of deaths for which author gave explanation to each and every possible doubts and questions in the successive pages. The book tries to clarify everything taking in account the many research papers and scientific facts, to gradually prove the point that Corona virus pandemic is nothing but a simple flu virus which has infected mankind for numberless times since the dawn of civilization.

With great courage and undoubting straightforwardness I tried to uncover the corona truth about Pharma Company, WHO, CDC, Banking and Media. The book explains scientifically why the current COVID 19 pandemic is a fake pandemic.

In present time everyone is confused. Everybody has many questions in his mind, regarding corona. These questions required to be answered scientifically and

logically. The author tried to give a reasonable and scientific explanation of each and every question.

1. About the Author

Dr.Tarun Kothari is the author of this book. I have a qualification of MBBS and MD. I am a radiologist. I have worked for the past twenty years as a doctor. Further I am expert in medical diagnostic field. I have taught advanced levels of radio-diagnosis to many MBBS and Post-graduate medical students.

I liked to motivate the people to live an honest life. I practise yoga and pranayama and kriyas of many kinds for the upliftment of physical body health and spiritual status. I wrote this book so that general masses can be educated regarding this fake corona pandemic.

.....
.....

DIVYAM (1):- What is a virus?

ME: A virus is a very small infectious particulate body that is made of either RNA or DNA genome. This may be double stranded or single stranded. This genetic material is enclosed in a protein covering, called as shell.

Virus is not able to reproduce on its own. It can only make more viruses by entering a cell and using its cellular machinery and mechanism.

When a virus infects a host cell, it removes its protein covering coat and releases genetic material in the host cell. Then it directs the host's machinery to transcribe its DNA or RNA, translate, develop and produce its genetic material. In this way they hi-

jacked the machinery of a host cell and its genetic mechanism and utilised host's cellular machinery in production of its components into thousands of viral material or progeny. When large amount of such virus particles are produced, it can rupture the host cell and in this the way kill the host cell.

The new viruses then go on and infect another host cell; single or multiple and then they infect further more host cells and may kill them. In this way viruses produce themselves in the host cell, while on the other hand they are harmful to host cells and body. Viruses are numerous in number.

DIVYAM (2):- Numerous! Can we count number of viruses?

ME: No, we cannot count them. But few scientists estimated that there number are about 10 power 31. How big is this 10^{31}? Scientist estimates that total stars in the sky are 10^{21}. So numbers of viruses are 10,000 crores times (100 billion times) the number of the stars.

Now I will tell you about types of viruses. Different scientists have given different figures. Their estimation ranges from 1,00,000 types to 1 crore types (100 thousands to 10 million types). Viruses are on the earth even before the humans, even before the animals, even before the plants, even before the watery creatures. Viruses have a quite different structure than humans.

DIVYAM (3):- What is the Structure of a Virus?

ME: Viruses come in a variety of sizes and shapes. They are specialized in attacking their particular target cell. The two major components of all viruses are the viral genetic material and its protective protein coat covering, known as the capsid.

The viral genome is made up of single or double-stranded RNA or single or double-stranded DNA. They have a phospholipid envelope covering generally originates from the membranes of previously

infected host cells. Sometime they have surface proteins. They can infect almost all types of cells.

DIVYAM (4):- How Virus Infect?

ME: The viral life cycle can be divided into the following five steps: 1. attachment, 2. entry, 3. replication, 4. assembly, and 5. release. The proteins on the surface of the virus help it recognize specific receptors on host cells.

Some viruses use these surface proteins to bind host cell receptors. Then they initiate a process called as internalization by endocytosis. The envelope-coated viruses can also directly fuse with the host cell membrane.

Some bacteriophages do not enter the cell. They inject their genome into the host cell. After reaching inside the cell, the viral genome controls the genomic machinery of the host cell to transcribe and translate its genome. They direct the host cell packaging method to package the new copies of the viral genome into viral particles to make progeny.

The viral infection cycle is classified either as lytic or lysogenic. In the lytic cycle, the new virus progeny burst out of the host cell and thereby killing the host cell. In the lysogenic cycle, the viral DNA or RNA is incorporated into the host genome where it remains dormant and is copied each time along with replication of host cell.

DIVYAM (5):- Can virus infect other than humans?

ME: Yes, they can do. Viruses can infect any type of cell: bacteria, plants, and animals. Viruses that target bacteria, are called as bacteriophages

Viruses were first discovered in the 19th century. The tobacco plant was economically-important plant. Tobacco plant was infected by an unknown disease that was investigated and later identified and named as Tobacco mosaic virus. Animal viruses are of great importance both in veterinary research and in medical research.

Moreover, viruses are cause of many human diseases, ranging from the common cold, chickenpox, and herpes, to more dangerous infections like yellow fever, hepatitis, and smallpox. They may be DNA virus or RNA virus.

DIVYAM (6):- Which viruses are DNA viruses?

ME: A DNA virus is a virus that has DNA – Deoxyribo nucleic acid as its genetic material. Few examples of DNA viruses are CMV, HSV, VZV, EBV and human papillomavirus (HPV). Hepatitis B is another small DNA virus that infects the liver, causes hepatitis, and is associated with liver cancer.

Adenovirus, herpes virus, and poxvirus are all examples of DNA viruses that infect humans. Adenoviruses mainly cause gastroenteritis and respiratory disease in humans. Like DNA virus you also have RNA virus.

DIVYAM (7):- Which viruses are RNA Viruses?

ME: RNA virus is a virus, whose genetic material is consists of RNA. An RNA virus is a virus that has RNA - ribonucleic acid as its genetic material. This nucleic acid is usually single-stranded RNA (ssRNA) but may be double-stranded RNA (dsRNA). Few examples of human diseases caused by RNA viruses include the common cold, influenza, SARS, COVID19, rabies, polio, measles virus etc.

DIVYAM (8):- Give me few more examples of Viruses.

ME: I will tell you few more examples of virus –

Coryza - rhinovirus,

Coxsackie - coxsackievirus.

Dengue virus is a flavivirus, and it is of four types designated as type 1, 2, 3, and 4, that causes both the classic and haemorrhagic forms of dengue.

Ebola virus

Marburg virus

EB virus is Epstein Barr virus is a herpeslike virus that causes infectious mononucleosisand is associ-

ated with Burkitt's lymphoma and nasopharyngeal carcinoma.

Intestinal virus - enterovirus.

Hepatitis virus is a virus that primarily affects the liver.

hepatitis A virus (HAV) causes hepatitis-A that is liver infection. hepatitis B virus (HBV) causes hepatitis-B that is liver infection. hepatitis C virus (HCV) causes hepatitis-C that is liver infection. hepatitis D virus (HDV) causes hepatitis-D that is liver infection. hepatitis E virus (HEV) causes hepatitis-D that is liver infection. hepatitis G virus (HGV) causes hepatitis-G that is liver infection.

Herpes virus causes herpes.

Human immunodeficiency virus (HIV) is associated with AIDS.

Influenza virus is a group of virus that causes influenza. They are at least three serotypes or species A, B, and C.

Measles virus is the cause of measles.

Mumps virus is the cause of Mumps.

Parainfluenza virus causes upper respiratory tract

diseases just like influenza viruses.

Poliomyelitis virus causes polio.

Rabies virus causes Rabies.

Respiratory syncytial virus (RSV) causes respiratory tract infection. It is part of ILI – Influenza Like Illness.

Rubella virus is causative agent of rubella.

West Nile virus causes encephalitis in Africa.

DIVYAM (9): Are viruses always contagious?

ME: Not all viral diseases are contagious. This means all viruses do not always spread from person to person. But many of them are contagious.

Common examples of contagious viral diseases are the flu, the common cold, HIV, and herpes. Other

types of viral diseases spread through other means, such as the bite of an already infected insect. Respiratory tract viral diseases are usually spread by droplet infection or person to person.

DIVYAM (10):- What are Respiratory viral diseases?

ME: Respiratory viral diseases are contagious and commonly affect the upper or lower parts of your respiratory tract. Common symptoms of a respiratory viral disease are:

- runny or stuffy nose
- coughing or sneezing
- fever
- body aches

DIVYAM (11):- What are common examples of respiratory diseases?

ME: Common examples are:

- Flu or influenza virus infection
- Common cold
- Respiratory syncytial virus infection
- Adenovirus infection
- Para-influenza virus infection
- Severe acute respiratory syndrome (SARS)
- Middle east Respiratory syndrome (MERS)
- Corona Virus

DIVYAM (12):- How these Respiratory viral diseases are transmitted?

ME: Respiratory viruses are spread by droplets generated through coughing or sneezing. If someone with a viral illness coughs or sneezes nearby to you and you inhale these droplets, you may develop the disease.

These viruses can also be spread through contaminated objects, such as doorknobs, door bells, table tops, mobile, watch, personal items etc. If you touch such object and then touch your nose or eyes, you could develop a disease.

DIVYAM (13):- What is normal treatment of Respiratory viral disease?

ME: Respiratory viral diseases usually heal their own. Generally they do not require any treatment. Only boosting your immunity is sufficient. Take sufficient sunlight and fresh air. Take sour fruits to increase vitamin-c level in body. For vitamin-D sufficient exposure to sunlight is adequate.

But few medications are commonly available at the medical shops are nasal decongestants, cough suppressants, pain relievers, anti-pyretic and anti-inflammatory; these can help to reduce symptoms. Many viruses cause respiratory tract infection. Corona virus is also one of the viruses that cause infection of respiratory tract.

DIVYAM (14):- What is corona virus?

ME: Coronaviruses are a group of related RNA viruses that cause diseases in mammals and birds and sometime in humans. In humans, these viruses generally cause mild respiratory tract infections. Some time they cause moderate infection and rarely severe one. Mild illnesses include some cases of the common cold, while moderate varieties can cause SARS and MERS.

A Corona Virus is like any influenza virus and the disease it causes is called corona virus disease. It can be put in ILI - Influenza Like Illness group as it shares many features of Influenza. Its mortality rate is about 0.1%. The corona virus attacks the respiratory tract. Common symptoms include fever, cough, weakness, taste change and shortness of breath. It's a single strand RNA segment. The latest so called pandemic is said to be caused by a variant of corona virus called as novel corona virus.

DIVYAM (15):- What is common site of infection of corona virus?

ME: A coronavirus is a type of common virus that can infect your nose and then go to sinuses or upper throat and rarely to lungs. They are more or less like common cold so can spread much like common cold viruses. Almost everyone gets a common cold infec-

tion many times in a year. You can get coronavirus infection at least once in your life, most likely as a young child.

DIVYAM (16):- Why are they named as corona?

ME: They have characteristic club-shaped spikes that project from their surface, which in electron micrographs create an image similar to solar corona, or something like crown, so their name is corona.

DIVYAM (17):- How old corona viruses are?

ME: Human coronaviruses were discovered in the 1960s.They were isolated using two different methods in the United Kingdom and the United States by E.C. Kendall, Malcom Byone and David Tyrrell working at the common cold unit of the British medical Research Council in1960.

The most recent common ancestor of all coronaviruses is estimated to have existed as recently as 8000 BCE. Some models even suggest the common ancestor as far back as 55 million years or more.

The most recent common ancestor of the alpha coronavirus line has been placed at about 2400 BCE, of the beta coronavirus line at 3300 BCE, of the gamma coronavirus line at 2800 BCE, and of the delta coronavirus line at about 3000 BCE.

Coronaviruses are large, roughly spherical, particles with bulbous surface projections. The average diameter of the virus particles is around 100 nm. Recent pandemic is said to be caused by the novel corona virus.

DIVYAM (18):- Is novel corona virus a dangerous virus?

ME: Most coronaviruses are not dangerous, but some may be that is also in few persons. Those that cause Middle East respiratory syndrome (MERS) or severe acute respiratory syndrome (SARS) can be dangerous for few individuals. Even they are not dangerous for all infected one.

It's not a dangerous virus. Tuberculosis is more dangerous disease than corona virus or novel corona virus. TB kills 15,00,000 people annually. Hepatitis is also more dangerous killing 14,00,000 people annually.

Corona is a very mild disease. Not serious at all. Media is not raising this issue; possibly they have been paid to raise the issue of corona as a dangerous disease instead of a mild disease. Novel corona virus is almost same as corona virus.

DIVYAM (19):- What is difference between corona virus and novel corona virus?

ME: Human Coronaviruses are as old as this earth. Probably viruses are the first creatures on the earth. Scientist first discovers it in 1960s. We have been told to believe that a dangerous virus, which was called as Novel Coronavirus, has evolved through mutation. It will cause a fatal disease.

The virus was labelled as '2019 novel coronavirus'. This later on called as '2019-nCoV.' COVID-19 is the name given to Novel Corona Virus disease. Here 'CO' stands for corona, 'VI' for virus, and 'D' for disease.

It is said COVID-19 virus is a new corona virus because of mutation. It is linked to the same family of viruses such as Severe Acute Respiratory Syndrome (SARS), Middle East Respiratory Syndrome (MERS) and some common cold viruses.

DIVYAM (20):- How do we know whether a person is a patient of covid-19?

ME: There is one test known as rtPCR Test that is Reverse transcription Polymerase Chain Reaction Test. It is a test kit by which you can diagnose whether a patient has COVID-19 infection or not.

With every product you will get a manual or instruction booklet. Whenever a machine or gadget is bought, a booklet is always provided, so that user can properly understand its uses, so that user can know limitations of device. Likely, when a rtPCR kit is purchased, a manufacturer's manual is there along with

test kit; so that we can use this kit in proper and scientific way. The manual says under Regulatory Status – 'For Research Use Only', Not for Diagnostic Purpose.

So it is clear now that it should be used only for research purposes and not to be used for diagnostic purpose. The inventor of this kit, Kary Mullis also says that this is only for research purpose.

DIVYAM (21):- Why RT-PCR cannot be used for diagnostic purpose?

ME: Because false positive and false negative are quite high. You cannot rely on this test. On the basis of result of this test you cannot say that this person is a corona patient because test is positive; likely you cannot say this patient is not a corona patient because test is negative. This is a useless test.

Coordinator of corona virus in the White House, Dr.Birx, is of the opinion that this diagnostic kit has 50% chance of proving false result. That means every second test could be wrong. For this reason, the health ministry in Finland, on 20th March, rejected this test kit.

On 27th Feb 2020 an article was published. 4 patients of Wuhan city were tested with this kit. They were declared corona virus negative by this test kit just before being released from the hospital. They were discharged from hospital and allowed to go home. After about 13 days, they were tested again with the same kit and were discovered to be corona-positive. What does this mean? This means that –

- They were not negative.
- They were cured but again infected by corona virus on reaching home.
- Their body is coronavirus free and the test is wrong.

So this test cannot give any conclusive answer. Further cross reactivity is a big issue. This must be taken into consideration for all tests.

DIVYAM (22):- Can this RT-PCR test cross react with corona family infection?

ME: Yes, this test is non-specific test and may show positive result for other non-covid corona virus infection, MERS virus infection or SARS virus infection.

DIVYAM (23):- Can this RT-PCR test cross react with other than corona infection?

ME: On the 4th of March, The Lancet published a study. There is a case study of a patient in Singapore in this journal. A Dengue positive was tested for COVID and was found to be corona positive. This patient was taken to the hospital with high fever, where he was tested for Dengue and declared dengue-positive, for which treatment began.

The doctor decided to test him for corona virus also and when tested found to be coronavirus positive also. Now the question is whether to consider him a dengue patient or a coronavirus patient? Was it false positive? Whether the patient is suffering from Dengue or COVID-19 could not be ascertained. So this is clear here that RT-PCR test may cross react with other non-corona virus infection. Even same patient could have different result.

DIVYAM (24):- Can RT-PCR test show different results for same patient?

ME: Yes. It may show. That's why I am calling this test a fraudulent test. On 5th March, an interesting article published in The New England Journal of Medicine where two samples were taken from same patient. Patient's nasal swab tested positive for COVID-19 while his oral swab showed negative result for COVID-19. A sample was taken from his nose and it was tested corona positive another sample from his mouth was tested and found to be corona negative.

Now what is final result? So it is clear here that same patient can show different result. You can understand that the reliability of this test is zero. They are using this only to create panic.

DIVYAM (25):- How to remove this panic?

ME: The accuracy and reliability of this RT-PCR test were and are doubtful. White House's Coronavirus Response co-ordinator Dr. Deborah Brix said that test has only 50% accuracy.

On the 6th of March a report was published in the British Medical Journal (BMJ), the report was written by Dr. Peter C Gotzsche. He opined that the only way to remove this atmosphere of fear is to remove this testing kit.

Science is proving that this test kit is illogical, unscientific, ill-legal and a crime against humanity. On the 20th of March, the inaccurate test kit was rejected in Finland. But sadly this was not done in India.

So you can understand here numbers of corona cases are actually a fake numbers. Corona is not a serious disease.

DIVYAM (26):- What are disease wise numbers of death in India?

ME: I will mention you few important disease and their death figure. In India every year 15,00,000 people die because of heart diseases; 9,50,000 people die because of respiratory diseases; 4,50,000 people die because of tuberculosis; 2,50,000 people dies because asthma; 5,00,000 people die because of respiratory infection; 7,25,000 people die because of stroke; 7,25,000 people dies because of stroke; 7,10,000 people die because of diarrhoea; 2,50,000 people die because of diabetes; 2,20,000 people die because of kidney illness; 4,50,000 people die because of cancer.

There are many diseases, which are highly deadly than Corona. Corona mortality is very little.

DIVYAM (27):- So corona is not serious at all?

ME: Looking at the death of other illnesses, corona seems to be a minor illness. Actual death rate of corona is about 0.1%. Even this may be less than this and later on death rate may be proved as low as 0.01%. The disease is just like a normal flu or a com-

mon cold. They created an atmosphere of fear by giving deliberate wrong prediction.

DIVYAM (28):- What was the Initial prediction?

ME: They spread a rumour that corona virus can kill half a million British populations and 55 million US populations. They spread rumour that corona is highly dangerous and can kill 500 to 1000 million world population.

They claimed wrongly that this virus is going to kill us all. They said that we have to lockdown the cities. And few governments of the world have kept us locked up in our homes believing that it will protect us from this dangerous virus.

UK government released a statement in January claiming that there will be 22,00,000 deaths in the US and 5,00,000 deaths in the UK.

There is nothing wrong in fearing death; as death is a natural process. It comes to all species. Nobody should create unnecessary fear among masses. Everybody has a right to work. Everybody has a right to make money. And our government destroyed our economy by locking down entire nations and snatching away all civil liberties. This is a false pandemic; even you cannot call this an endemic.

DIVYAM (29):- What is an Endemic?

ME: An endemic is a disease that exists permanently in a particular region or in particular population. Malaria is a constant problem in some parts of Africa and Asia, so we can call malaria as endemic disease. Malaria is an endemic disease prevalent in Africa, Asia, Latin America and the Middle East. It is transmitted by a protozoan parasite from the Plasmodium genus. They destroy the red blood cells. This causes anaemia in the patients and can prove fatal if left untreated.

Recent research says, about 200 to 500 million (20 crores to 50 crores) people suffer from malaria every year out of which 1.5 to 2.7 million (15 lakhs to 27 lakhs) will die. What a surprise here. Prevalence and

death rate of malaria is more-more than corona, still malaria is endemic and corona is pandemic.

Another example is Chagas Disease. About 7.6 million (76 lakhs) people are infected with Chagas disease. It is caused by a protozoan parasite, *Trypanosoma cruzi.* This disease is endemic to Mexico, South and Central America. Chagas disease is divided into acute phase, asymptomatic intermediate phase and chronic phase.

One more example is African Sleeping Sickness. This disease is caused by a protozoan parasite belonging to a different species of the *Trypanosoma* genus.

This disease is prevalent in Sub-Saharan Africa. It causes fever, joint pain, sweating, extreme fatigue, swollen lymph nodes, aching muscles and headaches. Slowly the parasite invades the central nervous system and causes a disturbance in the sleep cycle, poor coordination and confusion. Endemic diseases are often confused with epidemic diseases.

DIVYAM (30):- What is epidemic?

ME: An epidemic is an 'outbreak' of disease that attacks many peoples at about the same time and may spread through one or several communities. An epidemic is an outbreak of a disease; however, an endemic disease is the one that is constantly present in a particular geographical area.

Avian influenza, Cholera, Ebola, Plague, Yellow fever, Meningitis, MERS, Influenza, Zika, Rift Valley Fever, Lassa fever, Leptospirosis are few examples of epidemic disease. A pandemic is different from endemic and epidemic.

DIVYAM (31):- What is Pandemic?

ME: When an epidemic spreads throughout the world, it is called as pandemic. It is a type of epidemic that has spread worldwide, affecting many countries and continents. The Center for Disease Control and Prevention (CDC) defines a pandemic as a disease outbreak that has spread across multiple countries and continents and usually impacts many people. The

classification of 'pandemic' comes when a disease affects the global population.

Neither the WHO nor the CDC specifies exactly how many countries need to be affected for a disease outbreak to be labelled as a pandemic.

DIVYAM (32):-. Give me any past example of pandemic?

ME: The 1918 Spanish flu pandemic, the HIV/AIDS pandemic since 1981 and the 2009 swine flu pandemic are few examples of pandemic disease. Swine flu pandemic is suspected to be a falsified pandemic.

Here for a pandemic disease, mortality is very important; mortality should be high to label as serious pandemic. But corona has a very low mortality rate, so this cannot be called as true pandemic.

Here WHO has done a big mistake. This is either a mistake or has deliberately done by WHO as WHO might be the part of falsified corona pandemic. As PACE has already said that 2009 swine flu pandemic was a falsified pandemic.

DIVYAM (33):- What is this WHO?

ME: The WHO means World Health Organization. This is a special agency of the United Nations responsible for international public health. The WHO Constitution, which establishes the agency's governing structure and principles, states its main objective as 'the attainment of the highest possible level of health by all people'.

It is headquartered in Geneva, Switzerland, with six semi-autonomous regional offices and about 150 field offices distributed all over world.

The WHO's broad objectives includes advocating for universal healthcare, monitoring public health risks, coordinating responses to health emergencies, and promoting human health and wellbeing.

It provides technical assistance to countries, sets international health standards and guidelines, and collects data on global health issues. The WHO also

serves as a forum for summits and discussions on health issues.

It is said WHO is responsible for global health. But things are different. WHO people are saying that they are working to improve the global health but I fear they are actually working as agents of big pharmaceutical giants and working for their interest. In my opinion WHO is now a puppet of drug and vaccine companies. Even 2009 swine flu pandemic was later found to be a false pandemic.

DIVYAM (34):- Was 2009 Swine flu Pandemic declared by WHO a falsified Pandemic?

ME: Yes, It was a false pandemic. Yes, it was a fake pandemic. Basically there was no pandemic at all.

The PACE (Parliamentary Assembly of Council of Europe) investigate the so called swine flu pandemic. They find out big-level corruption between WHO, pharma industry and scientists that has caused a fear psychosis of billions people, permanently damaged the lives of millions and even caused deaths to hundreds of thousands.

The parliament motion was introduced by Dr. Wolfgang Wodarg, former member of the German Bundestag and chairman of the Health Committee of PACE (Parliamentary Assembly of the Council of Europe). German Bundestag is the German federal parliament.

Wodarg is a medical doctor, who considers the 'pandemic' Swine Flu campaign of the WHO to be 'one of the greatest medicine scandals of the Century'.

DIVYAM (35):- Is WHO a corrupt organization?

ME: It seems to be. Scientist and officials here are working for their self-interest or for the interest of some big pharmaceutical company or for the interest of some country. They might be agent of pharma companies or some big country.

The text of the resolution by a sufficient number in the Council of Europe Parliament says among other

things, "In order to promote their patented drugs and vaccines against flu, pharmaceutical companies influenced scientists and official agencies, responsible for public health standards to alarm governments worldwide and make them loss tight health resources for inefficient vaccine strategies and needlessly expose millions of healthy people to the risk of an unknown amount of side-effects of insufficiently tested vaccines".

The bird-flu and swine-flu campaign seems to have caused a great deal of damage to some vaccinated patients. It has also damaged the credibility and accountability of important international health institutions.

The Parliamentary inquiry look into the issue of 'falsified pandemic' that was declared by WHO in June 2009. This pandemic was declared on the advice of its group of experts, SAGE. SAGE is Study on global AGEing and adult health. Many of SAGE members have financial ties to the some pharmaceutical giants such as GlaxoSmithKline, Roche, Novartis, who benefited from the production of drugs and untested H1N1 vaccines.

In his statement to the Committee, Wodarg criticized the influence of the pharma industry on scientists and officials of WHO, stating that it has led to the situation where "unnecessarily millions of healthy people are exposed to the risk of poorly tested vaccines," and that, for a flu strain that is 'vastly less harmful' than all previous flu epidemics.

DIVYAM (36):- What should be the criteria for pandemic?

ME: Main criteria of pandemic should be number of deaths. It cannot the number of infected persons. Because number of death is the only way, where we can judge a disease is deadly or not.

For the first time, the WHO criteria for a pandemic was changed in April 2009 as the first Mexico case was reported, to make not the actual risk of a dis-

ease but the number of cases of the disease basis to declare 'pandemic'. Here is the game. Immediately after first case, the WHO changed the criteria of pandemic. They changed the criteria just to fool us that this is a pandemic.

By labelling the swine flu as pandemic, few nations were compelled to implement pandemic prevention plans and also the purchase un-necessary swine flu vaccines.

Because WHO is not subject to any parliamentary control, Wodarg said it should be compulsory for governments to insist on accountability. The inquiry also looks at the role of the two critical agencies in Germany, the Paul-Ehrlich and the Robert-Koch Institute. PACE was not ready to accept swine flu pandemic as real pandemic.

DIVYAM (37):- What was PACE final report?

ME: Finally PACE Health Committee denounces' unjustified scare of swine flu. Report said it's a waste of public money. The handling of the H1N1 pandemic by the World Health Organization (WHO), European Union agencies and national governments led to a 'waste of large sums of public money. There were unjustified scares, panic and fears faced by the European public.

Conflicts of interest among the WHO expert scientists, is now exposed very well. Three scientists had previously been paid by drug giants like Roche or GlaxoSmithKline for lecturing and consultancy work. Scientists involved in research works have also been paid by pharma giants.

So you think, paid scientists are there, who are working for a particular self-motivated interest. They are not working for humanity. Drugs and vaccines developed by these devil scientists were actually not helpful.

DIVYAM (38):- Was vaccination for the swine flu effective?

ME: The PACE report, says there were many evidences that the seriousness of the pandemic was vastly overrated by WHO, resulting in a distortion of public health priorities.

Mr Flynn told the committee: 'this was a pandemic that never really was', and described the vaccination program as placebo effects. There was a grave short-coming in the transparency of decision-making about the pandemic.

The influence of the pharmaceutical industry on decisions taken is quite detrimental to the society. Such advice could prove disastrous in the case of a severe future pandemic, it warns. But this is our mistake that we haven't taken their advice seriously.

Fiona Godlee, the Editor-in-Chief of the British Medical Journal, told that scientists who drew up key WHO guidelines on stockpiling flu vaccines and drugs had previously been paid hugely by drug companies which got to profit.

The WHO has been 'highly defensive,' the committee said. WHO is unwilling to accept that a change in the definition of a pandemic was made.

DIVYAM (39):- How an international body like the WHO can be influenced by the pharmaceutical companies?

ME: Yes, most of people are thinking in same way. The American pharma Companies or big pharma are multibillion-dollar enterprises. Their annual budget is more than many countries annual budget. They can influence any organisation. They can bribe anybody.

These companies have their puppets in governments around the world. Now you already know that PACE found WHO faked the swine flu as a pandemic. Now we should not give a right to WHO to dictate our health policies. Big Pharma has a huge influence over WHO, governments, doctors or even medical journals.

And Now it happened again now in 2020 as a false corona pandemic because we have not learned from warning of PACE report. WHO is using tactics of fear mongering for their self-motivated interest.

DIVYAM (40):- What is fear mongering?

ME: Fear mongering or scare mongering is the spreading of rumours of an impending severe danger to purposely arouse fear in order to manipulate the public feelings and decisions. They want to frighten us to sell their products. The action is deliberately done arousing public fear, or horror about a particular issue.

This is done through media. Media creates hype. Media give wrong figures and hide actual figures. They exacerbated normal mortality as abnormal, they exacerbated normal incidence as abnormal. They create panic in the society. They frightened the common people. They along with the WHO encourage the use of mask. Initially a few people started using the mask. Later on more people started using the mask after getting frightened by seeing other people doing the same. By doing this they scare the people. But they never tell you that mask cannot prevent entering of corona viruses to your mouth or nostril.

DIVYAM (41):- Can mask protect from corona virus?

ME: No. People were made fool by main media and the World Health Organization. WHO recommended people to wear masks. It is a known fact that even N95 mask cannot protect from the virus. Because N95 means filtering 95 % of above size 300 nanometers. While on the other hand corona virus size is around 100 nanometers.

Wearing any mask as recommended by the WHO is something like swimming with a mosquito net, expecting not to get wet in the swimming pool. WHO recommended mask just for fear mongering. Media, WHO and government agencies will never tell you that wearing a mask has many bad effects.

DIVYAM (42):- What are bad effects of wearing a mask?

ME: This must be understood that mask cannot stop corona virus infection and/or its spread. There are many side effects.

- First, size of corona virus is approximately 100 nanometers and pore size of the available mask are approximately 300 to 800 nanometers, so mask cannot prevent entering during inspiration or leaving the respiratory tract during expiration. Some people say that because this is a droplet infection, so droplets will stick to the mask and in this way they will prevent virus into nose and mouth but this is also a wrong perception as the droplet stick to the mask then there are more chances that the virus will remain in touch with mask and more chances of getting in during inspiration.
- Second, face masks can make breathing more difficult. Face masks are sometime intolerable to wear as they worsen their breathlessness. Moreover, some amount of carbon dioxide previously exhaled is inhaled at each respiratory cycle. So they will increase breathing efforts, frequency and deepness. Mask may also worsen the clinical condition of infected people from any other kind of respiratory infection as difficult breathing will pushes the viral load or bacterial load. In effect, the wearer inhales her or his own exhaled air. Inhaling carbon dioxide causes rapid breathing, rapid heart rate, clumsiness, emotional upsets and fatigue.
- Third, they can cause vision problems. Wearing a face mask obstructs the exhaled air and makes the exhaled air go into the eyes. This generates an irritable feeling and an impulse to touch your eyes. If your hands are contaminated, you are infecting yourself again, again and again.

- Fourth, they are highly uncomfortable to wear. It is very difficult to wear a mask for long time. Mask will trap the moisture that builds up from breathing and sweating. While you want your mask to fit perfectly around your face but this is usually not possible. Sometime mask are very tight and it may hurts your face. Too tight mask will gives you less space to breathe smoothly. Sometime it is too loose and will slip down.
- Fifth, they can cause glasses to fog. When anybody exhales air without wearing a mask, it immediately dissipates into the environment. When you wear a mask, it tends to go into your spectacles, fogging your glasses. Some persons suggest placing a folded tissue between your mouth and the mask. The tissue will absorb the warm, moist air, preventing it from reaching your glasses but that is not possible. Also it is said top of your mask should be tight and the bottom loose, to help direct your exhaled breath away from your eyes but this is again not possible because like you a normal person touches his mouth much frequently and the mask becomes loose after some minutes of wearing.
- Sixth, they decrease our immunity. Hypoxia that is low oxygen levels in the tissues, can suppress some aspects of the immune system. A prolonged decrease of enough oxygen in your body can decrease the ability of your immune system to tackle infections. Older and younger people wearing a mask are said to be more vulnerable to decreased immunity
- Seventh, they can force you to come close. It is difficult to identify a person wearing a mask. If both persons are wearing a mask, meets to each other, it becomes further very difficult to identify and indirectly it will

force to come closer. The quality, tone and the volume of speech between two people wearing masks are highly compromised and they may unknowingly come closer to each other. Further you need to speak loudly.

- Eighth, they can cause skin rashes, allergies. Mask may cause allergies, itchiness, and redness on the facial skin. Mask may collect sweat, beauty products, automotive exhaust, dust particles, pollen and any particles floating in the air, so all these product can cause skin rashes and allergy reaction.
- Ninth, they can cause a false sense of security. Pore sizes of the mask are three to ten times larger than the corona virus, so mask will not prevent entering or leaving the virus from respiratory tract. But a person may falsely believe that he is secured but actually he is not.
- Tenth, they can spread disease if not changed or washed. Mask requires change after 6 to 8 hours. Most of the common people don't know this. Mask need to be washed at least two times daily and should be properly dried up. They are used to stop the spread of micro-organism, not spread micro-organism themselves but wearing such dirty mask will cause to increase the spread of all types of germs.
- Eleventh, they can hurt toddler and children. Mask or cloth face coverings should not be placed on toddler and young children. They will lead to trouble breathing. Mask should also not be placed on those people who are infants, unconscious, incapacitated or otherwise unable to remove the mask without assistance of somebody.
- Twelfth, mask may endanger life of elderly people. Elderly population usually have weakened muscles, their respiratory efforts are less and they have few more other diseases. Associated disease may be respira-

tory or non-respiratory which may further reduce their respiratory power and lung capacity. In this situation wearing a mask will further decrease their oxygen level in the lungs, blood and body and in this way may further compromise their health and life.

- Thirteenth, walking and running with mask may be life threatening. We have heard news of death of healthy youth running with mask. Few youth may even ruptured their lungs and lead to death or serious illness.
- Fourteenth, mask causes social issue. Mask causes a fear in the society. Somebody might wrongly consider mask as a good safety measures and may have a hot discussion with those who know mask are not safe. This may lead to quarrel with colleagues, abusing each other, beating in between pro-mask and anti-mask groups. Similar things will happen among the members of a family, in between wife and husband, in between father and sons and in between other family members.
- Fifteenth, mask increases incidence of crime. Because mask can hide the true identity of a person, this helps thieves. Even CCTV camera cannot truly identify the thief. Even road side crime as snatching will increase because they are now more secure and hidden. ATM crime will further increase. Incidence of theft will increase.
- Sixteenth, mask increases burdens on police. Because of family issues, social issues, conflicts, theft, snatching and other crimes, police will get more unnecessary cases. These avoidable cases will increase load on police. If police will be busy in small work like forcing a citizen to wear a mask and fining a person on non-wearing, other major crimes in the society will also increases. Because of this delaying, investigations of old cases will

lead to delay and delayed justice of old court cases.

- Seventeenth, mask increases panic. This panic will lead to exacerbation of symptoms of other illness. This panic may lead to increase or decrease in blood pressure, increase or decrease in the sugar level. Respiratory distress, mental depression and even suicidal thoughts in few individuals may increase.
- Eighteenth, mask may lead to decrease water intake. If a person wearing a mask is thirsty, he/she may avoid water for few minutes or hours. This may lead to Fatigue, Constipation, Poor Skin Health, Sugar Cravings and Decreased Urination.
- Nineteenth, mask may increase pollution. There are no proper ways of disposing the mask. People are throwing the old used mask on the roads which is increasing unhygienic environment and pollution. This will further spread other infectious disease.
- Twentieth, mask increases cost burden to society. Masks are available from 10 Rupees to 500 rupees ranges. And they have to change 6-8 hourly or washed and dried up; so this further increases living cost. Masks have now become an added daily cost that very few people can handle especially if you are to opt for an NK95 mask. On average that can add up to INR 1000 to INR 30000 monthly. This is not easy to manage for many families. There are more chances, people risk reusing same masks for many days. Few people may have to choose between a meal and a mask.
- Twenty first, mask may collapse economy of our country. On a national scale, the mask will definitely disrupt economic dimensions. Economy of the county will be destroyed. If any person is working with a mask his working capacity will be decreased.

Further wearing mask, setting a mask (A person usually sets his mask minimum 10 times in an hour), removing a mask, washing and drying process needs time. In this way nation's time is wasted. Nation's working capacity decreases. Further a panic situation in the society because of mask and PPE kit used by the doctors, all together will decrease the production of the country, GDP will decrease and economy of the country will be collapsed.

DIVYAM (43):- Does it mean mask are not only useless but harmful too?

ME: Yes. You understood it properly. Masks do not prevent respiratory infections, influenza-like illnesses, or respiratory illnesses transmitted by droplets and aerosol particles. In a lack of knowledge, governments should not make policies that have a potential to cause harm. The government should not allow corporations to exploit fear-based sentiments.

Now we have understood that there is no known benefit of wearing a mask in a viral respiratory illness. It seems to main purpose of masks are to create fear among people. Mask and PPE kit creates panic in the society and they want to do this.

DIVYAM (44):- What is PPE Kit?

ME: PPE kit means personal protective equipment. Personal protective equipment is a protective clothing, helmets, goggles, or other garments or equipment designed to protect the wearer's body from injury or infection.

The hazards addressed by protective equipment include physical, electrical, heat, chemicals, biohazards, and airborne particulate matter. Personal Protective Equipment is protective equipment designed to safeguard the health workers by minimizing the exposure to a biological agent. They are usually made of polythene. They need to destroy after used once. They have many disadvantages.

DIVYAM (45):- What are disadvantages of PPE kit?

ME: PPE kit is just like a polythene rain coat. This plastic suit, goggles, helmets, cannot prevent you from infection. Poly-thenes have a larger pore size than corona virus. Further it covers your whole body so your contact with the environment will be lost; your body aeration will be lost. This will lead to perspiration, foul odour, skin reactions, allergic reactions and decreases immunity.

Most of the hospitals have shut down AC, because it is said that AC will spread it. Further you cannot take water so deprivation may lead to Fatigue, Constipation, Poor Skin Health, Sugar Cravings and burning Urination.

Further you have to hold your urination and defecation that will further damage your health. Further all the bad effects of the mask will be seen here with an exacerbated level.

DIVYAM (46):- Then why doctors are wearing PPE kits?

ME: There are three kinds of doctors. One with less education, less knowledge and they further don't want to know minute details of all these things. They don't want to do study. They don't have their own thought process. They are just going through media news and media knowledge. It's like a sheep walk. They are in false belief.

Second category of doctors is those who want to create panic in the society and PPE kits are very good weapon for that. They want to make more money; they will charge more from the patients. This is their looting instrument.

Third category of doctors is those doctors who are in government jobs. They have been ordered by the government to wear mask. They do not have guts to speak truth; they do not have guts to follow truth.

DIVYAM (47):- Then why police personnel's, sweepers and cleaners are asking for PPE kit?

ME: They do not have advanced knowledge of medical science. They are wrongly educated by media news. When they look at the doctor in PPE kits, they think PPE kits will possibly save from infection. Even I have read news of a police person, who becomes unconscious after wearing PPE kit.

Rather I will suggest government to ban PPE kit because corona is a simple flu viral disease that does not require any special protection. So persons wearing PPE kits are not a corona warrior, rather he is playing in hands of wicked people.

DIVYAM (48):- Are doctors really corona warriors?

ME: No. They are not corona warriors. A warrior fight for the people, for the common men, for the welfare of masses but here they even shut down seeing normal patients. Our hospitals are lying empty during this time of pandemic. But we were told healthcare services are under pressure and they are the frontline warriors!

We know that many videos on the social media were releases showing bodies lying in heaps waiting to be cremated off, just to show you how dangerous the disease is. But all these news are fake news. Corona is a simple viral disease, doctors must tell this to common mass. Rather doctors are frightening the general people.

DIVYAM (49):- What is a simple flu viral disease?

ME: Flu is just like a common cold with symptoms like runny nose, sneezing and sore throat. A mild difference is this that common colds usually develop slowly, whereas the flu tends to come on somewhat suddenly.

Common signs and symptoms of the flu are:

- Runny nose, sneezing
- Fever over 100.4 F (38 degree C)
- Aching muscles
- Chills and sweats
- Headache
- Dry, persistent cough

- Fatigue and weakness
- Nasal congestion
- Sore throat

Flu is usually caused by influenza virus. Influenza is a viral infection that attacks your respiratory system, your nose, throat and lungs. Influenza is commonly called the flu. Most people who get the flu can treat themselves at home and often don't need to see a doctor. It's a part of a common spectrum of ILI that is Influenza like illness and corona too is a simple flu.

DIVYAM (50):- Is COVID-19 similar to normal flu?

ME: You were told extensively by the media and by some doctors not to compare the COVID-19 with the flu, but we have now known the truth.

Let's compare it with the normal flu. The new novel corona virus and the seasonal flu are similar in many ways. Both are respiratory diseases that spread through droplets of fluid from the mouth and nose of someone who is infected. Both are contagious and produce similar symptoms such as fever, cough, muscle ache, weakness. Both are particularly has more effects on the elderly. So corona is a simple flu and part of spectrum of ILI.

DIVYAM (51):- What is ILI?

ME: ILI or Influenza Like Illness is also known as flu like disease or flu-like syndrome. ILI causes fever of greater than or equal to 100°F, in addition to cough or sore throat. After an incubation period of 1–4 days, there is an abrupt onset of body symptoms and respiratory signs. Symptom usually lasts 5–7 days. The body symptoms can include malaise, body aches, headache, loss of appetite, and nausea.

Influenza only causes 35–45% of ILI cases during peak seasons. The major viral agents of ILI include influenza viruses A and B, para-influenza virus, respiratory syncytial virus, human meta-pneumo virus, adenovirus, rhino viruses, entero viruses and human corona viruses.

ILI has high prevalence in the society. The ILI death rate is around 0.1% in the US. Death rate of corona virus is very-very low. It is even less than 0.1%. Do not confuse with false media reporting of sudden death of a youth. It is not linked to corona virus.

DIVYAM (52):- Why a young healthy looking person suddenly dies?

ME: Dying suddenly is not abnormal phenomenon. It is not related with corona virus.

There is one article published in Indian Journal of Pathology and Microbiology. You can cross-check this on their website – ijpmonline.com . This article was published on 07th march 2011. Autopsy of 6453 dead persons of age group 18 to 35 years were analysed. At the time of death, these young persons were healthy and without any prior known illness.

The study found about 54.6 % persons died because of some form of infection, may be viral, bacterial, TB, Hepatitis, Malaria, Typhoid or any other infection.

About 9.37 % persons died because of some form of asymptomatic cerebro-vascular disease like brain haemorrhage, stroke etc.

About 6.25 % persons died because of cardiac disease that is heart related issue like arrhythmias, irregular heart-beat, heart attack, aneurysmal rupture, cardiomyopathy, electrolyte imbalance, sudden changes in blood Ph etc.

Other main causes of adult sudden death are pulmonary embolism and shock.

A website webmd.com says it is largest cause of natural death in US, causing about 3,25,000 adult death in USA every year. If we interpolate these figure to India, than we may think of 13,00,000 sudden adult death every year in India.

So every years this happens; 13,00,000 adult death in India and that is sudden death; 1,08,000 death every month and 3600 death every day.

But media never tells all these. If any of these is tested for corona just before death and found to be positive, media will make a huge cry that this sudden death is because of corona. On the other hand it is not because of corona, it is a normal way of death for few individuals.

DIVYAM (53):- Why are so many people dying from corona?

ME: You will never know that people are dying from corona or some other illness. There is one test that is rtPCR test. This test is highly inaccurate. Inaccuracy may be in the range of 1% to 40 % or even higher. There is a great difference between dying with corona and dying from corona.

DIVYAM (54):- Can an improved corona person be re-infected?

ME: If you improved from flu, you can be re-infected. If you improved from TB, you can be re-infected. Re-infection is always a possibility with any kind of infection. If a corona positive person with or without treatment becomes corona negative, then chanced of re-infection are always there. This is not an abnormal phenomenon. So this is not a sign of a severity of an infection. Further corona or novel corona is disease with low infectivity rate.

DIVYAM (55):- If corona is not spreading fast, then why number of infected persons are increasing?

ME: It is because of corona testing. If you will test more, more number of people will show a positive test. And because they are going on adding each and every case cumulatively, so this number is increasing. They are adding the number. Even those patients, who have been improved, who have been converted negative from positive are not deleted from total tally.

If you test all people of world, you may find 400 billion or almost half the population of world as corona positive. Corona positive does not mean a corona patient. First you suspect a disease and then you test

it. Here we are following a reverse medical practice. Here we are testing first to normal persons to find out the so called corona cases.

DIVYAM (56):- Is corona highly infectious?

ME: No. A more infective agent has more R naught. And corona has a less R0, so this is not all highly infectious. Further its mortality rate is very less, so it's not a deadly disease. It's all a game plan to destroy world economy to achieve their many hidden agendas, to establish new world order is one of them.

DIVYAM (57):- What is R Naught?

ME: R0, pronounced 'R naught', is a mathematical term that indicates how contagious an infectious disease is. It's also referred to as the reproduction number. As an infection is transmitted to new people, it reproduces itself. See the R naught of few diseases -

- R0 for measles ranges from 12 to 18,
- R0 for tuberculosis ranges from 5 to 20,
- R0 for human corona ranges from 1.0 to 4.4,
- R0 for influenza ranges from 0.9 to 2.1,
- R0 for covid-19 ranges from 1.0 to 2.2,

So you can see here that R naught for Covid-19 is somewhere around R naught of Influenza, the common flu.

DIVYAM (58):- R naught of covid-19 is not high, then why the virus is spreading so fast?

ME: You must note an excellent point, The R0 of the Human Coronavirus is actually MORE (2.7 ± 1.7) than that of the Novel Coronavirus (or COVID-19). The highest R0 of this Novel Coronavirus is just 2.2 which is actually lower than the Human Coronavirus. So practically it should not spread fast. And that's indeed true.

COVID-19 is not actually spreading fast, it just because of media. Media is reporting each and every case like a cricket commentary to create atmosphere of fear. They must have been paid for this.

The diagnostic tests, i.e., RT-PCR and serological tests are highly inaccurate. Prof. Jihad Bishara, the director of the Infectious Disease Unit at Petah Tikva's Beilinson Hospital, said that "some of the steps being taken in Israel and abroad were very important, most people who are infected will recover without even knowing they were sick, the at-risk groups are now known, and the global panic is unnecessary and exaggerated".

DIVYAM (59):- Does T.B kill more than corona?

ME: T.B. kills an average 5 lakh Indians every year. T.B. has an R0 of 5 to 20, so this is more dangerous than novel corona. Further T.B. has a higher mortality rate. When we as a doctor interacted with tuberculosis patients, in T.B. hospitals, we were never told to wear masks or those body suits as we are seeing today.

Why are we going idiotic over a mild infection like coronavirus? Many people were suspicious about this pandemic from the very beginning and now their number has been increased manifold.

It seems quite paradoxical about the governments, administration, police and health authorities to behave like mad dog. We know the fact that Tuberculosis (TB) is a huge burden not only on our country but also all over world.

Annual death because of tuberculosis in India is about 440,000 to 5,00,000. TB also is 8 times more infective and 8 times more fatal than COVID-19. So if social distancing, quarantine and self-isolation really work, we should adopt all these measures to defeat TB.

DIVYAM (60):- But T.B. has a treatment while COVID-19 doesn't; isn't this significant?

ME: The answer is that no flu has any definitive treatment. Rather it is all about to create a new market. Media is not telling about T.B. because diagnostic and drug market for T.B. has been developed already. Now media wants to create new markets for pharma in-

dustry, which had paid them. COVID is 8 times less infectious and 8 times less deadly than tuberculosis, so why we need such a draconian measures.

DIVYAM (61):- Is there any effect of temperature on corona virus?

ME: These people are spreading rumours. Previously they told in the month of March, immediate lock down is required. And virus will be 'less powerful' at high temperature in the month of May and June. Later in April they told peak will come in May and June so extension of lockdown is required. Now they are telling peak will come in the month of July and August and partial lockdown, social distancing and mask are required to prevent the spread of the infection.

This will go on, later on they will say, peak will come in the month of November and December and at November / December they will say peak will come in January and February.

This is, I think, their game plan to maintain the environment of fear, to destroy the economy of nations.

DIVYAM (62):- But aren't we dealing with new pathogen?

ME: No, it is not true. Structure of COVID-19 is quite similar to influenza. COVID-19 has proved itself to be just another flu virus disease, so there's no need to panic. Not just TB but the overall disease burden of respiratory illnesses and Influenza like Illnesses is very high in India.

PPE kits are being flashed on to our faces by the main media is nothing but a scare mongering method. This is just to keep reminding us again and again that this virus is very dangerous and why we should leave our freedom and civil rights to the authorities, police and government to keep ourselves safe from this deadly danger. Indian Media has been paid hugely to frighten the people in the name of education.

DIVYAM (63):- Why there are so many cases in U.S.?

ME: It is because of many reasons. CDC has deceived the entire American and all worlds' population. CDC might say that this was a mistake, but it was not a mistake, rather a calculated move of a game. Ashish Jha, the K. T. Li Professor of Global Health at Harvard and the director of the Harvard Global Health Institute, asked "How could the CDC make that mistake? This is a mess."

Further, as you know now, test kits are highly inaccurate. So they might be giving a positive result on those persons, who are actually not a corona patient.

Now you can call CDC as a scandal organisation. CDC, Dr. Fauci, media, treating doctors all have created a wrong illusion of high number of cases.

DIVYAM (64):- What is CDC scandal?

ME: It is said that CDC – Central for Disease Control has made a mistake. The debilitating mistake: combining test results that diagnose current coronavirus infections with test results that measure whether someone has ever had the virus. The agency confirmed that it is mixing the results of two different tests, viral PCR tests and antibody tests. Both tests are reveal different information and are used for different reasons.

But the big game is combining results from two different tests. They added the result of two different tests on same patient; PCR and the antibody test and placed them in one tally. Combining the two tests has vastly increased the number of cases.

This inflated number they are flashing on TV screens after every few minutes, several times in a day. This inflated number; media and government and related game players used to show on TV media or in newspapers to scare the common people and justify masking, social distancing, lockdowns and to stop reopening the economy.

Just when governors in US are trying to reopen their economies, a gigantic case-counting deception at the CDC forced them to close the economy. In this way

millions of Americans suffered financial devastation because of corrupt CDC officers, scientists and personals.

Therefore, I am saying that this was not a mistake by CDC, rather it was a game move. They've managed to create a false impression that absolute case numbers are higher than it should be.

I have heard few people saying that there all many people behind this super game including Dr.Fauci, Bill Gates, Rockefeller, Neil Ferguson etc.

DIVYAM (65):- Who is Neil Ferguson?

ME: Neil Ferguson is a computer analyst. Either he is super idiot or he is along with the people behind this game. A computer model prediction of COVID deaths in the UK and US was made by Neil Ferguson.

His 2020 projections of 5,00,000 COVID deaths in the UK and 22,00,000 in the US were used by many countries to justify lockdowns. Neil Ferguson has made a horrendous lunatic exaggeration. His Track record, must be checked, He must be investigated.

These people are lying on the high side, blowing up figures, giving exaggerated numbers in order to create the illusion of pandemic, in order to creates a false pandemic. Few people are like Bill Gates is speaking only one world; vaccine, vaccine, vaccine. This is because probably he has invested in these vaccine companies.

DIVYAM (66):- What are vaccines?

ME: A vaccine is a biological preparation that provides active acquired immunity to a particular infectious disease. A vaccine typically contains an agent that resembles a disease-causing microorganism. It is often made from weakened or killed forms of the microbe. Sometimes instead of micro-organism, its toxins or one of its surface proteins are used.

Usually vaccines contain the same germs that cause disease. For example, measles vaccine contains measles virus. But they have been either killed or

weakened to the level that they don't make you very sick.

DIVYAM (67):- How vaccines prevent disease?

ME: A vaccine stimulates your immune system to produce antibodies. It is something like it would, if you were exposed to the disease. After getting vaccinated, you develop immunity to that disease, without getting the disease first. But vaccines provides you artificial immunity, they are not able to provide natural immunity.

When vaccines are injected into fatty tissue or muscle or given orally, vaccine antigens are not strong enough to produce the severe symptoms and signs of the disease but are strong enough for the immune system to produce antibodies against them. The memory cells prevent re-infection when they encounter re-attack that disease in the future. Thus, through vaccination, children develop immunity without severely suffering from the actual diseases. In this way vaccines prevent disease.

Each child is born with an immune system that is composed of a variety of cells, glands, organs, and fluids. These are located throughout our body to fight invading bacteria, virus, fungus and other germs. The immune system recognizes germs that enter the body as foreign matter. These germs have antigens on their surface, and our immune system recognises this antigen and then produces protein substances to fight them. These substances are called antibodies. They fight with antigen and neutralize them. Cells those produce antibodies become memory cells later on.

DIVYAM (68):- What are memory cells?

ME: A normal, healthy immune system has the ability to produce millions of these antibodies to fight- against millions of attacks every year. We are not even aware that we are being attacked and we have been defended by the body. Many antibodies disappear once they have destroyed the invading antigens.

Cells involved in the production of antibody become memory cells.

Memory cells remember the original antigen. It recognises the antigen immediately on attack and then fight against it. This they do quickly and strongly than initial attack, when the antigen attempts to re-infect a person, even after many years. This protection phenomenon is called as immunity. And cells involve in this procedure are called as memory cells.

Few cells will become memory cells on natural infection or artificial infection by vaccines. Vaccines are basically providing same immunity which we will get on natural infection.

DIVYAM (69):- Why not we should develop a vaccine against coronavirus?

ME: There are millions of germs, so how many vaccines you will develop? Naturally millions of vaccines need to be developed. Most vaccines requires more than single doses. So again multiples of millions of vaccines doses have to be given a child to protect from all diseases. Why to pin-prick our small new born babies to all these infecting agents while we can also get natural immunity.

A former director of the WHO, Professor Karol Sikora said that the Coronavirus could burn out naturally so a vaccine is no longer needed. Sikora said "There is a real chance that the virus will burn out naturally before any vaccine is developed,"

So, if you think vaccines are for all kind of infection then, this is not possible. So mankind should only focus to a very deadly disease for a vaccine. Why should we develop a vaccine for an infection with a low mortality rate even lower than the flu? Vaccines also have harmful effects?

DIVYAM (70):- What are harmful effects of a vaccine?

ME: A military study was done. It shows military personnel who received the flu vaccine were at 36 per cent increased risk for coronavirus with only a small

benefit against flu. Immunization with the SARS vaccine, which is given to protect us against the virus, actually makes us more susceptible to an infection from the same SARS coronavirus.

If everyone has to be vaccinated, then every one of us will soon be injected with vaccines that are contaminated DNA or RNA from human foetal cells or animal embryonic cells.

Some people also say that vaccine causes cancer. We do not have proper study on this matter but this might be true. It is also said by few people that vaccines causes autism.

DIVYAM (71):- What is autism?

ME: Autism is a serious developmental disorder that impairs the ability to communicate and interact with others. Autism, or autism spectrum disorder (ASD), refers to a broad range of conditions characterized by challenges with social skills, repetitive behaviours, speech and non-verbal communication. According to the Center for Disease Control, autism affects an estimated 1 in 54 children in the United States today, which was very less few decades ago.

Autism spectrum disorder impacts the nervous system and affects the overall cognitive, emotional, social and physical health of the affected individual. The range and severity of symptoms can vary widely. Common symptoms include difficulty with communication, difficulty with social interactions, obsessive interests and repetitive behaviours. Early recognition, as well as behavioural, educational and family therapies may reduce symptoms and support development and learning.

Vaccines cause autism and cancers. Vaccines may induce other disorders or may increase the severity of other diseases. So we should not opt for a vaccine for a mild disease whose mortality rate is very low.

DIVYAM (72):- What is true mortality rate of this COVID -19?

ME: What I think mortality rate is just like common cold or like a flu. So it's just 0.1 % or may be very less than this.

UK govt had released a statement in January 2020 claiming that there will be 22,00,000 deaths in the US and 5,00,000 deaths in the UK. COVID was then given a status of High Consequence Infectious Disease-HCID. After 2 months, the same UK government then changed its view.

On 19th March 2020 they quietly removed it from HCID and put it under the category of a normal virus and mentioned that it does not require any special treatment. This conclusion was reached by The New and Emerging Respiratory Virus Threats Advisory Group (NERVTAG), consists of 16 scientists.

On 26th March, a report emerged in the New England Journal of medicine which reported that COVID-19 is not as deadly as we expected it to be and the mortality rate and in common words the death rate is 0.1% which is equivalent to normal flu. Yes, zero point one per cent death rate. This is all paid media who have created this pandemic; rather it should be named as a media-demic.

DIVYAM (73):- Is media biased?

ME: Media is paid hugely. Just think mortality rate is only 0.1%. What does this mean? If 1000 people fall ill with the virus, only 1 person will die. Yes; only ONE out of a thousand will die. This figure is also achieved after wrong and deadly medicines and in an environment of fear.

Just think, if you remove dangerous drug trial and this atmosphere of fear then the death rate may be 0.01%, much lower than normal flu. But paid media is making a hue and cry, saying that so many people around the world are dying from the 'deadly virus'.

We have been watching the news with all the fearful background music. We are watching the news with people running around here and there in masks and PPE kits trying to control this dangerous virus. Media

is showing like this that the administration and police are making their big efforts to control this seemingly uncontrollable disease.

Actually media is feeding you. Not so many patients are dying from COVID-19. Very minor number may be dying with COVID-19. People who are dying are having other serious co-morbidities. They already have other severe health problems and if they die with a RT-PCR test done, which is highly inaccurate, showing COVID-19 positive, they are being counted as died due to COVID-19.

So definitely media is biased. This all is done to develop a new market.

DIVYAM (74):- Is media being utilised to develop a new market?

ME: Yes. They are being utilised or you can say they have sold their soul. Now you will not find a free and fair media anywhere in the world.

Initially death rate in Italy was reported as 10% by media. A study was conducted in Italy, where only 1.2% of 10% were reported to have died solely from the COVID-19 without any other illness. And what media told us.

Media told a rate of 10 % mortality rate in Italy, but actual figures are just 1.2% of this 10%, making an exact death rate of just 0.12%. Most common co-morbidities are Ischemic heart disease, Atrial fibrillation, Stroke, Hypertension, Diabetes, Dementia, COPD, Cancer, Chronic liver disease, Chronic kidney disease. People form these diseases were dying before corona also. But media is labelling these deaths from corona.

Media has frightened all of us that few people are not eagerly waiting for a vaccine. They are thinking only vaccine can save us. This was their game plan; they wanted to change the thinking process of mass, their behaviour and decision making. Now with the help of media they have achieved their goal of making a huge market even before invent of their product.

DIVYAM (75):- Why few people are more interested for a vaccine?

ME: These people have been brainwashed by media. Now few people just want a vaccine for an illness with such a low mortality rate. People are so much unclear, confused, feared, disturbed and disoriented; that they want a solution earliest, anyhow and at whatever cost.

They have been wrongly convinced by the media and other game players so much so that they are ready to be vaccinated thinking that this will end this situation of fear. They want to go back to job. They want everything to be reopened earliest.

These people have been falsely convinced of its efficacy and safety. So you need to understand how you were managed and fooled into believing about vaccinations as a cure for every disease, every illness. They have achieved their goal of changing your thought and decision in their favour.

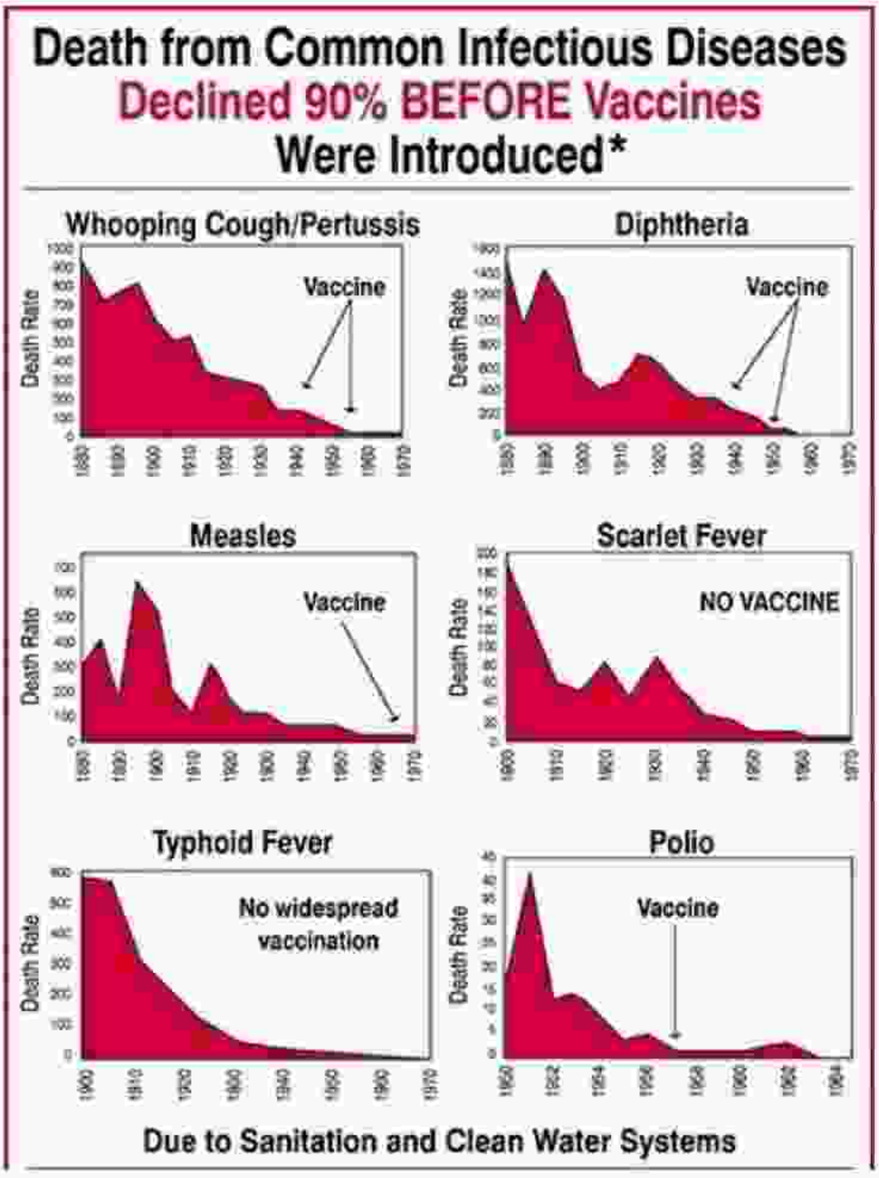

You must know that so called vaccination for serious diseases was also not very effective. You can learn this by understanding history of vaccination.

DIVYAM (76):- What is history of vaccination?

ME: Let's see vaccination history. Vaccination is not the real cause of declines in mortality seen in the first half of the twentieth century. Nearly 90% of the decrease in infectious disease mortality among US children occurred before 1940, when vaccines were not available. This point is important. 90% of the decrease in infectious disease mortality was achieved by good nutrition, health education, increases economic condition and better environment condition.

Only 10 % decrease in mortality rate may be because of vaccines. You also have been lied and made fooled that vaccination the disease is the cause of decreased but the truth is that disease mortality declined well before the development and introduction of vaccines.

I want to show you this graph. You can see this graph and understand role of vaccination in prevention of infectious disease is very subtle. The improvement trend is similar to diseases with vaccines and diseases without vaccines.

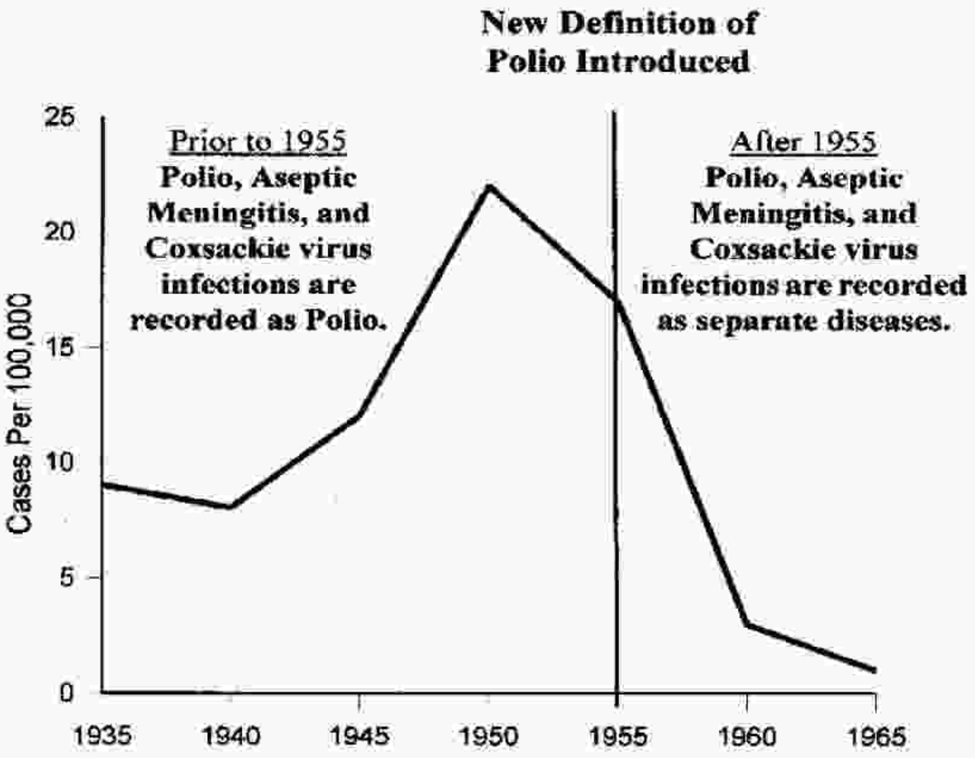

DIVYAM (77):- Hasn't vaccination eliminated the Polio?

ME: Polio is a very common virus, just like a cold or flu virus. Most of the people had/have the polio virus in their bodies at some point of time, but they don't know it. We have never tested for it unless we have paralysis. We all have thousands of different viruses in our body at one point of time. This is nature's way of keeping our immune systems stimulated, active and responsive.

The paralysis that was blamed on the poliovirus in the 1940s and 50s was actually not due to polio virus

itself. Rather it was due to the widespread spraying of DDT, a highly toxic pesticide. DDT is now banned in many countries.

Polio vaccination was started when Polio peak was already down. Just see this Polio graph to understand this properly.

I will suggest you to note new points here –

1. Before the vaccination all paralysis because of Polio, meningitis and Coxsackie virus were included as a Polio case.
2. But after the introduction of vaccination in year 1955, the definition of Polio changed. Now paralysis due to meningitis and Coxsackie virus were not labelled as Polio, rather they now considered as separate entity.
3. Later on further definition changed for a case of paralysis. Now they called a case of paralysis as a case of AFP that is Acute Flaccid Paralysis. You need to understand this trick. Now a day if you find a case of childhood paralysis, they say this is a case of AFP. Now if you found a case of polio paralysis, they will term this as AFP, rather saying as

Polio, because they want to say us that Polio has been eradicated.

4. Also see the Polio peak just before vaccination. Similar graphs are seen in other infections and you will see peak is just before development of a vaccine.

Further we must note that immune response is not developed in early life. Immune response takes time to develop.

DIVYAM (78):- At what age immune response develops in Humans?

ME: A new-born's immune system does not develop before 6 months. It takes all its antibodies from mother's milk. By 6 to 9 months after birth, infant begins to respond to glycoproteins. Only after 12 to 24 months of age is there a marked improvement in the body's response to polysaccharides and glycoproteins.

The human body cannot mount an immune response in the first 6 months of life. The time may even extend beyond to 2 years. So why to pierce our new born babies in initial few months of life? Why to give them un-necessary oral germs or parts of germs, when they are unable to produce antibodies at that time?

Big Pharma and their promoters like Bill Gates, Dr. Fauci, Mark Zuckeberg has brainwashed us. Now we are thinking that they are protecting us but there is one question; protection from what? A baby's immune system isn't able to response properly at this early stage.

Vaccines further have dangerous substances like aluminium, nickel, mercury, formaldehyde, DNA, mutated human cell lines and partially damaged animal's embryonic cells.

Vaccines are given to stimulate the immune system but it contains immuno-suppressants! Doctors either due to their ignorance or due to monetary incentives from big pharma are telling you just to vac-

cinate your baby. We are already brainwashed, so we keep on believing this. But we must know vaccines have a variety of side effects as well.

DIVYAM (79):- What are side effects of Vaccines?

ME: There are many side effects like -

- Arthritis, Chest Pain
- Dizziness, tremors and losing consciousness (syncope)
- Convulsions and seizures
- Guillain-Barre Syndrome
- Cranial nerve paralysis or limb paralysis
- Swelling of the brain, Eye pain
- Partial facial paralysis

... and many more.

DIVYAM (80):- What are other issues regarding Vaccines?

ME: There are many more questions. These need to be answered.

- If a child has already been vaccinated for measles then why to fear from a measles outbreak?
- If vaccines don't have any links to autism, then why CDC is selectively deleting those data of clinical trial which are suggesting of increased frequency of autism with vaccination?
- Why did a top CDC scientist openly confess this that vaccines cause increase in autism?
- We know that mercury is a neurotoxic chemical; then why is it still used in the making of vaccine? Why such mercury containing vaccines are being injected into children and pregnant women?
- Why does the vaccine industry need legal immunity from all harm effects caused by vaccines?

- Why we cannot sue them in court?
- Why historical public health charts do tells a totally different story. These charts show nearly all the declines in infectious disease are actually taking place before the introduction of respective vaccines?
- Vaccines are not trustworthy. A pro-vaccine group in Africa discover that vaccines being given to African women were secretly laced with abortion substances. Why?
- Why do some vaccine companies admit they are backed by no clinical trials?
- If vaccines are totally safe, then why is there a long list of dangerous and frightening side effects?
- Why do the vaccine companies are telling that their vaccine have never been tested in pregnant women? Why they say that the effects of the vaccine in foetal development are unknown?
- Why the CDC website does list that the toxic chemical ingredients are used in vaccines?
- Why do vaccine companies want a call for the arrest of parents of families of unvaccinated children, putting the parents behind the bar?
- Vaccines are un-natural and abnormal substances. Why to accept them as a normal.

DIVYAM (81):- Should we accept these new normal as normal?

ME: No. Normal is normal. Abnormal cannot be called as a normal. This will happen only, when someone wants to make us fool.

Giving up our civil rights is not normal. Wearing mask is not normal. Caller tune is not normal. Unnecessary use of sanitizers is not normal. Social distancing is not normal. Being tracked 24x7x365 is not normal. Business shutting down is not normal. Loss of jobs of masses is not normal. Daily media Hue and

Cry is not normal. Going bankrupt of businesses and common people is not normal. Farmers wasting their products, killing their livestock and dumping their milk is not normal. Lockdown is not normal. Partial lock is not normal. Unlock is not normal. Your local authorities tracking you and asking you to become hostile to your neighbours is not normal. Social distancing is not normal. Chanting flatten the curve is not normal.

This type of things happed previously. Previously also they made huge cry that everybody is dying. This happed at the time of falsified HIV pandemic and at the time of falsified swine flu pandemic. A panic was created by the media at those times also.

DIVYAM (82):- What was HIV panic?

ME: First case of HIV was reported in 1981. Then during 80s media created panic. There were rallies with HIV/AIDS cards. Even school children were forced to take participate in such rallies in the name of education. There was a rumour in America that HIV is spreading at super-fast rate. Everybody will be killed by HIV. Even touching somebody or touching handkerchief of a person will spread the disease. Everybody in US was scared. All around there was fear of HIV only.

The pharma industry sold many testing kits and equipment. Now HIV test is almost a mandatory test by doctors before any kind of surgery. They have made a market. Every year new markets are being created. Sometime this is HIV, sometime this is Dengue, sometime this is chikungunya, sometime Ebola, sometime zika and sometime corona.

They had lied about the case number at that time of HIV and this time of corona also. They had lied about the death count at that time of HIV and this time of corona also.

DIVYAM (83):- Why so many deaths are occurring?

ME: The deaths are occurring every single year, every single month and every single day. Death is a natural

process. The only difference is that they are not being reported by media. The CDC predicted in the month of February that there will be large number of death due to corona in between from 200000 to 17,00,000. These deaths were estimated by CDC due to corona virus in this flu season in the US alone.

The total flu death this season is about 20000 to 50000 which is less than the number of flu death in the previous four seasons (2018, 2017, 2016, 2015).

Paid media created a sensation solely because now literally all patients who are showing symptoms of the flu are being tested. No matter if they die of respiratory illness or any other associated illness, these people are labelling them as corona death. So you can say that this corona pandemic is a fake pandemic.

DIVYAM (84):-- When was this false pandemic started?

ME: In December of 2019, we first heard about this so called deadly and dangerous virus. The news came from Hubei province of China with its epicentre in Wuhan. It was blamed to have originated from eating undercooked bats. We have heard the saying that the Chinese eat anything living or non-living. They chose Wuhan.

DIVYAM (85):-- Was Wuhan chosen thoughtfully?

ME: Yes, It was chosen deliberatively. Because National Institute of Virology of China is located in Wuhan, so it is easy to spread the rumour that china was doing some research here. Likely India has its National Institute of Virology in Pune, Maharashtra. So any country want to spread a real or false virus in India, want to spread some rumour there first choice will be Pune. And next choice will be in some other cities where we have some major branch of National Institute of Virology.

China was got stuck in their plan. The China started mask, social distancing and lockdown according to WHO instructions. The WHO kept praising China in the early stages of the outbreak because China fol-

lowed their instructions. But sooner China realised the real fact and real satanic plan of WHO. So Chinese policy makers kept distance from WHO instruction and saved their nation.

Although I am strongly against Chinese expansionist policy, policy of 'One Inch Daily' but here matter is different. China is sufferer here. Ultimately China came to know that these WHO recommended tests kits are actually highly inaccurate.

DIVYAM (86):- Does Corona test have a high level of inaccuracy?

ME: Initially Covid-19 could be diagnosed only by one test, called Reverse Transcriptase Polymerase Chain Reaction or RT-PCR in short. This test doesn't detect the complete genetic structure of the virus but it detects only a part of the genetic material of the virus. Let's see what the manual of the test kit says-

This rtPCT test is non-specific with Influenza A virus (H1N1), Influenza B virus, Respiratory Syncytial virus (type B), Respiratory Adeno virus (Type 3, Type 7), Mycoplasma Pneumoniae, Chlamydia Pneumonae etc. Last two Mycoplasma Pneumoniae and Chlamydia Pneumonae are basically bacteria. So a positive test here means infection because of any of these viruses or even because of bacteria. So infection is because of Corona or because of any of the above viruses or bacteria cannot be differentiated. Even a patient of pneumonia will give a positive corona test. A positive corona test doesn't always mean corona.

It is clearly mentioned in the test manual that the regulatory status for the test is for research use only and not for use in diagnostic procedures.

Further test may be sometime positive and sometime negative. Four Wuhan patients who were discharged as COVID -ve but 14 days post discharge were found to be COVID +ve.

CDC has also mentioned this that this test is not a specific test.

DIVYAM (87):- What was CDC observations regarding this rt-PCR test?

ME: The CDC is the leading national public health institute of the United States. It is a United States federal agency, under the Department of Health and Human Services and is headquartered in Atlanta, Georgia. Centres for Disease Control and Prevention (CDC) made the following observations.

- Detection of viral RNA, means a positive test may not indicate the presence of an infectious virus or that 2019-nCov is the causative agent for clinical symptoms.
- False positive is more likely when prevalence is moderate or low.
- The performance of this test has not been established for monitoring treatment of 2019-nCov infection.

So, this test is a useless test. Other than corona viruses will also give a positive test. Even bacteria causing pneumonia can also give a positive test. Sometimes even exosome may be confused as corona virus.

DIVYAM (88):- What is exosome?

ME: The human body secretes a type of cell called 'exosome'. The function of exosome is not clear. It is believed to be a waste product of cellular function. It is released from various parts of our body including urine, saliva, breast milk, lung secretion etc. Lung secretion is called as broncho-alveolar lavage. So exosomes are also seen in broncho-alveolar fluid lavage. Exosomes in the broncho-alveolar lavage fluid are quite very similar to the COVID-19 virus. Look at the similarities.

	COVID-19	Exosome
Diameter outside the cell	100 nm	100 nm
Genetic material	RNA	RNA

	COVID-19	Exosome
Diameter outside the cell	100 nm	100 nm
Genetic material	RNA	RNA
Receptor	ACE-2	ACE-2
Found in the	Broncho-alveolar lavage as lung fluid	Broncho-alveolar lavage as lung fluid

	COVID-19	Exosome
Diameter outside the cell	100 nm	100 nm
Genetic material	RNA	RNA
Receptor	ACE-2	ACE-2
Found in the	Broncho-alveolar lavage as lung fluid	Broncho-alveolar lavage as lung fluid

Receptor	ACE-2	ACE-2
Found in the	Broncho-alveolar lavage as lung fluid	Broncho-alveolar lavage as lung fluid

Therefore it is quite possible that RT-PCR can wrongly diagnose an exosome as a COVID-19 virus. Dr. Andrew Kaufman MD gave an interview where he justified how we may be misinterpreting exosomes as the virus.

Further RT-PCR test are so inaccurate that they may be positive in non-human samples, as it was studied in Tanzania.

DIVYAM (89):- What was the study done in Tanzania?

ME: Coronavirus test kits used in Tanzania were dismissed as faulty by President John Magufuli. He said they had returned positive results on samples taken from a goat, pawpaw (papaya) and pineapple. So, how corona tests can be positive on papaya or pineapple or goat? Magufuli, TheTanzanians president said that the kits had "technical errors".

"The Covid-19 testing kits had been imported from abroad", Magufuli said. The president said he had instructed Tanzanian government officers to check the quality of the kits. They had randomly obtained several non-human samples but had assigned them human names and human ages.

These samples were taken from pawpaw, a quail, a goat and a sheep. These samples were sent to Tanzania's laboratory to test for the coronavirus. Lab technicians and doctors were unaware of their origins, they were not aware that these are non-human samples.

Samples from the quail, pawpaw and the goat tested positive for Covid-19. This meant test is giving wrong positive. It was likely that some people were being tested positive when in fact they were not infected by the coronavirus.

He refused the monetary aid. He said that we should not accept that every aid is meant to be good for this nation. He sent the WHO samples of a goat, a papaya and a quail for testing. These samples came out to be COVID-19 positive. The Tanzanian President is reported to have kicked out WHO from the country.

"I am communicating with Madagascar", he said during a speech, saying "They have got a medicine".

DIVYAM (90):- Which is that medicine from Madagascar?

ME: This is a drink made from a bright-green fern-like plant. This is being promoted in African countries as a cure for COVID-19. Madagascar President Andry Rajoelina said that Madagascar has developed this herbal treatment as a cure to COVID-19.

This is marketed as Covid-Organics and sold in the form of an herbal medicine. Rajoelina has widely distributed it in his Indian Ocean island nation and exported it to many parts of Africa. But west created doubts over this medicine.

DIVYAM (91):- Why does the west have doubts over this medicine?

ME: There was a bad reception in the west to this drink. This is because of their policy. They have a policy of hatred against Africa and India. They think they are superior race. Nobody else can produce a cure of any disease. WHO is a puppet organisation working for the interest of West and US. The President of Madagascar believes the only reason the rest of the world has refused to treat Madagascar's cure for the coronavirus with sincerity, urgency and respect is that the treatment comes from Africa.

He also raised the question that if it were a European country that had actually discovered this remedy, would there be so much doubt? Even we have heard WHO has offered a bribe to stop use of this medicine.

DIVYAM (92):- What is this WHO bribes case?

ME: President of Madagascar has made a claim that the WHO offered $20million bribe to poison COVID-19 cure. This is horrible. WHO is responsible for better health of world. But here they want to poison a medicine. The President of Madagascar Andry Rajoelina has accused the World Health Organisation of a plot to have its COVID-19 Organics to be poisoned. Rajoelina claims WHO offered a $20 million bribe to poison their medicine.

Is west has a real problem with Covid-Organics? West problem is this that how could it is a product from Africa? How could a poor country like Madagascar can develop such a medicine to help save the world?

So now you can see how horrible WHO is. WHO was established for better health of world's population. On the other hand WHO itself is giving bribe to poison a drug. What does this mean? WHO want to increase the mortality rate. So it seems WHO is the main culprit behind these inaccurate RT-PCR tests, antibody tests and deadly drug trials.

DIVYAM (93):- Who recommended these horribly incorrect RT-PCT test kits?

ME: The test kit is being recommended by the WHO, the same organization that was called as a fraudulent organisation in the past. WHO have been accused in the past of just faking a normal swine flu as pandemic swine flu. The Parliamentary Assembly of the Council of Europe (PACE), a human rights watchdog, also labelled WHO of being scandalous.

DIVYAM (94):- Are antibody tests more accurate?

ME: No. The CDC has now admitted that the antibody test can be wrong half the time. Yes, CDC says it may be wrong in 50% of cases. In terms of quality control, a test with up to 50% inaccuracy is absolutely useless. Further antibody test cannot detect the virus, rather they detect antibody. Detection of antibody is a good sign. It means your immune system is working fine. You do not need any drug or vaccine.

On the other side these people are making vaccines mandatory. It may be possible that initially this may be optional, but later on these will be mandatory. This you have seen in the case of mask. At first they were voluntary but masks are now mandatory in India. And they may deploy police or even army if you refuse. Even I have read news that vaccines promoter like Bill Gates are giving bribe to politicians to make vaccines compulsory. It happed with Nigerian President.

DIVYAM (95):- Did Bill Gates offered a bribe to Nigerian president for forced vaccination?

ME: We have heard that Nigerian President was offered 10 million dollars by Bill Gates to make the Coronavirus injection compulsory for the public but he refused.

It is said that Bill Gates had offered $10 million bribe for a forced vaccination program for Coronavirus to the Nigerian House of Representatives to make a bill. The opposition political parties in Nigeria rejected the foreign-sponsored bill. The bill was for mandating the compulsory vaccination of all Nigerians.

Bill Gates wanted a forced vaccination bill to be passed even before the vaccines have not been discovered. The opposition political parties in Nigeria were very aware people. They demanded the speaker be impeached if he forces the bill on all members.

Dr. Shiva Ayyadurai, the inventor of email and renowned MIT's former scientist and PhD holder has said Bill Gates is bluffing us. He criticised Bill Gates and his plan to vaccinate the world and keep the nations under lockdown till then over a virus which isn't even fatal or infective. Even Kennedy has criticized Bill Gates.

DIVYAM (96):- What did Kennedy said about Bill Gates?

ME: Even Robert F. Kennedy Jr., the nephew of former American President John F. Kennedy, exposed Bill Gates agenda in India. Kennedy junior said that Bill

Gates is horribly obsessed with vaccines. Mr. Robert Kennedy wrote an article exposing Bill's agenda in India and even accusing him of suffering from a 'twisted messiah complex'.

Vaccines, for Bill Gates, are a strategic philanthropy that feed his many vaccine-related businesses, including Microsoft's ambition to control a global vac ID enterprise and give him dictatorial control over global health policy. Bill Gates has a bad record with innocent Indian people. This was done through Gates Foundation.

DIVYAM (97):- What Gates Foundation did to innocent Indian population?

ME: The Gates Foundation started a trial in India. The trial in India was unscientific and unethical. A deadly vaccine trails was done for cervical cancer. That was a dangerous trail and thousands of innocent little girls died.

This vaccine caused sterility and menstrual disorders in almost all girls. Possibly main media has been paid hugely that's why main media tried to pass it off by conveniently labelling it as a conspiracy theory. But records are available here. Again you can think how main media hide this episode and try to save Bill Gates.

Whole incident was dismissed by the main media as a 'conspiracy theory' but a detailed report is available here. It is titled as 'Alleged Irregularities in the Conduct of Studies using Human Papilloma Virus (HPV) Vaccine in India'.

Study was done under Department of Health Research, Ministry of Health and Family Welfare from the Govt of India gave all the minute details.

As mentioned clearly in the report, anaphylaxis that is severe allergic reaction, syncope, convulsions, asthma, central demyelinating diseases, acute disseminated encephalomyelitis, Idiopathic Thrombocytopenic Purpura etc. are some of the known side effects of the dangerous vaccine. Thousands

of young girls died. And hundreds of thousands suffered serious illness.

The PATH that is Programme for Appropriate Technology in Health was indeed affiliated with the Bill and Melinda Gates foundation. They do all there wrong, unscientific, illegal and unethical activities in the name of philanthropy.

DIVYAM (98):- Is Gates Foundation doing any real philanthropic work?

ME: I don't think so. They are not doing 'real' philanthropy work, rather this is their investment. He seems to be more a demonic person with demonic thoughts, behaviour and action. Bill Gates has been under a lot of criticism for his plans to force everyone to get vaccinated with a vaccine that is yet to be discovered. Check his Instagram page, majority of comments are adverse.

Philanthropy is actually a sugar coated excuse being used by this clever satanic man. This philanthropy is to make a good image in the society and to hide their devil ideas and actions. If he is 'donating' a single dollar than at least he will make 20 to 50 times more profit.

It is said that Bill Gates backed a $1 billion plan to launch surveillance satellites to track people around the world. The purpose of this is invasion of privacy. He must be investigated.

DIVYAM (99):- Can any action be taken against Bill Gates?

ME: We have heard about an online petition. An online petition is calling on the White House to investigate Bill Gates and Melinda Gates for 'crimes against humanity' and 'medical malpractice'.

The petition received more than 500,000 signatures up to 11th May. This online petition demanded to the White House asking for the arrest of Bill Gates for crimes against humanity.

The petition accuses the Bill and Melinda Gates Foundation of 'medical malpractice'. The petition also quoted Bill Gates when talking about his interest in reducing population growth by means of vaccinations. This happens in Kenya.

DIVYAM (100):- What is this Kenya Case?

ME: Bill Gates has been blamed of intentionally sterilizing Kenyan children through the use of a hidden HCG antigen in tetanus vaccines. "This proved right our worst fears; that this WHO campaign is not about eradicating neonatal tetanus, but a well-coordinated forceful population control mass sterilization exercise using a proven fertility regulating vaccine," Dr. Ngare, spokesman for the Kenya Catholic Doctors Association, said.

Most of the people have now understood the big game played by big super elite class. We must fight for our right. We must fight for the right of the common mass. Whoever is behind the game must be punished. It looks like Bill Gates is a deceiving whole world.

DIVYAM (101):- Bill Gates seems to be a Deceiver, a Dajjal?

ME: I think so. He seems to be the Dajjal. He is a great deceiver to mankind. Italian politician Sara Cunial accuses Bill Gates and the corrupt parliament and demanded an immediate inquiry.

Even mass protection against Bill Gates with 'Arrest Bill Gates' slogans are quite common. He is hiding his devil thoughts behind the curtain of philanthropy. It is also heard that Bill or his foundation is also paying a good sum of dollars to doctors to manipulate death certificate.

DIVYAM (102):- Are death certificates being manipulated?

ME: Possibly yes. A physician from Montana Dr. Annie Bukacek exposed the big game. He showed that how COVID 19 death certificates are being ma-

nipulated. Dr.Bukacek says that CDC is instructing physicians to exaggerate COVID 19 deaths on death certificates.

Further, there has been evidence that doctors in US are getting incentive of more than 4000 dollar to label a patient death as corona death. It was observed in the US that deaths from asthma, cancer, heart disease, COPD, and a long list of reasons are no longer being reported.

DIVYAM (103):- Is CDC part of the conspiracy?

ME: It looks like so. It seems that CDC people are quite corrupt. Now it's not a matter of US only. It's a matter of whole world; it's a matter of all mankind. We have to save not only Indian or African population; but also the American population need to be saved from crooked hands of CDC.

Few of our low level politicians and lower CDC staff might know the correct fact but they are thinking like the entire group thinks. They are promoting groupthink. So you can also label this as a groupthink pandemic also.

DIVYAM (104):- What is The Groupthink?

ME: Groupthink is a psychological phenomenon in which people try to make a consensus within a group. In many cases, people will set aside their own personal beliefs, thoughts and opinion and adopt the opinion of the rest of the group. People, who are opposed to the issue, frequently remain silent, preferring to keep the peace with others. They thought they are disturbing the uniformity of the group, so they remain quite, so they did not speak their views.

Groupthink is common where group members have similar backgrounds and particularly where that group is placed under stressful condition, under a condition, that demands a quick response, resulting in irrational, stupid decision making.

It is more common among politicians. Politicians avoid discussion with their super boss, also because

of the fear that they will lose a party ticket, or a ministry or some perks or some monetary benefits.

Thus Groupthink is a psychological phenomenon that occurs within a group of people in which the desire for harmony or conformity in the group is on the top. That results in an irrational, stupid or dysfunctional decision making outcome.

The best example for all these behaviours is the response to Covid-19 when government ministers were collectively panicked and taken a total stupid decision of compulsory facemask, social distancing and lockdown.

This decision was taken by one or two bosses, rest members of the group just blindly followed along with the line of groupthink. They locked down the population that had virtually zero risk of getting any serious problems from the disease.

At the same time they side-lined the independent good thinkers. Dissenters, good thinkers and independent medical experts could have offered a calm, better and rational thought. They could give a better solution. They may be able to provide a better targeted approach to Covid-19. But they were not heard.

The Prime Minister of any country, who in practice makes most of the decisions, has high political cunningness but no governmental skills or scientific skill whoever. He is incapable of studying a complex scientific problem in deepness, in full depth. He thinks as he speaks in a slogan manners.

Groupthink in government, in the media and in the general public is probably a cause for current madness. If an important person decides for a lockdown, the other members just remain quite. They must understand that draconian measures like compulsory mask, social distancing and lockdown are un-necessary steps.

DIVYAM (105):- Can lockdown solve the problem?

ME: No. Not at all. Never. Even before India chosen the option of lockdown, I was against this. From Feb-

ruary onward I tried to educate common people. I tried to aware the mass; by posting various post, articles and videos on Facebook. I uploaded many videos on YouTube to aware the people that lockdown will not solve this problem.

India declared first lockdown of 21 days, second lockdown of 19 days, third lockdown of 14 days and fourth lockdown of 40 days. Unlock are also a new type of lockdown. First unlock of 30 days and second unlock of 31 days has passed. Now India is under third unlock of 31 days.

Some states are doing 10 days lockdown, others are opting for 3 days lockdown and few are doing weekday lockdown. Lockdown are further going on in the name of unlock. There is no rational in choosing number of days. This is arbitrary, unscientific and unreasonable. Can any politician or administrative officer answer the masses how they are choosing number of days? What is rational? They are following which science? This is a fake pandemic, a fake science, by fake people to make us fool.

This lockdown will lead to complete destruction of country. Now we have to face inflation, unemployment and poverty. India's economic rating on the world rating list has already fallen down to negative or to junk.

Media should speak against it but they are not doing their duties. They seem to be biased; possibly they have been bought by big elite giants.

DIVYAM (106):- Is role of media doubtful?

ME: The media created an illusion of proper, genuine, civilised, real, intelligent discussion but the reality is different. Media is biased. Media either not calling those persons who are speaking truth or if they called them, media just does not give them sufficient time to complete their words. There is no in depth, fair, impartial or balance discussion in media.

Media is not giving a chance to those people who have a different thinking on the important topic of

Covid-19. Viewers are unable to find a fair discussion. Media is not hearing to those who are speaking truth. Media must hear these scientific people who are against strict measures like compulsory mask wearing and against lockdown.

Media worked quietly negatively. They worked like baster. Most of them are corrupt. They have taken huge money in the name of educating mass, in the name of spreading knowledge. But they spread wrong education, wrong knowledge to the general mass.

Media are the people who always fight for their extra rights, but these people do not take any responsibility. These are only persons; those have many rights but without any responsibility.

The main media flourish their business by creating atmosphere of fear. They prosper by sensitisation of a normal issue. They create drama. Most of these are pre-planned. This they do for their clients, who have paid them. Truth doesn't have any sense to them.

They are spreading anti-truth as a truth. There have been multiple media reports showing that hospitals are under high pressure and doctors are working overtime fighting on the front lines to fight this pandemic. The bitter truth is that most of the hospitals are lying empty and most of the small clinics are closed.

They create panic in the society. They created, supported and maintained an environment of fear, they must be punished. We must boycott them.

DIVYAM (107):- How a common man can boycott media?

ME: Media news is many times wrong, fabricated and have own self hidden interest. We must boycott them.

- ✓ First of all, we have to stop seeing TV news.
- ✓ Secondly, stop reading the newspapers.
- ✓ Thirdly, we should note down all the names of advertisers, stop buying their products.

- ✓ Fourthly, send a mail or make a call to advertisers companies and persons that we will not buy your products, till you will not stop your products advertisings on television and newspapers.

To save country and to save mankind from the hands of media mafia, we need to boycott them.

Media must say to the people that masks are not protective but they are saying something opposite. Media must tell that sanitizers do not have any role in protecting corona virus but they are saying opposite phenomenon. We must boycott media.

DIVYAM (108):- Can hand sanitizers prevent corona infections?

ME: No, its media, who is saying this. Media has created a phobia in the minds of the people. Because of this media created mass phobia and resultant mass panic, people are washing their hand and body parts regularly and thinking it is protecting us from the dangerous virus.

The alcohol in hand sanitizers will enter into your bloodstream on repeated usage which can cause addiction. Further sanitizers have many side effects.

DIVYAM (109):- What are side effects of sanitizers?

ME: Sanitizers are very harmful substances. The most common type of adverse health effects for both alcohol- and non-alcohol-based hand sanitizers were ocular irritation, vomiting, conjunctivitis, oral irritation, cough, and abdominal pain. Rare side effects included coma, seizure, hypoglycaemia, metabolic acidosis, and respiratory depression. Now I will tell you in detail.

- First, excessive use can change the normal amount of your body's micro-biomes. Yes, it kills most of germs but the very important problem is that even the good germs are also killed. These good germs that protect you from infection are also killed so sanitizers reduce your immunity. Sanitizers are stronger at killing bacteria. Sanitizer also kills off

the bacteria that are beneficial for our body, which in turn can decrease our healthy bacterial count. The solution to this is that people should use hand sanitizer with some extra caution and only when they don't have access to soap and water. Even ashes and water are sufficient to remove the harmful micro-biomes from the body.

- Second, it can increase your risk of eczema. Sanitizers usually contain irritants and allergens and this may increase the risk of hand dermatitis and eczema. This commonly presents on the skin with redness, dryness, hardness, cracks, and even blisters that cause itch, swelling or pain.
- Third, excessive use can develop antibiotic resistant bacteria. Center for Disease Control and Prevention says, hand sanitizer with antibacterial substances can contribute to the development of antibiotic resistance stronger bacteria. So washing your hands with water instead of sanitizer should be practiced. Or use ashes with water that is also better health hygiene. The antibiotic resistant bacteria have a capacity to tolerate the amount of the antibiotic drug that otherwise should be able to kill them. Either the antibiotic will not kill them or a higher dose will be required to kill them. Sometime sanitizer contains triclosan. Triclosan increases the likelihood of bacteria developing resistance to antibiotics. Overexposure to antibiotics or improper antibiotic use can lead to bacterial resistance, making it more difficult or even impossible to treat.
- Fourth, hand sanitizers are not effective to remove dirt and mud. If your hands are visibly soiled, hand sanitizer will not be able to remove all mud. Hand sanitizer does not remove all dirt and is less effective at killing germs when our hands are dirty with mud.

- Fifth, washing hands with warm water and soap are the best way to kill any germs. The primary disinfecting ingredient in hand sanitizer formulas is an alcohol - ethyl or isopropyl alcohol. Further they are added with softeners and sometimes fragrances to remove the smell of alcohol. Frequent use of it can cause skin irritation, or dry skin. If you have sensitive skin, the effects can be even worse.
- Sixth, excessive and un-necessary use can make your hands dry. If you are using hand sanitizer every day or after every few hours, the alcohol in hand sanitizer can dry your skin. You can go for soap and water to clean your hands. Or you can use ashes and water to clean your hands.
- Seventh, it can make you infertile. There are some non-alcohol-based hand sanitizers that are made of an antibiotic component called triclosan or triclocarban. Triclosan is a dangerous substance, as its use or overuse has negative effects on fertility and foetal development. Further it can cause increased episodes of asthma.
- Eighth, it can cause alcohol poisoning. Hand sanitizers can develop alcohol poisoning. Teenagers are at high risk. We have seen few reports that teenagers were hospitalized with alcohol poisoning from consuming hand sanitizer. Ingesting and inhaling sanitizer every minute can collect alcohol in your body. So it increases risk of alcohol poisoning. The Center for Disease Control says that children are particularly at high risk of ingesting hand sanitizer. Hand sanitizers are usually scented, perfumed, bright coloured or attractively packaged. So children are very much attracted. So, we must always keep it away from the reach of children.

- Ninth, it could cause hormone imbalance. FDA says, triclosan present in a hand sanitizer also causes hormone problems. Some sanitizer contains fragrances. Fragrances contain phthalates. Phthalates can disrupt endocrine system. Endocrine system secrets hormones. So, sanitizers will lead to hormonal imbalance. They could also alter genital development.
- Tenth, hand sanitizer can lead to explosion sometime. It is very risky for those, who work with chemicals. Hand sanitizer can sometime explode and become dangerous. Some person has to work with chemicals all day. And because of fear you want to make sure your hands are clean. If you work with strong cleaning, de-greasing materials and pesticides, hand sanitizer can be very harmful for your body. Farmers and farm workers already had increased levels of pesticides in their bodies and effect of sanitizers can further add bad effects.
- Eleventh, it may derange your immune system. Triclosan also weakens the human immune function and reaction. The weakened immune system makes people increased susceptible to allergies and infections and more vulnerable to the toxic chemical Bisphenol A. Bisphenol A is found in plastics. As you know plastic can induce cancer. So the can cause cancer. It was found that health care employees who use hand sanitizers over soap and water for routine hand washing were nearly six times more at risk for outbreaks of Norovirus. Noro virus is a causative agent of acute gastroenteritis. It is found that children and teens with higher levels of triclosan were more likely to be developing gastro-enteritis, hay fever and other allergies.
- Twelfth, it may contain toxic chemicals. Sometimes, the hand sanitizer is scented,

perfumed and loaded with toxic chemicals. Laws are in favour of companies. Under law, companies aren't required to disclose the ingredients. Synthetic fragrances contain phthalates and parabens that are very-very harmful.

- Thirteenth, they can retard the growth. As you know now that phthalates are endocrine disruptors that can affect human body development and reproduction. Parabens are chemicals that can negatively affect the functioning of hormones, fertility, birth outcomes, and reproductive development.
- Fourteenth, they can increase incidence of fire. We have heard of few women working in kitchen suddenly catch fire. Their hands were burnt. This was because of hand sanitizers. Even if you use excessive sanitizers in your car, this may catch fire. Sanitizers and spirits are highly inflammable.

So, now you have understood that sanitizers are really not as useful as told by media. Mask, hand sanitizers, quarantine and isolation are just to create hype in the society. They are just to create fear in the society.

DIVYAM (110):- What is quarantine?

ME: Quarantine separates and restricts the movement of healthy people who were exposed to a contagious disease or infection. It is also done for these people who may have been exposed to a disease and do not know it, or they may have the disease but do not show symptoms.

DIVYAM (111):- What is Isolation?

ME: Isolation separates sick people with a contagious disease from people who are not sick. Isolation is the separation of the patient. Isolation in this corona time is very dangerous. WHO has using these patients as guinea pig. In the name of 'WHO solidarity trial' dangerous drug are being given to patients. A

lot of dangerous medicines are being experimented to the isolated patients. Even few doctors are using steroid.

DIVYAM (112):- Is steroid a good treatment?

ME: Few doctors are giving prednisolone, a steroid as a treatment. Although it is not clear why to use prednisolone, but few doctors are using it. Prednisolone can further decrease your immunity. Prednisolone is not a good drug and has many side effects.

DIVYAM (113):- What are side effects of prednisolone?

ME: I will take to you to a website rxlist.com . Here you can see list of side effects of prednisolone, the steroid as follows -

- increased chance of infections,
- heartburn,
- trouble sleeping, insomnia,
- hunger,
- nausea,
- headache,
- dizziness,
- menstrual period changes,
- increased sweating,
- acne and
- nervousness

Using deadly drugs to patients is not good for the sake of the humanity. Basically it seems that WHO want to increase the mortality rate of corona virus so that they can say that this is a true pandemic.

DIVYAM (114):- Is there any other way to confirm or refute the pandemic?

ME: Yes. Average monthly mortality rate in India and other countries should be calculated in pre COVID time and COVID time. This should be compared monthly, trimonthly six monthly and yearly. Numbers of total deaths in COVID period and pre-COVID periods in the same month/s should be taken into account. If the difference in mortality rate or total number of death is considerably higher, the claim of

pandemic is true otherwise it's a fake pandemic; a fake pandemic to trap the people; a fake pandemic to track us to make us slaves.

DIVYAM (115):- What is this tracking app?

ME: Rather you can call this as a trapping app. These are not tracking app, these are meant to trap you. You need to have the tracking app for anyone who works. Although this is not mandatory for travel by air or by rail presently, but very soon government can do it mandatory for travel as well. This is because government just want to steal your privacy. This is a step towards enslavement. Even big giants like Google also infringe your privacy.

DIVYAM (116):- Does Google also steal our privacy?

ME: Yes. World's number one website Google was already charged with stealing the privacy of its users. It records your every movement minutely.

Many Google services on Android devices store your location data without your permission. Even if you've used a privacy setting that says location off, they will record your location. Even with location history paused or off, some Google apps automatically store time and location data without asking you and without your permission.

DIVYAM (117):- I want to confirm it. How to confirm this?

ME: If you want to confirm it, just go to my activity at Google. Go to myactivity.google.com from your computer or laptop and you will be upset to see all the matter here. Go to other Google activity and then to manage activity.

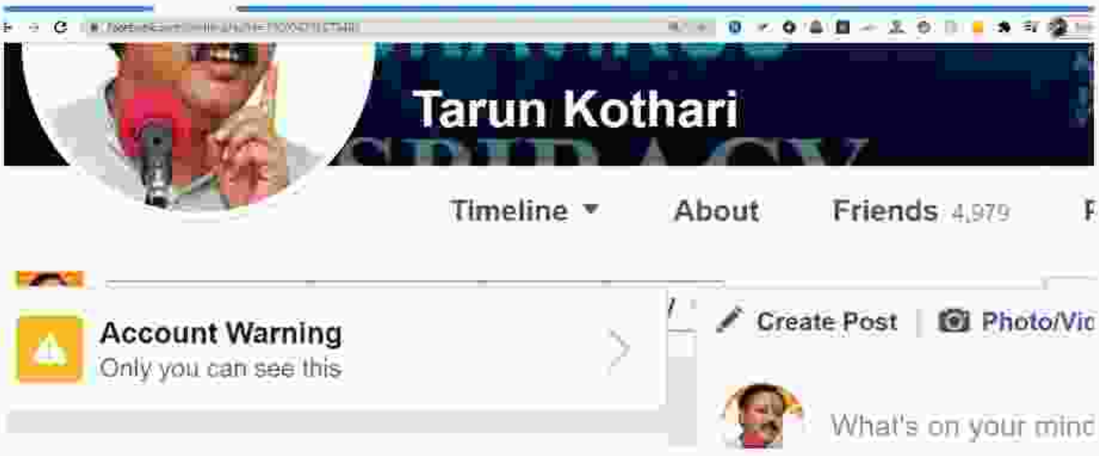

Google stores every minute detail of your mobile usage including which apps you opened and closed and when you opened or closed. All your internet activity is recorded. Even you have made a setting of location off; Google android phones usually continue to collect information and continue to send information to Google.

DIVYAM (118):- Is Google involved in this Corona Super Game?

ME: Seems to be. Google has also removed few pages that showed the true picture of corona false pandemic. Either Google not showing these truth-speaking websites or showing them at last pages. So, it seems that Google has joined hands with those people who want to destroy our economy.

DIVYAM (119):- Is Facebook also involved?

ME: Facebook seems to be biased. It is removing those pages where people are saying the truth. How Facebook can label any post as fake or true. Facebook is issuing an account warning to its users. Facebook has also issue me an account warning.

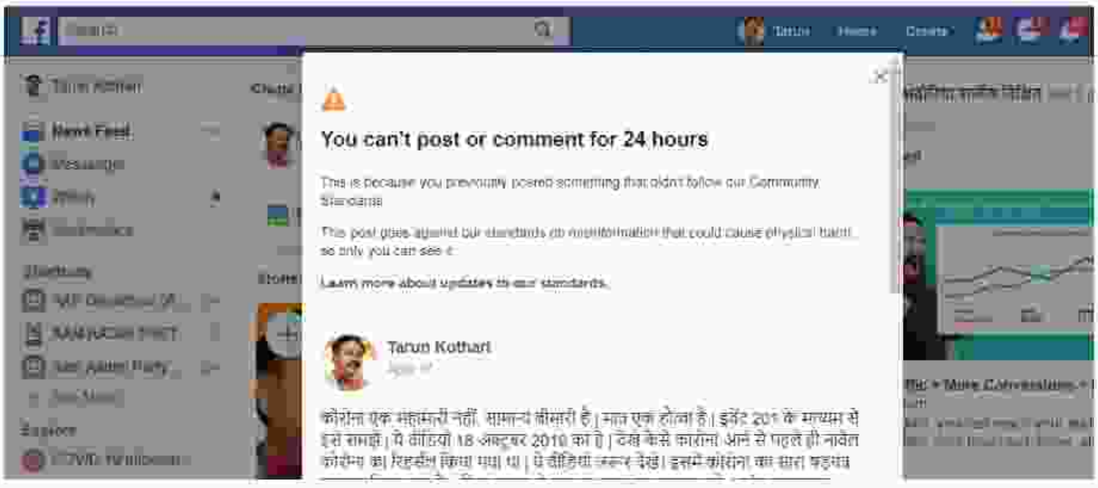

It looks like they are working under instruction of pharma industry. I am a doctor with MBBS, MD qualification; so I know better about corona or Zuckerberg knows better about corona?

Pharma companies are narrating new principals every day, changing their old stand making mockery of science. Big conspirators have their control on most organizations. Mr. Mark Zuckerberg says Facebook will start 'warning' their users if they liked, reacted or commented on Covid-19 misinformation.

Facebook is deleting the truth speaking pages and posts. The Facebook is stopping them to comment, to post and to share.

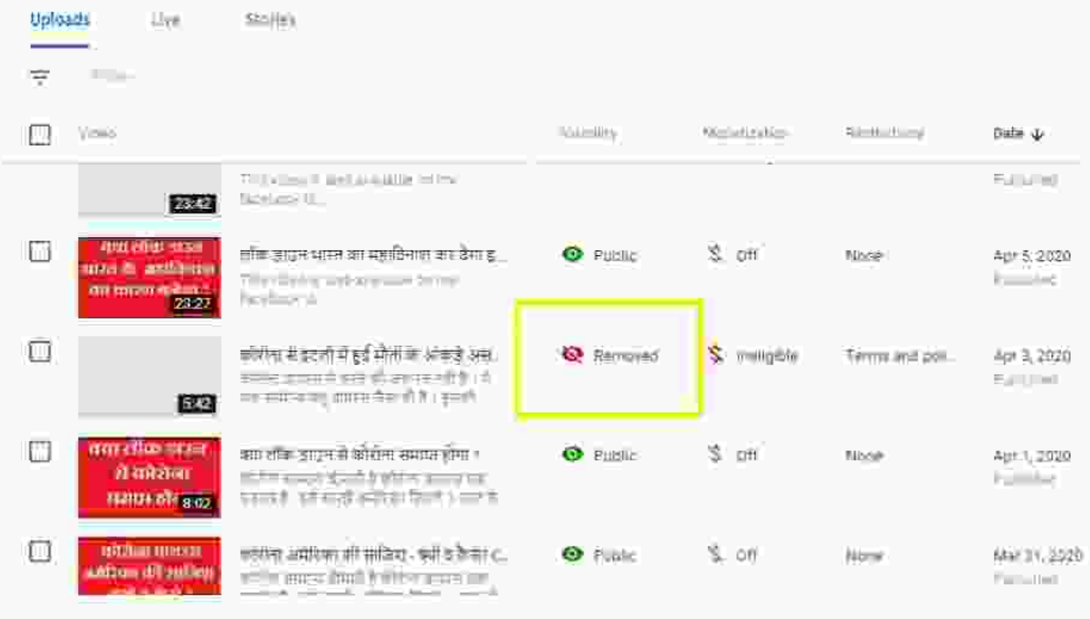

How does Facebook decide if the post is fact or fiction? How does Facebook decide information is true or misinformation? How does Facebook decide information is scientific or un-scientific?

DIVYAM (120):- Is Youtube also involved?

ME: Yes, seems to be. Youtube is removing those videos where people are speaking truth. These videos are removed in the name of misinformation and disinformation. This is just to fool the public. How can they decide this information is false or true?

Youtube has removed more than 15 videos of mine. Youtube is not only removing videos of the whistleblower but also deleting their account. So I think possibly youtube is also involved in this game.

DIVYAM (121):- Anyhow isn't it better for the elderly to stay at home?

ME: No, this is not better for elderly to stay packed inside a house. In India situation is further worse. Here 10,00,00,000 people do not have a home. So, how to order them to stay at home? About 30 to 50 per-cent of population is living in small home of one or two rooms. How we can pack every person of such families for such a long time of many months.

Nobody should fear from a simple common cold like disease or flu like disease. Should our elderly population lock down themselves and maintain social distancing till the time they die?

Elderly population rather need more sunlight and fresh air. Rather they must go to park morning and evening both times and daily. Newspapers should not dictate us. They are not scientific people.

DIVYAM (122):- Why the newspaper story is different?

ME: Newspapers have been heavily paid. Media story are all paid story. Media is showing old images as latest images.

As for example some work was going on in some cemetery or kabristan in some past time. Say for example some excavator were there in 2015 in some cemetery.

Media took this old picture from their library and shown in 2020 and said that there are so many dead bodies that authorities needed excavator for digging the grave. This is height of untruthfulness.

Media must be given a huge punishment for this. Media is creating panic, by giving wrong, fabricated stories.

Media should tell the masses about herd immunity, about natural immunity booster like vitamin C and vitamin D. Media should act to remove the fear from society.

DIVYAM (123):- What is herd immunity?

ME: Herd means group of people continuously in touch with one another. Herd means people living in same environment. Herd immunity means the resistance to the spread of a contagious disease within a population.

When good number of a population is immune to an infectious disease, this provides indirect protection to rest of the population. This is called as herd immunity or herd protection to those people who are not exposed to the disease. Even if they are exposed, they will not get the disease.

For example, if 70% of a population is immune to a virus, other 30 % will not get sick. To achieve this population should be exposed to the infection. Herd immunity decreases the number of deaths, as they are also protected, who are not exposed to disease.

DIVYAM (124):- Has number of deaths increased worldwide?

ME: No. Not at all. By seeing at the all data from respective Government Website we can see there is no excess mortality in this season in US or Italy or India. In India, in every flu season, respiratory infection or Influenza like Illness kill nearly 3,50,000 people. It means 3000 deaths every day due to influenza like illness that is ILI is seen in India in every flu season every year. This is of flu season, not of whole year. Whole year data must be significantly higher.

The deaths mentioned as corona by media might me actually because of wrong calculation, double calculation, deadly medication, fear, mask, social distancing, depression, suicide and other immunity degrading practices.

DIVYAM (125):- Have lockdown increased Suicide cases?

ME: Yes. Suicide rates in Australia are said to rise up to 50 per cent due to the economic and social impacts of the coronavirus. World leading research by the country's top mental health experts predicts the im-

pact of the virus could result in an extra 1500 deaths a year over the next five years.

This is because of mental health crisis due to the corona pandemic. So this false pandemic has increases suicidal cases mainly because of job loss and fear psychosis.

California doctors say they have seen suicidal cases in a month that is equals to suicidal cases in a year. So they says its approximately 10 to 12 times more suicide. This is because of the lockdown impact on mental health. Mental depression is an important health problem that has been exaggerated many folds because of this media-dermic.

DIVYAM (126):- Is screening common people is useful?

ME: No. Screening is useless because –

- First, 80% of the corona virus carrier are asymptomatic and so cannot be detected.
- Second, among the remaining 20 % symptomatic COVID patients 50% to 60% do not have fever as a symptom. So they cannot be detected with a thermal scanner.
- Third, thermal scanner being used presently is actually an industrial thermal scanner with an acceptable error of ± 4 degree F.

So you can understand that most of the corona carrier cannot be detected with the present mass screening method. Thermal screening method employed initially airport and subsequently in colonies is a useless, time wasting and money wasting policy.

DIVYAM (127):- Can lockdown contain the infection?

ME: It is impossible to contain any virus by draconian measures like lockdown. Lockdown is absolutely unscientific method. Further people in essential services are working so transmission of any kind of virus cannot be contained.

Taiwan and Sweden and now Japan have already shown that the whole lockdown exercise is a com-

plete farce, a big comedy. North Korea and South Korea did not follow the draconian path of lockdown. Even no extra death from North Korea or South Korea has been reported. Few African and Asian countries have not opted for lockdown and these countries are not showing any excess death.

DIVYAM (128):- If there is no lockdown then how can be the spread of the virus be contained?

ME: Containing a virus is not like containing a rat in a rat-cage. Viruses are one of the smallest particles. And since the corona virus isn't a deadly one, we can let the virus spread so we can develop herd immunity.

Sunlight and fresh air are the good drugs that we have against any viral illness. So if you keep yourself confined at home, you're depriving yourselves of these two natural lifesaving drugs in our fight against the virus.

So, lockdown will result into weakened immune system. This corona virus is a simple virus, not deadly, so boosting our immunity is more than sufficient. This you can better understand if you will go through swine flu pandemic. In that time also the cause of death was not the virus.

DIVYAM (129):- What is story of swine flu pandemic?

ME: I will discuss a brief history of swine flu pandemic with you. In the year, 1920 H1N1 Spanish Flu outbreak was there. It is considered world's worst flu outbreak in history which killed about 5,00,00,000 people. Among them about 50 lakhs were Indians. It was believed that the virus was very strong, and dangerous to have killed crores of people. But now medical science is very clear that the actual cause of deaths was not virus or some deadly version of virus but some other reason.

During 1918-1920, whenever anyone came with flu symptoms, was taken in the hospital and was kept in a close room. The room was devoid of any fresh air

and proper sunlight. Further they were given inadequate nutrition. All these factors lack of fresh air, lack of sunlight and lack of nutrition were the real causes of the death in the case of swine flu pandemic.

Then, few hospitals in the world came with a new principle of 'Open Air Hospitals'. Here patients were kept in fresh air and also provided sunlight. Patients from such hospital were recovered and they walked out alive.

Remember, fresh air is precious God gift to us from nature and are best antiviral. Sunlight provides vitamin D and further improves our immunity.

Do not confuse with the death figures flashed by media. Corona is not deadly and corona is not the real cause of death of corona positive.

DIVYAM (130):- So like swine flu pandemic, are real cause of deaths of COVID19 positive something else?

ME: So compare the episode of swine flu pandemic with the present corona pandemic situation, exactly same thing is happening.

If anyone is detected with corona virus, then that person is quarantined completely in a way that the person is cut off from fresh air and sunlight. Also the food is processed and packed or half cooked in a way that the person can only fill his stomach but nutrition is almost negligible. Plus patient is away from his family members. No member is allowed to meet him. Plus there is environment of fear. Plus these patients are given dangerous medicine in the name of experiment. In such a situation the patient takes a longer time to recover.

Also, if the patient has been suffering from other diseases like chronic kidney disease, diabetes, heart disease, respiratory illness, high blood pressure or any other disease will be more fearful. The anti-malarial drug hydroxychloroquine, dangerous & deadly antiviral drugs, along with antibiotic then resulted in QT prolongation meaning the heart beat dangerously decreases and causes sudden cardiac arrest.

Lockdown and other fear factors further increases blood sugar, blood pressure and depression. About 30 to 40 per cent population is worrying about losing their jobs. So the numbers of persons under depression are increasing. People are more falling sick because of the strict lock down protocol.

Further, death figures are highly exaggerated. Deaths due to other diseases are also included as a corona death. Doctors are paid a good amount of incentive to write cause of death as a corona death in the death certificate.

Al these factors are the real cause of death shown as corona death. When nature can heal itself, why to go for an artificial healing method? When nature can provide immunity against it, then why to go for an artificial immunisation?

DIVYAM (131):- What is difference between natural and artificial immunization?

ME: When any infecting agent enters your body, your body will develop antibodies against antigens of infecting particle. It may take few days. But when same infecting agent attacks you second time, the already formed army of antibodies will be released quickly, neutralising the antigen of infectious agent.

Vaccine is a basically partially damaged infectious agents itself or a particles of infectious agent or sometimes antigens or toxoids. They are given orally or in injectable form. So they produce antibodies and your body will recognise immediately the infectious agent on second invasion or on subsequent invasion.

Now take the example of coronavirus and when this enters the body, not everyone will fall sick. About 80% to 90% people will not fall sick due to coronavirus. They will not even know that they are the carriers of coronavirus. Only 10% to 20% people fall ill. Even among them only half will develop fever and cough and these will too recover fast. Your body will develop immunity or antibodies to fight the coronavirus so that the next time it enters your body, your

body will be in a position to fight quickly. This is what called as natural immunization.

Pharmaceutical industry is against this natural immunization. This they want to achieve through their product 'vaccine'. When we do same thing with vaccine, it is called as artificial immunization.

These people want to promote their vaccine. They know that corona is such a mild from of the disease, that it can be treated by home-made medicine too. Naturopathy, Ayurved and Homeopathy can treat it at no cost or minimum cost. One the one side Allopathy does not has any treatment and on the other side government is forcing the common people for an Allopathic treatment. It's a great joke.

DIVYAM (132):- Did you mean only Allopathic treatment can be given to the corona patients?

ME: If a patient is corona positive then that patient is quarantined and given only allopathic treatment. Remdesivir, an experimental drug, which has never been approved for corona is given to patients or anti-malarial drug hydroxychloroquine which has no link with viral disease is given. In fact it has been seen in the last 40 years that anti-malarial drug causes dysrhythmia means irregular heart beat resulting in sudden cardiac death. It is clear that this medicine may result in heart attack or cardiac arrest.

Allopathy does not have a treatment for corona virus; still allopathic medicines are being given to these patients, while on the other hand they are not allowing patients to take Ayurvedic and Homeopathic treatment. Even Ayurvedic doctors and Homeopathic doctors were not even allowed to see the patients. These doctors are not allowed to treat corona patients, patients are kept at a long distance. Either this is a great mistake or this might be because of some big-big game plan or government might be under pressure or under the influence of bribe.

DIVYAM (133):- Has a person an option of choosing his choice of pathy?

ME: No. He has no right to choose his choice of pathy like ayurvedic, naturopathy or homeopathy simply because he is like a testing animal like a guinea pig or a rabbit or a mouse. He is given allopathic medicines which have no relevance to coronavirus. Patient's basic right of choosing a pathy is being violated here.

DIVYAM (134):- Why AYUSH doctors are not allowed to treat the corona patients?

ME: It's a true fact, they are not allowed. Whenever an Ayurvedic practitioner approaches the health ministry for patients to be handed over to them for treatment then in reply he is questioned if he has ever treated a corona patient. What a joke?

Indian health ministry is not allowing treating the patient, rather asking them, have they treated any corona patient previously. But ministry is not asking the same question to allopathic doctor. What would happen if somebody asks an allopathic doctor the same question? Does any allopathic doctor have any evidence of having treated a corona patient? He also does not have evidence and nor does our AYUSH Doctors.

An allopathic doctor also has not treated a corona patient before this corona illness. Ayurvedic medicines are devoid of any side effects; on the other hand, there is evidence that the allopathic medicine being used for treatment has resulted in many people affected with heart attack or cardiac arrest, suicidal thought and other dangerous side effects.

DIVYAM (135):- Why Ayurved or AYUSH is not given importance over Allopath or at least an equal opportunity by our Indian Government?

ME: Our government should do it. But this is a mystery why they are not doing this. This might be the part of big game. Many countries in the world are using Ayurved for their patients.

In Tehran, the capital of Iran 200 corona positive patients were treated with the Ayurvedic treatment and result were excellent. Within 1 week of treat-

ment 190 patients were recovered and the remaining 10 were observed to be recovering fast.

On one hand in some part of the world Ayurved is being used to treat patients and on the other hand in our country patients are kept away from Ayurved and homoeopathic doctors. Indian government should give preference to Ayurved over allopath. Possibly this might be reason, if ayurvedic doctors are given a chance to treat the patient and if they were able to treat it, it will be proved that this is a false pandemic.

DIVYAM (136):- I have heard that after every 100 years a pandemic comes. Isn't it a Once in a century pandemic?

ME: No. Can anybody label names of twenty pandemic in last twenty centuries? This statistics is not true. Pandemic is not like an astrological event. Our policymakers are relying on meaningless statistics based on unreliable samples. This is a well-planned fake pandemic.

Government are tactfully using the reasoning of prepare for worst. They are saying we need to prepare for the worst so they are taking extreme measures of social distancing and lockdowns. But when everything is normal, then why to go for lockdown in the name of prepare for the worst.

This is a big-big game plan. Big elites and Media houses have forced many governments to do what they want to be done. Government has become now a puppet. Government is playing in their hands. Now media has become a tool to enslave the masses. Media is controlling the emotions of masses by giving wrong and fabricated news.

DIVYAM (137):- How media fabricated the news?

ME: A media article published on the New York Post claiming that Kentucky State saw the highest spike in Coronavirus cases after lockdown protests. So now I will do a fact check in the light of science and data. Kentucky had about 100 lockdown protestors. None

of them got Covid-19. The spikes in cases are not connected with protesters. This is a very good example of a fake news headline designed to confuse, outright deceive and to change mass psychology.

Further media is showing old pictures as new picture. Some maintenance work by using excavator in sometime in past was going on in some cemetery or cremation ground. These were shown as latest images by the media, telling the masses that there are many dead bodies and administration is needing excavator to dig graves.

So the next time you see any such news, always suspect that media may be telling you a lie. Don't believe on media. Their aim is to serve you sensation, not a true picture of an event. So please use your brain and your intelligence to reach a decision between facts from fiction, to reach a decision between sciences from fake.

Doctors can better understand this fake pandemic. Doctors should also understand and should speak truth. Now doctors all over the world should come forward. They must develop courage to speak truth for the sake of humanity. Whenever general mass will know the truth, they will abuse big elites, government, administration and media. The blame will also come to doctors. People will ask them, why they were silent, when these were looting them.

DIVYAM (138):- Why aren't doctors speaking up the truth?

ME: There are many reasons:

1. The treating doctors blindly follow the national and international guidelines. Sometime they are forced to follow the national and international norms by their own government. International guidelines are formulated by the WHO and other international bodies who themselves are funded by parties with vested interests.

2. They are not free thinkers. They stick to whatever they have been taught in their textbooks. Their books and journals might be injected with some kind of wrong knowledge. During their studies and in later life of practice they are never able to test that all the matter written in the book is correct or not. They have to keep a blind faith on their books and journals.
3. Even if the treating doctors, who want to expose this whole scam, their videos are getting deleted, their post on social media is being deleted. Main stream media is not taking their interviews. As paid has already set their agenda.
4. They are told to keep shut by the hospitals owners, otherwise their contracts would be terminated and they will become jobless.
5. Pharmaceutical industry has literally purchased the profession of medical practise. They give huge commission on drugs.
6. Few doctors are in fear of litigation in court in case their method of treatment doesn't end well, which costs them a lot of time and money.
7. Regulatory institutions may take highest action. They can cancel or suspend their licence in the name of disciplinary action. Regularity bodies can punish the medical practitioners who question the system.
8. They are in fear that police may register a FIR against them. They are in fear that government may take an action against them. They are further frightened by attacks of various party workers, as their views might be consider as a view against their party leader.
9. Government doctors are bound to follow government rules and regulations. They cannot express their views openly.
10. Few of my colleagues started telling the truth. But they saw a hostile behav-

iour of the patients, because patients were wrongly taught by the media. So later on they gave up the idea to tell it to more people and kept silence.

DIVYAM (139):- Doctors are also dying; how is it possible if the virus is not deadly?

ME: There are many factors -

- First you must know the natural death figures of doctors. Did you know how many people die every year, every month, every day? What is normal death rate? Just calculate it for India. India has a death rate of approximately 7.3 per 1000 per year. Minimally 1,00,00,000 people died annually. This is a lowest death figure. We are taking this number of 1,00,00,000 just to understand easily; Actual death figure is higher. This means approximately 8,50,000 death monthly. This comes to 28,000 deaths per day minimum. Considering doctor population in India 1:2000 this come to 425 doctors death every month. So approximately 425 doctor will died in India every month. Here we are on minimum side. Few of them may get corona false positive and their death will be declared as corona death.
- Second, few doctors are dying because of dangerous preventive medicine. On 29th March , Dr Utpal Barman, a senior anaesthetist from Guwahati complained of chest pain after taking anti malaria drug, hydroxyl-choloroquine as a preventive measure from COVID-19 lead to death due to cardiac arrest. So doctors are taking preventive medicine, which is actually very dangerous drug. This is also increasing death figure of doctor.
- Third, continued use of face mask, PPE kits and an atmosphere of fear decreasing their immunity and further aggravating their other health problems resulting into death.
- Fourth, they are under pressure of media, government and public. They have to kill their

own soul to follows instructions of government and regulating bodies like ICMR, Central Health Ministry, State Health Ministry, and even to their bosses etc.

DIVYAM (140):- What is ICMR and what are their guidelines?

ME: The ICMR that is Indian Council of Medical Research is a wing of the Central Ministry of Health & Family Welfare. It is the top body of India for biomedical research. It co- ordinates, formulates and promotes biomedical research in India. It is headquartered in Delhi.

ICMR have instructed all healthcare units that 'suspected deaths' can be labelled as COVID-19 deaths. They are just blindly saying virus is very dangerous so every death because of other reasons may be included in the list of corona death, even if the test is negative but doctors suspect so.

They are not saying any word on the unreliability of the RT-PCR test, which we have already discussed. If you don't understand what this means, just try to understand that these 'suspected deaths' will add on to the COVID-19 death tally which helps the media and the government to continue with the fear-mongering.

Their guideline further says that a rapid test done and result comes to positive, it will be accepted. But if result comes to negative, it will be not accepted. For negative a further testing by RT-PCR test is mandatory. This creates suspicion. Do they want to increase the number of patient anyhow? What the hell scientific work are they doing?

Further, ICMR is not saying any word regarding immunity. They are not telling people how to boost immunity. Have they done any study on natural immunization? They are not saying anything how to increase the dendritic cells in the body. Have they done any study on dendritic cells?

DIVYAM (141):- What are dendritic cells?

ME: Dendritic cells have multiple projections. They are responsible for the initiation of immune responses of an individual. Dendritic cells are bone marrow originated leukocytes. They are the most potent type of antigen-presenting cells.

Dendritic cells provide more than 90% immunity of your body. These dendritic cells are spread out in our entire body, especially just below the skin.

You can kill these dendritic cells or make them inactive by feeding them with sanitizers. When you are applying sanitizer on your hand, actually you are rubbing alcohol on your hands. This alcohol is not limited to the skin but it penetrates your skin to reach the dendritic cells. And in this way you unknowingly either kill them or make them inactive.

This alcohol penetrates the different layers of the skin and mixes with the blood and spreads throughout the body. You may lose your driving licence or fined because of alcohol in your breadth. Sanitizers decrease your immunity.

DIVYAM (142):- How can I increase my immunity?

ME: To increase your immunity you can take vitamin C. Main natural sources of vitamin C are Indian gooseberry that is aavala, lemon, orange, sweet lemon (Mosambi), kiwi, lemon, guava, grapefruit, papaya, and strawberries. Vegetables such as broccoli, cauliflower, and capsicums are also high source of vitamin C. Green and red peppers, spinach, cabbage, turnip greens and other leafy greens, sweet & white potatoes are also good source of vitamin C.

You should also take vitamin D to increase your immunity. This is very simple. Just expose your body to sunlight 15 minutes in morning and 15 minutes in evening. Do not take vitamin D in tablet form. Exposure to sunlight is sufficient.

If your immunity is good, you need not to worry about corona infection or any other infection.

DIVYAM (143):- If I am tested positive for corona, then what should I do?

ME: First of all you should be very happy that you are tested positive for corona. You need not to worry. Just increase your body immunity that will fight with not only corona but also with other infections as well.

And if this test is antibody test, then you should be further happy as you have developed antibodies against corona now. You are now naturally immunised. No vaccine is required, No treatment is required.

DIVYAM (144):- What is the treatment of Covid-19?

ME: Allopathy does not have any drug for this. But the miracle is this that still patients are getting recovered. Because this is a simple flu, because this is a simple common cold, so no need to take panic. So just do what we do during a flu season. Just follows advice of your grandfathers and grandmothers and go for a home based medicine.

India, unfortunately, relies blindly on the WHO. The Central Ministry of Health and Family Welfare blindly keeps parroting WHO's wordings. So called expert of WHO are having close links with pharmaceutical companies. To tackle the supposed life-threatening pandemic, the WHO has approved 'Solidarity Trials' of drugs that was not approved by even the Food and Drug Administration Authority. These drugs are like a poison.

DIVYAM (145):- What is solidarity clinic trial of WHO?

ME: WHO has started a clinical trial, called as 'solidarity clinic trial'. WHO says that The Solidarity Clinical Trial is an international clinical trial to help find an effective treatment for COVID-19, launched by WHO and partners. Yes, launched by its partner as well. It is hoped that one or more of the treatments under trial will result in improving clinical outcomes in COVID-19 patients and save lives.

But things are different. Here most dangerous drugs are given in the name of experiment in the name of trials. Actually these dangerous drugs may cause

death. Rather it seems that WHO may have a hidden plan to kill the people by using these dangerous drugs.

Few dangerous drug treatment options are there. But neither patients nor doctor has a choice to choose the option. Computer will decide this.

DIVYAM (146):- What are treatment options under solidarity clinic trial?

ME: Treatment options under study are –

1. Remdesivir
2. Lopinavir/Ritonavir
3. Hydroxychloroquine
4. Interferon beta-1a

Remdesivir was previously tested as an Ebola treatment. But its trial in Ebola was stopped because of serious side effects and increased deaths. It has generated some so called 'promising results' in animal studies for Middle East Respiratory Syndrome (MERS-CoV) and severe acute respiratory syndrome (SARS), which are also caused by coronaviruses, suggesting it may have some effect in patients with COVID-19.

Lopinavir/Ritonavir is used in treatment for few cases of HIV. Evidence for COVID-19, MERS and SARS is yet to show that it can or cannot improve clinical outcomes or prevent infection. This trial aims to identify and confirm any benefit for COVID-19 patients. Studies done so far in COVID-19 patients have been inconclusive.

Interferon beta-1a is used to treat multiple sclerosis. It has high number of side effects. Whatever side effect you can think, you will find that as a side effect of Interferon beta-1a.

Hydroxy-chloroquine is anti-malarial drug, given in the treatment of malaria. It has no relation with virus as Malaria is caused by the Plasmodium parasite.

DIVYAM (147):- What is Remdesivir?

ME: Remdesivir (RDV) is a synthetic molecule in the antiviral class of medications targeting RNA synthesis. The molecule looks a lot like a DNA nucleoside. It is currently an investigational drug. It is said that

Remdesivir substitutes RNA polymerase enzyme meaning the RNA can't develop so the virus cannot replicate itself. But problem is with body enzymes and proteins. Many natural processes use this enzyme. So all the normal protein development process will be changed or blocked. This will result into deformed proteins or normal proteins may actually not form.

DIVYAM (148):- Is Remdesivir effective against covid-19?

ME: Possibly not, as only limited evidences are available. There is only one randomized control trial for remdesivir (RDV) conducted during the last Ebola outbreak. That study was stopped before it was concluded that it has many dangerous side effects. And it was found to increase significant mortality. Further it didn't help those Ebola patients rather it killed many patients.

The majority of clinical decisions are made based on the historical epidemics of Ebola, SARS and MERS. Remdesivir was used in these three outbreaks but was not found to be as promising as hoped. So there is no evidence that this drug is helpful. On the contrary, it has many dangerous side effects.

DIVYAM (149):- What are the side effects of Remdesivir?

ME: There is a long list.

- It can cause hypotension followed rapidly by cardiac arrest and death.
- Liver enzyme increases. Increased hepatic enzyme is by far the most common adverse event. So this drug damages liver. The FDA emergency use authorization called for liver

function testing on all patients before dosing.

- It is also harmful to kidneys. Rat model studies showed injury to the kidney cortical tubules from remdesivir. In humans, remdesivir appears to be cleared largely by the kidneys, which could lead to accumulation of the drug in the renal system and resultant decreased renal function.
- It also damages heart. Cardiovascular adverse effects are definitely there. Researchers have concern about cardiac arrhythmias.
- GI adverse effects like nausea and diarrhoea have also been reported.
- The other adverse effects in studies of remdesivir include respiratory failure and organ impairment, low albumin, low potassium, low count of red blood cells and yellow discoloration of the skin.
- Other possible side effects of remdesivir include: Infusion - related reactions have been seen during a remdesivir infusion or around the time remdesivir was given. Signs and symptoms of infusion - related reactions may include: low blood pressure, nausea, vomiting, sweating, and shivering.

DIVYAM (150):- Has FDA approved remdesivir for treatment of COVID-19?

ME: No, Remdesivir is still considered an investigational drug and is not approved by the FDA. But it has received emergency use authorization by the FDA. This means that remdesivir can now be distributed in the U.S. and healthcare providers can treat hospitalized patients with severe COVID-19 with the drug intravenously as an experimental drug.

Only emergency use of remdesivir is approved for COVID-19. Further it has many serious interactions with other common drugs.

DIVYAM (151):- What drugs interact with remdesivir?

ME: There are some medications that will boost the remdesivir level in your bloodstream, and some that will reduce it. Some antibiotics, anticonvulsants, and even some other drugs may do this. Some examples are -

- Clarithromycin
- Rifampicin
- Phenytoin
- Phenobarbital

DIVYAM (152):- Is remdesivir safe for women?

ME: Impact of remdesivir on pregnancy is not unknown, nor do we know if it is excreted in breast milk or not. In rats and monkeys, remdesivir affected badly the kidney development in foetuses. So this may cause teratogenic defects.

DIVYAM (153):- Interferon beta-1a is also included under WHO solidarity clinic trial. What is interferon beta-1a?

ME: Interferon beta-1a 166 amino acid glycoprotein used to treat relapsing multiple sclerosis. It is a protein produced by recombinant DNA. It will not cure multiple sclerosis, it will only decrease the frequency of relapse symptoms. Interferon beta-1a does not cure multiple sclerosis, rather it helps to decrease the number of flare-ups and slows the occurrence of some of the physical disability that commonly occurs in the disease.

DIVYAM (154):- Can interferon beta-1a be used to treat the COVID-19 coronavirus?

ME: Brand names are available for interferon beta-1a are Rebif and Avonex. Interferon beta-1a and interferon alfa-2b are both under investigation as potential treatments for people with COVID-19 coronavirus disease.

Normally when our body confronted with a virus, each cell shoots an emergency chemical called as

interferon to tell the immune system to start its defences. Interferon Beta-1a, specifically, activates macrophages that engulf antigens and natural killer cells (NK cells), a type of immune T-Cell.

The theory is this that interferon may be able to make the immune system stronger by turning on dormant parts and directing them toward the defence against SARS-nCoV-2 assault.

But there is a serious problem. When interferon accelerate our immune system, COVID-19's flu-like symptoms are likely to become worse. So, if someone is already on a ventilator then an interferon-based medicine could be catastrophic and may result in death.

In America it was tried to treat Hepatitis C in the late 1990s and early 2000s. Its side effects caused a lot of injury to U.S. patients. So it was stopped.

DIVYAM (155):- What are the side effects of Interferon beta 1a?

ME: This drug has many side effects. It cannot be labelled as a drug, rather it's a poison. For this we will move to a website medlineplus.gov . See what this site states as side effects –

- headache
- fever
- chills
- dry eyes
- vision problems
- dry mouth
- bruising, pain, redness, swelling, or tenderness at the injection site
- new or worsening depression
- thinking about harming or killing yourself or planning or trying to do so
- anxiety
- hives
- rash
- itching
- difficulty breathing or swallowing

- swelling of the eyes, face, mouth, tongue, throat, hands, arms, feet, ankles, or lower legs
- light headedness
- fainting
- seizures
- loss of coordination
- extreme tiredness
- lack of energy
- nausea
- vomiting
- loss of appetite
- pale stools
- pain in the upper right part of the stomach
- yellowing of the skin or eyes
- dark urine
- pale skin
- chest pain
- fast heartbeat
- unusual bruising or bleeding
- sore throat, cough, fever, chills, or other signs of infection
- unexplained weight gain or loss
- feeling cold or hot all the time
- blackening of skin or drainage at the injection site
- red or bloody stools or diarrhoea
- stomach pain
- slow or difficult speech
- purple patches or pinpoint dots (rash) on the skin
- decreased urination or blood in the urine

For further confirmation, now we will see another medical website drugs.com , which shows following side effects -

- black, tarry stools
- chest pain
- chills
- cough
- diarrhoea
- fever

- flu-like symptoms
- headache
- joint pain
- muscle aches
- nausea
- pain
- painful or difficult urination
- shortness of breath
- sores, ulcers, or white spots on the lips or in the mouth
- swollen glands
- unusual bleeding or bruising
- unusual tiredness or weakness
- abdominal or stomach pain
- clumsiness or unsteadiness
- convulsions (seizures)
- decreased hearing
- difficulty with swallowing
- dizziness
- fainting
- feeling of warmth
- hives or itching
- mood changes, especially with thoughts of suicide
- muscle spasms
- pain or discharge from the vagina
- pelvic discomfort, aching, or heaviness
- redness of the face, neck, arms, and occasionally, upper chest
- redness, swelling, or tenderness at the injection site
- runny or stuffy nose
- skin lesions
- sneezing
- sore throat
- speech problems
- swelling of the face, lips, or eyelids
- troubled breathing
- earache
- general feeling of discomfort or illness
- loss of appetite
- painful blisters on trunk of the body

- painful cold sores or blisters on the lips, nose, eyes, or genitals
- bleeding gums
- blood in the urine or stools
- bloody nose
- chest discomfort
- confusion
- constipation
- dark urine
- decreased urine output
- depressed mood
- dilated neck veins
- dry skin and hair
- extreme fatigue
- fast, irregular, or pounding heartbeat
- feeling cold
- general tiredness and weakness
- hair loss
- heavier menstrual periods
- high fever
- irregular breathing
- light-colour stools
- loss of bladder control
- mental depression
- mood or other mental changes
- muscle cramps and stiffness
- nausea or vomiting
- nervousness
- pale skin
- persistent loss of appetite
- pinpoint red spots on the skin
- puffiness or swelling of the eyelids, or around the eyes, face, lips, or tongue
- redness, blistering, peeling, or loosening of the skin
- sensitivity to heat
- skin rash
- slowed heartbeat
- sudden loss of consciousness
- sweating
- swelling of the face, fingers, feet, or lower legs

- swelling of the mouth or throat
- tightness in the chest
- tightness in the throat
- upper right abdominal or stomach pain or tenderness
- weight gain or loss
- yellow eyes and skin

DIVYAM (156):-- Is suicide done by corona patients because of Interferon beta-1a?

ME: It seems to be. I have heard few patients have committed suicide during corona treatment. Few even jumped from hospital building. So this might be because of this poisonous drug. We must also investigate why this drug was chosen in the treatment of corona positive persons. This might be a game plan to increase the death tally from corona.

DIVYAM (157):- As you said Lopinavir/Ritonavir is also included under WHO clinical trial. What are the side effects of Lopinavir/Ritonavir?

ME: To understand this I will take you to one website that is webmd.com

The site has written following side effects –

- diarrhoea,
- headache,
- nausea,
- vomiting,
- stomach upset,
- drowsiness,
- dizziness,
- a bad taste in the mouth,
- trouble in sleeping,
- unexplained weight loss,
- tiredness,
- muscle aches/weakness that doesn't go away,
- headaches that are severe or don't go away,
- joint pain,
- numbness/tingling of the hands/feet/arms/legs,

- vision changes,
- signs of infection (such as fever, chills, swollen lymph nodes)
- trouble breathing,
- cough,
- non-healing skin sores,
- signs of an overactive thyroid (such as irritability, nervousness, heat intolerance, fast/ pounding/ irregular heartbeat, bulging eyes, unusual growth in the neck/thyroid known as a Goitre),
- signs of a certain nerve problem known as Guillain-Barre syndrome (such as trouble breathing/ swallowing/ trouble during moving your eyes, drooping face, paralysis, trouble speaking),
- increased thirst,
- increased urination,
- blurred vision,
- confusion,
- persistent nausea/vomiting,
- stomach/abdominal pain,
- yellowing eyes/skin,
- dark urine,
- persistent fever
- symptoms of a heart attack (such as chest/ jaw/left arm pain, shortness of breath, unusual sweating),
- severe dizziness,
- fainting,
- slow/fast/irregular heartbeat,
- severe drowsiness,
- difficulty breathing,
- seizures,
- muscle weakness,
- signs of kidney problems (such as change in the amount of urine)
- changes in body fat (such as increased fat in the upper back and stomach areas, decreased fat in the arms and legs)
- increase in blood fat (cholesterol and triglycerides) levels

- This is not a complete list of possible side effects. If you notice other effects not listed above, contact your doctor or pharmacist.

Now I will take to you on one more website rxlist.com to confirm the side effects mentioned above. See what this site says about side effects Lopinavir/Ritonavir –

- diarrhoea,
- headache,
- weakness,
- nausea,
- vomiting,
- stomach upset,
- drowsiness,
- dizziness,
- a bad taste in the mouth,
- trouble sleeping,
- skin rash, and
- changes in the shape or location of body fat (especially in your arms, legs, face, neck, breasts, and waist)
- unexplained weight loss,
- persistent muscle aches or weakness,
- joint pain,
- numbness or tingling of the hands/feet/arms/legs,
- severe tiredness,
- vision changes,
- severe or persistent headaches,
- signs of infection (such as fever, chills, trouble breathing, cough, non-healing skin sores),
- signs of an overactive thyroid (such as irritability, nervousness, heat intolerance, fast/pounding/irregular heartbeat, bulging eyes, unusual growth in the neck/thyroid known as a Goitre),
- signs of a nerve problem known as Guillain-Barre Syndrome (such as difficulty in breathing/swallowing/moving your eyes, drooping face, paralysis, slurred speech),

- increased thirst,
- increased urination,
- confusion,
- persistent nausea or vomiting,
- stomach or abdominal pain,
- yellowing eyes or skin, or
- dark urine

So you can understand side effect of this drugs Lopinavir/Ritonavir. If this is a drug, then what is a poison?

DIVYAM (158):- What are the side effects of hydroxychloroquine?

ME: I will take you to a website medicalnewstoday.com to better understand the side effects of hydroxychloroquine.

The more common side effects that can occur with hydroxychloroquine include:

- headache
- dizziness
- diarrhoea
- stomach cramps
- vomiting
- blurred vision or other vision changes, which may be permanent in some cases
- heart disease, including heart failure and issues with your heart rhythm; some cases have been fatal
- ringing in your ears or hearing loss
- angioedema (rapid swelling of your skin)
- hives
- mild or severe bronchospasm
- sore throat
- severe hypoglycaemia
- unusual bleeding or bruising
- blue-black skin colour
- muscle weakness
- hair loss or changes in hair colour
- abnormal mood changes

- mental health effects, including suicidal thoughts

You may go to one more website for further confirmation that is drugs.com, just see what is written here about side effects of hydroxychloroquine –

- blistering, peeling, loosening of the skin
- blurred vision or other vision changes
- chest discomfort, pain, or tightness
- cough or hoarseness
- dark urine
- decreased urination
- defective colour vision
- diarrhoea
- difficulty breathing
- difficulty seeing at night
- dizziness or fainting
- fast, pounding, uneven heartbeat
- feeling that others are watching you or controlling your behaviour
- feeling that others can hear your thoughts
- feeling, seeing, or hearing things that are not there
- fever with or without chills
- general feeling of tiredness or weakness
- headache
- inability to move the eyes
- increased blinking or spasms of the eyelid
- joint or muscle pain
- large, hive-like swelling on the face, eyelids, lips, tongue, throat, hands, legs, feet, and sex organs
- loss of hearing
- lower back or side pain
- noisy breathing
- painful or difficult urination
- red irritated eyes
- red skin lesions, often with a purple centre
- severe mood or mental changes
- sore throat sores, ulcers, or white spots on the lips or in the mouth

- sticking out of the tongue
- stomach pain
- swelling of the feet or lower legs
- swollen or painful glands
- trouble with breathing, speaking, or swallowing
- uncontrolled twisting movements of the neck, trunk, arms, or legs
- unusual behaviour
- unusual bleeding or bruising
- unusual facial expressions
- unusual tiredness or weakness
- yellow eyes or skin

Symptoms of overdose are -

- drowsiness
- dry mouth
- increased thirst
- loss of appetite
- mood changes
- no pulse or blood pressure
- numbness or tingling in the hands, feet, or lips
- unconsciousness

DIVYAM (159):-- What is Fabiflu?

ME: Fabiflu contains Favipiravir. Favipiravir is a new experimental drug for COVID-19. Favipiravir is an antiviral drug that was developed for the treatment of resistant influenza virus in Japan. Its biochemical name is 6-fluoro-3-hydroxy-2-pyrazinecarboxamid; with the brand names being Abigan or Avigan and Fabiflu. Favipiravir is a modified pyrazine analog (purine nucleoside analog or a derivative of pyrazine carboxamide), initially approved for the treatment of influenza that was resistant to oseltamivir and zanamivir therapies.

DIVYAM (160):- What are side effects of favipiravir?

ME: This drug is new one. Most of the side effects are unknown. But like other this must be having dangerous side effects.

This is very costly drug, available with brand name as Fabiflu in India. Other brand name is Avigan.

Now we will move to cdc.gov.tw to see the side effects.

- Teratogenic effects. CDC clearly says drug causes early embryonic death and has teratogenic effects. Teratogenicity means defects in developing foetus, defect in your child. If you think males are safe, then you are wrong. It is also written here that his drug is distributed in sperm. So again it further increases the chance of teratogenicity through male also. You must search for 'thalidomide tragedy'. Millions of foetuses suffered the side effects of this drug. Thousands of children with limb and other deformity are still there in US. Limb defects like seal like limbs with absent arm and forearm are there.

Although we do not know very much about this new dangerous antiviral drug but few more side effects in addition to teratogenicity are –

- Reduced body weight
- Vomiting
- Reduced locomotive activity
- Decreased production of red blood cells

- Abnormal liver function such as the increased production of aspartate aminotransferase, alkaline phosphatase, alanine aminotransferase and total albumin
- Increased vacuolization in hepatocytes
- It is teratogenic meaning; it can cause congenital defects and therefore should be avoided in pregnant women.

So now you can understand very well. This is a big–big game. This is a simple flu. People will usually not die because of this. So they have planned to increase death rate. Mask, sanitizers, social distancing, lockdown, environment of fear, WHO solidarity clinical trial are all important measures to increase the death rate of this non-severe infection. This seems like a well-planned operation to kill majority of humans as described under the principles of Georgia Guide Stones.

DIVYAM (161):- What are Georgia Guide Stones?

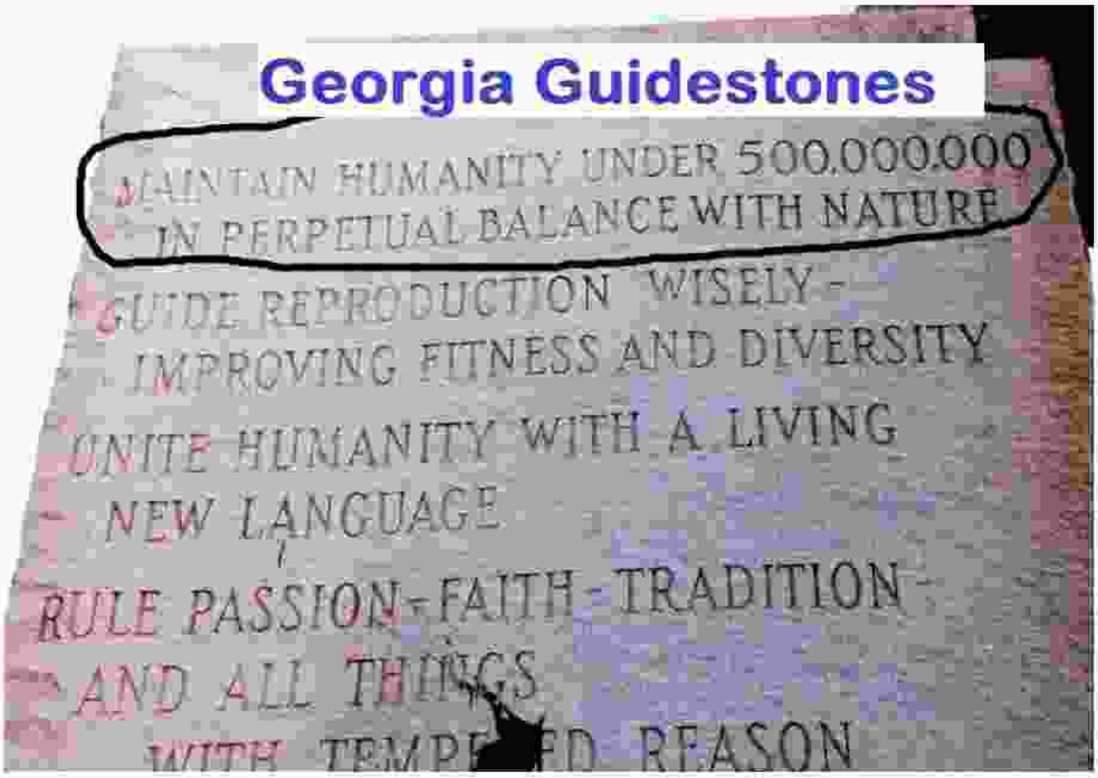

ME: These stones are placed in Elbert County, Georgia, US; five granite slabs are there. Each of them weighs about 20 tons and one capstone is on top of them. Nobody knows who built it. These stones appeared as if all of a sudden. Few people and administrative persons must know this, but all is kept secret. Why no administrative person or authority is giving any answer to this question, from where these stones came, who made these stones, when these stones were placed here.

Here on these stones, the matter is written in eight different languages. A capsule is placed 6 feet below this spot. It is written here 'to be open on…' but no date mentioned.

There are Ten Commandments written here.

1. Maintain humanity under 50,00,00,000 (50 crores) in perpetual balance with nature.
2. Guide reproduction wisely – improving fitness and diversity.
3. Unite humanity with a living new language.
4. Rule passion – faith - tradition and all things with tempered reason.
5. Protect people and nations with fair laws and just courts.
6. Let all nations rule internally, resolving external disputes in a world court.
7. Avoid petty laws and useless officials.
8. Balance personal rights with social duties.
9. Prize truth – beauty – love – seeking harmony with the infinite.
10. Be not a cancer on the earth – Leave room for nature – Leave room for nature.

Most of people think this is a satanic order, where they want to kill almost 90% of human population. This is the concept of New World Order; where these people want to reduce 90 % of world's population.

DIVYAM (162):- What is New World Order?

ME: The New World Order is a group of few people who are working secretly to form a totalitarian world government. They want to rule the world. They want to make us slaves.

New World Order people want to rule the world through an authoritarian world government, which will destroy the sovereignty of all nations and will impose their own agenda. New world order is being implemented gradually. Georgia guide stone rules are being implemented gradually. This will be done by Mind Control, Money Control, Behaviour Control and Population Control.

DIVYAM (163):- What is mind control?

ME: Mind control is a method to control your thinking process. Government, Corporations and main media are being involved in the mind control of common people in the name of creating a national consensus.

Actually they are doing this by creating a culture of fear. They want people to be frightened so that they can take social control. A death fearing population might offer their civil rights to those in power. New world order will be implemented through the use of mind control - a broad range of tactics able to divert an individual's control of his or her own thinking, behaviour, emotions, and decisions. Their next step is money control.

DIVYAM (164):- What is money control?

ME: All your money will be controlled by these people. What you can purchase and what you cannot purchase will be decided by these wicked people of the new world order. Internet transaction, mobile transaction, digital money, digital coins are all methods through which they will take control of all your money.

They may enforce you to install a digital chip in your body. This chip will be a must for all future transactions. This chip ID2020 will not only control your money but they will also control your actions, behaviour, movement and privacy. Your behaviour will be extremely controlled to their desired level.

DIVYAM (165):- How will they control our behaviour?

ME: Your behaviour will be control by the tool of media. They will continuously flash few specific matters again and again. You will read only that matter, which they wanted to be read by you. These all will looks normal.

Media will spread false news. Media will make people ready to submit. People will themselves be ready to submit themselves for vaccination, mass screening, police atrocities, digital ID etc.

This you have already seen in the present scenario of corona media-demic. In this way they will control your behaviour, emotions and decisions. By utilising all means, ultimately they want to achieve their goal

of population control so that to make you slave of so called superior race.

DIVYAM (166):- What is population Control?

ME: They want to decrease 90% of world population. They want to keep the world human population about 50,00,00,000. Even forced vaccination might be a way to achieve this target.

Now people are awakening. Opposition towards mass vaccinations in particular got significant attention in the late 2010s. People that refused or refused to allow their children to be vaccinated are known as anti-vaxxers. They are against a perceived population control agenda as a reason to refuse.

New world order people want to eliminate 90% population of world by any mean. This is their main and first agenda. This agenda is well known as agenda 21.

DIVYAM (167):- What is agenda 21?

ME: The depopulation agenda is a part of agenda 21, so that they can reduce the human population. This they call as manageable numbers. Manageable numbers mean a controllable numbers so that they can carry out their activities without fear. Agenda 21 is condemned as enslaving people into urban areas and depopulating rural ones. Even UN has mentioned agenda 21 as a top priority.

DIVYAM (168):- What is Agenda 21 of United Nations?

ME: A conference was held by UNCED in the year 1992. UNCED means United Nations Conference on Environment and Development. The Commission on Sustainable Development (CSD) was created in December 1992 to ensure effective follow-up of UNCED, to monitor and report on implementation of the agreements at the local, national, regional and international levels.

Agenda 21 is a comprehensive plan of action to be taken globally, nationally and locally by organizations of the United Nations System, Governments,

and Major Groups in every area in which human impacts on the environment.

But they have hidden agenda. UN wants to make a totalitarian world government seeking to reduce most of the world's population as part of a UN plot dating back to 1992. Agenda 21 will reduce the human population from almost 8 billion to around 500 million. This means that the UN is planning on killing just over 90% of the global population. Luckily we came to know this at Event 201.

DIVYAM (169):- What is event201?

ME: Event 201 took place on October 18, 2019 in New York. Here they predicted a severe pandemic in 2020 and discussed how to manage it. Yes, they predicted a pandemic in 2020. Yes, they predicted corona pandemic. Yes, they predicted a new strain of corona pandemic. Yes, they predicted a corona pandemic in the year 2019-2020.

The Johns Hopkins Center for Health Security in partnership with the World Economic Forum and the Bill and Melinda Gates Foundation hosted this event. They called it a high-level pandemic exercise. The exercise illustrated areas where public/private partnerships will be necessary during the response to a severe pandemic in order to diminish large-scale economic and societal consequences.

Here you can understand easily that this pandemic was actually pre-planned. In the name of preparedness, they actually planned it completely. Bill and Melinda Gates Foundation was the key element here.

DIVYAM (170):- So, can we suspect Bill Gates as a main culprit?

ME: We should suspect. We must investigate. Bill Gates used to say words like this. 'Next destruction will not be by a nuclear bomb; rather it will be a virus. When Bill said this, he was pointing toward an image of corona virus. Bill Gates is used to say from long before 2015 that a pandemic is coming, a pan-

demic is coming, and a pandemic is coming. World should prepare for it, World should prepare for it, World should prepare for it.

He said about next destruction pointing out its doesn't look like this (An image of atomic blast). In fact it looks like this (A picture of corona virus). So how can a person predict a pandemic? So how can a person predict a pandemic because of a particular virus or bacteria? Not even the wisest doctor can predict it. Not even the wisest scientist can predict it. Not a single politician can predict a pandemic. So how Bill Gates predicted it? So this is clear evidence that this pandemic is a fake pandemic.

They want to paralyse the world economy, they want to destroy world peace, they want to decrease the world population, and they want to enslave us. This is their agenda of new world order. They will enslave us by various tools, ID2020 is one of them.

DIVYAM (171):- What is ID2020?

ME: ID2020 is a non-governmental organization which advocates for digital ID for the billions people worldwide. This is a programme to give a digital ID to all. But again they have a hidden agenda here. It is said by few that Bill
Gates made plans for mandatory COVID-19 vaccination and the implantation of microchips into patient's bodies. It is said, he is using the COVID-19 pandemic to push a vaccine with a microchip capable of tracking you.

DIVYAM (172):- What are human microchip implantations?

ME: A human microchip implant is typically a chip which is implanted in human skin or sub-dermal region. This is an identifying integrated circuit device or RFID transponder encased in silicate glass and im-

planted in the body of a human being. This is also called as Radio Frequency ID.

These devices contain a unique ID number and that ID is linked to all your personal information, linked to an external database. Your all information's such as personal identification, police record, law enforcement, medical history, travel history, medications, allergies, banking details, purchase history, movie history, friend history, relatives history, contact information etc. are recorded here. They can be viewed by the bosses. All your transaction will be through that ID only. This is a new way of enslaving people. Even a movie drama predicted this corona pandemic in 2018.

DIVYAM (173):- which movie drama predicted Corona virus outbreak?

ME: According to Netizens, a TV show on Netflix, predicted the coronavirus pandemic back in 2018. 10th episode of Korean series 'My Secret Terrius', which was released in 2018, mentions the deadly corona virus illness, which in recent times is being called the COVID-19 outbreak. If you will see clips of this movie 'My Secret Terrius', you will hear many times coronavirus, coronavirus and coronavirus. I myself have seen few clips.
So this is a clear cut case of a pre-planned falsified pandemic with many purposes. Few people say that big families like Rothschild and Rockefeller families may be involved in this game. This required to be investigated.

DIVYAM (174):- Who is this Rothschild?

ME: The Rothschild family is a wealthy Jewish family originally from Frankfurt, Germany. They have a variety of businesses. Rothschild businesses include banking and finance, mining, energy, real estate, and winemaking.

It is said that they were originally Goldsmith (Sunar). People used to give them their gold for safety and security reasons. Rothschild used to give them a re-

ceipt. Later on these receipts circulated in the market and gold actually never went out from Rothschild family. Later on he calculated and found only 10 % persons actually demand their gold money back every year. So he started lending others 90% gold as his own money. And this was too in the form of a receipt. So in this way they multiplied others money as their own assets. But actual gold remain in their custody. Later Rothschild family started businesses in five different countries in similar way.

DIVYAM (175):- Is there any role of Rothschild family in current falsified pandemic?

ME: I don't know exactly. But few people are discussing that big family like Rothschild may also be there in this game. Few people claim that the family controls the world's gold, wealth and financial institutions or encouraged or discouraged wars between governments.

Even it is also common understanding in common men that it is Rothschild family who want economic collapse after every few years. This they want so that inflation can be increased and by this inflation, value of their gold money will be increased immediately. Few people also say that Rockefeller family may also have a hidden role.

DIVYAM (176):- Who is Rockefeller family?

ME: It is American industrial, political and banking family who is one of the wealthiest families of world. Rockefeller family has high influence in American politics. Rockefeller foundation issued a document in 2010 for future 'lock step.' This document is quite controversial.

DIVYAM (177):- What is Rockefeller document?

ME: In the 2010 Rockefeller foundation released a document and they suggested a 'lock-step' for future pandemic like issues. This 'Lock-Step' portion, predicted a global health problem. It predicted a scenario involving a pandemic. The document ultimately

came to the conclusion that the only way to solve a global pandemic was 'lockstep' by state as the world-wide model.

Now, we are in 2020; we find ourselves in this exact situation, just a coincidence? Not a co-incidence. Everything has happed according to their document. Lock-step is same as lock-down.

On April 21st the Rockefeller Foundation released another document titled 'National Covid-19 Testing Action Plan Pragmatic Steps' to reopen our workplaces and our communities. Now same is happening. Now they are re-opening our workplaces slowly according to instruction of Rockefeller foundation.

Few experts say that few big-big banking giants want bank to be collapsed after every few years. They actually gain a profit on collapse of a bank.

DIVYAM (178):- How banks collapse?

ME: The most common cause of bank failure occurs when the market value of the bank's assets falls to below the market value of the bank's liabilities. Liabilities are the bank's obligations to creditors and depositors.

Banking system is a complex system. They lend more than they have. Yes, they lend more than they have. Suppose bank 'A' has a deposition of Rupees 5,00,000. Now common idea is that bank will lend approximately 90% of it. But reality is different. Bank lend many times of this money. The bank 'A' may lend you even 10 times of their capital, that is Rupees 50,00,000.

This is possible because bank actually doesn't give you all amount in cash. They just give a number in your passbook or in your statement. The main portion of the amount remains to the bank. If you purchase something from that borrowed amount usually you give a cheque. So again cash remains in the

same bank or in other bank but definitively in the banking system.

So now what will happen if all the persons who have 'borrowed' from the bank wanted to withdraw their cash? So now what will happen if all the persons who have 'deposited' in the bank wanted to withdraw their cash? In any of the both circumstances, bank will collapse on the same day. This is true for all banks. But this failure is done deliberately by few people who wanted bank to collapse.

DIVYAM (179):- Who wants the banks to collapse?

ME: Banking system has made many laws in their favour by forcing our corrupt politicians. If the banks go bankrupt, you lose your money. By the rulings of Reserve Bank of India, the maximum amount insured for Savings Bank Account is 20,000/ and for a current account Rs.1,00,000. So if you have Rs 1,00,00,000 in your Current Account, you will only get back Rs.1,00,000.

If an individual opens more than one deposit in one or more branches of the same bank, then all these are accounts will be considered as a single account. Therefore, the balances in all these accounts are aggregated and maximum insurance cover is available up to Rs 1,00,000 only.

So if a bank collapses, the money of depositors will be lost. You will lose all or most of your money. So somebody must get yours money. So think who will be benefited by this bankruptcy. Obviously, the loss is yours but somebody must be benefited. Big banking giants actually get all the benefits and their money increases.

Collapsing banking system and devastation of country's economy will ultimately lead to inflation. By inflation they will further loot us.

DIVYAM (180):- How they loot us by inflation?

ME: Inflation is basically loot. Inflation is a robbery done by the government of the time. You need to understand this. Suppose you have 1,00,000 rupees in your home or in your bank. And inflation increases to 20%. It means while previously you were able to purchase 1000 units from 1,00,000 rupees, but now you are able to purchase only same 800 units. So value of your money has decreased now. Actually now you have only 80,000 rupees. But when you will check and count your money, it will show 1,00,000 Rupees. You have the same cash of rupees 1,00,000. Your bank will also show rupees 1,00,000 in passbook but actually this is only 80,000 rupees now. Government has robbed your 20,000 rupees from your saving by inflation.

DIVYAM (181):- So who is behind all this super game?

ME: Super elites seem to be behind this game. Super elites have involved many persons and many companies in their plan. Some people also says that Dr. Fauci may also be involved along with others in this game plan.

DIVYAM (182):- Who is Dr Fauci?

ME: Dr.Fauci is the director of US - NIAID - National Institute of Allergy and Infectious Disease. He wants strict lockdown protocol in US. US president Trump does not want to impose lockdown. As you know now, corona is a simple infectious disease like flu or common cold, so you can understand why this man wants strict protocol. Either a game! Or vested interest! God knows. But something is there.

It is also true that US have made huge profit. As you can understand American dollar has raised significantly in compared to Indian Rupees

DIVYAM (183):- 34. Why American Dollar improved?

ME: American dollar has jumped 10 Rupees in last few months. This is a sign of complete devastation of Indian economy. India has ruined, on the other hand US economy sustained well because of their president's continuous efforts against lockdown.

Now, here you must note one important point that this 10 Rs increment against one dollar takes a period of 10 years. So within few months American has made a huge amount of profit that is equal to at least 10 years. So America has made a big gain from India out of this fake pandemic.

DIVYAM (184):- Is recovery rate a hoax?

ME: They make us fools in the name of recovery rate? Recovery rate is same from outset. At First, recovery rate was calculated after initial 14 days. So it was less. Definitively as days advances you will see an increase trend of recovery rate. This way they made us fool by saying that recovery rate is improving after mask, social distancing and lockdown.

Now they have partially achieved their aim. Now they will take some more harsh action like compulsory vaccination, compulsory certification, etc.

DIVYAM (185):- Will different certification be made mandatory?

ME: Most likely, yes. Recently son of my friend has got an interview call from SSC. They wanted a corona negative certificate. Very soon they will demand a corona negative certification for banking, for travel in train, for travel in air, for school admission, for college admission, for all job interviews, for BPL benefits, for marriage, for hospital procedures etc.

They may demand a vaccination certificate. This is all to loot common people. Common people are looted in different ways. They are selling un-neces-

sary kits, machines, medicines, vaccines. We need large scale mass demonstration. This we need in all countries. We need a complete revolution.

DIVYAM (186):- How will this revolution come?

ME: This revolution must come to save the mankind. And this revolution will come. And this revolution has to come. And this revolution is coming soon. This revolution is need of time. We have to bring this revolution. You have to work hard to bring this revolution. Everybody has to contribute to make this revolution successful.

I do not expect it to be started from Africa as they have suffered the least. I do not expect it to be started from China as Chinese people do not have normal civil rights. I do not expect it to be started from Europe as Europe is too much divided. I expect it either from India or from US.

Most of the Indians have now understood that corona is a simple flu, and they were made fools. Soon you will see a big game changing revolution in India.

I do expect it more from US. These are people with more civil rights. US people are the people who can better understand the whole game plan. Please do not think common population of US is not suffering as US is a developed nation. Common person of US has also suffered a lot.

I have a special faith in American mothers, sisters and daughter; as they are suffering from two sides. They are facing the problem of un-necessary pricking of vaccination to their new-born & young children and second they are facing loss of job.

American women are very bold women. They are very brave. They love their liberty and freedom. Very

soon American women will come on the roads for a demonstration and nation wise strike in all cities. Men all over the world will support this. We together will make this world a better place to live with harmony, dignity and truth. We will make True World Order.

DIVYAM (187):- What is True World Order?

ME: True World Order is against the devil New World Order. New world order is a demonic thought that is based on the principle of deceive and falsity. True World Order will have a principle of truth as its core thought. True world order will live with a harmonious relation with all race, creed, caste and religion. Not only this, True World Order will establish a bond of love with affection with animals also. True World Order will make efforts to adjust the human population with the nature and plant kingdom as well.

DIVYAM (188):- What do you expect from those you supports your view?

ME: I think now they have probably understood whole game. If still not, then they must search for more articles. I request readers to spread the true knowledge regarding this media-demic. Raise a strong voice against it. The World should be opened up so that people can start their work. The money, business and jobs lost during this period should be compensated by government. Media has worked like a demon, so demonstration against media houses should be there all over the world. We need a worldwide revolution against atrocities done by media giants, pharmaceutical companies, doctors and government.

Now we will end this conversation here. I hope a revolt against corona atrocities. I hope an insurgency against corona cruelty. I hope a revolution against

mask, social distancing, caller tune, sanitizers, unlock and lock-down. I hope for a better world. I hope truth should prevail. I hope a true world order. I hope those who are guilty will be punished. I hope a big revolution.
