Read the following passage then answer the questions below:

The great ship, Titanic, sailed for New York from Southampton on April 10th, 1912. She was carrying 1316 passengers and a crew of 891. Even by modern standards, the 46,000 ton Titanic was a colossal ship. At that time, however, she was not only the largest ship, but was regarded as unsinkable, for she had sixteen watertight compartments. The tragic sinking of this great liner will always be remembered, for she went down on **her** first voyage with heavy loss of life.

Four days after setting out, while the Titanic was sailing across the icy waters of the North Atlantic, a huge iceberg was suddenly noticed by a lookout. After the alarm had been given, the great ship turned sharply to avoid a direct collision. The Titanic turned just in time, narrowly missing the immense wall of ice which rose over 100 feet out of the water beside her. Suddenly, there was a slight trembling sound from below, and the captain went down to see what had happened. Below, **he** realized to his horror that the Titanic was sinking rapidly, for five of her sixteen watertight compartments had already been flooded ! The order to abandon ship was given and hundreds of people plunged into the icy water. As there were not enough life-boats for everybody, 1500 lives were lost.
