QUESTION 1
Natural
substances are biodegradable and break down over time.
Man made
Synthetic
Light
QUESTION 2
Which of the following is an example of matter?
water
sound
coldness
light

QUESTION 3
What is the difference between natural and synthetic materials?
Natural substances occur naturally, whereas synthetic substances are produced in laboratories.
Synthetic substances occur naturally, whereas natural substances are produced in laboratories.
Synthetic substances are biodegradable and natural compounds are not.
Synthetic substances are used to create natural materials.
QUESTION 4
Which of the following are NOT considered a form of matter?

QUESTION 11
Word Bank
space
vacuum
light
matter
energy
Living things are made of matter, which refers to any physical substance that takes up space and has mass.
QUESTION 12
What are objects like chairs, buildings and planets, and substances like wood, metal and water are all made up of?
light
air
matter
thoughts
