Mercury the Planet was always in a hurry. He raced around the sun faster than any of the other planets and never seemed to slow down. But one day, Mercury was feeling tired and wanted to take a break. He asked the sun if he could slow down just for a day. The sun agreed, and for one day, Mercury was able to enjoy a slow, relaxing orbit.

Questions:

Why was Mercury always in a hurry?

_____

What did Mercury do when he was feeling tired?

_____

What did the sun say when Mercury asked to slow down?

Venus was a beautiful planet, always shining brightly in the sky. She was proud of her brightness and loved to show it off. But one day, Venus learned that what truly makes a planet special is not just how bright it is, but also what it's made of and the life it supports. From that day on, Venus was proud not just of her brightness, but also of all the unique qualities she had to offer.

Questions:

What did Venus used to be proud of?

_____

What did Venus learn about what makes a planet special?

_____

What was Venus proud of after she learned this lesson?

Earth was a special planet, because it was the only one that had life. Animals roamed the land, fish swam in the oceans, and birds flew in the sky. Earth loved having so many different forms of life, but she also wanted to make sure that everything stayed in balance. So, Earth made sure that the animals had enough food to eat and that the plants had enough sun and water to grow.

Questions:

What was special about Earth?

_____

What did Earth want to make sure of?

_____

What did Earth do to make sure everything stayed in balance?
